(d) Replacement property acquired pursuant to this section shall be subject to the same use, disposition, and other provisions of this subpart that would apply to the property replaced. Where applicability of a provision depends upon the acquisition cost of property, the acquisition cost of the original property shall be used to determine whether the provision applies unless the additional outlay for the replacement property, if any, is also supported by an HEW grant. In the latter case, the full acquisition cost of the replacement property (the amount for the replaced property plus

the additional outlay) shall be used to determine whether the provision applies.

§ 74.138 Nonexpendable personal property—disposition.

When nonexpendable personal property can no longer be used as provided in § 74.136, disposition of the property shall be made as follows:

(a) *Property with a unit acquisition cost of less than $1,000.* The property may be sold or used for other activities without compensation to the Federal Government. In the case of property acquired under a subgrant or cost-type contract, the non-Federal parties involved shall determine amongst themselves who shall have the right to sell or use the property.

(b) *Property with a unit acquisition cost of $1,000 or more.* The property may be retained for other uses, provided the granting agency or its successor is paid an amount calculated by multiplying the current fair market value of the property by the Federal share of the property. In the case of property acquired under a subgrant or cost-type contract, the non-Federal parties involved shall determine amongst themselves who shall have the first option to retain the property. If the property has further use value but is not needed by any of the parties involved, the grantee shall request disposition instructions from the granting agency. Normally, the granting agency will issue instructions to the grantee within 120 days after receipt of the request. The following procedures shall govern:

(1) If the grantee is so instructed or if disposition instructions are not issued within the 120 day period, the property shall be sold and the granting agency shall be paid an amount calculated by multiplying the sales proceeds by the Federal share of the property. However, $100 or 10 percent of the total sales proceeds, whichever is greater, may be deducted and retained from that amount for selling and handling expenses.

(2) If the grantee is instructed to have the property shipped elsewhere, the grantee shall be entitled to be paid any reasonable shipping or interim costs incurred, plus an amount computed by multiplying the current fair market value of the property by the non-Federal share of the property.

(3) If the grantee is instructed to dispose of the property otherwise, the grantee shall be entitled to be reimbursed by the granting agency for any costs incurred in such disposition.

(c) *Date of disposition.* (1) Disposition of property subject to Paragraph (a) of this section shall be considered to occur on the date the property can no longer be used in projects or activities currently or previously sponsored by the Federal Government.

(2) Disposition of property subject to paragraph (b) of this section shall be considered to occur on the earliest of the following: (i) The date the Federal Government is compensated for its share of the fair market value or (ii) the date the property is determined to have no further use value or (iii) the date the property leaves the physical possession of the grantee and the subgrantees or contractors, if any, who acquired or used the property. However, replacement of property pursuant to § 74.137 will not be considered a disposition of the property that was replaced.

§ 74.139 Nonexpendable personal property—procedural requirements.

Procedures for managing nonexpendable personal property subject to this subpart shall, as a minimum, meet the requirements listed in this section. These requirements shall be observed until the date of disposition of the property, determined in accordance with § 74.138(c), or until the property is replaced pursuant to § 74.137. In addition, the property records required by paragraph (a) of this section shall be subject to the retention and access requirements of Subpart D of this part. In the case of property in the hands of subgrantees or cost-type contractors, the grantee is responsible for ensuring that these requirements are met, regardless of whether the procedures themselves are performed by the contractor, subgrantee or grantee or by a combination of the parties involved.

(a) Property records shall be maintained accurately and shall include:

(1) A description of the property, including manufacturer's model number, if any.

(2) An identification number, such as the manufacturer's serial number.

(3) Identification of the grant under which the property was acquired.

(4) Whether title vests in the grantee, subgrantee, or contractor.

(5) Acquisition date and unit acquisition costs. If replacement property, a cross reference to the property records of the property replaced.

(6) The Federal share of the property as determined in accordance with §§ 74.142 through 74.148.

(7) Location, use and condition of the property and the date this information was reported.

(8) Ultimate disposition data, including date of disposition and selling price or the method used to determine current fair market value if the granting agency was compensated for the Federal share of that value. If the property was replaced pursuant to § 74.137, in lieu of the preceding disposition data, data on the trade-in or sale and a cross reference to the property records of the replacement property.

(b) A physical inventory of property shall be taken and the results reconciled with the property records at least once every two years to verify the existence, current utilization, and continued need for the property. Any differences between quantities determined by the physical inspection and those shown in the accounting records shall be investigated to determine the causes of the differences.

(c) A control system shall be in effect to insure adequate safeguards to prevent loss, damage, or theft of the property. Any loss, damage, or theft of nonexpendable personal property shall be investigated and fully documented.

(d) Adequate maintenance procedures shall be implemented to keep the property in good condition.

(e) Where sale of the property is authorized or required, proper selling procedures shall be established which will provide for competition to the extent practicable and result in the highest possible return.

§ 74.140 Exemptions for nonexpendable personal property acquired under grants subject to certain statutes.

Some Federal statutes (e.g., Pub. L. 83–934, 42 U.S.C. 1892) provide that, in grants for the conduct of certain specified activities at certain specified kinds of institutions or organizations, granting agencies shall have authority to vest title to equipment purchased with the grant funds in such an institution or organization without further obligation to the Federal Government or on such terms and conditions as deemed appropriate. Nonexpendable personal property purchased by such an institution or organization under a grant subject to such a statute shall be exempt from §§ 74.136, 74.137(c), 74.138, and 74.139. For the purposes of § 74.135(a), disposition of such property shall be considered to take place when the property is no longer needed for the project or activities for which it was acquired.

§ 74.141 Expendable personal property.

(a) Title to expendable personal property acquired by a grantee shall vest in the grantee upon acquisition. Title to such property acquired by the recipient of a subgrant or of a cost-type procurement contract awarded under a grant or subgrant shall vest in the grantee, the recipient, or an intermediate awarding party, as the non-Federal parties involved may determine.

(b) If there is a residual inventory of such property exceeding $1,000 in total aggregate fair market value upon termination or completion of the grant, subgrant, or cost-type contract for which it was acquired and the property is not needed for any other project or activity, currently or previously sponsored by the Federal Government the property shall either be retained for use in other activities or be sold. In either case, the granting agency shall be paid an amount computed by multiplying the current fair market value or the proceeds from sale by the Federal share of the property. If the property is sold, ten percent of the proceeds may be deducted and retained from the amount otherwise due the granting agency, for selling and handling expenses.

§ 74.142 Federal share of property—general.

(a) Several sections of this subpart require a determination of the Federal (or non-Federal) share of real or tangible personal property. Sections 74.143 through 74.148 set forth rules by which such a determination shall be made.

These rules are intended to produce equitable results that are independent of whether the accounting system of the grantee or any other party involved charges the acquisition cost of an item of property to HEW funds, to required cost-sharing or matching, or partly to each. To this end, the rules provide that the Federal share of property shall be the same as the granting agency's share of the acquiring party's total costs under the grant.

(b) In all calculations pursuant to these rules, the value of third-party in-kind contributions (as defined in Subpart G of this part) is excluded, since those contributions do not make the donor a party to the acquisition of the property and are not part of the Federal and non-Federal funds used for the actual outlays of the acquiring party.

(c) These calculations also exclude project costs which are neither borne by an HEW grant nor required to meet a cost-sharing or matching requirement of an HEW grant. The purpose of this exclusion is to make it unnecessary for the grantee or others to report or account for such costs merely in order to calculate the Federal and non-Federal shares in property. It is, of course, recognized that a portion of the acquisition cost of property acquired for a project may constitute voluntary cost-sharing or overmatching, or may otherwise neither be borne by a grant nor counted towards a cost-sharing or matching requirement of a grant. Accordingly, provision is made for appropriate reductions to the Federal share of the property in such cases. (See § 74.146).

§ 74.143 Federal share of property acquired by a grantee.

Except as explained in § 74.146 through 74.148, the Federal share of real or tangible personal property acquired by a grantee shall be the same as the granting agency's share of the grantee's costs under the grant and shall be calculated as follows:

(a) Determine the total costs incurred by the grantee which were either borne by the grant or counted toward meeting a cost-sharing or matching requirement of the grant. Include costs incurred by subgrantees only to the extent they were paid for by the grantee.

(b) Divide the figure determined in accordance with paragraph (a) of this section into the amount of those costs borne by the HEW grant.

§ 74.144 Federal share in property acquired by a subgrantee.

Except as explained in § 74.146 through 74.148, the Federal share of real or tangible personal property acquired by a subgrantee shall be the same as the granting agency's share of the subgrantee's costs under the grant and shall be calculated as follows:

(a) Determine the granting agency's share of the grantee's costs in accordance with § 74.143.

(b) Determine the grantee's share of the subgrantee's costs. Exclude all subgrantee costs that are not ultimately borne by or counted towards a cost-sharing or matching requirement of the HEW grant.

(c) Multiply the ratios obtained in paragraphs (a) and (b) of this section. For example, if the granting agency bears 50 percent of the grantee's costs under the grant (paragraph (a)) and the grantee bears 50 percent of the subgrantee's costs under the HEW grant (paragraph (b)), the Federal share of the subgrantee's costs and of property acquired by that subgrantee shall be 25 percent.

(d) If the property was acquired under a lower tier subgrant (i.e., a subgrant under a subgrant), continue the preceding procedure as far as necessary by multiplying the share last obtained times the subgrantee's share of the costs of the lower tier subgrantee.

§ 74.145 Federal share of property acquired by a cost-type procurement contractor under a grant or subgrant.

The Federal share of real or tangible personal property acquired by the recipient of a cost-type procurement contract awarded by the grantee or a subgrantee shall be determined as if the contractor were a subgrantee.

§ 74.146 Federal share of property acquired only in part under a grant.

If only a portion of the acquisition cost of an item of real or tangible personal property is borne by a grant or counted toward meeting a cost-sharing or matching requirement of a grant, the Federal share in that item of property shall be calculated as follows:

(a) Divide the total acquisition cost of the property into the amount of that cost borne by the grant or counted toward meeting a cost-sharing or matching requirement of the grant. For example, if the property cost $10,000 and $5,000 of that cost was neither borne by the grant nor required to meet a cost sharing or matching requirement then count only one-half.

(b) Multiply the ratio obtained in paragraph (a) of this section by the Federal share of the costs of the grantee, subgrantee, or cost-type contractor determined in accordance with §§ 74.143–74.145.

§ 74.147 Federal share of replacement property.

The Federal share of replacement property shall be calculated as follows:

(a) Determine the Federal share in the property replaced.

(b) Divide the full acquisition cost of the replacement property into the amount received for trade-in of the property replaced or the proceeds from sale of that property (less any reasonable and necessary selling expenses).

(c) Multiply the ratios obtained in paragraphs (a) and (b) of this section.

(d) If the additional outlay for the replacement property is also supported by an HEW grant, determine the Federal share in the property resulting from that support (calculated as explained in § 74.146) and add that share ratio to the share ratio calculated in paragraph (c) of this section.

§ 74.148 Federal share of property under annual grants.

Where grant support is continued or renewed on an annual or essentially annual basis, the Federal share of real property or tangible personal property shall be based on grantee costs pertaining to (a) the grant funding period or periods in which the grantee incurs the obligation or obligations resulting in the acquisition of the property or (b) in the case of property acquired under a subgrant, the grant funding period in which the grantee awards the subgrant which, directly or through another subgrant, gives rise to the acquisition of the property.

§ 74.149 Division of non-Federal share of market value or proceeds.

In the case of real property or tangible personal property acquired under a subgrant or cost-type contract under a grant, the division of the non-Federal share of the market value or proceeds from sale of the property among the grantee, the recipient of the subgrant or contract, and any intermediate recipients, upon disposition of the property pursuant to this subpart, shall be a matter for the non-Federal parties involved to determine.

§ 74.150 Inventions and patents.

HEW's regulations on inventions and patents arising out of activities assisted by a grant are set forth in Parts 6 and 8 of this title.

§ 74.151 Copyrights.

(a) When copyrightable material is developed in the course of or under a grant or subgrant to a government, the government which developed the work is free to copyright it or to permit others to do so.

(b) Unless otherwise provided by the terms and conditions of the HEW grant, when copyrightable material is developed in the course of or under a grant or subgrant to a nongovernmental organization, the grantee or subgrantee which developed the work is free to copyright it or to permit others to do so.

(c) If the work is developed under a subgrant, the subgrantee's rights pursuant to paragraphs (a) and (b) of this section shall be subject to any prohibitions or restrictions of the grantee which may have been part of the terms of the subgrant.

(d) If any material developed in the course of or under a grant or subgrant is copyrighted, HEW shall have a royalty-free, nonexclusive and irrevocable license to reproduce, publish, or otherwise use, and to authorize others to use, the work for Government purposes.

§ 74.152 Right of grantees to impose additional requirements.

With respect to any property subject to this subpart which is acquired or developed under a subgrant or a contract under a grant or subgrant, the grantee is not prohibited by this subpart from imposing additional requirements not inconsistent with the requirements in this subpart or in other terms and conditions

of the grant. For example, the grantee may prohibit subgrantees from using real property acquired under a subgrant for any project or activity other than the one originally authorized unless the grantee, as well as the granting agency, gives its approval (see § 74.133(b)).

Subpart P—Procurement Standards

§ 74.160 Scope of subpart; terminology.

(a) This subpart provides standards for use by grantees and subgrantees in establishing procedures for the procurement of supplies, equipment, construction, and other services whose cost is either borne as a direct cost by a grant or counted as a direct cost towards satisfying a cost-sharing or matching requirement of a grant. Except where stated otherwise (see § 74.166), this subpart does not apply to the awarding of subgrants.

(b) The standards in this subpart are intended to insure that materials and services procured under HEW grants and subgrants are obtained in an effective manner and in compliance with the provisions of applicable Federal law and Executive Orders.

(c) The term "procuring party," as used in this subpart, means the grantee or the subgrantee, whichever is making a procurement that is subject to this subpart.

§ 74.161 General.

(a) Procuring parties may use their own procurement policies, provided that procurements and procedures subject to this subpart are made in accordance with the standards set forth in this subpart.

(b) The standards contained in this subpart do not relieve the procuring party of the contractual responsibilities arising under its contracts. The procuring party is the responsible authority, without recourse to HEW, regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements that are subject to this subpart. This includes but is not limited to: Disputes, claims, protests of award, source evaluation, or other matters of a contractual nature. Matters concerning violation of law are to be referred to such local, State, or Federal authority as may have proper jurisdiction.

§ 74.162 Code of conduct.

(a) The procuring party shall maintain a code or standards of conduct that shall govern the performance of its officers, employees or agents engaged in the awarding and administration of contracts that are subject to this subpart. The code or standards shall provide for disciplinary actions to be applied for violations of the code or standards by the procuring party's officers, employees, or agents. For governmental procuring parties, such disciplinary actions are required only to the extent otherwise permissible under the government's laws, rules, or regulations, but, to the extent so permissible, shall also include disciplinary actions to be applied for violations by contractors or their agents.

The procuring party's officers, employees or agents shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or potential contractors.

(c) No employee, officer, or agent of a nongovernmental procuring party shall participate in the selection, award, or administration of a contract subject to this subpart where, to his or her knowledge, any of the following has a financial interest in that contract:

(i) The employee, officer, or agent;

(ii) Any member of his or her immediate family;

(iii) His or her partner;

(iv) An organization in which any of the above is an officer, director, or employee;

(v) A person or organization with whom any of the above individuals is negotiating or has any arrangement concerning prospective employment.

§ 74.163 Free competition.

(a) All procurement transactions shall be conducted in a manner to provide, to the maximum extent practical, open and free competition.

(b) The procuring party should be alert to organizational conflicts of interest or noncompetitive practices among contractors that may restrict or eliminate competition or otherwise restrain trade. In particular, a contractor that develops or drafts specifications, requirements, a statement of work, an invitation for bids or a request for proposals for a particular procurement by a nongovernmental procuring party should be excluded from competing for that procurement.

(c) Solicitations shall clearly set forth all requirements that the bidder/offerer must fulfill in order for his bid/offer to be evaluated. Awards shall be made to the responsible bidder/offeror whose bid/offer is responsive to the solicitation and is most advantageous to the procuring party, price and other factors considered. Factors such as discounts, transportation costs, and taxes may be considered in determining the lowest bid. Any and all bids/offers may be rejected when it is in the procuring party's interest to do so, and, in the case of governmental procuring parties, such rejections are in accordance with the government's applicable law, rules, or regulations.

§ 74.164 Procedural requirements.

The procuring party shall establish procurement procedures which provide for as a minimum, the following:

(a) Proposed procurement actions shall follow a procedure to assure that unnecessary or duplicative items are not purchased. Where appropriate, an analysis shall be made of lease and purchase alternatives to determine which would be the most economical, practical procurement.

(b) Solicitations for goods and services shall be based upon a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description shall not, in competitive procurements, contain features which unduly restrict competition. "Brand name or equal" description may be used as a means to define the performance or other salient requirements of a procurement, and when so used, the specific features of the named brand which must be met by bidders/offerors should be clearly specified.

(c) Where applicable, section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e (b)) shall be observed.

(d) Positive efforts shall be made by procuring parties to utilize small business and minority-owned business sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for contracts subject to this subpart.

(e) The type of procuring instruments used, e.g., fixed-price contracts, cost reimbursable contracts, purchase orders, incentive contracts, shall be determined by the procuring party but must be appropriate for the particular procurement and for promoting the best interest of the grant project or program involved. The "cost-plus-a-percentage-of-cost" method of contracting shall not be used.

(f) Contracts shall be made only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources or accessibility to other necessary resources.

(g) The following shall be subject to prior approval at the discretion of the granting agency if the aggregate expenditure is expected to exceed $5,000: (1) Any proposed sole source contract; (2) any proposed contract to be awarded by a nongovernmental procuring party where only one bid or proposal has been received.

(h) Nongovernmental procuring parties should make some form of price or cost analysis in connection with every negotiated procurement action. Price analysis may be accomplished in various ways, including the comparison of price quotations submitted, market prices and similar indicia, together with discounts. Cost analysis is the review and evaluation of each element of cost proposed by the offeror to determine reasonableness, allocability and allowability.

(i) Procurement and files for purchases in excess of $10,000 shall include the following:

(1) Basis for contractor selection;

(2) Justification for lack of competition when competitive bids or offers are not obtained;

(3) Basis for award cost or price.

(j) A system for contract administration shall be maintained to ensure contractor conformance with terms, conditions and specifications of the contract, and to ensure adequate and timely followup of all purchases.

§ 74.165 Requirement for governments to use formal advertising.

(a) Except as provided in paragraph (b) of this section, in making procurements that are subject to this section, governmental procuring parties shall use the formal advertising method of procurement, involving adequate purchase descriptions, sealed bids, and public openings of bids.

(b) Procurements may be negotiated if it is not practicable or feasible to use formal advertising. Generally, such procurements may be negotiated if one or more of the following conditions prevail:

(1) The public exigency will not permit the delay incident to advertising.

(2) The material or service to be procured is available from only one person or firm.

(3) The aggregate amount involved does not exceed $10,000.

(4) The contract is for personal or professional services, or for any service to be rendered by a university, college, or other educational institution.

(5) The material or services are to be procured and used outside the limits of the United States and its possessions.

(6) No acceptable bids have been received after formal advertising.

(7) The purchases are for highly perishable materials or medical supplies, for material or services where the prices are established by law, for technical items or equipment requiring standardization and interchangeability of parts with existing equipment, for experimental, developmental or research work, for supplies purchased for authorized resale, or for technical or specialized supplies requiring substantial initial investment for manufacture.

(8) Formal advertising is otherwise not practicable or feasible, and negotiation is authorized by applicable State, local, or tribal law, rules, or regulations.

(c) Notwithstanding the existence of circumstances justifying negotiation, competition shall be obtained to the maximum extent practicable.

(d) For every negotiated procurement in excess of $10,000 by a governmental procuring party, written justification for the use of negotiation in lieu of formal advertising shall be included in the government's procurement records and files, in addition to the information required by § 74.164(l). The justification may be on a class basis, i.e., covering a group of related or similar contracts, or it may be on an individual contract basis.

§ 74.166 Contract and subgrant provisions.

(a) *Scope.* (1) This section sets forth requirements relating to provisions that must be included in contracts for procurements that are subject to this part. The requirements shall also apply to subcontracts of any tier under such contracts, and the term "contracts" in this section shall be construed as including subcontracts.

(2) Certain requirements in this section also apply to subgrants and so state.

(b) *General.* All contracts and subgrants shall contain sufficient provisions to define a sound and complete agreement.

(c) *Administrative remedies for violations.* Contracts in excess of $10,000 shall contain contractual provisions or conditions that will allow for administrative, contractual or legal remedies in instances in which contractors violate or breach contract terms, and provide for such remedial actions as appropriate.

(d) *Termination provisions.* Contracts in excess of $10,000 shall contain suitable provisions for termination by the awarding party, including the maner by which termination will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(e) *E.O. 11246.* Where applicable, construction contracts in excess of $10,000 shall contain a provision requiring compliance with Executive Order 11246, entitled "Equal Employment Opportunity," as amended by Executive Order 11375, and as supplemented in Department of Labor regulations (41 CFR Part 60).

(f) *Copeland Act.* Contracts or subgrants in excess of $2,000 for construction of repair shall include a provision for compliance with the Copeland "Anti-Kick Back" Act (18 U.S.C. 874) as supplemented in Department of Labor regulation (29 CFR Part 3). All suspected or reported violations shall be reported to the granting agency by the grantee or through the grantee and any intermediate awarding parties.

(g) *Davis-Bacon Act.* When required by the Federal legislation governing the grant program, all construction contracts in excess of $2,000 shall include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 276 a to a7) as supplemented by Department of Labor regulations (29 CFR Part 5). All suspected or reported violations shall be reported to the granting agency by the grantee or through the grantee and any intermediate awarding parties.

(h) *Contract Work Hours and Safety Standards Act.* All contracts subject to the Contract Work Hours and Safety Standards Act (40 U.S.C. 327 et seq.) shall include a provision requiring the contractor to comply with the applicable sections of the Act and the Department of Labor's implementing regulations (29 CFR Parts 5 and 1926).

(i) *Inventions and patents.* Contracts or subgrants which may give rise to inventions subject to Parts 6 and 8 of this title shall include a provision requiring compliance with those parts.

(j) *Clean Air and Water Acts.* Contracts and subgrants in excess of $100,000 shall contain provisions requiring compliance with all applicable standards, order, or regulations issued pursuant to the Clean Act of 1970 (42 U.S.C. 1857 et seq.) and the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) as amended. Violations shall be reported in writing by the party awarding the contract or subcontract to the appropriate regional office of the Environmental Protection Agency, and a copy of the report shall be submitted to the granting agency through the intermediate awarding parties, if any.

Subpart Q—Cost Principles

§ 74.170 Scope of subpart.

This subpart establishes the principles to be used (except to the extent inconsistent with an applicable Federal statute or regulation) in determining costs applicable to HEW grants, and to subgrants or cost-type contracts under HEW grants.

§ 74.171 Grants to governmental organizations.

The principles to be used in determining the allowable costs of activities conducted or administered by governmental organizations under grants (and subgrants or cost-type contracts awarded to them under grants) are set forth in Appendix C to this part.

§ 74.172 Grants to institutions of higher education.

(a) *Research and development.* The principles for determining the allowable costs of research and development work performed by institutions of higher education (other than profit-making institutions) under grants (and subgrants or cost-type contracts awarded to them under grants) are set forth in Part I of Appendix D to this part.

(b) *Training and other educational services.* The principles for determining the allowable costs of training and other educational services provided by institutions of higher education (other than profit-making institutions) under grants (and subgrants or cost-type contracts awarded to them under grants) are set forth in Part II of Appendix D to this part.

(c) *Other activities.* Appendix D to this part shall be used as a guide for determining the allowable costs of other activities conducted by institutions of higher education (other than profit-making institutions) under grants (and subgrants or cost-type contracts awarded to them under grants).

§ 74.173 Grants to hospitals.

(a) *Research and development.* The principles for determining the allowable costs of research and development work performed by hospitals under grants (and subgrants or cost-type contracts awarded to them under grants) are set forth in Appendix E to this part.

(b) *Other activities.* Appendix E to this part shall be used as a guide for determining the allowable costs of other activities conducted by hospitals under grants (and subgrants or cost-type contracts awarded to them under grants).

§ 74.174 Grants to other nonprofit organizations.

(a) *Nonconstruction.* The principles for determining the allowable costs of activities conducted by nonprofit organizations other than institutions of higher education, hospitals, and governmental organizations under nonconstruction grants (and nonconstruction subgrants or cost-type contracts awarded to them under grants) are set forth in Appendix F to this part.

(b) *Construction.* Appendix F to this part shall be used as a guide for determining the allowable costs of work under construction grants to nonprofit organizations (other than institutions of higher education, hospitals and governmental organizations) and any construction subgrants or cost-type contracts awarded to such nonprofit organizations under grants.

§ 74.175 Subgrants and cost-type contracts.

(a) It should be noted that the cost principles applicable to a subgrantee or cost-type contractor under an HEW grant will not necessarily be the same as those applicable to the grantee. For example, where a State government awards a subgrant or cost-type contract to an institution of higher education, Appendix D to this part would apply to the costs incurred by the institution of higher education, even though Appendix C would apply to the costs incurred by the State.

(b) The principles to be used in determining the allowable costs of work performed by commercial organizations other than hospitals under cost-type contracts awarded to them under HEW grants are set forth in 41 CFR Subpart 1–15.2.

§ 74.176 Costs allowable with approval.

Each set of cost principles identifies certain costs that are allowable to the extent that they are approved by the granting agency. The following procedures govern approval of these costs.

(a) When costs are treated as indirect costs (or are allocated pursuant to a government-wide cost allocation plan), acceptance of the costs as part of the indirect cost rate or cost allocation plan shall constitute approval.

(b) When the costs are treated as direct costs, they must be approved in advance by the granting agency. If the costs are specified in the grant budget, approval of the budget shall constitute approval of the costs. If they are not specified in the budget, the grantee shall obtain specific prior approval in writing from the granting agency.

(c) A granting agency may conditionally waive the requirement for its approval of the costs. The condition will be that the grantee establish adequate safeguards to ensure that a meaningful review of the propriety of the costs is conducted by an appropriate grantee official prior to the incurrence of the costs. Such a waiver shall apply only to the requirement for granting agency approval. If, upon audit or otherwise, it is determined that the costs do not meet other requirements or tests for allowability specified by the applicable cost principles, such as reasonableness and necessity, the costs may be disallowed.

Subpart R—[Reserved]

Subpart S—Construction Grants—[Reserved]

[FR Doc. 77-2155 Filed 1-21-77;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 21048; RM-2370]

FM BROADCAST STATION IN ADEL, GEORGIA

Proposed Change in Table of Assignments

Adopted: January 13, 1977.

Released: January 18, 1977.

1. *Petitioner, Proposal and Comments.* (a) Notice of Proposed Rule Making is given concerning the amendment of the FM Table of Assignments (§ 73.202(b) of the Commission's Rules and Regulations) as concerns Adel, Georgia.

(b) A "Petition for Rule Making" and amendment were filed by Timberland Communications, Inc. ("petitioner"), through counsel, proposing the assignment of either Channel 221A or Channel 237A to Adel, Georgia. Timberland had initially requested Channel 249A. As a result of Commission action in Docket No. 19551 assigning Channel 249A to Ocilla, Georgia, Timberland amended its proposal. The Broadcast Good Music! Committee, one of the parties in Docket 19551, supra, appealed the Commission's decision to Federal Court.[1] Good Music! then filed a Request for Stay with the Commission regarding matters in this Notice, stating that is felt the Channel 237A proposal for Adel could prove to be mutually exclusive with its appeal and could create a multiplicity of litigation. Resolution of the petition to stay became unnecessary when Good Music! reversed its position and agreed not to object to issuance of this Notice.[2] As will be indicated in the comments below, these associated controversies need not be considered in this Notice, since Channel 221A can be assigned to Adel thereby avoiding the peripheral issues which would arise if Channel 237A were considered at this time as a possible alternative.[3]

3. *Community Data.* (a) *Location.* Adel is located in the south-central region of Georgia approximately 209 kilometers (130 miles) south of Macon, 344 kilometers (214 miles) south of Atlanta and 233 kilometers (145 miles) northwest of Jacksonville, Florida.

(b) *Population.* Adel, 4,972; Cook County, 12,129 (1970 U.S. Census figures).

(c) *Local Broadcast Service.* Daytime-only AM Station WBIT (Class III, D) licensed to petitioner is the only AM aural service licensed to the community. Adel is also within the 1 mV/m contour of Moultrie FM Station WMTM and Valdosta FM Stations WGOV and WAFT.

(d) *Economic Data.* The city of Adel, seat of Cook County, was incorporated in 1919 and currently has 18 manufacturing industries within its area employing over 1,600 persons. The city has two industrial areas which it hopes will attract new industry, and a five-million dollar expansion by the Weyerhauser Company is pointed to by petitioner as evidence of the city's growth potential. Petitioner indicates that between 1960 and 1970, Adel's population increased 15.1 percent and Cook County's population increased 2.6 percent. Petitioner's data would appear to indicate a growing community with only limited aural service which needs a first local full-time FM service to serve the needs of its citizens and to further stimulate its planned economic growth. For these reasons, a rule making proceeding would be appropriate to more thoroughly consider these needs.

4. *Preclusion Studies.* Preclusion is not ordinarily considered in the context of a first Class A assignment to a community without an FM channel assignment. However, because a Channel 221A assignment could potentially affect otherwise possible educational FM service, petitioner should furnish data showing the preclusionary effect, if any, of assigning Channel 221A to Adel upon the future assignment of educational stations on Channels 218, 219 and 220.

5. *Comments.* Since there possibly remains a question of where Channel 237A should ultimately be assigned,[4] we believe that the assignment of Channel 221A should be proposed for Adel. Although either channel may be assigned to Adel now without affecting any existing FM assignment, we believe it best to avoid the possible delay which could be caused by considering all the issues of a Channel 237A assignment, and this Notice is directed only to those issues involving a Channel 221A assignment.

PROPOSED AMENDMENT TO THE FM TABLE OF ASSIGNMENTS

6. Accordingly, the Commission proposes to amend the FM Table of Assignments (§ 73.202(b) of the Commission's Rules and Regulations) with regard to the community listed below as follows:

City	Channel No.	
	Present	Proposed
Adel, Ga.		221A

7. *Authority.* The Commission's authority to institute rule making proceedings; showings required, cut-off procedures and filing requirements are contained in the attachment and are incorporated by reference herein.

8. *Comments and Replies.* Interested persons and parties may file comments

[1] The U.S. Court of Appeals, D.C. Circuit, Case No. 75–1926, affirmed the Commission's action on October 29, 1976.

[2] Letter dated June 3, 1976, to the Commission from attorneys for Good Music!

[3] Additionally, an alleged "counterproposal" was filed by a Mr. John W. Davidson proposing Channel 237A to McRae, Georgia. Since the distance between McRae and Adel is 121 kilometers (75 miles) and is beyond the 105 kilometers (65 miles) Class A cochannel separation required, both communities could have Channel 237A assigned (absent other conflicts), and Mr. Davidson's filing will be treated as a separate request for rule making for McRae.

[4] Hawkinsville, Ocilla and McRae, Georgia, all had expressed an interest in Channel 237A.

on or before February 28, 1977, and reply comments on or before March 21, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the notice of proposed rule making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[47 CFR Part 89]

PUBLIC LAND MOBILE RADIO SYSTEMS

Interconnection Policies; Order Extending Time for Filing Reply Comments

Adopted: January 13, 1977.

Released: January 17, 1977.

In the matter of amendment of part 89 (Class A only) of the Commission's rules to prescribe policies and regulations to govern "interconnection" of private land mobile radio systems with the public, switched, telephone network,[1] Docket No. 20846.

1. In response to a petition filed by Airsignal International, Inc., and for the reasons set forth therein: *It is ordered,* Pursuant to authority contained in section 4(i) of the Communications Act of 1934, as amended, and in § 0.331 of the Commission's rules, That the time for filing Reply Comments in the above-entitled proceeding is extended to February 1, 1977.

ARLAN K. VAN DOORN,
Acting Chief, Safety and Special Radio Services Bureau.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

FOSTER GRANDPARENT AND SENIOR COMPANION PROGRAMS

Income Eligibility Level

This notice revises the schedule of income eligibility levels for individuals and families for the Foster Grandparent Program and the Senior Companion Program published in the FEDERAL REGISTER of July 30, 1976 (41 FR 31962). The revised schedule is based on poverty figures effective May 5, 1976, obtained from the Community Services Administration Income Poverty Guidelines dated March 31, 1976, and Department of Labor Consumer Price Index for October 1976, dated November 19, 1976. The amounts include state supplements to the Federal Supplemental Security Income (SSI) Program, effective August 9, 1976.

These ACTION programs are authorized pursuant to section 211 of the Domestic Volunteer Service Act of 1973, Pub. L. 93-113, 87 Stat. 402. Pursuant to section 421(4) of Pub. L. 93-113, 87 Stat. 414, the income eligibility levels are determined by the currently applicable guideline published by the Community Services Administration, pursuant to section 625 of the Economic Opportunity Act of 1974, as amended (42 USC 2971(a)), and increased by the amounts individual states supplement the Federal Supplement Security Income (SSI) Program, permitting ACTION, in accordance with section 421(4) of Pub. L. 93-113, to take into consideration existing poverty guidelines as appropriate to local situations. Section 625 permits the OEO poverty guideline to be adjusted for cost-of-living changes.

The income eligibility levels will be reviewed at least once a year, and similar schedules will be prepared to reflect any changes required as a result of that review.

Pursuant to section 420 of Pub. L. 93-113, this policy will become effective on January 24, 1977.

ACTION schedule of income eligibility levels for foster grandparents or senior companions

State	Individuals	Family of 2	Family of 3
Alabama	$2,885	$3,815	$4,785

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[Notice of Designation Number A366]

NORTH DAKOTA

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following North Dakota Counties as a result of drought during the 1976 crop year.

Dickey	McIntosh
Emmons	Ransom
La Moure	Richland
Logan	Sargent

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94-68, and the provisions of 7 CFR 1832.3(b).

Applications for emergency loans must be received by this Department no later than March 7, 1977, for physical losses and October 5, 1977, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 18th day of January 1977.

FRANK B. ELLIOTT,
Administrator,
Farmers Home Administration.

[FR Doc.77-2070 Filed 1-21-77;8:45 am]

[Notice of Designation Number A367]

SOUTH DAKOTA

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following South Dakota Counties as a result of drought during the 1976 crop year.

Aurora	Hyde
Beadle	Jerauld
Brookings	Kingsbury
Brown	Lake
Brule	Lyman
Buffalo	McCook
Campbell	McPherson
Clark	Marshall
Codington	Mellette
Corson	Miner
Davison	Potter
Day	Roberts
Dewey	Sanborn
Deuel	Shannon
Douglas	Spink
Edmunds	Stanley
Faulk	Sully
Grant	Todd
Gregory	Tripp
Hamlin	Walworth
Hand	Washbaugh
Hanson	Ziebach
Hughes	

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Develop-

ment Act, as amended by Pub. L. 94–68, and the provisions of 7 CFR 1832.3(b).

Applications for emergency loans must be received by this Department no later than March 7, 1977, for physical losses and October 5, 1977, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, DC, this 18th day of January 1977.

FRANK B. ELLIOTT,
Administrator
Farmers Home Administration.

Forest Service

SOUTH FORK SALMON RIVER PLANNING UNIT

Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the South Fork Salmon River Planning Unit, Boise National Forest and Payette National Forest, Idaho. The Forest Service report number is USDA–FS–DES (Adm) R4–77–2.

The environmental statement identifies and evaluates the probable effects of the land use plan for the South Fork Salmon River Planning Unit on the Boise and Payette National Forests in south-central Idaho. The purpose of the plan is to allocate National Forest lands within the unit to specific resource uses and activities; establish management objectives; document management direction, decisions, and necessary coordination between resource uses and activities; and provide for the protection, use, and development of the various resources within the planning unit. All resource activities will be monitored so that tolerable levels of sedimentation will not be exceeded in the South Fork Salmon River.

This draft environmental statement was transmitted to CEQ on January 13, 1977.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. and Independence Ave., S.W., Washington, D.C. 20250.
Regional Planning Office, USDA, Forest Service, Federal Building, Room 4120, Ogden, Utah 84401.
Forest Supervisor, Boise National Forest, 1075 Park Boulevard, Boise, Idaho 83706.
Forest Supervisor, Payette National Forest, Forest Service Building, P.O. Box 1026, McCall, Idaho 83638.
District Forest Ranger, Krassel Ranger District, McCall, Idaho 83638.
District Forest Ranger, Cascade Ranger District, Cascade, Idaho 83611.

A limited number of single copies are available upon request to Forest Supervisor Edward C. Maw, Boise National Forest, 1075 Park Boulevard, Boise, Idaho 83706 and Forest Supervisor William B. Sendt, Payette National Forest, Forest Service Building, P.O. Box 1026, McCall, Idaho 83638.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor Edward C. Maw, Boise National Forest, 1075 Park Boulevard, Boise, Idaho 83706 and/or Forest Supervisor William B. Sendt, Payette National Forest, Forest Service Building, P.O. Box 1026, McCall, Idaho 83638. Comments must be received by March 15, 1977, in order to be considered in the preparation of the final environmental statement.

VERN HAMPRE,
Regional Forester.

JANUARY 13, 1977.

Office of the Secretary

U.S. MEAT ANIMAL RESEARCH CENTER ADVISORY COMMITTEE

Renewal

Pursuant to the provisions of Pub. L. 92–463, the Federal Advisory Committee Act, and OMB Circular A–63, notice is hereby given of the renewal of the U.S. Meat Animal Research Center Advisory Committee (Agricultural Research Service, U.S. Department of Agriculture). The Committee provides advice and counsel concerning matters vital to the interests of the Department of Agriculture and the beef cattle, sheep and swine industries. The Committee reviews the character of research in progress and brings to the attention of the Department researchable problems confronting the beef cattle, sheep and swine industries, which is clearly in the public interest. The Committee provides counsel on the identification of high priority problems for which the resources of the U.S. Meat Animal Research Center are uniquely adapted for gaining solutions.

Membership on the Committee includes representatives of all segments of the beef cattle, sheep and swine industries, including service industries as well as representatives from State agricultural experiment stations.

The effectiveness of the Department's research program at the U.S. Meat Animal Research Center will be enhanced by having this advice and counsel which is not available in any other way.

Further information concerning this Committee may be obtained by contacting the Director, U.S. Meat Animal Research Center, P.O. Box 166, Clay Center, Nebraska 68933.

Done at Washington, D.C., this 18th day of January, 1977.

JOHN A. KNEBEL,
Secretary.

CONCLUSIONS
APPENDIX I
APPENDIX II

DockeB. pt3–MHM HFR MH FR WD YL—

INTRODUCTION

1. This proceeding is concerned with the lawfulness of American Telephone and Telegraph Company's (AT&T) Tariff F.C.C. No. 267 which enunciates the rates, practices and regulations for Dataphone Digital Service (DDS). This private line service offering of interstate digital data communications within and between specified metropolitan areas in the continental United States utilizes a technique called data under voice (DUV). This method of transmitting digital signals employs a portion of the radio relay frequency spectrum which allegedly has been otherwise normally unused. DDS provides two-way transmission of digital signals at synchronous speeds at 2.4, 4.8, 9.6 or 56 kilobits per second (Kbps).[1] AT&T is presently authorized to provide DDS over a 24 city network. An application for authority to extend the service to an additional 40 cities (W–P–C–433) has been filed.[2] AT&T plans to eventually operate a nationwide end-to-end DDS network serving 96 cities.

2. The subject tariff became effective, after several postponements, on December 15, 1974. We initiated this investigation into the lawfulness of Tariff 267 by Memorandum Opinion and Order, 50 FCC 2d 501 (1974) (hereinafter "Designation Order"). The following issues were designated for hearing:

(1) Whether the charges, classifications, practices, and regulations published in the aforesaid tariffs are or will be unjust and unreasonable within the meaning of section 201(b) of the Act.

(2) Whether such charges, classifications, practices, and regulations will, or could be applied to, subject any person or class of persons to unjust or unreasonable discrimination or give any undue or unreasonable preference or prejudice to any person, class of persons, or locality, within the meaning of section 202(a) of the Act.

(3) Whether the tariff schedules conform to the requirements of section 203 of the Act and Part 61. (47 CFR Part 61) of our rules implementing that section.

(4) If any such charges, classifications, practices, or regulations are found to be unlawful, whether the Commission, pursuant to Section 205 of the Act, should prescribe charges, classifications, practices and regulations for the service governed by the tariffs, and if so, what should be prescribed.

(5) Whether Dataphone Digital Service, as reflected in the tariff filing described herein, involves rates or practices which may be anticompetitive or otherwise unlawful.

(6) Whether Dataphone Digital Service, as reflected in the tariff filing described herein, represents a just and reasonable discrete classification of service within the meaning of Section 201(b) of the Act.

(7) Whether the rate making principles, including allocations of costs, used by AT&T in deriving its proposed rates for Dataphone Digital Service, are appropriate to the types of competitive services proposed in the tariff filing described herein, and whether the costs derived therefrom justify the charges for the proposed service.

(8) Whether the terms and conditions for resale and shared use, as reflected in the tariff filing described herein, are just and reasonable.

[1] A related service offering at 1.544 megabits per second is at issue in Docket No. 20690.

[2] We partially held that application in abeyance pending improvement in DDS earnings and completion of the present proceeding. See 60 FCC 2d 835 (1976).

3. In the Designation Order, we also instructed AT&T to file at regular intervals reports regarding costs, revenues and operating experience associated with the provision of DDS as a condition to the grant of AT&T's section 214 applications. AT&T did not keep records of actual costs as called for in our Order. However, AT&T did submit several studies of its investment and expenses for DDS. Included was a 1975 year-end study employing three fully distributed cost (FDC) studies. Also submitted were two separate FDC studies incorporating refinements to the data base, one using alleged embedded investments in 24 cities to allocate certain expense accounts and the other using nationwide averages for the allocation.

4. Several parties in addition to AT&T, including the Trial Staff of the Commission's Common Carrier Bureau (Trial Staff), Data Transmission Company (Datran)[3] and the Independent Data Communications Manufacturers Association (IDCMA), participated in the "paper" proceeding[4] specified by the Designation Order. An Initial Decision (ID), FCC 76D–34 (released July 2, 1976), appended hereto, was issued by the Administrative Law Judges on June 22, 1976. The ID found that DDS and AT&T's private line analog data service are not like communications services within the meaning of section 202(a) of the Communications Act, 47 U.S.C. 202 (a). This finding was based on the technological differences utilized by the two services to perform the common function of data transmission. The ID concluded that three separate reasons existed for declaring AT&T's DDS rates unlawful. First, the ID found the rates to be unjust and unreasonable, pursuant to section 201(b) of the Communications Act, 47 U.S.C. 201(b), on the basis that AT&T's estimated projected annual revenues for DDS appeared to be overstated and its net investment and expenses understated. Second, the ID concluded that the DDS rates were discriminatory under section 202(a) of the Act. The ID based its conclusions on the following factors: The rates for the higher speeds were disproportionately higher than for the lower speeds; costs of providing the four speeds of service were distributed in a discriminatory manner resulting in unjustified advantage to low speed users; and the resale and shared use restrictions were unjustified and discriminatory. Finally, the ID found AT&T's rates were predatory and anticompetitive based on what the ID considered to be AT&T's deliberate attempt to justify a non-compensatory rate by understating costs using the long run incremental cost (LRIC) study method, its failure to account for research and development costs, and its treatment of the DUV spectrum as a "free economic good."

5. The ID found insufficient material in the record to prescribe rates for DDS. However, the ID did state that AT&T should be required to file a new tariff to continue its DDS offering and set forth the following general prescriptions to be applicable to such a tariff filing (para. 128): (a) Any restructuring of Tariff 267 rates should be reasonably related to the costs of providing that service; (b) under any restructuring, each rate element should be reasonably related to the cost of providing that element of service; (c) the rates for DDS equipment marketed by AT&T in competition with customer-provided equipment must be based on the full cost of that equipment; (d) interconnection of DDS customer-provided equipment is to be made through the same means at a uniform interface or connecting arrangement; and (e) Bell must eliminate the unjust, and unreasonable shared use and resale provisions of Tariff 267. The ID stated that AT&T's tariff should be accompanied by a fully distributed cost study based on one year of reasonably current historical DDS operating experience. Prior to the submission of a new DDS tariff, the ID concluded that AT&T should file interim rates no lower than those for its private line data services offered under its Tariff F.C.C. No. 260.

6. Exceptions to the ID were filed by AT&T, the Trial Staff, Datran, IDCMA, the Department of Defense (DOD), Telenet Communications Corporation (Telenet), Aeronautical Radio, Inc. (ARINC), the Associated Press (AP) and United Press International, Inc. (UPI). In summary, the Trial Staff excepts to the ID finding that DDS and analog data services are not like services. AT&T takes exception to the ID's ruling that revenues are overstated and investments and expenses understated. Further, AT&T maintains that its estimates of demand

[3] On August 19, 1976, Datran filed an application seeking authority for an indefinite emergency discontinuance of all its common carrier services. The Commission conditionally granted Datran's request in its Order and Certificate, 60 FCC 2d 958 (1976). Datran discontinued all service on September 15, 1976. Datran also filed a voluntary petition in bankruptcy with the U.S. District Court for the Eastern District of Virginia. On August 27, 1976, the Court appointed Stanley J. Samorajczyk Receiver in Bankruptcy for Datran. Mr. Samorajczyk was later elected Trustee by Datran's creditors. We will fully consider Datran's position and arguments found in the record of this proceeding, despite what has transpired affecting Datran's status.

[4] The presiding Administrative Law Judges criticized the use of the "paper" hearing in this case (Initial Decision, fn. 13) as not providing satisfactory opportunity for development of testimony and cross-examination of witnesses. We specified the procedures to be followed in this hearing with the explanation that we were continuing to experiment with procedures under which to conduct "paper" proceedings. Designation Order, 50 FCC 2d at 515, fn. 17. It was anticipated that supplemental oral procedures, rather than multiple interrogatories, would be utilized in instances to which the ID refers. See 50 FCC 2d at 515. However, oral procedures involving witnesses were not used, only conferences without witnesses. In the future, we will expect a mixture of written and oral procedures to be used in such cases as appropriate. We are continuing to identify and utilize the most effective methods of conducting hearings so that a full record might be developed with minimal expense to the parties and in order to conduct and complete rate proceedings expeditiously.

and revenues are sound and its cost data is accurate. AT&T also excepts to the ID finding that its DDS rate structure is discriminatory, arguing that the relationship of rates to speed is proper and that the resale and shared use issue has been determined in a separate proceeding. In several specific objections, Datran takes exception to what it considers the ID's failure to adequately adjust AT&T's understated costs and overstated revenues. IDCMA excepts to the ID finding that a 9.5 percent rate of return is sufficient for DDS and claims that such a rate of return will result in cross-subsidization from monopoly services. UPI contends that the DDS rates are neither too low nor unlawful.

7. AT&T takes exception to the determination that its DDS rates are predatory. On the other hand, the Trial Staff and Datran except to the ID finding on the basis that it should be strengthened to find an attempt to monopolize the data market. In support of its contention, AT&T maintains that alternative use of the LRIC method was not precluded by the Designation Order, a position supported by a majority of the other parties to this proceeding. AT&T further contends that both its LRIC and FDC studies support a finding that its rates are compensatory, but Datran argues that AT&T did not conduct any actual FDC studies. AT&T and DOD take exception to the ID's use of FDC Method 1 as being unjustified. The ID's treatment of DUV is excepted to by AT&T on the one hand, claiming that it considered DUV as a free economic good only in the LRIC study, and by Datran on the other to the extent that the ID refers to DUV as "normally unused." Datran and IDCMA take exception to the ID's refusal to prescribe rates and argues that the record is satisfactory for prescription. In regard to the ID's interim rate guidelines, both Datran and IDCMA contend that they should be more specific. ARINC and AP argue that the interim rates should be lower. Finally, Datran and Telenet maintain that AT&T should be required to offer DDS only through a separate subsidiary. Requests for oral argument made by Datran, DOD and IDCMA were denied by the Commission. FCC 76–857 (released September 14, 1976).[5]

[5] On November 24, 1976, AT&T filed a petition to defer the issuance of our decision in this proceeding pending refinement of the proper cost study procedures and forecasting techniques set forth in the "Final Decision" in Docket No. 18128, FCC 76–886 (released October 1, 1976). AT&T maintains that failure to await these procedures and techniques may result in a DDS decision inconsistent with the guidelines. We find no merit in AT&T's contentions and are denying its petition herein. Based on the record in this proceeding, we are able to conclude that AT&T's DDS rates are unjust and unreasonable and otherwise unlawful, independent of any determination reached in Docket 18128. However, we also find that the DDS rates are inconsistent with the requirements set forth in Docket 18128.

DECISION

8. As modified herein, and in consideration of the exceptions thereto, we essentially affirm the findings and conclusions of the Initial Decision.

I. REASONABLENESS OF RATES

9. AT&T has supplied cost and revenue information for DDS as part of its direct case in this proceeding. We are presented with the question of whether this information as well as that adduced elsewhere in the record of this proceeding meets the burden imposed upon AT&T of showing that its DDS tariff (Tariff F.C.C. No. 267) is just and reasonable and free of unlawful discrimination within the meaning of sections 201(b) and 202(a) of the Communications Act.[6] Our determination of the appropriate cost and revenue information is central to the disposition of Issues 1, 2, 3 and 7 of this proceeding, which will be considered herein.[7]

A. AT&T MARKET PROJECTIONS

10. The revenue projections made by AT&T were based on two market studies formulated through the use of a computerized market simulator. The model was designed to quantitatively estimate the market for DDS at various test rates for the years 1974, 1975 and 1976, assuming digital data networks comprising 24 cities by the end of the first year, 60 by the second and 96 by the third. These market quantities were then used as inputs in developing an engineering plan of the network and the corresponding plant configurations required to provide DDS at the various test rates. The requisite investments and associated expenses were then determined for each of these plant quantities. Thus, the reliability of AT&T's simulation model is crucial to the evaluation of both AT&T's revenue forecasts and its cost forecasts.

11. In order to determine the validity of the model, forecasted and actual results must be compared.[8] A comparison can be made between annualized monthly recurring revenues Bell actually received from DDS rates for December, 1975 representing one year of actual operation with annualized monthly recurring DDS revenues as estimated by AT&T's simulator for the first year of operation for 24 cities. To some extent, such a comparison indicates the reasonableness and reliability of the simulator's forecasts.[9] Tabulated below are both the estimated and actual monthly recurring revenues annualized for the initial year for 24 cities. Total annualized revenues and annualized revenues by speed are given. The percent difference between the actual and the forecasted revenues are also shown.

[6] For appropriate burden of proof tests, see Decision in Docket No. 19989 (WATS), 59 FCC 2d 671 (1976), and Interim Decision in Docket No. 19919 (High Density—Low Density), 55 FCC 2d 224 (1975).

[7] See para. 2, supra, for a description of these issues.

[8] The record in this proceeding limits our evaluation of output to this type of comparison. The ID delineated the infirmities of this approach (fn. 33). We recognize such shortcomings, but find that in the instant proceeding that properly made comparisons of projected and actual results can yield valuable information concerning the reliability of AT&T's simulation model.

[9] Insuring that rate levels and rate structure are just and reasonable involves comparing annual data, whether actual or forecasted, and not an annualization of one month of a year. Because AT&T has only forecasted annualized revenues with its simulator, to make any comparisons of actual and forecasted revenues acceptable, we are forced to use annualized data. This, however, should not be construed as general acceptance of this practice. See paragraph 20, infra.

	DDS revenues [1] (In thousands)				
	Total	2.4 Kbps	4.8 Kbps	9.6 Kbps	56 Kbps
Forecasts	13,833	8,551	1,977	1,691	1,615
Actuals	2,267	133	575	1,290	268
Percent difference	510	6,329	244	31	503

[1] Forecasts were taken from A.T. & T.'s March 1974 simulation run and are for recurring digital revenues only. Actuals were taken from A.T. & T.'s Jan. 22, 1976, filing, transmittal No. 12497, of recurring revenues for DDS at tariff 267 rates.

12. AT&T has alleged that these tremendous differences between actual and forecasted revenues are due to unforeseen factors outside its control, these factors including: (1) Deferral of the effective date of the initial DDS tariff by seven months; (2) delay in the approval of the nineteen city DDS Section 214 application; (3) use of higher Tariff No. 260 rates for the first year for nineteen cities; (4) delay of the still-pending 40 city DDS Section 214 application (W–P–C–433); (5) lowering of Datran's competitive rate and its bulk rate tariff offering.

13. In examining these alleged external influences, it should be noted that in February, 1975, when asked about the effect of the delay in the implementation of DDS on Bell's original plans, Bell stated:

> At the present time, it is not expected that network expansion will be significantly delayed so as to substantially affect the revenues at the end of 1976.

This statement was made after AT&T was aware of all the above external factors except Datran's "bulk rate offering," which became effective October 22, 1975, and delay in grant of the 40 city application.

14. The deferral of the DDS tariff by seven months to December, 1974 has no effect on the revenue comparison since we used December, 1975 revenue data, which follows one year of actual operation. In regard to alleged delays in the approval of the nineteen city DDS section 214 applications, we note that AT&T received section 214 authority at the same time we designated Tariff No. 267 for hearing in December, 1974. Thus, we authorized the additional nineteen cities at the beginning of the first year of operation for DDS. All 24 cities assumed to be in operation at the end of the first year by AT&T's simulator were in fact in operation by October of the first year. The use of the higher Tariff 260 rates applied only to the additional nineteen cities for the lower speeds (2.4 Kbps and 4.8 Kbps). On the average, these Tariff 260 rates for 2.4 Kbps were approximately 32 percent higher than Tariff 267 rates (and 1 percent higher for 4.8 Kbps).[10] In no case were these rates more than 93 percent higher. For this 32 percent differential to account for the 6,329 percent difference in forecasted over actual 2.4 Kbps use would imply a price elasticity of demand for DDS well in excess of any reasonable estimate, including AT&T's apparent implicit use of 2 to 2.5.[11]

15. The alleged delay of the 40 city DDS application has no bearing on our revenue comparisons since we are comparing actual and forecasted revenues for 24 cities only. Likewise, Datran's lowered rates should have no effect on the forecasts since the rates were only lowered to a level consistent with that assumed by Bell's simulation model. As to Datran's bulk rate offering, we have been unable to detect any decline in the rate of growth in monthly recurring DDS revenues after the introduction of Datran's bulk rate offering.[12] Therefore, we must conclude that the above external factors have had no material effect on actual DDS revenues.[13]

[10] These percentages were calculated on the basis of an average length of haul for 2.4 Kbps of 242 miles and 880 miles for 4.8 Kbps. These average lengths of haul are those reported by AT&T in Transmittal No. 12497, January 22, 1976, Vol. 10, p. 53, and are for year end 1975.

[11] Assuming a price elasticity of demand of 2.5 and an average increase in price of 32 percent, a decrease in demand of 80 percent would result. Thus, annualized recurring 2.4 Kbps revenues would have been about $300,000, still leaving a 2,750 percent difference between actuals and forecasted 2.4 Kbps revenues.

[12] Prior to October, 1975, DDS recurring revenues were growing approximately $21,600 per month and between October, 1975 and July, 1976 at $30,400 per month.

[13] In its Exceptions to the ID, AT&T makes a comparison between actual revenues and what it characterizes as first year on-net revenues to allegedly demonstrate the reliability of its forecasts. AT&T defines on-net services as services wholly contained in the DDS expansion plan and on-net to off-net services as services partially contained in the digital network. These on-net revenue figures do not appear in the record before their introduction in AT&T's Exceptions. Additionally, there is no substantiation of these figures and no indication of whether the model might generate such figures. Assuming, arguendo, that these new revenue figures are accurate, we arrive at a contradiction, as AT&T in its initial filing stated it did not anticipate introduction of on-net to off-net service until early in the second year of operation. This service was not actually introduced until September, 1976. Yet AT&T maintains in its Exceptions that the recurring revenue projections for the first year of operation (1975) contain a substantial amount of on-net to off-net revenues, i.e., the difference between forecasted recurring DDS revenues and the alleged on-net only revenues.

[14] This is especially true for DDS which is a new service with no historical background.

16. Our concern with the accuracy of AT&T's DDS market forecast is based on the fact that such forecasts play a key role in the DDS rate making process. First, forecasted market quantities help to determine facilities requirements and hence investment and expenses of offering the service. See paragraph 10, supra. Second, market forecasts in the form of revenue projections are instrumental along with cost data in determining whether the revenues at the filed rates will meet projected costs.[14] In general, whenever a carrier overstates its investment and expenses accordingly, the filed rate will tend to appear to be compensatory (based on the revenue projections) when in fact it may not be compensatory. We have considered the practical effects of overstating market forecasts on rate making in a hypothetical situation. For an explanation of this example see Appendix II.

17. Based on our analysis, we do not believe that the external factors cited by AT&T (see paragraph 12, supra) could have accounted fully or even materially for the discrepancies found. Because AT&T's simulator represents an abstraction of the actual process which determines the market for DDS, the accuracy and the reasonableness of the simulator's forecasts will be a function of the degree to which it mimics reality. The specific techniques utilized by AT&T in devising its model, as well as our evaluation of the individual objections and criticism of the inputs and outputs of the model are treated more fully in Appendix I, attached hereto. Of the three input variables whose inclusion in the model we question (stimulation effect, buy-up factor, and effect of satellite competition), all tend to overstate DDS demand and hence revenues. Also, the exclusion of a variable indicative of the effect of the national economy leads to the overstatement of DDS demand and revenues. Finally, all the input parameter values we question, with the possible exception of the maturation factor, tend to overstate DDS demand and revenues.

18. In addition, to its modeling techniques, in 1972 AT&T directly and indirectly contacted an estimated 98 percent of the potential customers for a service such as DDS in an effort to verify the market appropriateness of its current Digital Data System. While this market survey, known as "Project A," was never completed, it apparently reached the vast majority of potential customers.

19. *Conclusions.* We find that AT&T's simulation model is not substantiated to our satisfaction and its demand forecasts cannot be considered as accurate or reasonable. Nearly every practice associated with AT&T's simulator led to an overstatement of DDS demand and revenues. Such a finding is reinforced by the fact that in 1972, through "Project A," AT&T contacted the vast majority of potential DDS customers, and presumably was reasonably aware of the demand for DDS. Yet its simulation model overstates this demand.

20. *Guidelines.* Based on the foregoing we will expect AT&T in future submissions of market demand models to fully support the necessity and sufficiency of the input variables used and provide reasonable supporting evidence regarding parameter values. We will also require AT&T to utilize sensitivity analysis tests and internal consistency tests in the manner described in Appendix I for future DDS simulation models. Finally, we will require AT&T to provide actual and annual demand and revenue data in future DDS submissions.

B. COSTS

1. *LRIC Cost Study.* 21. An LRIC analysis was submitted by AT&T in purported justification of its proposed Tariff No. 267 rates. The ID gave no consideration to this study (para. 23 and fn. 12), claiming that the Commission in the Designation Order had limited submissions to FDC studies. Several parties except to this ruling as an incorrect interpretation of the Designation Order. We must reverse the ID's ruling. The Designation Order indicated that LRIC studies would be relevant evidence in this proceeding and that the question of the validity of LRIC or FDC studies in developing rate levels for discrete classes of service would be resolved in Docket Nos. 18128 and 19129. 50 FCC 2d at 509.

22. Although we have reached a decision in Docket 18128, we will consider the validity of AT&T's LRIC study independently of those determinations. We find, inter alia, the following infirmities in using AT&T's LRIC analysis of record as justification for the filed DDS rates: (1) AT&T's treatment of the DUV portion of the spectrum as a free economic good; (2) use of outmoded cost and engineering data;[15] (3) overstatement of demand and revenue projections, resulting in biased contribution and burden tests (see para. 19, supra); and (4) improper use by AT&T of its own rate-making principles by filing Test Rate 6, instead of the indicated Test Rate 8, which is 20 percent higher than the filed rate (see para. 26, infra). Thus, we find AT&T's use of LRIC analysis as justification for DDS rates to be improper.

23. In its LRIC analysis, AT&T treated the data under voice (DUV) portion of this spectrum as a free economic good. AT&T emphasizes that it did not consider DUV to be a free economic good in

[15] In our discussion concerning AT&T's alleged FDC studies we shall note that AT&T used projected costs for DDS. To the extent that AT&T's LRIC costs are reflected in the FDC projections concerning special plant cost we find that the criticism therein are applicable here. (See paras. 27–52, infra).

its FDC studies. To the extent that the ID indicates AT&T did otherwise (paragraphs 45–46), we reverse such findings.

24. Because of the significant ratemaking principles involved, the question of whether AT&T accorded proper treatment to DUV in its LRIC study for DDS must be considered. In support of its position, AT&T cites economic reasons for considering DUV as a free economic good in its LRIC study. These reasons are based on the assumption of AT&T's Council of Economic Advisors that if the marginal opportunity costs [16] are zero, then the marginal and incremental costs also would be zero. AT&T concedes, however, that non-economic considerations indicate that the use of DUV should not be treated as a free economic good.

25. We find that AT&T should not have treated DUV as a free economic good in its LRIC analysis. We note that an internal AT&T memorandum of record herein (AT&T Response of August 1, 1975 to Datran's Request, at 555) indicates that it was unsure of the proper treatment of DUV on an incremental cost basis. The important question is whether the DUV spectrum incurs any significant opportunity costs. According at AT&T's own technical journals, of which we take official notice, the DUV spectrum can be used for services other than DDS.[17] Based on this fact, the DUV spectrum for DDS presents an opportunity cost. Since the alternative uses of DUV are analog service, AT&T's LRIC study for DDS should have assigned a proper share of the incremental joint and common costs entailed in providing the total network serving the 96 cities to the DUV technology.

26. Based on the foregoing, we conclude that AT&T's revenue forecasts are overstated and its LRIC costs are improper. This overstatement of revenues and improper use of LRIC costs have resulted in the appearance of justified rates which were in fact not justified.

2. FDC Cost Studies. 27. In its direct case, AT&T submitted two DDS cost studies which it characterizes as fully distributed cost (FDC) studies. Since DDS was a new service at the time the studies were conducted, no actual or historical costs were available. Instead, AT&T used projected costs for both FDC studies. One study purportedly uses allocation methods similar to FDC Method 1 and the other uses methods similar to FDC Method 7. The ID found that DDS rates should be "solidly premised on a reasonably accurate revenue projection and an acceptable Method 1 Fully Distributed Cost Study." (para. 49). Thus, the ID did not consider AT&T's FDC Method 7 study. Various parties, including AT&T and DOD, take exception to the ID's finding. In addition, many aspects of the ID's evaluation of DDS investment and expense figures are the subject of exceptions by several parties.

28. The AT&T FDC studies are more accurately characterized as hybrid cost studies. They are based, in part, on the following: historical cost information for some investment items, LRIC data for other investment items, estimates for several expense categories derived from existing service classifications other than DDS, and historical cost information where the costs were incurred in several different years. AT&T's FDC data was developed on the assumption that it would serve 96 cities in 1976. This assumption has proven to be incorrect.

29. We will assess the validity of both AT&T's FDC cost studies by first examining the investment data and then the expense data. Our discussion will be limited to the major items of investment and expense disputed by the parties.

a. *Hybrid FDC Method 1*—30. *Investments.* Several areas concerning AT&T's investment data are in dispute. These include the following: allocation of common plant; assignment of obsolete nonfungible plant; impact of inflation and Western Electric Company price increases; fill factor for interexchange (IX) plant; local loop investment; nine city Digital Serving Area (DSA) sample; and depreciation reserve.

31. AT&T allocated its investment in common plant by relying on TELPAK factors or ratios. The ID rejected the use of TELPAK ratios for DDS on the basis that TELPAK is not representative of DDS (paras. 83–86).[18] Specifically, the ID's determination was founded on the fact that TELPAK is a bulk rate, quantity discount service, that it, until recently, has earned a low rate of return based on FDC–1 analysis, and that its ratios are based on obsolete data and questionable estimating techniques. The Trial Staff and other parties have maintained in this proceeding that AT&T's use of TELPAK ratios bears no reasonable relationship to an appropriate assignment of these investment items to DDS. They also argued for development of allocation factors specifically for DDS. On the other hand, AT&T claimed that the use of TELPAK ratios is reasonable since TELPAK and DDS have fundamentally similar service characteristics in that both are line haul/service terminal (inter-DSA/digital access line (DAL)) type offerings. We conclude that the use of TELPAK ratios in determining the allocation of common plant for DDS is inappropriate. Even if it is assumed that DDS and TELPAK have similar service characteristics, we do not find the relevance to the allocation of plant overhead. DDS and TELPAK employ plant overhead in differing mixes. Since DDS employs a new technology and, according to AT&T, comprises a digital network separate and distinct from the analog system of which TELPAK is a part, it is unlikely that two such distinct networks would employ the same mix of plant overhead. AT&T has not shown that such is the case.

32. The question of the proper treatment for the allocation of obsolete nonfungible plant has been raised. The Trial Staff and Datran argue that such costs should be assigned to the service which caused its obsolescence. AT&T argues that while such a procedure is appropriate in LRIC, it is not in FDC. We affirm the ID finding (fn. 42) that the record contains no convincing evidence that modems and echo suppressors will be made obsolete by DDS. Given the availability of off-net analog extensions and the expected continued growth of analog data communication services, we are skeptical of any claimed obsolescence of modems and echo suppressors. Since we are not convinced that such equipment will become obsolete, it is unnecessary for us at this time to reach, as the ID apparently has, any decision as to how obsolescence costs should be treated.[19]

33. Another area of contention is the adequacy of general inflationary trends and Western Electric price increases of 1975 (averaging 5.1 percent) and 1976 (averaging 4.0 percent). The record demonstrates that AT&T did not take into account inflation in its forecast of expected DDS costs.[20] This failure to account for the severe inflation of the past few years plus the failure to employ current cost information has caused AT&T to substantially understate the investment costs of DDS.

34. AT&T also failed to adequately account for the Western Electric price increases. AT&T suggests that an average 4 percent increase overall in Western Electric prices in January 1976, which allegedly translates into a 2 percent increase in annual costs, is covered by a 3 percent increase in DDS rates. This argument obfuscates the pertinent issue. In this proceeding, our concern is not with the average overall increase in Western Electric prices, but with the increase in specific Western Electric prices for goods and services used for DDS. We are also concerned with why AT&T failed to forecast any increases in DDS equipment prices and installation charges. We affirm the ID finding (paragraph 77) that it was incumbent upon AT&T to fully develop such increased costs in formulating its tariff, and that AT&T has not justified its failure to do so.

35. AT&T used a 90 percent fill factor in its allocation of common inter-exchange (IX facility radio relay costs to DUV channels used to transmit DDS intercity. This figure for the ratio of supergroup to mastergroup is unsubstantiated, but AT&T claims that the necessary studies would be time consuming and unwarranted. The Trial Staff and Datran argue that AT&T's figure is overstated and thus understates the amount of common IX plan allocated to DDS. The ID (paragraph 73) found that AT&T has not shown that its allocation of common IX plant for DDS is just and reasonable. We affirm this findnig of the ID. However, while we are skeptical of such a high fill factor, we have no method of determining an appropriate fill from the record in this proceeding. Thus, we reject AT&T's unsupported fill factor assumption. Because of the critical nature of the fill factor in allocation of common IX plant,[21] we will require AT&T in all future DDS tariff filings to provide a detailed justification using appropriate traffic engineering data and techniques for any proferred fill factors.

36. AT&T stated that its cost for local loop equipment is $309.36 for each DDS station and over $13 million for all 43,000 stations. These figures are based on 1969 cost data, which partially relied on 2-wire loops. DDS stations require 4-wire loops. The ID (paragraph 70) found AT&T's loop investment to be understated but did not speculate as to the extent of the understatement. AT&T excepts to this finding on the basis that its use of 1969 cost data to determine the loop investment is proper. Upon consideration of the record, we find that the ID's determination should be affirmed. We cannot accept at face value justification based on data that was five years old at the time of filing, given the well documented recent inflationary trends in equipment prices. Also, we cannot accept the inclusion of cost data for 2-wire loops when 4-wire loops are necessary for the service. Further, we note that AT&T presented 2 and 4 wire loop costs separately in its January 1975 filing, but has given us no documented studies of either 2-wire or 4-wire loop costs. Finally, we do not find the doubling of 2-wire costs to be representative of 4-wire costs. As AT&T's own data demonstrates, this can either lead to an overstatement or an understatement of 4-wire loops costs, but not to the actual costs of 4-wire loops. The above factors in the aggregate result in substantial understatement of local loop investments.

37. AT&T utilized a 9 city sample of the 96 city DDS network for 1976 in costing the Digital Serving Area (DSA) portion of the network. The ID (paragraphs 79–80) found this sample to be unrepresentative and to understate unit costs and hence total costs.[22] AT&T acknowledged its 9 city sample was not randomly generated, but defends it as being representative of the 96 DSAs. AT&T argues that the 9 DSAs selected are representative of the 96 DSAs essentially on the basis of the total stations terminated and the DAL–1/DAL–2 station ratio. AT&T also alludes to a study in which 46 DSAs were analyzed and used to cost the entire 96 cities. On the basis of this 46 city sample, AT&T concludes that with a confidence level of 95 percent the total investment derived by analyzing each of the 96 DSAs would yield a figure which would not be statistically different from the one derived from the 9 city sample. While AT&T's criteria for selecting its 9 city sample may be useful in sizing the cities as to whether or not they are large, medium or small, we agree with the ID (paragraphs 79–80) that this is irrelevant to the representativeness of the sample.

38. The ID (paragraphs 79–80) found that AT&T employed a biased, unrepresentative sample to develop total DSA costs which resulted in a substantial but undetermined understatement of DSA costs. Based on the relevant data available, as discussed below, we affirm the ID's finding that the sample was faulty. AT&T's 9 city sample consists of 3 large DSAs, 3 medium and 3 small. In order to determine the representativeness of the 3 city subsamples submitted, the characteristics on which the DSA portion of the network is costed were analyzed. According to AT&T, data inputs for the DSA investment model include: DSA station and mileage summary; DSA equipment count summary; material pricelist; unit cost file; and capacity cost assignments. Of these data inputs only the DSA station and mileage summary and the DSA equipment count summary would seem to vary between DSAs. Thus, we examined the number of DAL–1 and DAL–2 terminations per DSA, route miles per DSA, and number of DAL–2 end offices to determine whether AT&T's 3 city subsamples are representative of total DDS costs. While the record contains information on the number of DAL–1 and DAL–2 terminations, there is no direct evidence available on the other two factors. Logically, we would expect that as the number of DAL–2 terminations increase so would the number of DAL–2 terminations to total terminations as an indirect test for the number of DAL–2 end offices in 3 city samples versus those in the relevant DSA classifications. We also note that AT&T's only use of total terminations in its classification of DSAs assumes a similar distribution of DALs within a DSA classification and that this assumption is not supported in the record.

39. Using AT&T's classification of DSAs as large, medium, or small and its forecasted number of DAL–1 and DAL–2 terminations by DSA for 1976 at the filed rate, the following table compares the average number of DAL–1 and DAL–2 terminations for the 3 city subsamples with the corresponding averages for all the DSAs by size.

	Average number of terminations				
	Total	DAL–1	DAL–2	Percent DAL–1	Percent DAL–2
Large DSA's:					
3 city sample	2,954	2,228	726	75.4	24.6
7 city total	2,309	1,348	961	58.4	41.6
Percent difference	27.9	65.3	(24.5)		
Medium DSA's:					
3 city sample	1,010	577	433	57.1	42.9
18 city total	755	498	257	66.0	34.0
Percent difference	33.8	15.9	68.5		
Small DSA's:					
3 city sample	240	155	85	64.6	35.4
71 city total	195	151	44	77.4	22.6
Percent difference	23.1	2.6	93.2		

40. It is now evident that AT&T's samples overstated the average number of total DAL and DAL–1 terminations. Since unit costs would be lower the higher the use for cities of similar size (i.e., number of DAL terminations), AT&T's sample tends to understate the unit costs associated with the DAL–1 portion of DSA costs. This leads to an overall understatement of DSA costs because DAL–1 costs comprise the largest portion of total DSA costs. Also, a comparison of the percentage of DAL–2 terminations to total terminations shows wide variations between AT&T's sample and the relevant universe.

41. A number of criticisms have been leveled at the AT&T derived depreciation reserve. Datran points to an apparent inconsistency between claimed depreciation expense and claimed reserve and maintains that AT&T has improperly allocated the common portion of the system depreciation reserve to DDS. IDCMA claims that AT&T failed to recognize competitive pressure and depreciate equipment more rapidly. The question of the appropriate service life and method of depreciation to be applied to equipment used for competitive services is of such fundamental nature that it is best resolved in a separate

[16] Various parties of this proceeding have attempted to apply their concept of opportunity costs to support their individual economic arguments. Thus, the meaning of opportunity costs has become somewhat unclear. (See ID, fn. 22). We consider the proper definition to be the standard economic one, which states that the opportunity cost of a productive factor is the maximum value that this factor could produce in an alternative use.

[17] In effect, DUV creates a "T carrier" in an allegedly normally unused portions of the microwave spectrum. This "T carrier" can be used to provide analog, as well as digital service. A.T. & T. has engineered the equipment to carry analog and digital signals over the same facility. V. I. Johannes, "The Evolving Digital Network," 54 "Bell Laboratories Record" (November, 1976) 269, 271. See also N. R. Snow, ed., "Digital Data Systems," 54 "Bell System Technical Journal" (May–June, 1975) 811, 875.

[18] While the ID's discussion of the appropriateness of TELPAK ratios for DDS specifically referred to expenses, the findings are of a general nature and are applicable to investment allocations.

[19] This question is more appropriately addressed in our development of revised FDC–7 and FDC–1 methodologies in the aftermath of our decision in Docket No. 18128.

[20] Concern over the inadequate treatment of inflation is also present throughout the ID's discussion of investment and expense data.

[21] Simply changing the fill factor assumption from 90 percent to 80 percent increases the amount of common interexchange plant allocated to DDS by $3.1 million for 96 cities in 1976 using AT&T data from its January 1975 filing.

[22] We note that the ID (paragraph 78) incorrectly characterizes the 9 city sample as being used to project investment and revenue requirements for the entire 96 city DD network. In fact, this sample was used only for the DSA portion of the 96 city DDS network.

proceeding.[23] We find AT&T's use of TELPAK ratios to allocate the common portion of the system depreciation reserve to DDS is inappropriate. See paragraph 47, *supra*.

42. In summary, we find that through AT&T's practices found unsupportable herein, AT&T has substantially understated the costs of providing DDS to 96 cities in 1976 at forecasted demand. Furthermore, the use of a hypothetical network of 96 cities by AT&T for costing and revenue purposes prevents us from making any determination as to the actual costs of providing DDS in the authorized 24 cities for a specific test year on the basis of the record in this proceeding. Because cost and demand characteristics differ between the 96 city hypothetical network and the authorized 24 city network, such data cannot be found to comply with the requirement of our rules that actual costs be filed. We will therefore require AT&T to file actual and future costs on a basis consistent with the geographical coverage of the tariff under consideration to comply with § 61.38 of the Rules.

43. *Expenses.* AT&T's expense data has been challenged on the grounds of the methodology used and the type of information employed. More specifically, exception is taken to the expense methodology on the basis that AT&T failed to properly include research and development (R&D) and start-up expenditures, that it applied its expense factors to inappropriately derived revenue and investment data, and that it failed to take into account inflationary tendencies in forecasting expense data. Exception is taken to AT&T's informational base on the grounds that it contains outmoded data, inappropriate TELPAK ratios for some expense items and that it derives annual expense data in contrast to annualized revenue data derived from the market simulator.

44. AT&T states that DDS R&D and start-up expenditures are included in the allocated general expenses. Thus, it claims that it has allocated a portion of total R&D and start-up expenditures to DDS. Several parties have objected to this procedure on the grounds that it ignores start-up costs and R&D expenditures for DDS that were incurred before the service was authorized, that it does not explicitly account for such expenditures, and that the form of aggregate allocation is inappropriate and R&D expenses and start-up costs should be directly attributed where possible. We recognize that present accounting methods do not adequately address these criticisms. Thus, we reach no finding as to the amount of AT&T's R&D and start-up costs for DDS. However, we note that there is record evidence that AT&T did not fully account for all relevant R&D expenditures in relation to DDS.[24]

45. AT&T derived expense data by applying factors to various revenue and investment items, which we already found to be inappropriately derived and have rejected. See paragraph 31, *supra*. Thus, the expense data must similarly be rejected. Furthermore, because the bulk of expenses were derived from vastly understated investment items, we find that AT&T's expense data is generally understated. Additionally, the failure of AT&T to take into account inflation leads to an understatement of its forecasted DDS expense. See paragraph 33, *supra*.

46. We have already found (paragraphs 34, 36 *supra*) that AT&T employed outmoded information in several instances. Its derivation of DDS expenses is no exception. The use of factors that can in some cases (e.g., service revenue accounting expense) be traced back to the original seven way cost study in 1964 nullifies any claims AT&T could have of using current historical data or being truly forecasting expenses for DDS. Thus, we find that the use of outmoded data taken from a variety of past years is sufficient cause in itself to reject AT&T's claimed expenses for DDS as being unjust and unreasonable.

47. AT&T used historic ratios of the TELPAK service category to forecast certain DDS expenses. AT&T claims that the use of TELPAK ratios is more appropriate than voice private line ratios. Even if this is the case, it ignores the real issue of why AT&T failed to develop specific ratios for DDS.[25] The answer to this question is not found in the record. Since such ratios were not developed for DDS, we must consider the appropriateness of AT&T's use of TELPAK ratios. We affirm the ID's finding that TELPAK ratios are inappropriate. Our decision is based on the fact that TELPAK is a bulk offering while DDS is not, that TELPAK has historically earned a low return and that the particular ratios employed are based on obsolete data and improper estimating techniques.

48. We finally must consider whether the information used to derive AT&T's DDS expenses yields annualized expenses in the same sense that AT&T's simulator yields annualized revenues. AT&T claims that it derived annualized expenses. On the other hand, Datran and others argue that AT&T derives annual expense data.[26] We find that annualized data is inappropriate for use in determining test year cost and revenue data for ratemaking purposes. Therefore, we will require AT&T to provide both revenues and expenses on a consistent *annual* basis in future DDS rate filings. If AT&T also wishes to supply annualized data, it may do so provided it is done on a well documented, consistent basis. The need for annual data becomes readily apparent as one attempts to track forecasted data with actuals. Annual data provide the basis upon which overall revenue requirements are generally calculated. It is essenital that this Commission have such data by service on an annual basis in order to insure that a carrier's overall revenue requirement has a reasonable opportunity of being attained.[27]

49. We have already found that AT&T's costing methodology generally leads to an understatement of DDS investment costs at a given level of demand. In addition, we have found AT&T's forecasted demand for DDS was overstated. It follows that any use of expense to investment or revenue ratios to calculate DDS expenses must be rejected. We have also expressed considerable doubt concerning the appropriateness of the ratios used in this case and their meaning. Consequently, we find that AT&T has understated the costs both investment and expenses, of providing DDS at forecasted demand levels.

b. *Hybrid FDC Method 7.* 50. While none of the parties extensively analyzed AT&T's FDC–7 in terms of investment items, the special plant cost and many common costs of FDC–7 are identical to AT&T's FDC–1. Thus, many of the criticisms of FDC–1 are applicable to FDC–7. The principal differences between FDC–7 and FDC–1 are in the areas of plant under construction, miscellaneous plant (land, buildings, furniture and vehicles), and the 10th FDC–7 category concerning the treatment of non-directly attributable IX plant.

51. Under FDC–7, plant under construction is allocated to DDS on the basis of the expected increases in revenues by service. The basis upon which AT&T has allocated plant under construction is questionable since the forecasted revenue increases are not substantiated. AT&T's assumption for an expected 30 percent growth in revenues for DDS between 1976 and 1977 is without foundation in the record. AT&T has also substantially

[23] The subject of investigation of Docket No. 20188 is A.T. & T.'s proposed Equal Life Group (ELG) approach to depreciation. In addition, we have a consultant contract outstanding to investigate the general question of depreciation rules and policies for the telecommunications industry.

[24] AT&T claimed in rebuttal testimony that $715,000 of R&D expenditures were allocated to DDS. The record discloses that at a minimum of $2.6 million of identifiable R&D expenditures are associated with the provision of DDS. AT&T Response to Datran 1st Interrogatories, Q1(B)(1), p. 151. We are further examining the question of treatment of R&D expenditures in our revisions to the Uniform System of Accounts.

[25] A related question is the appropriateness of the use of ratios at all in forecasting future expenses. The use of fixed ratios by AT&T in forecasting costs entails the implicit assumption that expenses do not vary over time or that they vary exactly in the same manner as the particular revenue or investment item on which an expense item is derived. This implicit assumption seems particularly inappropriate when considering maintenance expenses. To assume that maintenance of a particular capital good does not vary over time flies in the face of common sense and the typical failure rates assumed by practicing engineers.

[26] AT&T annualized DDS revenues by multiplying projected December revenues by 12. For a growing service such a procedure yields a higher revenue estimate than the use of annual data, the sum of 12 consecutive months; hence, the concern over whether or not AT&T has annualized its expenses in a manner consistent with its annualization of DDS revenues.

[27] "F.P.C. v. Hope Natural Gas Company," 320 U.S. 591 (1944).

overstated DDS revenues in 1976, thereby overstating the potential dollar revenue growth of DDS. Therefore, we can accept neither AT&T's FDC–7 estimate of plant under construction allocated to DDS nor the associated interest during construction revenues. Additionally, we find our criticism of AT&T's FDC–1 in paras. 31, 33, 34, 37–41 *supra*, to be equally applicable to AT&T's FDC–7 study. Hence, for the above reasons, we find that AT&T's FDC–7 study is unacceptable and fails to adequately reflect the true costs of DDS.

c. *Conclusions.* 52. AT&T has allegedly performed two fully distributed cost studies using forecasted cost data for both studies. One study purportedly uses allocation methods similar to FDC Method 1, while the other purportedly uses allocation methods similar to FDC Method 7.[28] AT&T's revenue forecasts have been found to be overstated and, as we have found, AT&T's forecasted costs are understated at the forecasted level of demand. This overstatement of revenues and understatement of costs have enabled AT&T to apparently justify rates for DDS which are in fact not justified.

3. *Non-Compensatory Rates.* 53. The record in this proceeding is not adequate to support a finding that the DDS rates are compensatory. However, additional information, of which we take official notice, on file with the Commission is relevant to this issue. This information consists of the various AT&T supplied cost studies filed in connection with its 40 city DDS section 214 application (W–P–C–433). The probative value of the studies [29] in this proceeding is enhanced by the fact that the studies are for the 24 cities in service for test year 1975, the first year of operation. In addition, these studies employ results from a special engineering study of the DSA portion of the existing 24 cities, rather than a biased sample of 9 DSAs, as AT&T did here. See paragraph 40, *supra*. The use of nationwide factor file for FDC–1 also minimizes the problem we found (paragraph 31, *supra*) with the use of TELPAK ratios. Thus, we find these additional Section 214 cost studies to be a significant improvement over the FDC studies provided by AT&T in this proceeding.

54. As we noted in our "Memorandum Opinion and Order," 60 FCC 2d 835 (1976), the FDC studies supplied in connection with the Section 214 applications show a low earnings ratio ranging from −0.75 percent to 4.2 percent. The results are as follows: [30]

[28] These FDC Method 1 and 7 studies utilize the methodology used prior to our Docket 18128 Decision. Pursuant to that Decision, revised methodologies for both are being developed.

[29] While these studies have certain deficiencies as well, see 60 FCC 2d 835 (1976), we find the results to be of sufficient probative value for use in this Decision.

[30] AT&T also recently provided in summary form tentative results of FDC–1 and FDC–7 studies for October 1976. These tentative results are summarized below. November 22, 1976 letter to Chief, Cost Analysis Branch, Common Carrier Bureau, from Gordon B. Evans, AT&T, in connection with W–P–C–433.

[Dollar amounts in thousands]

	FDC 1	FDC 7
Net investments	$42,08	$40,36
Net expenses	$6,68	$6,57
Income	$5,67	$8,82
Net operating income/net investment (percent)	0.07	2.3

Summary of cost of service results for DDS annualized Dec. 31, 1975

[Dollar amounts in thousands]

	FDC-1 [1]	FDC-7 [2]
Plant in service	$35.5	$35.6
Plant under construction	$1.6	$3.8
Other investments	$0.5	$0.3
Gross investment	$45.4	$39.7
Depreciation reserve	$3.7	$4.0
Net investment	$36.7	$35.7
Operating revenues	$3.9	$3.9
Other income	$0.1	$0.3
Total revenues	$4.0	$4.2
Expenses, income charges and other taxes	$5.7	$4.2
Federal income tax	($1.5)	($1.0)
Net operating earnings	($0.2)	$1.0
Ratio of net operating (percent)	(0.75)	2.80

[1] May 25, 1976, letter to Chief, Common Carrier Bureau from Robert E. Sageman, assistant vice president, A.T. & G., in connection with W–P–C–433.
[2] Mar. 31, 1976, letter to Chief, Common Carrier Bureau from T. W. Scandlyn, assistant vice president, A.T. & T., in connection with W–P–C–433. Adjusted for subsequent reports.

55. It is evident that 1975 DDS rates do not generate sufficient revenues to cover all costs, including cost of capital, regardless of the FDC methodology used. Tentative results provided by AT&T for October 1976 show similar results. Thus, nearly two years of operation have failed to show any improvement in the earnings results of DDS. While we would not necessarily expect a new service to immediately earn a reasonable rate of return, we do expect improvements in earnings ratio over time if rates are to be compensatory. That DDS has failed to exhibit such trends we find to be sufficient reason to reach the finding that present DDS rates are non-compensatory and will continue to be non-compensatory in the foreseeable future.

4. *Rate Structure.* 56. AT&T's rate structure for DDS is delineated in the ID (paras. 27–38). Essentially, the rate structure embodies a four-speed service offering with the rates for the various rate elements increasing as the speed of service increases. While the ID considered the differences in rates for the four speeds of DDS and the justification for these variations in the context of section 202(a) discrimination, we find it is proper to examine the rate structure on the basis of whether it is just and reasonable, pursuant to section 201(b) of the Act.[31] We are concerned whether the rate for each speed of DDS is reasonably related to the cost of providing that speed of service, or whether deviation from such costs is reasonably justified by AT&T.

57. AT&T has alleged that the DDS rate structure was devised with two major objectives in mind. First, individual rate elements should correspond to *identifiable* cost producing elements. Second, the rate structure should be easy to understand and administer. Various other parties to this proceeding contend that AT&T has failed to select rates for the various DDS rate elements that bear a reasonable relationship to cost. The ID upheld this position (paragraph 94). AT&T takes exception and argues that it is inappropriate to consider the rates for DDS by rate elements. Instead, AT&T argues that the correct rates are those of the end-to-end service, which combine a number of rate elements. AT&T further asserts that, taken as a whole, the rates for each speed show a profitable revenue/cost relationship.

58. AT&T has admitted that it departed from a strict cost-relationship in setting DDS rates. In essence, AT&T alleges that rates for 2.4 Kbps rate elements were set at levels fairly close to the estimated corresponding costs [32] and that rates for the higher speeds were then selected primarily to maintain a reasonable progression of rates with increasing speed. AT&T felt that "market forces" would be dominant in determining the specific rate element levels at each of the different speeds. Thus, it opted to maintain a reasonable progression of rates with increasing speed and discounted the fact that its own analysis indicated little increase in cost with increase in speed, particularly for DALs.

59. We uphold the findings of the ID (Paragraph 94) that rates should bear a reasonable relationship to cost.[33] We have recently determined in our Docket 18128 Decision that the relevant costs to be considered should be fully distributed costs rather than incremental costs. The evidence of record indicates that AT&T set DDS rates for 2.4 Kbps rate elements on the basis of incremental costs only and for other speeds on an orderly progression from the 2.4 Kbps rates.

30. We conclude that the rates for the 2.4 Kbps rate elements are not adequately cost justified. We also find that the departures from cost based rates for the other DDS speeds are unsubstantiated. AT&T's position that only end-to-end DDS rates are significant is invalid, since a user may not require all of the rate elements included in the end-to-end rate. AT&T's rates should be based on the costs of providing the individual

[31] We therefore reverse the ID's finding that AT&T's DDS rate structure is discriminatory, in violation of section 202(a) of the Act.

[32] Corresponding costs were determined using LRIC, not FDC, analysis.

[33] Decision in Docket No. 19989 (WATS), 59 FCC 2d 671 (1976), and Interim Decision in Docket No. 19919 (Hi-Lo), 55 FCC 2d 224 (1975). We do not, however, totally reject the employment of the "value of service" concept in every instance. Certain circumstances may be appropriate for a deviation from cost of service pricing. However, we are unconvinced that there is any need for an "orderly progression" in rates for this service, or that any other justification exists for departure from cost-based pricing by rate element.

elements of the service. If AT&T elects to establish rates that depart from such costs, it must fully justify its variations. Claims that factors such as "market forces" are predominate and require an alternative to cost related ratemaking cannot be accepted without substantiation. We also find no validity in AT&T's argument that an orderly progression in DDS rates by speed is necessary or warranted, absent cost justification.

5. *Competitive Service Ratemaking Principles*—61. In *Specialized Common Carrier Services*, 29 FCC 2d 870 (1971), we set forth our policy of "full and fair competition" for specialized services. Private Line services, including DDS, fall within this policy. We recognized potential problems associated with the emerging rivalry between established common carriers (ECCs) and the emerging specialized common carriers (SCCs). In such situations, we were and continue to be concerned with avoiding imposing a "protective umbrella" over the SCCs on one hand and preventing anticompetitive pricing practices by the ECCs on the other. These ratemaking concerns not only apply to interservice pricing but intraservice rate structures as well.

62. We must consider whether AT&T employed ratemaking principles in devising its DDS rates that had an anticompetitive effect. We are concerned here with ratemaking principles applicable to subservices within a dedicated private line digital service. This rapid development by AT&T of this new service has raised several novel problems, such as how shall the cost of developing and implementing new services and technologies be allocated among ratepayers and on what basis should rates for a new competitive service be developed. While the former issue is before us in other proceedings,[34] we will consider the question of the appropriate pricing methods for a new service such as DDS herein.

63. In determining proper pricing for a new service, we must consider the basis on which to determine the lawfulness of rate element prices. We are concerned that the DDS network, in terms of information flow, is utilized as efficiently as possible and that any economies of a digital technology should accrue to the public. We are further concerned that, insofar as possible, the service is not priced so as to discriminate unreasonably against or to give an undue preference to any group of users. We affirm the ID finding (paragraph 94) that the best way to achieve the above objectives is for all subservices and rate elements of the DDS tariff to bear a reasonable relationship to costs. We therefore require AT&T to specify and justify the costs of providing each speed of service and each rate element in order that we can determine if these objectives are met[35] and whether or not each rate element is necessarily compensatory.

64. A number of alternatives to solving the question of pricing a new competitive service have been proposed in this proceeding. One involves the use of the economic concept of opportunity costs in setting rates. The ID found (fn. 22) that the hypothetical nature of opportunity cost is an inappropriate method for determining the reasonableness of rates. We affirm this position.[36] Since opportunity cost does not represent an actual expenditure, it is an inappropriate standard to be used in rate determinations. However, this does not mean that the notion of opportunity cost and the consideration of alternative uses of resources may not be considered in facility authorizations and in analysis of the reasonableness of management decisions on selection of service offerings. Consideration of section 214 applications will thus include a determination, where appropriate, of alternative uses of the facilities.

65. Another alternative to the competitive service pricing issue is the establishment of a separate subsidiary or subsidiaries for AT&T's competitive services in order to prevent the possibility of cross-subsidization between monopoly and competitive services. Since the record in this proceeding does not in any material fashion address this issue, we conclude that there is insufficient information to find that the formation of separate subsidiaries for AT&T's competitive services would be in the public interest.

66. In conclusion, we find that reliance on cost of service principles is the appropriate standard in determining the appropriate rate levels and rate structures for competitive searvices like DDS. We reject the use of opportunity costs as relevant in determining the cost of service.

6. *Docket No. 18128 Considerations*. 67. We have now rendered our Final Decision in Docket No. 18128, FCC 76–886 released October 1, 1976) (hereinafter Docket 18128 Decision). That proceeding addressed the issue of the general lawfulness of overall rate levels and interservice rate level relationships of AT&T's major categories of interstate service.

68. We have already considered the validity of AT&T's DDS cost data and rate structure data independently of the outcome of Docket 18128. We will also evaluate the DDS cost data and rate structure in light of our Docket 18128 Decision. In so doing, however, we acknowledge that the parties to the instant proceeding did not have the benefit of the Docket 18128 Decision.

69. We will first consider the utilization of AT&T's LRIC methodology for DDS. In Docket 18128, we rejected the LRIC methodology as inadequate to support rates for AT&T's private line services. In this proceeding, AT&T has acknowledged that the DDS LRIC study is methodologically consistent with the LRIC studies set forth in Docket Nos. 18128 and 18684. Although DDS was not explicitly considered in Docket 18128, we find that the same reasoning employed in rejecting AT&T's LRIC analysis as justification for private line service rate levels is applicable to DDS.[37]

70. We also must consider the question which arises in pricing a new service such as DDS of the relevant revenue requirement and the period in which the service should achieve that rate level. In Docket 18128, we determined that each of AT&T's major classes of service should earn the same rate of return within the range prescribed for the firm as a whole (presently 9.5–10 percent), based on a FDC methodology as provided therein.[38] DDS is a new data communications service offering and it is assumed that its demand will increase over time. Thus, we would not expect DDS to earn a 9.5–10 percent return during its start-up period. However, in accordance with our guidelines in Docket 18128 concerning departures from the authorized return levels, we expect DDS to earn such a rate of return as well as to recover any shortfalls from various years within a reasonable time, such time specified in the rate filing.

71. In view of the above findings and our finding in Docket 18128, we will require AT&T in the future to file rates for DDS on the basis of the revised methodologies and procedures as specified for other services in our Docket 18128 Decision. Additionally, if any future rate filings during the start-up period of the DDS offering show a shortfall in DDS revenues, AT&T must demonstrate that the filed rates will recoup such shortfall

[34] See para. 44, *supra*.

[35] See fn. 30, *supra*.

[36] We do not, however, accept the ID's definition of opportunity costs. As stated in fn. 17, *supra*, we consider opportunity cost to be the maximum value that the productive factor could produce in an alternative use. Other parties propose that since DUV can be used for voice, opportunity costs should be considered here. Although we recognize the alternative uses of DUV (see paragraph 26, *infra*.), we reject the concept of opportunity costs.

[37] In Docket 18128, we stated the following:

We have found above that a strict marginal costing approach to pricing cannot be practically implemented under real-world telecommunications industry conditions. We have also found that Bell's LRIC analysis is neither theoretically acceptable nor commensurate with our statutory mandate to ensure just, reasonable and non-discriminatory rates. We must accordingly conclude that LRIC cannot be used to determine whether the return levels for Bell's major interstate categories of service are just and reasonable within the meaning of section 201(b)." Para. 183. See also paragraphs 112–137 for detailed discussion of LRIC.

Additionally, we rejected DOD's LRAC concept:

"DOD" has proposed the use of long-run average costs (LRAC) as the appropriate reference point for determining compensatory rates which are not a burden on other services • • • We reject LRAC for many of the reasons that led us to reject LRIC." Fn. 77.

[38] IDCMA and others have alleged that DDS is a new competitive service and hence is inherently more risky than MTS or WATS. Our Docket 18128 Decision rejects a so called risk premium for competitive services. We shall continue to follow that policy at this time. Only when it can be demonstrated on the record that the overall riskiness of AT&T has been increased by a particular service to a material degree will we consider the necessity of a "risk premium" for that service.

and become fully compensatory within a reasonable time.

C. CONCLUSIONS

72. Accordingly, we must find that AT&T's Tariff FCC No. 267 rates for DDS are unjust and unreasonable and thus are in violation of section 201(b) of the Act based on the evidence of record as discussed in sections A and B above. AT&T's DDS tariff can also be found at variance with the guidlines set forth in our Docket 18128 Decision.

II. LIKE SERVICES

73. The ID found that DDS is a discrete classification of service within section 201(b) of the Act and that DDS and Tariff 260 private line analog data services are not like communications services within the meaning of section 202(a). This conclusion was based on the finding that while the ultimate function of the two services is the same, the manner of transmitting data is different. Thus, the ID's determination would permit AT&T to continue to have separate rate structures for the two services. The Trial Staff takes exception to this ruling, arguing that the proper test for determining whether two services are like communications services was properly enunciated but improperly applied by the ID. The Trial Staff asserts that a correct determination depends upon whether the customer perceives the two services to be functionally the same, rather than upon the manner of performing the function.

74. We recognize that DDS clearly involves the use of different technology than that employed for analog data transmission, and features some different technical characteristics (e.g., lower error rates, synchronous transmission). Moreover, DDS requires the use of different access equipment from analog systems. Such technological changes, however, are frequently incorporated into the telecommunications network simply as an improvement in and under the same tariff as existing services. For example, existing private line as well as MTS services employ transmission technologies ranging from open wire analog systems through various T-carrier digital systems, microwave radio relay systems, L-type coaxial cable, and satellites—all offered under a single tariff at composite rates.

75. Accordingly, while we agree that DDS might well be considered a new and separate classification of service, we also find some merit in the Trial Staff's position that a major faetor in such a determination must be the customer's perception of the service. There is no evidence in this proceeding that the differing technological approaches and performance characteristics of DDS are perceived by the users as a significant basis for preferring this service offering to conventional analog data transmission services. Instead, the primary basis for preference appears to be the substantial cost savings which result from the lower tariff charges for this offering.

75a. This is seen most clearly in AT&T's own studies submitted in this proceeding which projected a high cross-elastic effect between DDS and certain Series 3000 (single voice-grade) and 5000 (Telpak bulk) services in its Tariff FCC No. 260, which offer analog data services over voice-grade channels. In the first year of operation, AT&T projected that over 70 percent of its DDS revenue would represent a loss to these two analog services. By the third year, DDS was expected to develop some additional independent market, but about 60 percent of the DDS revenue was projected to be a loss to Series 3000 and 5000 services (AT&T Ex. 9, p. 3 and Ex. 9, p. 40). The actual first-year losses have proved to be somewhat less, primarily because we required DDS to be offered at voice-grade rates during that period, thus minimizing the cost advantages of DDS. Thus, it appears that the customers' primary attraction to DDS is cost savings, rather than differences in the services offered.

75b. While DDS uses a different transmission technology from analog services, this is insufficient justification to find that the services are unlike. Traditionally, communications carriers have not differentiated between services which offer the customer a similar function using different technologies (in this case, carrying data between two points at discrete speeds). For example, international services using satellites and cables; domestic message telecommunications service calls by satellite or terrestrial; domestic communications using coaxial cable, microwave radio, or other facilities are not offered as "unlike" services at different rates. Similarly, while DDS and analog data services use different transmission technologies, they perform a similar communications function, are perceived by the customer as similar services and their demand appears to be highly crosselastic. Accordingly, we find the services to be like services within the meaning of section 202(a) of the Act.

76. Pursuant to section 202(a), however, AT&T may not classify DDS and like analog services as separate services at different tariff rates unless it can justify this discrimination in rates between like services. Here, we find such justification. While we cannot find support in the record as to the actual costs of providing DDS, we can find that AT&T has shown that the costs of providing DDS are potentially different from analog. Specifically, DDS utilizes 4-wire local distribution facilities, whereas analog services require only 2-wire loops. Also DDS requires utilization of a Data Service Unit (DSU) while analog data services use more expensive data set or "modem" equipment. Thus the technological differences, facilities and equipment needed to provide the services convince us that there are at least potential cost differences in the provision of DDS and analog data services.

77. Based on the potential cost differences acknowledged above, we can tentatively accept the service offered pursuant to AT&T's Tariff 267 as a separate classification of service priced at a different rate from like analog services. However, when AT&T files its new tariff in compliance with this Decision, it must fully justify that DDS and analog data services in fact have significant cost differences. Such a showing must be of sufficient detail and in accordance with the standards set forth above.

III. CHANNEL SERVICE UNIT/DATA SERVICE UNIT

78. The ID considered the functions of the Channel Service Unit (CSU) and the Data Service Unit (DSU) utilized in the DDS network and determined that AT&T should unbundle the CSU charges from the rates for the Digital Access Line in the DDS tariff (paragraphs 102–105). The issues of the actual functions of the CSU and DSU and whether the charge for the CSU should properly be included in the basic DDS rate were not designated as issues in this proceeding.[39] See Designation Order, 50 FCC 2d 501 (1974). Rather, these questions were raised by IDCMA during the course of the proceeding, but we did not enlarge the issues to include them, pursuant to § 1.229 of our rules.

79. Since we had not specifically designated the issue, the burden of proving that the inclusion of CSU charges in the basic DDS rate structure is not discriminatory did not rest with AT&T in this proceeding, and therefore AT&T cannot be held responsible for its failure to supply the information which IDCMA requested in this area. Thus, the evidence of record is not sufficient to reach a determination on the CSU/DSU question and we do not find that it is necessary to do so in this decision. Therefore, we are vacating the ID's finding in this regard (paragraph 105).

80. However, we find that IDCMA has raised a significant question as to the bundling of rates, whether the functions of the CSU can reasonably be provided by customer-supplied equipment and if so, whether such equipment must be certified by the Commission pursuant to Part 68 of our rules. We shall therefore require AT&T to address these issues when it files a new, full, tariff offering for DDS meeting the guidelines specified herein.

[39] IDCMA objects to the absence in the ID of a ruling on the "no-mix" issue which it claims to be discriminatory. This refers to a prohibition in pertinent AT&T tariffs of the use of customer-provided modems on analog extensions of DDS. Although AT&T has removed the prohibitions from its tariffs, IDCMA continues to object because of its concern that AT&T has not given assurances that it will not alter its techniteal data for the off-net-adaptor (required for such extensions) so as to make customer-provided modems incompatible. We do not share IDCMA's concern. Even while the prohibitions were effective, we declined to designate this as an issue in this proceeding. In addition, we find no provision in AT&T's Tariff No. 267 under which IDCMA could allege discrimination. Finally, the removal of the "no-mix" rule from Tariffs 260 and 267 negates any validity to IDCMA's claim.

IV. ANTICOMPETITIVE PRACTICES

81. Several parties[a] have taken exception to the various aspects of the ID's determination that DDS rates and practices are anticompetitive and otherwise unlawful. See ID, paragraphs 109–118. In light of these exceptions we will thoroughly consider this issue in order to dispel any areas of confusion or uncertainty. At the outset of this discussion, it should be noted that our decision herein is neither seasoned with public interest cliches nor garnished with antitrust platitudes. This decision is restricted to the interpretation and enforcement of policies and rules adopted by this Commission pursuant to the Communications Act of 1934.

82. Essentially, our discussion herein involves an interpretation of what we meant by "full and fair competition." As indicated in the Designation Order, 50 FCC 2d at 507, the principal issue squarely presented before the Commission is the interpretation of language in the *Specialized Common Carrier* decision; which reads in relevant part, 29 FCC 2d at 915:

> Our objective [is] to promote and maintain an environment within which existing and any new carriers shall have an opportunity to compete fairly and fully in the sale of specialized services • • • [t]here should not be any protective umbrella for new entrants or any artificial bolstering of operations that cannot succeed on their own merits.

We intend here to examine the question of anticompetitive practices from the standpoint of our statutory mandate to make available an efficient communications system of reasonable cost, consistent with the public convenience and necessity, rather than within the structures of antitrust regulations and case law. See "U.S. v. Philadelphia National Bank," 379 U.S. 321 (1963). However, to the extent that certain principles are relevant, though not determinative of the issues herein, they are referred to for guidance. See, "Northern Natural Gas Co. v. FPC," 399 F. 2d 953 (1968). In this way, we hope to make the "full and fair competition" obligations of the carriers consistent with similar obligations imposed pursuant to the antitrust laws. See, "Macon Products Corp. v. ATT," 359 F. Supp. 873 (C.D. Calif. 1973); "Carterfone," 13 FCC 2d 420 (1968), 14 FCC 2d 571 (1968); "Carter v. ATT," 250 F. Supp. 188 (N.D. Tex), *aff'd*, 365 F. 2d 486 (5th Cir. 1966), *cert. denied*, 385 U.S. 1008 (1967; "Chastain v. ATT," 351 F. Supp. 1320 (1972), 401 F. Supp. 151 (D.D.C. 1975), 43 FCC 2d 1079 (1973), 49 FCC 2d 749 (1974), *review pending sub. nom. ATT v. FCC*, No. 74–2101, (D.C. Cir.). It is our conclusion that we are obligated pursuant to the express language of section 205 of the Act to enforce those policies adopted by this Commission and affirmed by the courts.

83. The Designation Order and the ID set forth the same jurisdictional basis and factual context within which the anticompetitive issue is to be resolved.[b] In our Designation Order ,we stated, in reference to the particular applicability of the "full and fair competition" standard to the case before us, that:

> • • • We cannot conclude, on the basis of the material now before us, that the DDS tariff proposals are predatory, anticompetitive or otherwise unlawful because of their competitive impact. Rather, we conclude that a substantial question exists as to the appropriateness of the proposed rates, and as to their potential anticompetitive impact. While we have no intention of creating a protective umbrella over the newly emerging competitive carriers, neither can we ignore the enormous market power and influence of AT&T. Particularly, because of its unique position in the provision of communications services, we have a responsibility to assure ourselves that its competitive efforts are legitimate ones, free of predatory or anticompetitive aspects. (50 FCC 2d at 509.)
>
> • • • We consider it imperative and in the public interest that the effective competition for data communications services not be eliminated through the institution by AT&T of rates and conditions which may be predatory, anticompetitive or otherwise unlawful. (50 FCC 2d at 511.)

The ID continued in this same vein.

> • • • as early as June 3, 1971, the Commission recognized the danger that an established carrier, such as AT&T, who furnished monopoly services could use its monopoly position to enhance its competitive position in this relatively new and expanding data transmission field. (Para. 8)

84. To the extent indicated herein, we affirm the finding of the ID that the DDS rates, and certain practices associated therewith, are of an anticompetitive nature, in direct contravention of our policies favoring fair competition. We have found, both in the "Specialized Common Carrier" decision, *supra*, and as a result of our economic analysis in our First Report in Docket No. 20003, FCC 76–879 (released September 27, 1976), that significant public benefits result from competition in the provision of private line services. Among these benefits are a wider choice of carriers and services, including innovation in the provision of private line services. Further, innovative delivery systems can produce lower rates for customers of these services. Where the rates of one carrier for a service are so low as to constitute an anticompetitive practice, however, customers of that service may temporarily benefit from lower rates. This, however, is an immediate burden on ratepayers of other services, whose rates must subsidize the anticompetitive rates, and an ultimate detriment to the subsidized service's customers, who will be deprived of the benefits of competition. We find, according to the facts delineated herein, that the unreasonably low price of the DDS service and the methods used in setting that price, could deprive the public of the benefits of competition and are contrary to the public interest.

85. Specifically, we agree with the Trial Staff that even if "[w]e cannot find the market simulations were deliberately deceptive" (ID, paragraph 116), there is sufficient evidence in other internal AT&T documents, which explicitly indicates that AT&T was aware of the fact that DDS, at least initially, would not meet the overall rate of return requirement and moreover, would require a subsidy from monopoly services. In AT&T's response of August 15, 1975 (pp. 382–83), to Datran's Fifth Interrogatories, it stated: "Most importantly, Bell's lower, competitive PL rates will produce shifts from the more profitable MTS service to a less profitable service." A service offering being non-compensatory *per se* does not contravene our rules.[c] In "American Satellite Corp.," 55 FCC 2d 1, 2–3 (1975), we stated that a new service in its early stages may not be compensatory, but we specifically noted that had ASC been a monopoly service supplier, our concern over the possible anticompetitive implications of a non-compensatory service would have been different.

86. In addition, according to AT&T's second market study, it could have minimized the non-compensatory nature of the service. According to its rate filing, AT&T's Test Rate 8 and 9 for DDS would have yielded a greater revenue contribution than Test Rate 6, which was ultimately selected. In this study filed in January, 1975, which corrected the previously misstated Datran prices and geographic coverage, and added the alleged satellite data service "competitive threat,"[d] Test Rate 6 yielded incremental revenues of $20.8 million, in contrast with Test Rate 8 and 9 which yielded incremental revenues of $24.1 million and $22.7 million, respectively. In our Docket 18128 Decision (para. 100), we stated: "[F]inally, within the context of fair competition the RD objects to any pricing approach that will not tend to provide maximum amelioration and coverage of revenue shortfalls that necessarily result from full cost pricing departures." We recognize that the question of costing methodology has been resolved in Docket 18128; however, we refer to the aforementioned language because of its objective, which we adopted in our Final Decision in Docket 18128, of reducing revenue shortfalls, which would reduce the amount by which a service offering is non-compensatory.

87. Datran contends that AT&T's possession of Datran's "Preliminary Rate Schedule"[e] and its simultaneous use of significantly lower Datran rates in its market simulator are further evidence of Bell's disregard of our policy of "full and fair competition." An AT&T memo dated November, 1973, stated that Datran's "Preliminary Rate Schedule" indicated that Datran's end-to-end charges for 2.4 Kbps service would be "almost double" those in AT&T's Test Rate 6. Thus, AT&T had the actual rate schedule in its possession, but chose not to use those rates, but rather lower ones, in its simulation. If AT&T had any question as to whether or not Datran's test rates were subject to change, it could have resolved the issue in a manner that avoided the question of fair competition.

88. Moreover, we have found that Bell's rates were below cost, and were thus effectively anticompetitive. See "Ben-Hur Coal Company v. Wells," 242 F. 2d 481 (1957) and "United States v. National Dairy Corp.," 372 U.S. 29 (1963); 15 U.S.C. 13a, c. 592, 49 Stat. 527, (June 19, 1936). We have already concluded that AT&T priced DDS below costs, using both the LRIC and FDC costing methods.[f] We also found that Bell's pricing below cost is a direct consequence of its understatement of cost and overstatement of demand.[g] See paragraphs 42, 52, *supra*. For example, a comparison of AT&T's forecasts in the record and actual revenues, as given in its Transmittal No. 12497, filed January 22, 1976, indicates that total DDS revenues were overestimated by 510 percent. This overstatement is partially attributable to AT&T's use of annualized revenues instead of actuals. In addition, AT&T's estimation of demand was skewed by its failure to account for the impact of the recent economic recession on demand.

89. According to AT&T, DDS employs a digital network, founded in a new technology, separate and distinct from the analog system of which TELPAK is a part. Consequently, we found the use of TELPAK ratios resulted in an unjustified statement items (paragraph 47). In addition, we concluded that an understatement of costs resulted from AT&T's failure to account for inflationary trends, and its exclusion of most research and development, and start-up costs associated with DDS (paragraph 44). Moreover, we noted that since the fill factor has a critical function in the allocation of common interexchange plant, the use of high and unsubstantiated fill factors contributed to the understatement of costs (paragraph 35). For instance, a change in the fill factor assumption from 90 percent to 80 percent would result in an increase in the amount of common interexchange plant allocated to DDS by $3.1 million for 96 cities in 1976, using AT&T's data from its January, 1975 tariff filing. AT&T provided no reason for its selection of a 90 percent fill factor, and asserted that the necessary studies to find the accurate fill factor would be too time consuming and unwarranted and thus refused to file them.

90. We find that the resolution of the issue herein is consistent with and integrally related to Commission policy enunciated in numerous decisions.[h] The economic ramifications of this policy were examined recently in the "Matter of Economic Implications and Interrelationships Arising From Policies and Practices Relating to Customer Interconnection, Jurisdictional Separations and Rate Structures, Docket No. 20003," FCC 76–879 (released October 1, 1976).[i]

In these cases, we stated our intention to follow a liberal policy of "open-entry" in this area and, "the findings and philosophy reflected in our Specialized Common Carrier decision are relevant and apposite here and support a competitive environment for the development and sales of the type of services proposed. See generally, Kestenbaum, Competition in Communications, 16 Antitrust Bulletin 769, 771–77 (1971). Mewer, Recent Federal Actions Affecting Long Distance Telecommunications: A Survey of Issues Concerning the Microwave Specialized Common Carrier Industry, 43 Geo. Wash. L. Rev. 878 (1975).

[i] As a result of our study in Docket 20003, we concluded that no economic justification existed for a change in our policies regarding private line competition. We found that at the end of 1975, nine specialized common carriers were operational, with operating revenues of $34,944,000, as contrasted with Bell's private line operating revenues of $1,479,473,000. We made mention of the fact that these carriers were concentrating on the market for point-to-point analog transmission channels. However, these analog channels could easily be configured into private line data networks, by the use of terminal and modem equipment currently available from interconnect suppliers. Thus, we found that the telephone industry, including AT&T and the independent telephone companies, have been experiencing a period of record growth in revenues and earnings, even despite the recent inflationary and recessionary trends in the economy. During the second quarter of 1976, operating revenues for these companies representing more than 95 percent of the industry were up 11–18 percent over the same quarter in 1975—an amount typical of the past several years. For the same period, net income was up 12–22 percent over the corresponding 1975 results, while earnings per share were up 15–20 percent. Furthermore, th telephone companies dominate the industry by a wide margin, receiving $35.1 billion, or about 97 percent of total industry revenues, in 1975. Even in the private line and terminal quipmnt markets, (the only areas open to competition) the telephone industry received $4.1 billion or 95.5 percent as compared with $194 million, or 4.5 percent for the competitive industry.

[j] Justice Frankfurter, at page 93, writing for the majority in RCA, states that where the Commission has favored competition, it has relied not upon competition for its own sake but upon specific findings that public interest benefits—such as better service, lower costs and wider consumer choices—would result. Cf. "Domestic Communications Satellite," 35 FCC 2d 844, 38 FCC 2d 665 (1972).

[k] We note that our Designation Order required AT&T to permit resale and shared use of DDS by all communications common carriers. AT&T filed its Tariff F.C.C. No. 260 offering DDS facilities for use by other common carriers. The question presented here is whether the public DDS tariff, F.C.C. No. 267, must permit unlimited resale and sharing.

In reaching the conclusions adopted in those decisions, we did so under the legal standards established in "FCC v. RCA",[j] 346 U.S. 86 (1953), "U.S. v. RCA", 358 U.S. 334 (1959), as well as in "Hawaiian Telephone v. FCC", 498 F. 2d 771 (1974). Our decisions herein is limited to a factual determination of whether or not certain conduct of AT&T associated with its DDS tariff is of an anticompetitive nature, in contravention of Commission Rules and Regulations.

91. AT&T's actions herein evidence a clear contravention of Commission policies. We find Bell's conduct an impediment to competition in the private line data communications market, in contravention of the competitive policy we adopted in the "Specialized Common Carrier" decision. We make no finding as to predatory or anticompetitive intent in relation to this service offering. A finding on this question is unnecessary for the performance of our regulatory duties which, in this case, are to determine the lawfulness of the subject tariff.

V. RESALE AND SHARED USE

92. The provisions of AT&T's Tariff 267 restrict resale of DDS to Composite Data Service Vendors (CDSVs) (Sec. 2.2.5 (A)) and prohibit shared use by all communications common carriers (Sec. 2.2.5(B)(2)).[k] Based on the record of this proceeding, the ID found these pro-

---

[a] AT&T, Datran, the TFial Staff, DOD and Telenet.

[b] Pursuant to our authority in sections 4(i) and 201(b) of the Act, we adopted the rule of "full and fair competition" announced in the Specialized Common Carrier decision, *supra*.

[c] Two competitive necessity criteria have been accepted in justification of rates which are not fully compensatory. See TELPAK, 38 FCC 370 (1964), 37 FCC 1111 (1964), aff'd sub nom. "American Trucking Assn., v. FCC," 377 F.2d 121 (D.C. Cir. 1966), cert. denied, 386 US 943 (1967).

[d] In our Docket 18128 Decision, we noted that even in the more established market of the TELPAK offering, growth in specialized carriers and satellites is not a sufficient competitive threat to Bell. "While growth in specialized carriers and satellites might justify such a competitive response in the future, this uncertain probability is not sufficient to justify the present TELPAK offering.

[e] This schedule, which was apparently taken from Datran's marketing brochures, was set out in an internal memorandum which, it appears, was written by the official of AT&T whose job it is to determine the competitors' rates.

[f] Below cost sales *per se* are not condemned when made in furtherance of a legitimate commercial objective, such as the liquidation of excess, obsolete, or perishable merchandise, or the need to meet a lawful, equally low price of a competitor, because such below cost sales are neither "unreasonably low" nor made with predatory intent. See "Hershel California Fruit Products Co. v. Hunts Food, Inc.," 111 F. Supp. 732 (1953). We find no such mitigating circumstances in the case before us.

[g] We note that AT&T had, at one time, initiated a 98 percent sample of the potential data communications market to determine the expected demand for DDS. The project, known as "Project A," was apparently abandoned at some stage, and no results have been reported. We have two difficulties with the report of this project. First, it appears to be a preselling of DDS, which in itself is anticompetitive. Second, the study was apparently partly conducted, but we have no way of knowing whether the partial results are consistent with the overstated demand projections submitted in this proceeding.

[h] See Specialized Common Carrier, supra, aff'd Washington Utilities and Transportation Commission v. FCC, 513 F. 2d 1142 (1974); Cf. Bell Telephone of Pennsylvania v. FCC, 503 F. 2d 1250 (1974); cert. denied, 423 U.S. 896; Cf. American Trucking Association v. FCC, 37 F. 2d 121 (1966); compare, Land Mobile Service Between 806 and 960 MHz, Docket No. 18262, 46 FCC 2d 752, 760–61 (1974) (in order to avoid the danger of anticompetitive action on the part of the wireline companies, the Commission required these companies engaging in land mobile services to establish a wholly separate operating company); Cf. Packet Communications, Inc., 43 FCC 2d 922 (1973), Graphnet Systems, Inc., 44 FCC 2d 800 (1974) and Telenet Communications Corp., 46 FCC 2d 860 (1974).

visions to be unjust and unreasonable. AT&T contends that no need exists to consider the ID's finding on the resale and shared use issue, since the lawfulness of these Tariff 267 provisions has been determined in the Commission's "Report and Order" in Docket No. 20097, 60 FCC 2d 261 (1976). AT&T has filed petitions for stay and reconsideration of that decision.

93. We acknowledge that the lawfulness of the resale and shared use provisions in Tariff 267 was considered as part of our general policy determination in Docket No. 20097. 60 FCC 2d at 295. We found therein that the restrictions in the resale provisions of Tariff 267 are unduly discriminatory and that the tariff should allow unlimited sharing and resale of DDS to be just and reasonable. 60 FCC 2d at 296.[51] As we stated in the Designation Order, the technical and economic aspects of more widespread resale and shared use for DDS would be considered in this investigation independently from the policy determinations in Docket No. 20097. 50 FCC 2d at 512.

94. Since, as we have found in Docket No. 20097, unlimited resale and shared use of all competitive services is generally deemed just and reasonable and in the public interest, a tariff provision restricting such use must be judged on the basis of whether unlimited resale or sharing would result in public detriment. AT&T has provided no information or data in this proceeding to demonstrate any such adverse effect. In addition, AT&T did not allege that it would experience negative economic impact or that technological problems would result from unlimited resale and shared use of DDS.

95. AT&T's Tariff F.C.C. No. 268 contains the rates and conditions of service for digital facilities provided to other common carriers (OCCs). Tariff 268 provides for unlimited resale and shared use of DDS by the OCCs, as required by our facility authorizations, and has been in effect since February 16, 1975. Yet AT&T has alleged neither adverse economic impact nor technological problems resulting from the effectuation of this provision. The difference in the resale and shared use provisions in Tariff Nos. 267 and 268 clearly demonstrates that the customers of the same AT&T provided service are subject to dissimilar resale and shared use policies, pursuant to the two tariffs.

96. We conclude that AT&T has failed to demonstrate that any public benefit results from its restricted resale and shared use provisions. Likewise, AT&T has not shown that any economic or technological problems would result if the limitations were removed. Also, the difference in treatment of Tariff 267 and 268 customers is clearly discriminatory. On the basis of these findings, we are prescribing the resale and shared use provisions of AT&T's Tariff 268 (Sec. 2.2.1 (A)) for AT&T's Tariff 267 to replace the present restricted use provisions (Sec. 2.2.5 (A) and (B)).[52]

[51] Our decision ordered the subject common carriers to revise their tariffs and to eliminate restriction on the resale and shared use inconsistent with our policies. The deadline for filing such revisions has been deferred.

VI. Remedies

97. As we have found, the present DDS rates are unjust and unreasonable, in violation of Section 201(b) of the Act. Further, from the cost studies submitted in compliance with our initial grant and filed in support of W–P–C–433, the application to expand the facilities, we have found that the rates are not compensatory under a fully distributed cost analysis. We therefore find that the rates for DDS are unreasonably low and are being cross-subsidized by users of other AT&T services.

98. In other recent rate proceedings in which we have found the rates unreasonable, "Hi-Lo," 58 FCC 2d 362 (1976), and "WATS," 59 FCC 2d 671 (1976), we have permitted AT&T to file new rates and have retained the existing rates until the new filing becomes effective. In these other cases we found the rates unjustified, but the information in the record was insufficient even to find whether rates were to low or too high. In this case, however, we cannot justify retention of rates found to be unlawfully low for the period of time required for AT&T to prepare a full rate filing.

99. Further, we must agree with the ID that we have too little information of any probative value to enable us to prescribe new rates, even for an interim period.[53] However, it is clear that we cannot permit the service to continue to be offered at such an unreasonably low rate that the users of other services are clearly burdened.

100. We further cannot accept the recommendation in the ID that we prescribe the rates for comparable analog services for the interim until AT&T submits a new rate filing. As noted, we have no record on which to determine that those rates would be any more reasonable for this service than the existing rates. Further, the present rates for analog services (at 2.4, 4.8 and 9.6 Kbps) are at issue in our Docket No. 20814, and the overall rate levels of such private line services have themselves been found to be deficient in Docket 18128, *supra*.

101. Therefore, until such time as AT&T can prepare and file a new tariff offering for DDS which meets the criteria established in Docket 18128 and herein,[54] it can offer DDS only at rates which are designed to earn no less than 9.5 percent, the presently authorized rate of return of the Bell System (57 FCC 2d 960 (1976)). In calculating this return, AT&T shall use the Fully Distributed Cost, Method 7, allocations on which it based its FDC–7 special studies filed on March 31, 1976. For the purpose of this filing, since we realize that preparation of a new market study is very time-consuming, we will accept an assumption of the present market and rate of growth during the period in which the interim rates are in effect. We shall also not require AT&T to furnish the extensive cost justification normally required for a tariff filing. The filing may include the use of costs as specified in the special cost studies which have been filed or are presently being prepared, that the rates filed will be compensatory within the interim period.

102. If AT&T does not submit an acceptable replacement filing which becomes effective within sixty days after publication of this Decision in the Federal Register, its Tariff FCC No. 267 will be cancelled. If the carrier wishes to offer an end-to-end digital service after that date, it may do so within the present rate structure of its Tariff FCC No. 260, Series 2000, 3000 and 8000.

103. We believe that the requirement outlined above will permit AT&T to continue to offer DDS while not burdening its customers for other services by a service which is not compensatory. We also find this will accomplish the same result as that sought to be accomplished by the ID while retaining DDS as a separate classification of service.

VII. Procedural Questions

104. Several procedural matters have been raised which require our attention. The Trial Staff, Datran and IDCMA take exception to the ID (para. 26, fn. 15) insofar as it granted AT&T's motions to strike portions of their Proposed Findings and Conclusions. AT&T's motions were initially denied by decision of the Administrative Law Judges, FCC 76M–452 (released April 9, 1976), on the basis that the alleged frailties in the Proposed Findings should properly be treated in AT&T's Reply Findings. AT&T then incorporated its motions into its Reply Findings and the ID denied the motions only to the extent that the material AT&T sought to have stricken was incorporated in the ID.

105. The Trial Staff and IDCMA both argue that the lack of specificity of the ID ruling in question creates uncertainty as to which portions of the Proposed Findings are incorporated or stricken. The Trial Staff also asserts that the lack of reasons for striking given in the ID raises questions of denial of due process. All three parties claim that AT&T's motions are without merit since they do not indicate specific substantive or procedural defects in the Proposed Findings. The parties further maintain that their pleadings did not constitute new evidentiary material, but regardless, they argue that AT&T had the opportunity to respond in its Reply. On the other hand, AT&T maintains that it has demonstrated the Proposed Findings in question were not based on evidence of record and should be stricken.

[52] If AT&T can specifically justify different conditions or rates for OCCs based on costs or other criteria, we will reconsider our prescription.

[53] We note again that AT&T was required as a condition to its section 214 grant to report costs of providing DDS, a condition that was not met for over one year. If AT&T had in fact reported its costs from the first, as required, we may have had a sufficient record from which to determine reasonable rates.

[54] We expect such a filing to be made at the time AT&T submits its other rate filings in compliance with the Docket 18128 Decision.

106. The disposition of AT&T's motions to strike has created some confusion. The terminology used by the Administrative Law Judges gives the impression that if a specific finding was not stricken, it was accepted and incorporated in the ID. We do not find that this conclusion necessarily follows. It is not apparent from the ruling in question whether any material whatsover was stricken. However, upon review of the Proposed Findings and AT&T's motion, it is evident that the ID ruling does not result in material being stricken which is considered controlling in the disposition of any issues in this proceeding. Thus, we find nothing to warrant the striking of the Proposed Finding of the Trial Staff, Datran or IDCMA. We will therefore reverse the ID insofar as it granted any portion of AT&T's motions to strike.

107. In addition, IDCMA raises objections to two rulings of the Administrative Law Judges during the course of this proceeding: a September 19, 1975 decision disallowing several of IDCMA's final interrogatories; and a December 8, 1975 ruling not requiring AT&T to supply certain cost data specified by IDCMA. IDCMA neither alleges nor demonstrates any harm or injury resulting from the two rulings. Also IDCMA does not show how the outcome of this proceeding would be changed if the rulings had been reversed. Thus, we will deny as moot IDCMA's exceptions to the rulings in question.

Conclusions

108. We have set forth above our reasons for finding that AT&T's Tariff FCC No. 267 is unjust and unreasonable. We have found that AT&T substantially overstated the market for DDS and that the resultant revenue projections and demand forecasts were likewise overstated and unsubstantiated. In reaching these results, AT&T employed unjustified market simulation methodology to forecast demand and revenues for DDS. We have also determined that AT&T understated the costs, including both investment and expenses, of providing DDS. This conclusion was based on our evaluation of AT&T's LRIC and FDC–1 and FDC–7 studies, which utilized projected costs. We have found these studies to be methodologically deficient in many important respects. Since these studies were based on overstated revenue forecasts and understated costs, we found that AT&T's DDS rates were inadequately justified and that they were clearly non-compensatory.

109. We further found the DDS rate structure to be unjust and unreasonable. Specifically, we determined that the various rate elements of the service or individual speeds of service were not adequately cost justified. Further, we found that AT&T did not substantiate the lawfulness of its orderly progression in rates by speed, as a departure from cost-based rates. Additionally, we found that reliance on cost of service principles is the appropriate standard for determining the proper DDS rate level and rate structure, and rejected the use of opportunity costs for this purpose.

110. We also independently considered the effect of our Decision in Docket 18128 on the subject DDS tariff. On the basis of our rejection of the use of LRIC studies for determining private line service rate levels in Docket 18128, we have found AT&T's LRIC analysis as a means of justifying the DDS rate level to be inappropriate. In accordance with our Docket 18128 Decision, we also have found that DDS should earn a rate of return within the range prescribed for AT&T as a whole within a reasonable time, as well as recover revenue shortfalls incurred during the developmental stage of service within a specified time.

111. We have also stated our finding that DDS and analog data service are like communication services within the meaning of section 202(a), but that sufficient evidence of record existed to accept tentatively AT&T's service offered pursuant to its Tariff No. 267 as a separate classification of service until AT&T files a new permanent DDS tariff.

112. We have also set forth our reasons for determining that the DDS rates and certain associated practices of AT&T were anticompetitive in effect and in violation of our policies of "full and fair competition."

113. We have found the restricted resale and shared use provisions of AT&T's Tariff 267 are unjustified and discriminatory in relation to the different resale provisions found in AT&T's Tariff 268. We have prescribed the resale and shared use provisions of Tariff 268 for Tariff 267 to replace present restricted use provisions.

114. Finally, we have found that the rates for DDS are unreasonably low and are being cross subsidized by users of other AT&T services. Therefore, we found that AT&T can continue to offer DDS only at rates which are designed to earn a rate of return of no less than 9.5 percent, calculated on present FDC–7 allocations. However, we found that such interim rates can remain in effect only until such time as AT&T files fully justified rates, in accordance with the criteria established herein and in Docket 18128.

115. The Commission will stop short of a legal sanction but is duly noting the fact that AT&T has clearly disregarded its specific order to retain and report on a regular basis its actual costs of providing DDS. The lack of probative cost data is a significant factor in our inability to determine just and reasonable rates for this service.

116. Accordingly, we conclude that the rates and conditions of AT&T's Tariff FCC No. 267, as specified herein, are unjust, unreasonable and unlawful, in violation of section 201(b) of the Communications Act. We further conclude that the public interest would be served only by eliminating the cross-subsidization inherent in the unreasonably low tariff at the earliest practicable time. Accordingly, we require AT&T to file an interim tariff offering Dataphone Digital Service at rates designed to yield a 9.5 percent return, as provided herein, no later than February 22, 1977, effective on thirty days' notice. We also require AT&T to develop a fully justified tariff for the service offering which it must file no later than the time it submits the other private line tariff filings in compliance with our Decision in Docket No. 18128, FCC 76–886 (released October 1, 1976). The DDS filing must meet the requirements of that Decision as well as the following guidelines.

117. In terms of Market and Demand Data, AT&T should provide the following:

(1) Market quantities for DDS by rate element and speed. These should include one year of actual results by month and three years of year-end projections. This information should be on a consistent time frame with cost information as provided below. Tariff No. 268 quantities should be reported separately.

(2) DDS operating revenues by rate element and speed, including one year of actual revenues by month and three years of projected annual revenues. Revenues should indicate recurring and nonrecurring revenues separately. Tariff 268 revenues should be reported separately.

(3) The number of digroups between each pair of DSA's and corresponding fill by speed, including year-end actuals and year-end projections for 3 years reported for a time frame consistent with other requirements herein.[55]

(4) The number of DAL–2 end offices and associated market quantities by DSA, including year-end projections for 3 years reported for a time frame consistent with other requirements herein.

(5) Reports of any unmet demand within existing network because of insufficient facilities.

(6) Projections and results of tests as provided in Appendix I for computerized market simulator, if employed.

(7) Present market quantities for other private line data services in a disaggregated form which shall be comparable to DDS market quantities.

(8) The amount of revenues foregone by existing services due to DDS as well as market quantities, including total annual amounts for actuals and 3 year projections.[56]

118. In terms of cost data, AT&T shall provide the following information:

(1) Investment and expense data by rate element and speed, including annual actuals as well as 3 year annual projections. Directly attributable as well as any non-directly attributable costs shall be provided.

(2) Justification of any proffered facility fills and accompanying engineering support data.

(3) Cost projections should reflect and separately account for:

(i) Increases in market quantities;

(ii) Increases due to inflationary trends;

[55] This will assist us in determining the feasibility of permitting expansion of the service beyond existing points.

[56] Items 7 and 8 may be supplied in a form similar to that in AT&T's initial tariff § 61.38 filing.

(iii) Cross-elastic demand and cost effects of rate changes in DDS and other services;

(iv) Directly attributable and non-directly attributable cost.

(4) Cost and revenue projections for DDS network in-place or to be in-place at time tariff changes are to become effective.

(5) All costs should be annual data.

(6) If cost ratios are employed they should be separately developed for DDS and fully supported. Support shall include source of information used as well as actual figures used to derive cost ratios. Ratios should also reflect annual data. Justification should be provided for the ratios for each year so employed.

119. All of the above requested market and cost information shall be provided at the time AT&T files DDS rates in accordance with revised FDC–7 and revised FDC–1 methodologies and in all subsequent filings.

120. We also require AT&T to fully justify that DDS and analog data services are in fact reasonable separate classifications.

121. *Accordingly, it is ordered,* That, pursuant to section 201(b) of the Communications Act, 47 U.S.C. 201(b), AT&T's Tariff FCC No. 267 is found unlawful as indicated herein, and is null and void.

122. *It is further ordered,* That, pursuant to section 408 of the Communications Act, 47 U.S.C. 408, this Decision shall become effective March 22, 1977, insofar as it relates to cancellation of the existing tariff.

123. *It is further ordered,* That AT&T shall file an interim tariff no later than February 22, 1977, on thirty days' notice, as provided herein.

124. *It is further ordered,* That AT&T shall subsequently file a fully justified tariff, as specified herein.

125. *It is further ordered,* That Docket No. 20288 is terminated.

126. *It is further ordered,* That all outstanding interlocutory motions are dismissed as moot.

FEDERAL COMMUNICATIONS[*] COMMISSION,
VINCENT J. MULLINS,
Secretary.

APPENDIX I—AT&T'S MARKET SIMULATION MODEL

1. AT&T submitted two market simulation studies, one filed in March, 1974 and the other in January, 1975. In order to quantitatively estimate the market for DDS, AT&T first identified that portion of the existing Bell System interstate communications market which it felt could potentially use DDS. The Bell System 1972 Interstate Private Line Inventory was the primary data source used in making this determination. After identifying this potential market for DDS, AT&T estimated the shifts from AT&T's other services to DDS that would occur at each of the proposed test rates. Next, AT&T estimated the market for DDS in the presence of competing carriers.[1] The test rates for 2.4, 4.8, 9.6 and 56 Kbps were simulated independently. The results of these separate runs were then adjusted by market distribution factors combined with factors for estimated growth rates, simulation effects, and maturation lags, in order to size the individual results according to the mix of speeds estimated to exist for the year under study.

2. The second study modified the inputs used for the first and recomputed revenues. Changes included the following:

a. The addition of Test Rate 11 (TR 11), reflecting rate levels generally 30 percent higher than TR 6 (the tariffed rates), to replace TR 10.

b. Use of actual, current rates and geographical locations of service for Datran, MCI, and SPCC as reflected in their respective tariffs.

c. Additional input to reflect alleged competitive impact of domestic satellites.

d. Modem run only for 1976 and 96 cities.

For a detail tabulation of the input variables to Bell's market simulation, see Table I below.

TABLE I—INPUT VARIABLES TO BELL MARKET SIMULATION

I. Identity of Potential Users:
  A. Private Line Customers.
    1. Low Speed (2.4 Kbps) Users.
    2. Medium Speed (4.8 and 9.6 Kbps) Users.
    3. High Speed (56 Kbps) Users.
  B. Common Users.
II. Growth Rates for Industry:
  A. User Base Growth Rates.
    1. Private Line Customers.
      a. Low.
      b. Medium.
      c. High.
    2. Common Users.
  B. Geographic Patterns for Network Expansion.
  C. Speed Mix Characteristics of Demand.
  D. User Adoption Rates (Maturation Factor).
  E. Stimulation Effect.
III. Behavior of Competitors:
  A. Geographical Coverage.
  B. Tariffs for Datran and Other SCC's.
IV. Behavior of Potential Customers:
  A. Total Charges.
  B. Buy-up Factor.
  C. Price Trade-offs Between Dataphone Digital Service and Specialized Common Carrier Services.
  D. Price Trade-offs Between Bell System Analog Users and Datran.
V. Elements of the Tariffs:
  A. DAL's in DSA's.
    1. DAL 1.
    2. DAL 2.
  B. Channels Between Cities.
  C. Miscellaneous Elements.
    1. DSU.
    2. MSA.
    3. Off-Net Extension Adaptor.
    4. Maintenance of Service Charge.

3. *Validation of Bell's Market Simulation.* It is crucial that we examine the structure, assumptions, and limitations of AT&T's model to evaluate whether the simulator is a reasonable approximation of reality.

4. While no single method exists to determine the reasonableness of a simulation model, a variety of tests can be used to evaluate both the inputs and outputs and then reach a determination as to the validity of the model. The procedures we will use in evaluating these input variables as well as the model's outputs are contained in Table II, below. While these procedures are drawn substantially from the Trial Staff's findings, we note that no conflicting findings on this particular matter were offered by any of the parties involved. The ID also supports this approach. In addition, we note that AT&T has supplied no information in this proceeding indicating the procedures used to validate its simulation model. Hence, we find that AT&T has failed to meet its burden of demonstrating the reliability and reasonableness of its market projection for DDS.

5. *Simulation Input.* We will first examine the necessity and sufficiency of the input variables and then the reasonableness of their parameter values. However, our discussion will be limited to those inputs disputed by the parties involved in this proceeding. The disputed input variables include the stimulation effect, the buy up factor, the behavior of competitors as it relates to satellite communication, and the omission of an explicit variable reflecting the influence of national economic conditions on demand for DDS.

6. The stimulation effect was included in the model, because, in Bell's judgment, DDS with its better quality of performance would be certain to stimulate growth above and beyond the "normal" growth rate experienced in the data communications market. The Trial Staff, as well as other parties have argued that no empirical evidence supports the existence of such a factor, let alone its assumed magnitude. While we do not doubt the offering of DDS will generate new customers for that service and siphon off customers from other data communications services, it does not necessarily follow that the existence of DDS will stimulate interest in other data communications services, especially in light of the magnitude of AT&T's assumed shift of present data service customers to DDS.

TABLE II.—PROCEDURES TO EVALUATE SIMULATIONS

I. Validation of Simulation Input Data:
  A. Appropriateness of Input Variables.
    1. Necessity of input variables.
    2. Sufficiency of input variables.
  B. Appropriateness of Assumptions Regarding Parameter Values of Input Variables.
    1. Relevance of supporting data to input variables.
    2. Accuracy of supporting data.
II. Validation of Simulation Output Data:
  A. Comparisons with Real World Process.
  B. Sensitivity Analyses of Output to Systematic Changes in Input Variables.
  C. Stability Tests of Simulation.
  D. Internal consistency of intermediate outputs.
III. Validation of Simulation Model:
  A. Acceptable Results for I and II above.
  B. "Theoretical" Soundness of Model.
  C. Proper Implementation of Model.

7. AT&T included a buy-up factor because it assumed customers would be willing to pay a premium for DDS with its better performance and improved reliability. The Trial Staff and others argue that findings from a Bell study undermine this assumption. Because no details as to how Bell conducted this study are available, we cannot accurately judge the results. However, we do acknowledge the possibility of a buy-up factor for new customers. We would not, however, expect the buy-up factor to have as significant an effect on present data communications users because of potentially costly system reconfigurations in switching from an analog to digital network and capital expenditures for digital terminal equipment by customers having their own equipment. Hence, while a buy-up factor in some form may be necessary, AT&T has neither justified its present form nor provided an acceptable justification for its magnitude.

8. AT&T also included the competitive effect of satellite data communications on DDS as an input. This was justified by evidence that devices are being developed to improve the transmission capabilities of data over satellites and protocols which would support full-duplex operations on satellites would be available prior to 1976. Datran, among others, argues an alleged ½ second delay associated with satellite transmission combined with the current inefficiencies of line protocols presently in use will inhibit the movement of data communications users to satellite facilities until about 1980. We find that the problems raised by Datran with respect to satellite transmission protocols were capable of being resolved in the 1974–1976 time frame. However, we also affirm the ID's finding (paragraph 64) that widespread use of satellites for data communications was not likely during the time frame under consideration.[2] We regard as suspect the inclusion of the satellite effect only in the second model, even though domestic satellites were beginning to offer services by March 1974. Inclusion of this alleged competitive threat would tend to support a lower "optimum" test rate than would otherwise be the case.

9. AT&T has argued that while the simulation model does not explicitly include an input variable reflecting the impact of national economic conditions on the demand for DDS, such a variable was implicitly considered in the formulation of expected growth rates for the various data services. The Trial Staff and others argue that such a factor must be explicitly taken into account, especially considering the recessionary conditions of the past few years. We cannot determine from the record whether AT&T did implicitly account for general economic conditions. Given their importance on the potential demand for DDS, we find that it is incumbent upon AT&T to specifically account for such conditions. We also find that AT&T's simulation model is deficient with respect to the appropriateness of its input variables for the reasons stated above.

10. Disputes among the parties exist concerning the appropriate parameter values of input variables. The parameter values in dispute include: (1) Medium speed user base growth rate; (2) common user base growth rate; (3) speed mix; (4) maturation factor; (5) SCC's tariffs; (6) price trade-offs of customers; (7) SCC's geographical coverage; (8) AT&T's share of DSU market; (9) stimulation effect; (10) buy-up factor; and (11) presence of satellite competition.

11. In order to estimate the rate of growth in demand for the medium speed DDS market, AT&T relied on estimates furnished by several independent research firms. These estimates indicated the growth potential for data communication based on the expected number of data terminals to be in use in the future. AT&T also used the historical rate of growth in the April Bell System Interstate Data Revenues for 1968–1973, as inputs into the selection of a medium speed user base growth rate. Accordingly, AT&T determined that a mid-range growth of 30 percent per year for 1974 through 1976 was appropriate. The Trial Staff and others argue that this growth is significantly overstated and cite April to April growth rates for 1973–74 and 1974–75 of 14 and 17 percent respectively as evidence of this overstatement.

12. A more fundamental criticism of the estimate is Bell's choice of information for estimating this expected growth rate. First, AT&T relies on outside studies whose accuracy and rigor were not evaluated by Bell. Second, AT&T neither adjusted its own revenue data to take into account rate increases nor used 12 month data, which would yield more stable and accurate results than the arbitrary examination of a single month per year. Finally, AT&T ignored 1974 data for interstate Data Revenues which showed a significant difference between its estimated growth for 1974 of 30 percent and actual growth of approximately 14 percent (unadjusted for rate changes). Due to apparently wide year to year fluctuations in the growth of the data communications market, the selection and use of a single figure for the expected future growth rate is inexact. Based on our own analysis, we find the growth rate for 1974 to 1976 to be between 15 and 30 percent, with the most likely value being 25 percent. Therefore, even though AT&T's estimated growth rate of 30 percent is at the upper limit of our zone of reasonableness, AT&T's support for such a figure is unsubstantiated.

13. The common user (Message Toll Telephone Service (MTS) and Wide Area Telecommunications Service (WATS)) base growth rate was also estimated by AT&T to be 30 percent per year from 1974 through 1976. The Trial Staff and others argue that since these common users were expected to switch only to the lower speeds of DDS, a more reasonable estimate of the common user base growth rate would be the growth rate assumed by AT&T for potential private line customers of low speed DDS, which was between 10 and 13 percent. While we have doubts as to the relevance of an assumption which presumes MTS and WATS customers to be potential customers of DDS,[3] WATS as a whole has grown approximately 30 percent per year. Since AT&T assumes that all potential switches will occur from WATS to DDS, we conclude that the assumed base growth rate for common users is reasonable. However, we are still doubtful of the relevance of considering monopoly service users for an acknowledged private line service.

14. The market distribution factors for 1974 through 1976 were estimated from information initially gathered in a 1970 data study which attempted to inventory the data communications market in 1970 and forecast it for the next five years. See paragraph 1, supra. The Trial Staff objects to the use of these factors and argues that "actual" results should be considered. However, the Trial Staff mistakenly considers the actual results to be the actual speed mix for all of DDS. Therefore, based on this erroneous assumption, comparison between the actual speed mix and AT&T's market distribution factors reflects a substantial difference. We cannot accept this as a valid comparison. AT&T never intended that its market distribution factors be indicative of the ultimate speed mix for DDS. These factors were merely an intermediate input in the determination of the ultimate mix. See paragraph 1, supra. However, Datran's comparison of AT&T's forecasted and actual distribution for 24 cities during the first year of DDS operation is as follows:

[In percent]

	2.4 Kbps	4.8 Kbps	9.6 Kbps	56 Kbps
Forecasted	62.1	14.3	12.[illegible]	11.[illegible]
Actual	5.8	23.4	56.0	11.[illegible]

We recognized the problems of comparing actual and forecasted results.[4] However, in this case, the actual results are at such variance with AT&T's forecasts that they suggest problems with the way in which the forecasted speed mix was derived.[5]

15. AT&T argued that potential users will not necessarily switch to DDS when it first becomes economically attractive. We find that this lagged condition seems likely; however, we find no justification for the reasonableness of the quantification of this maturation factor.

16. AT&T's assumptions concerning Datran's rates have been a point of contention in this proceeding.[6] In its initial simulation run, AT&T assumed lower rates for Datran's competitive services than those actually proposed by Datran. In its second run, AT&T used Datran's filed rates, but introduced a new variable to reflect alleged widespread satellite competition for data services. We have already determined that it was improper to consider potential effects on DDS within the 1974–1976 time frame. We now find that AT&T's treatment of Datran's rates constitute an improper justification of AT&T's proposed DDS rates.

17. AT&T assumes that customers would pay a 6 percent premium over Bell's analog services for Datran's all digital service. The Trial Staff and others argue that since this premium is similar to the buy-up factor, it too should be eliminated. We reject AT&T's use of a 6 percent premium on Datran's digital services on the basis that the figure was unsubstantiated in the record.

18. AT&T's estimates of the geographical coverage of the SCC's for 1974, 1975 and 1976 relied on filings with the Commission for microwave station construction applications and filed tariffs for those SCCs already in operation. Datran, among others, has argued that AT&T made overly optimistic assump-

[*] Commissioner Lee absent.

[1] Throughout this analysis, AT&T assumed that end-to-end communications charges are the major determinants in a customer's choice between available alternatives. AT&T also assumed that the services to be provided by DDS would be similar in operation to private line data communication services presently available.

[2] The facts to date have substantiated this contention. There is little evidence of widespread use of domestic satellites to transmit data.

[3] First Report in Docket No. 20003, FCC 76–879 (released October 1, 1976).

[4] We have noted and rejected AT&T's assertions as to why the actual revenue distribution differs significantly from forecasted distribution. See Decision, paragraphs 13–15.

[5] The use of outmoded 1970 data and projections and the inclusion of data terminals used at speeds of 200 to 1500 Kpbs as being representative of 2.4 Kbps DDS users are indicative of AT&T's bias in its determination of market distribution factors. The application of these factors, which heavily favored 2.4 Kpbs users, only to Series 3000—Type 3002 service (admitted by Bell to be principally composed of medium speed users) also biased the ultimate results of the model.

[6] AT&T's use of lower rates for its principal competitor, Datran, enables AT&T to justify lower rates for itself. This is a result of AT&T's ratemaking philosophy of setting rates to yield as large a contribution above relevant costs as practical, taking into account market conditions, rate relationships and other ratemaking factors. Thus, AT&T assumptions as to Datran's rates are crucial to AT&T's selection of DDS rates.

tions concerning service to intermediate cities on backbone rates, interconnection among the various SCCs, grant of construction applications, the availability of construction funds to SCCs, and the interval for completion of construction. We find that these assumptions have led AT&T to overestimate potential SCC competition. By overstating potential SCC competition, AT&T could more readily justify a lower "optimum" than would otherwise be the case.

19. AT&T assumed that its share of the market for Data Service Units (DSUs) would be 100 percent in the first year, 90 percent the second, and 80 percent the third. Furthermore, it assumed share of the DSU market would be the same regardless of the test rates. The latter assumption appears reasonable since the price of the DSU was the same for each test rate. However, we find AT&T's assumption as to its market share for DSUs to be without substantiation.

20. Since we have rejected herein AT&T's particular use of a stimulation effect, buy-up factor, and the presence of satellite competition, we need not reach the question of the reasonableness of the parameter values for these inputs.

21. *Simulation—Output.* We will examine how sensitivity analysis, stability tests, and internal consistency tests could have been used to evaluate the appropriateness of AT&T's present input data.[7]

22. If AT&T had conducted sensitivity analyses of the effects of systematic changes in the input data on the stimulator's output, a considerable amount of the controversy surrounding the validation of this input data would have been mooted. In other words, if the results of the simulator were insensitive to certain input data, then these input data would not require close scrutiny, thereby enabling all parties in this proceeding, including AT&T, to concentrate on validating those inputs to which the model was particularly sensitive. Computerized sensitivity analysis is a relatively simple and well established procedure, but AT&T chose not to perform such analyses, thus denying the other parties and the Commission data necessary to review the DDS tariff. The performance of stability tests and the examination of the internal consistence of intermediate outputs would not only have aided the Commission in determining the reasonableness of the simulator, but also could have proven useful to Bell management in its own evaluation of the simulator.

APPENDIX II

The effects of overstating market forecasts on rate making can be aptly illustrated with a hypothetical example. We will utilize a situation where a common carrier is providing the interexchange portion of a service. The carrier's market forecasts indicate that at a price of $10 per circuit-mile demand will be 100 circuit-miles. We assume either that the minimum amount of interexchange plant installed is 100 circuit-miles or that the carrier believes its market forecast and installs 100 circuit-miles. Based on a unit investment cost at $11 per circuit-mile and expenses at $9 per circuit-mile (for a total investment of $1,100 and total expense of $900), an average rate of return (using an 11 year life for plant and straight line depreciation) of 9.53 percent is calculated. If the carrier's market forecast proves to be actually overstated by 15 percent, at a price equal to $10 per circuit-mile, only 85 circuit-miles are demanded. However, the carrier has already installed 100 circuit-miles, hence investment and the majority of investment related expense remain constant. Revenues decline from $1000 to $900 while expenses only declined from $900 to $850, and the average rate of return is now zero percent. Thus, by overstating demand by only 15 percent, the filed rate of $10 per circuit-mile provides the carrier's investors with no return on their capital, and the service is non-compensatory.

The calculations for the examples are as follows:

Assume:
Filed Rate = P = $10/circuit-mile
Forecasted demand = Q_D = 100 circuit miles
Quantity supplied = Q_S = 100 circuit-miles
Actual demand = Q_A = 85 circuit-miles
Unit Investment Costs = I_1 = $11/circuit-mile
Unit Expense for 100 circuit-miles = E_1 = $9/circuit-mile
Unit Expense for 85 circuit-miles = E_2 = $8.50/circuit-mile

(1) Forecasted Demand:
Total Revenue (TR) = $P_1 \times Q_D$ = ($10/circuit-mile) × (100 circuit-miles) = $1,000
Total Expenses (TE) = $E_1 \times Q_S$ = ($9/circuit-mile) × (100 circuit-miles) = $900
Gross Investment = $I_1 \times Q_S$ = ($11/circuit-mile) × (100 circuit-miles) = $1,100
Net Investment = Gross Investment − Depreciation Reserve = 1,100 − 100 = 1000
Average Net Investment = (1,00+1000) ÷ 2 = $1,050

$$\text{Average Rate of Return} = \frac{TR - TE}{\text{Net}} = \frac{1000 - 900}{1050} = 9.53\%$$

(2) Actual Demand:
Total Revenue = $P_1 \times Q_A$ = ($10/circuit-mile) × (85 circuit-miles) = $850
Total Expenses = $E_2 \times Q_A$ = $850

$$\text{Average Rate of Return} = \frac{850 - 850}{1050} = 0.0\%$$

[FR Doc 77-1925 Filed 1-21-77;8:45 am]

[7] We note that AT&T's claim that sensitivity analysis is valid only for stochastic models is without foundation.

[Report No. 841]

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

JANUARY 17, 1977.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's rules and regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (See 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) The close of business one business day preceding the day on which the Commission takes atcion on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. (See §§ 1.227(b)(3) and 21.30(b) of the Commission's rules.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

20560–CD–P–(4)–77, The Pacific Telephone and Telegraph Company (KMD991). C.P. to change antenna system operating on 152.69 and 152.72 MHz and for additional facilities to operate on 152.78. Base and 158.04 MHz. Test located at 516 Third Street, Santa Rosa, Calif.

20561–CD–AL–77, Harrington Broadcasting Co. Consent to Assignment of License from Harrington Broadcasting Co., assignor to Petoskey Mobile Telephone Company, assignee. Station: KWH309, Emmet, Mich.

20562–CD–P–77, Northern Illinois Radio Phone and Paging Systems, Inc. (KSB590). C.P. for additional facilities to operate on 152.06 MHz at a new Loc. No. 5: 1100 ft. West of Martin Road on Southside of Street (Rt. No. 120), McHenry, Ill.

20563–CD–P–77, Messages By Radio, Inc. (new). C.P. for a new station to operate on 152.21 MHz to be located at 248 Tate Avenue. Buchanan, N.Y.

20564–CD–P–(2)–77, Northern Illinois Radio Phone and Paging Systems, Inc. (KTS200). C.P. to change antenna system and replace transmitter operating on 158.70 MHz at Loc. No. 1: 2526 North Harlem Aevenue, Elmwood Park; and to change antenna system operating on 158.70 MHz at Loc. No. 2: 1741 South O'Plane Road, Warren Township, Ill.

20565–CD–P–77, Radio Relay New York Corp. (KEC745). C.P. for additional facilities to operate on 35.22 MHz at a new Loc. No. 13: 20 Exchange Place, New York, N.Y.

20566–CD–P–77, Radio Relay Corp.-Michigan (KGI774). C.P. to relocate facilities and operate on 35.22 MHz at a new Loc. No. 10: 2000 Inkster Road, Inkster, Mich.

20567–CD–P–77, Radio Dispatch Company (KGI774). C.P. to relocate facilities and change antenna system operating at 152.06 MHz to be located at 18th and Walnut Streets, Philadelphia, Pa.

20568–CD–P–77, American Mobile Radio, Inc. (KMD344). C.P. for additional facilities to operate on 35.58 MHz at a new Loc. No. 2: San Pedro Hill, San Pedro, Calif.

20569–CD–P–77, Portable Communications, Inc. (KEK289). C.P. for additional facilities to operate on 454.325 MHz at a new Loc. No. 5: 740 Werner Road, Attica, N.Y.

20570–CD–P–(2)–77, Patterson Anserphone Communication Enterprises, Inc. d/b/a Answerphone (KIG841). C.P. for additional facilities to operate on 454.125 and 454.175 MHz at a new Loc. No. 4: 4812 Six Forks Road, Raleigh, N.C.

20571–CD–P–77, Radio Broadcasting Company (KWU290). C.P. for additional facilities to operate on 158.70 MHz at Loc. No. 5: 11 South Monroe Street, Hammonton, N.J.

20573–CD–TC–77, Phenix Communications Company, Inc. Consent to Transfer of Control from J. Frank Snellings, Jr. and Bertha Mae Snellings, transferor, to Reginald R. Cain, Jr. and Evelyn S. Cain, transferees. Station: KIJ351, Phenix City, Ala.

20574–CD–TC–(2)–77, Phenix Communications Co. of Georgia, Inc. Consent to Transfer of Control from J. Frank Snellings, Jr. and Bertha Mae Snellings, transferors, to Reginald R. Cain, Jr. and Evelyn S. Cain, transferees. Stations: KTS264, Columbus, Ga. and KUO603, Phenix City, and Columbus, Ga.

20575–CD–P–77, S. F. McNeill d/b/a Communication Specialists Co. (new). C.P. for a new station to operate on 152.24 MHz to be located at 3330 Wrightsville Avenue, Wilmington, N.C.

20576–CD–P–(3)–77, Beep Communications Systems, Inc. (new). C.P. for a new station to operate on 454.175, 454.200 and 454.225 MHz to be located at North Beacon Mtn., Beacon, N.Y.

20577–CD–P–77, Beep Communications Systems, Inc. (KEK287). C.P. for additional facilities to operate on 454.225 MHz at a new Loc. No. 3: 1 Strawberry Hill Court, Stamford, Conn.

20578–CD–P–77, Communications Engineering, Inc. (KWU236). C.P. for additional facilities to operate on 158.70 MHz to be located at 3201 C Street, Anchorage, Alaska.

20579–CD–AL–77, Alden Seitz and David K. Seitz d/b/a Mobilfone Exchange of Sandusky Consent to Assignment of License from Alden Seitz and David K. Seitz d/b/a Mobilfone of Sandusky, Assignor to David K. Seitz d/b/a Mobilfone Exchange of Sandusky, assignee. Station: KLF529, Columbus, Ohio.

RURAL RADIO

60133–CR–P/L–77, Pacific Northwest Bell Telephone Company (new). C.P. for a new Rural Subscriber station to operate on 157.86 MHz to be located 12 Miles West of Bend, Elk Lake, Oreg.

60134–CR–P–77, Hawaiian Telephone Company (new). C.P. for a new Central Office station to operate on 454.50 MHz to be located at 3038 Kuhio Highway, Lihue, Hawaii.

60135–CR–P–77, Hawaiian Telephone Company (new). C.P. for a new Rural Subscriber station to operate on 459.5 MHz to be located 2.40 miles NNW of Lihue Post Office, Lihue, Hawaii.

POINT TO POINT MICROWAVE RADIO SERVICE

979–CF–P–77, New York Telephone Company (KEF76), 413 East Fayette Street, Syracuse, N.Y. Lat. 43°02'55" N.—Long. 76°08'51" W. C.P. to add new point communication on frequencies 11605H, 11445V MHz toward Granby, N.Y., on azimuth 322.6 degrees.

890–CF–P–77, same (new), County Line Road, Granby, N.Y. Lat. 43°14'01" N.—Long. 76°20'29" W. C.P. for a new station on frequencies 11155H, 10995V MHz toward Syracuse, N.Y., on azimuth 142.4 degrees and 10955H, 10875V MHz toward Scriba, N.Y., on azimuth 334.1 degrees.

981–CF–P–77, same (new), Bryns Road, Scriba, N.Y. Lat. 43°25'48" N.—Long. 76°28'21" W. C.P. for a new station on frequencies 11405H, 11325V MHz toward Granby on azimuth 154.0 degrees, and 11365H, 11285V MHz toward Oswego, N.Y., on azimuth 306.2 degrees.

982–CF–P–77, same (new), 235 West Third Street, Oswego, N.Y. Lat. 43°27'00" N.—Long. 76°30'36" W. C.P. for a new station on frequencies 10915H, 10835V MHz toward Scriba, N.Y., on azimuth 126.2 degrees.

991–CF–P–77, American Telephone and Telegraph Company (KKN23), 1407 Jefferson Street, Houston, Tex. Lat. 29°44'45" N.—Long. 95°21'56" W. C.P. to add frequency 3890.0V MHz toward Fairbanks, Tex.

992–CF–P–77, same (KGP78), 2.4 miles north of Fairbanks, Tex. Lat. 29°52'03" N.—Long. 95°31'18" W. C.P. to add frequencies 3930.0V MHz toward Houston. Tex., 3930.0H MHz toward Spring, Tex.

993–CF–P–77, same (KGP77), 2.2 miles south-southwest of Spring, Tex. Lat. 30°02'54" N.—Long. 95°25'54" W. C.P. to add frequency 3890.0H MHz toward Fairbanks, Tex.

1001–CF–P–77, Millington Telephone Company, Inc. (new), Woodstock, 6 miles southwest Millington, Tenn. Lat. 35°17'47" N.—Long. 89°58'30" W. C.P. for a new station on frequencies 11345.0V MHz toward Memphis, Tenn., on azimuth 201.9 degrees and 11345.0V MHz toward Kerrville, Tenn., on azimuth 43.5 degrees.

1002–CF–P–77, same (new), 0.8 mile north of Kerrville, Tenn. Lat. 35°23'35" N.—Long. 89°51'47" W. C.P. for a new station on frequencies 11135.0V MHz toward Woodstock on azimuth 223.5 degrees, 10975.0V MHz toward Shelby Forest on azimuth 246.4 degrees, 10975.0V MHz toward Munford on azimuth 35.9 degrees, 10775.0V MHz toward Rosemark on azimuth 112.4 degrees and 10775.0V MHz toward Millington on azimuth 211.4 degrees.

1003–CF–P–77, same (new), 4880 Navy Road, Millington, Tenn. Lat. 35°20'31" N.—Long. 89°54'04" W. C.P. for a new station frequency 11665.0V MHz toward Kerrville, Tenn., on azimuth 31.3 degrees.

1004–CF–P–77, Millington Telephone Company, Inc. (new), Shelby Forest, 0.2 miles south of Cuba, Tenn. Lat. 35°20'54" N.—Long. 89°59'16" W. C.P. for a new station on frequency 11385.0V MHz toward Kerrville, Tenn., on azimuth 216.0 degrees.

1005–CF–P–77, same (new), Munford, Tenn. Lat. 35°26'56" N.—Long. 89°48'49" W. C.P. for a new station on frequency 11385.0V MHz toward Kerrville, Tenn., on azimuth 216.0 degrees.

1006–CF–P–77, same (new), Rosemark, Tenn. Lat. 35°21'43" N.—Long. 89°46'16" W. C.P. for a new station on frequency 11665.0V MHz toward Kerrville, Tenn., on azimuth 292.5 degrees.

MAJOR AMENDMENT

4965–CF–P–76, Northwestern Telephone Systems, Inc. (KPG64), Blacktail, Mont. Application amended to decrease emission designator from 33000F9 to 30000F9 for frequencies 11445V, 11685H MHz toward Charlo, Mont.

CORRECTIONS

219–CF–MP–77, American Microwave & Communications, Inc. (KQL 46), 0.5 mile West of Covington, Mich. (Lat. 46°32'02" N.—Long. 88°32'37" W.). This entry appearing in Public Notice of November 8, 1976, is corrected to read as follows: Construction permit to replace transmitters, change polarity and change frequencies to 6276.8H, 6308.4V, 6338.1H and 6397.4H MHz toward Bergland, Mich., on azimuth 281.7 degrees, to change polarity of frequencies to 6276.8H, 6338.1H, 6397.4H and to delete frequency 6308.4V MHz toward Houghton, Mich., on azimuth 356.4 degrees.

580–CF–P–77, Yankee Microwave (KYZ 85), Mt. Washington, Sargents Purchase, N.H. (Lat. 44°16'13" N.—Long. 71°18'13" W.). This entry appearing in Public Notice of December 13, 1976 is revised to read as follows: 6212.1H MHz toward Manchester, N.H. on azimuth 189.0 degrees and to delete 6212.1V MHz toward Saddleback, N.H., on azimuth 176.2 degrees.

508–CF–P/L–77, RCA Alaska Communications, Inc. (new), Tok Cathedral, Alaska. Correct file number to read 509–CF–P/L–77 for this entry. All other particulars remain as reported on Public Notice number 835. dated December 6, 1976.

Add: 508–CF–P/L–77, RCA Alaska Communications, Inc. (new), 794th ACWSQDN, APO Seattle, Cape Newenham, Alaska. Lat. 58°37'39" N.—Long. 162°04'25" W. C.P. for a new station on frequency 810 MHz toward Bethel, Alaska on azimuth 2.0 degrees. (This entry was inadvertently omitted from the December 6, 1976 Public Notice.)

EMERGENCY BROADCAST SYSTEM SCHEDULED

Closed Circuit Test

JANUARY 18, 1977.

A test of the Emergency Broadcast System (EBS) has been scheduled for Thursday, January 27, 1977 between 2:03:30 and 2:09:00 p.m., Washington D.C. time. Only ABC, CBS, NBC, IMN, MBS, and NPR radio network affiliates and UPI–Audio clients will participate. Television networks are not participating in this test.

Network affiliates will be notified of the test procedures via their network beginning four days in advance of the test. Test messages will also be run by AP and UPI radio press wire services for four days in advance of the test to issue wide dissemination of the test announcement and schedule.

Final evaluation of the January test is scheduled to be made by the end of February 1977.

THIS IS A CLOSED CIRCUIT TEST AND WILL NOT BE BROADCAST OVER THE AIR

Action by the Commission January 12, 1977. Commissioners Wiley (Chairman), Hooks, Quello, Washburn, Fogarty and White.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FM AND TV TRANSLATOR APPLICATION READY AND AVAILABLE FOR PROCESSING

Adopted: January 6, 1977.

Released: January 17, 1977.

Notice is hereby given pursuant to § 1.572(c) and 1.573(d) of the Commission's rules, that on March 2, 1977, the TV and FM translator applications listed below will be considered as ready and available for processing. Pursuant to §§ 1.227(b)(1) and 1.519(b) of the Commission's rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on March 1, 1977, which involves a conflict necessitating a hearing with any application on this list, must

be substantially complete and submitted for filing at the offices of the Commission in Washington, D.C., by the close of business on March 1, 1977.

The attention of any party in interest desiring to file pleadings concerning any pending TV and FM translator application, pursuant to section 309(d) (1) of the Communications Act of 1934, as amended, is directed to § 1.580(i) of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FM TRANSLATOR APPLICATIONS

BPFT-370 (new), Oshkosh, Omro and Winneconne, Wisconsin, Oshkosh Christian Business Men's Committee Req: Channel 221, 92.1 MHz, 1 watt. Primary: WRVM (FM), Suring, Wis.

BPFT-372 K221AE, Stanford, Mont., Stanford TV Association. Req: Change frequency to Ch-285, 104.9 MHz and change primary station to KLCM-FM, Lewiston, Mont.

BPFT-373 (new), Lead, S. Dak., Great Plains Leasing Corp. Req: Channel 288, 105.5 MHz, 1 watt. Primary: KKLS-FM, Rapid City, S. Dak.

VICINITY OF U.S./CANADA BORDER

Interim Criteria for Licensing Land Mobile Radio Systems in 806-890 MHz Band

By exchange of letters between the Commission and the Department of Communications of Canada, an interim arrangement has been agreed to for licensing U.S. land mobile systems in the 806-890 MHz band within 250 miles from the U.S./Canada border.

The interim arrangement had been worked out by a joint group of staff members from Canada's Department of Communications and from the Commission. This Joint FCC/DOC working group has been exploring possible alternatives for sharing the use of the frequencies in the 806-890 MHz band by the two countries along the border.

The 806-890 MHz band is allocated to the land mobile services in the U.S. In Canada, it is allocated for television broadcasting.

The interim arrangement provides for licensing U.S. land mobile radio stations so as to fully protect Canadian television assignments in the band and to preserve the opportunity for possible use of some of this spectrum for land mobile purposes closer to the border in Canada as well as in the United States.

The criteria for authorizing U.S. land mobile stations are as follows: 1. Base stations will not be authorized in areas closer than 100 miles from the U.S./Canadian border.

2. Within a zone 100 miles and 125 miles from the border, base stations will be authorized only after specific arrangements have been made between the Commission and the Department of Communications of Canada for the specific geographic areas.

3. Within the zone 125 miles and 145 miles from the border, base stations may be authorized with the maximum of 500 watts ERP at 500 feet effective antenna height, or the equivalent.

4. Beyond 145 miles from the border, base stations may be authorized with the power and antenna heights permitted by the rules (1000 watts ERP at 1000 feet effective antenna height, for "urban conventional" and "trunked" stations, and 500 watts ERP at 500 feet effective antenna height, or the equivalent, for "suburban conventional" stations).

5. Mobile stations will be authorized to operate at distances of 90 miles or more from the border. The maximum ERP for mobile units operating within the zone between 90 and 145 miles from the border must not exceed 200 watts. Land mobile systems will normally employ a duplex channeling plan so as to prevent mobile-to-mobile operations closer than 90 miles to the border.

6. Mobile units operating further than 145 miles from the border will be authorized to operate with powers prescribed by the rules.

7. All land mobile stations within 250 miles from the border will be authorized on condition that they cause no harmful interference to Canadian television stations operating in the 806-890 MHz band. Land mobile stations will not be afforded protection from interference from Canadian television stations.

8. For information purposes only, the Commission will notify the Department of Communications of land mobile radio assignments in the band within 250 miles from the border.

This is an interim arrangement between the Commission and the Department of Communications, and it is anticipated that discussions will continue looking towards a mutually beneficial, overall solution.

This action was taken by the Commission. Commissioner Lee was absent.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

CIVIL AERONAUTICS BOARD

COMMUTER AIRLINE ASSOCIATION OF AMERICA

Meeting

Notice is hereby given that a presentation will be made by Commuter Airline Association of America on Wednesday, February 2, 1977, at 3:00 p.m. (local time), in Room 1027, Universal Building, 1825 Connecticut Avenue, N.W., Washington, D.C., regarding the problem facing the commuter airlines.

Dated at Washington, D.C., January 17, 1977.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-2050 Filed 1-21-77;8:45 a.m.]

[Docket No. 27557; Order 77-1-101]

SEABOARD WORLD AIRLINES, INC.

Order of Investigation and Suspension Regarding North Atlantic Cargo Charter Transfer Rules

Adopted by the Civil Aeronautics board) proposes a cargo charter transfer on the 6th day of January, 1977.

By tariff revisions filed December 20, 1976 for effectiveness January 19, 1977, Seaboard World Airlines, Inc. (Seaboard) proposes a cargo charter transfer rule which would permit the carrier to transfer U.S./Europe cargo shipments, already contracted to be carried on chartered aircraft, to Seaboard's regular scheduled service at the prevailing mileage-based charter rates.[1] Complaints requesting suspension of the filing pending investigation have been submitted by Pan American World Airways, Inc. (Pan American), Trans World Airlines, Inc. (TWA), The Flying Tiger Line Inc. (Tiger), Trans International Airlines, Inc. (TIA), and World Airways, Inc. (World).

In support of its proposal, Seaboard submits that the tariff rule would maintain the basic distinction between charter and scheduled service traffic and rates, while permitting the movement of charter-rated shipments on scheduled flights without impairing scheduled service availability; that Seaboard could operate more efficiently by maximizing productivity and reducing fuel consumption; that the decision whether charter-rated cargo will be carried on a scheduled or charter flight would lie entirely with the carrier, subject only to the prior consent of the charterer; and that neither the rates nor services received by either scheduled or charter shippers will be affected by the transfer facility.[2] Finally, Seaboard has submitted data based on average scheduled and charter flights showing that, on a scheduled B-747F flight with a load factor of 64.2 percent from scheduled freight, the carrier would achieve a revenue improvement of 54 to 68 percent by carrying additional cargo transferred from a DC-8 charter contract; and states that such an improvement on many flights could be of significant help in offsetting the severe cost escalations and depressed traffic experienced in North Atlantic freighter operations.

The complainants generally assert, *inter alia*, that Seaboard's tariff filing merely reflects an illegal practice Seaboard has followed for years and which is the subject of pending enforcement proceedings[3] and Seaboard cannot legitimize practices which violate the Act and the Board's Regulations simply by filing them in a tariff; that the Board has already denied a Seaboard petition for rulemaking and waiver intended to accomplish the same end, and concurrently expanded the issues in Docket 27557, Transatlantic FAK Container and Charter Freight Rates Investigation, to cover the issues raised by Seaboard's proposal which, therefore, are already under investigation;[4] and that in Order 76-9-128, September 14, 1976, the Board suspended a similar charter transfer facility proposed for use in North Atlantic passenger service by Pan American, and accordingly should not permit a "part charter" proposal to become effective in cargo service having just suspended a similar one in passenger operations. TIA contends further that, although Seaboard justifies its proposal on the basis that it will improve earnings, in fact Seaboard's current disappointing economic results reflect yield dilution attributable to its long-standing practice of illegally carrying charter shipments on scheduled service.

Upon consideration of the proposed rule, the complaints and all other relevant matters, the Board concludes that the proposal may be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful and should be suspended pending investigation.

As indicated in the complaints, Order 76-9-157 denied a rulemaking petition by Seaboard seeking authority, by waiver or amendment of the Board's Economic Regulations, to accomplish the same result now sought through a tariff rule, i.e., to transport charter-sized shipments in scheduled service at planeload charter rates. Although Seaboard's petition was denied, the central issue it raised, i.e., "the economics of charter-rating very large cargo shipments on scheduled service in North Atlantic markets," was included by Order 76-9-157 as an additional issue in Docket 27557, Transatlantic FAK Container and Charter Freight Rates Investigation.

Although the proposed tariff rule raises issues central to the overall question of the costs attributable to large-volume cargo shipments in transatlantic service and the pricing decisions most appropriate to reflect such costs. Seaboard has provided no estimate in its tariff justification of the overall effect its proposal is expected to have on costs, load factors or revenue.[5] Absent such basic data, and in view of our prior consideration of this issue, the Board concludes that the carrier has not shown that its novel proposal, which represents a fundamental change in the traditional pattern of scheduled and charter operations, should become effective without investigation.

The investigation in Docket 27557 already includes the issues presented by Seaboard's proposed tariff rule. The matter was generally considered at that time and a determination was made that it should be set down for hearing. We reaffirm our prior finding and accordingly the investigation ordered herein will be consolidated with the ongoing one in Docket 27557.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 102, 204(a), 403, 404, 801 and 1002(j) thereof,

It is ordered, That: 1. An investigation be instituted to determine whether the provisions of Rule No. 2(h) on 8th Revised Page 3 to Charter Tariff No. ICH-1, C.A.B. No. 23 issued by Seaboard World Airlines, Inc., and rules, regulations, or practices affecting such provisions, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and, if found to be unlawful, to take appropriate action to prevent the use of such provisions or rules, regulations, or practices;

2. Pending hearing and decision by the Board the tariff provisions specified in ordering paragraph one above are suspended and their use deferred to and including January 18, 1978, unless otherwise ordered by the Board; and that no change be made therein during the period of suspension except by order or special permission of the Board;

3. The investigation ordered herein be consolidated with that in Docket 27557;

4. This order shall be submitted to the President[6] and shall become effective on January 19, 1977;

5. The investigation ordered herein be assigned for hearing before an administrative law judge of the Board at a time and place hereafter to be designated;

6. Except to the extent granted herein, the complaints of Pan American World Airways, Inc., Trans World Airlines, Inc., The Flying Tiger Line Inc., Trans International Airlines, Inc., and World Airways, Inc. in Dockets 30274, 30263, 30276, 30272, and 30275 be and hereby are dismissed; and

7. Copies of this order be filed in the aforesaid tariffs and be served upon Seaboard World Airlines, Inc., Pan American World Airways, Inc., Trans World Airlines, Inc., The Flying Tiger Line Inc., Trans International Airlines, Inc., and World Airways, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[Docket No. 30335; Order 77-1-92]

UNITED AIR LINES, INC.

Order Granting Emergency Exemption

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 14th day of January, 1977.

United Air Lines, Inc. (United) by application filed January 12, 1977 in Docket 30335, requests an emergency exemption from the requirements of Order 74-12-109[1] for a period not to exceed 31 days to permit it to file fares tariffs in 42 markets constructed on a fare formula lower than the formula used on the remainder of its system. The application is conditioned on prior Board withdrawal of the suspension imposed by Order 76-12-16[2] of a general fare increase marked to become effective January 15, 1977.

In support of its application United states that if the Board withdraws the suspension imposed by Order 76-12-16 United will have higher fares than its competitors in 42 markets; that the requested exemption is necessary for the

[1] Seaboard World Airlines, Inc., Tariff C.A.B. No. 23, 8th Revised Page 3 and Original Page 3-A.

[2] Charges for shipments would be assessed as at present according to the appropriate rate tariffs. Seaboard also asserts that a charter shipper may sometimes receive faster service by having his shipment transferred to scheduled service; and that scheduled shippers will receive no worse service than at present since their consignments would have priority over charter-rated shipments in loading.

[3] Citing the November 22, 1976 Initial Decision of Administrative Law Judge Backley in Dockets 27036 and 27104, Seaboard World Airlines, Inc. Enforcement Proceeding.

[4] Order 76-9-157, September 29, 1976.

[5] The supporting data submitted by Seaboard in support of its proposal are largely limited to showing that on a per scheduled flight basis, total revenue would be considerably improved if a charter load were also carried in addition to regular scheduled traffic.

[6] This order was submitted to the President on January 7, 1977.

[1] December 27, 1974; Phase 9 of the Domestic Passenger-Fare Investigation (DPFI).

[2] December 3, 1976.

carrier to maintain its "existing competitive posture"; that it requests it be permitted to file the lower fares at the time the suspension order is lifted because some of the competing carriers have on file tariffs which can be amended in no less than 30 days; that the Board has previously granted such relief in Order 76–2–98 when confronted with "substantially similar facts"; and that the Board already has under study a proposal that would permanently implement the form of relief sought herein.[3]

Upon review of the statements contained in the application we find that enforcement of the prohibition [4] against filing individual fares tariffs inconsistent with the formula used to construct fares over the bulk of the carrier's system, insofar as it would prevent United or any other certificated carrier from matching specific fares of competitors who decline to adopt the two-percent general domestic passenger-fare increase marked to become effective on January 15, 1977, would be an undue burden on the carrier by reason of the limited extent of and unusual circumstances affecting its operations and is not in the public interest. Also, in view of the emergency nature of the request, we will act upon the application prior to the expiration of the normal period for filing answers.

A permanent mechanism for resolving the problem of carrier differences in implementing general fare increases is presently under review.[5] Since grant of the temporary relief at issue herein will not prejudice that proceeding, and since the circumstances in this case appear to be substantially similar to those for which we found a similar emergency exemption warranted in February, 1976,[6] we shall grant United's application. We remind the carriers that, as we have previously indicated, for future ratemaking purposes the Board will treat the present increase as though it had been in effect by all carriers in all markets from the date implemented by even a single carrier. Because we expect our findings on the permanent mechanism to issue shortly, we will limit our exemption authorization to the requested period of 31 days from the date of adoption of this order. Although only United has requested exemption relief, we will include all carriers in order to avoid any additional last-minute requests. We shall also require all carriers to file in Docket 30335 a list of all markets, together with the appropriate shortest authorized mileages, in which the carrier elects to file fares constructed on the basis of a fare formula lower than the formula reflecting the January 15, 1975 two percent general fare increase. This filing requirement does not apply to those carriers electing to forego the two percent increase altogether.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly section 416(b) thereof.

[5] Order 76–8–18, August 4, 1976.
[6] Order 76–2–98, February 25, 1976

It is ordered, That:

1. The U.S. trunkline and local service carriers be and they hereby are exempted from the requirements of Order 74–12–109 for a period of 31 days from the date of adoption hereof to the extent necessary to permit them to file tariffs containing fares in selected markets constructed on a fare formula lower than the formula used on the remainder of their systems where such action is necessary to maintain or return to a previously existing competitive posture; and

2. To the extent not granted herein, the application in Docket 30335 be and it hereby is denied.

This order will be published in the FEDERAL REGISTER.

[Docket No. 22859; Order 77–1–82]

UNITED AIR LINES, INC.

Order of Suspension Regarding Domestic Air Freight Rates

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 14th day of January, 1977.

By tariff revisions marked [1] to become effective January 17 and 31, 1977, United Air Lines, Inc. (United) proposes, among other things, to establish L–3 and L–11 regular and daylight general commodity container air freight rates and charges from Salt Lake City, Utah, and Norfolk/Newport News and Richmond, Virginia, to numerous destinations. Part of the movements will be performed through substitute motor carrier service by trucking Salt Lake City shipments to Denver, Colardo, and Norfolk and Richmond shipments to Washington, D.C.

United asserts, inter alia, that the proposal would make the benefits of wide-body aircraft lower-deck container service available at the three origins; that these containers cannot now be accommodated from these origins since the carrier offers no wide-body service from the cities; that the proposed charges are equal to United's current charges from Denver and Washington, respectively, plus an amount to cover the cost of the substitute truck service from the origin to the respective airport city; that the combining of airport-to-airport container charges with substitute truck charges is consistent with the opinion set forth in Order 75–3–37, Substitution of Other Service for Air Transportation Rule Proceeding, Docket 19797; and that the level of the proposed charges are all below the Bureau of Economics' industry-average costs updated for the year ended June 30, 1976.

The proposed rates and charges all come within the scope of the Domestic Air Freight Rate Investigation (DAFRI), Docket 22859, and their lawfulness will be determined in that proceeding. The issue now before the Board is whether to suspend the proposal or to permit it to become effective pending the decision in that investigation.

As indicated by United, none of the proposed rates and charges exceed the industry-average costs of such traffic as developed in DAFRI and updated for the year ended June 30, 1976. However, many of the proposed standard service and daylight time-of-tender charges out of these cities exceed the bulk charges for the same weight. For example, from Norfolk to Los Angeles United proposes $442 for an L–3 with a minimum weight of 1,100 pounds, about 7 percent above the current bulk charge of $414 for shipments of the same size. Container premiums in other markets encompassed by this proposal range between 2 and 15 percent over the bulk charges. We believe that shipper-loaded containers have lower terminal handling costs and represent significant cost reductions as compared with bulk shipments of similar weight, which reductions should be reflected in rates to the shipper. Consequently, charging more for container shipments than bulk shipments in the same market fails to give proper recognition to the cost differences involved, and raises significant questions of undue preference and prejudice.

United states that combining its airport-to-airport container charges with the substitute truck charges is consistent with the decision in the Substitute Service case, Order 75–3–37. However, that decision does not prescribe the combining of air and motor charges or any other formula as required to arrive at the charge for such substitute service transportation. In fact, a central issue in the case was the propriety of charging air rates where service was by substitute service means. The formulation cited by United may be appropriate in the case of a joint truck-air rate but that is not the case here where the service is United's, in part through a trucker agent. In such cases, the acceptable rates are those which would apply were United providing all the service.

Upon consideration of the above and other relevant factors, the Board finds that a considerable number of the proposed minimum charges per container as specified in Appendices A and B, should be suspended.[2] All other rates and charges out of Salt Lake City, Norfolk/Newport News, and Richmond do not exceed those for bulk shipments of similar size and will be permitted.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly Sections 204(a), 403, 404, and 1002 thereof,

It is ordered, That: 1. Pending hearing and decision by the Board, the rates, charges, and provisions described in Appendix A hereto are suspended, and their use deferred to and including April 16, 1977; and the rates, charges, and provisions described in Appendix B [3] hereto are suspended, and their use deferred to and including April 30, 1977, unless otherwise ordered by the Board, and that no change be made therein during the period of suspension, except by order or special permission of the Board; and

2. Copies of this order shall be filed with the tariff and served upon United Air Lines, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[Docket Nos. 30356, 27693; Order 77–1–94]

WORLD AIRWAYS

Order Regarding Transcontinental Low-Fare Route Proceeding

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 14th day of January, 1977.

By Order 75–7–2, July 1, 1975, the Board announced that it would set the application of World Airways in Docket 27693 for expedited hearing, if it first found that the Federal Aviation Act does not prohibit supplemental air carriers from acquiring scheduled authority. After briefs and oral argument on this threshold question, the Board in Order 76–1–88, January 23, 1976, determined that it did not have the legal authority to issue a route certificate to a supplemental air carrier without requiring the surrender of the carrier's supplemental authority. Accordingly, World's application was dismissed. The applicant appealed and on December 8, 1976, the United States Court of Appeals for the District of Columbia Circuit reversed Order 76–1–88 and remanded the case for hearing.

With the threshold impediment removed, the application is hereby set for expedited hearing as announced in Order 75–7–2. Like the Chicago Midway Low-Fare Route Proceeding recently set for hearing in Docket 30277,[1] this case is also unique and complex but its implications are somewhat different from those of Chicago Midway. We have, therefore, decided to follow similar procedures by issuing a second order which will (a) define the scope of the proceeding, and (b) designate the route and rate issues to be resolved, including the relationship of World's fare proposal to the requirements of the Domestic Passenger Fare Investigation.[2]

In order to expedite the case and eliminate any unnecessary procedural steps, all other applications, motions to consolidate and comments regarding this order must be filed within 30 days of the service date of this order. Answers to motions filed pursuant to this directive will be due 14 days thereafter. Environmental evaluations pursuant to Part 312 of the Procedural Regulations shall be filed by World and any other applicant for authority within 90 days of the date of service of this order.

Accordingly, it is ordered, That: 1. A proceeding to be known as the Transcontinental Low-Fare Route Proceeding, Docket ——, be and it hereby is instituted and set for hearing before an administrative law judge of the Board at a time and place to be designated hereafter;

2. The application of World Airways, Inc. in Docket 27693 be and it hereby is restored to its place on the Board's docket and consolidated for hearing with the proceeding instituted by paragraph 1 above;

3. Applications, motions to consolidate and comments regarding this order shall be filed within 30 days of the service date of this order;

4. Answers in response to pleadings filed pursuant to paragraph 3 above shall be filed within 14 days thereafter;

5. World Airways and any other applicant for authority shall file an environmental evaluation within 90 days of the service date of this order; and

6. A copy of this order shall be served upon all parties in Docket 27693.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[Docket Nos. 30149, 30079, 30197; Order 77–1–93]

VARIOUS CARRIERS

Order Dismissing Complaints Regarding Domestic Passenger Fare Increase

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 14th day of January, 1977.

By tariff revisions [1] marked to become effective January 15, 1977, nine trunkline carriers—American Airlines, Inc. (American), Braniff Airways, Inc., Continental Air Lines, Inc., Eastern Air Lines, Inc. (Eastern), Northwest Airlines, Inc., Pan American World Airways, Inc., Trans World Airlines, Inc. (TWA), United Air Lines, Inc. (United), and Western Air Lines, Inc.—and five local service carriers—Allegheny Airlines, Inc., Frontier Airlines, Inc., Hughes Air Corp. d/b/a Hughes Airwest, North Central Airlines, Inc., and Piedmont Aviation, Inc.— propose to increase passenger fares in the 48-contiguous states and the District of Columbia by two percent. In support, the carriers assert, inter alia, that cost inflation has continued unabated and must be offset by a fare increase; that a two-percent increase over present fares appears justified even under the Board's ratemaking methodology; and that with various modifications to the Board's overly stringent analysis, an increase in excess of six percent could be justified.

The National Passenger Traffic Association, Inc. (NPTA) has complained against the proposals alleging that a two-percent fare increase over the present level would violate the 12.0-percent rate of return standard and would contribute to overall inflation when the economy has been considered by many to be in a "pause." In addition NPTA alleges that the domestic trunklines have experienced substantially increased net operating revenues and that this favorable trend should continue into the future; and that the Board's evaluation should not be based upon speculative increases in cost beyond the tariff effective date.

In answer the carriers state that NPTA has once again failed to acknowledge that the Board's ratemaking standards adjust for changes in traffic and financial results, and that even with currently improved results, a fare increase is required under the Board's ratemaking methodology.[2] The carriers further contend that NPTA's arguments about the Board's ratemaking standards are not based upon any analysis of their reasonableness, but merely upon a desire to minimize airline fares, regardless of the increase in unit costs.

Upon consideration of the proposals, the complaints and answers thereto, and all relevant matters, the Board finds that the complaints do not set forth sufficient facts to warrant investigation and consequently the request for suspension will be denied and the complaints dismissed.

By Order 76–12–16, December 3, 1976 the Board suspended certain of the proposed increases, those which had a tariff effective date prior to the travel effective date of January 15, 1977, in order to evaluate industry revenue need based upon the most current data available, that for the year ended September 30, 1976. We have now completed this analysis, and the results appear in Appendix A[2a]. Our assessment indicates that the industry ratemaking rate of return as of the tariff effective date of January 15, 1977 equals 10.0 percent. Including the two-percent increase proposed herein raises the return to 11.8 percent. We therefore find that the proposed increase appears warranted after inclusion of all ratemaking standards, the estimated revenue production of present fares, and current unit cost levels.[3]

The carriers have raised several issues which would have the Board alter its

[1] Revisions to Airline Tariff Publishing Company, Agent, Tariff C.A.B. No. 227

[2] In addition, while they do not exceed the bulk charges for the same weight, for technical reasons a number of daylight container charges would be suspended where the standard service charges are suspended because they exceed bulk charges.

[3] Appendix A and B filed as a part of the original document.

[1] Order 76–12–149, December 28, 1976.

[2] A staff evidence request will be appended to the order and the parties will be directed to submit comments thereon prior to the prehearing conference. All parties will be free to seek modification or expansion of the request. Because of the need in this case for further expert analysis of the facts and legal issues, no staff component will become a party to the proceeding until the second order has been issued.

[2] American, Eastern, TWA, and United have submitted answers to NPTA's complaints.

[2a] Appendices A through D are filed as a part of the original document.

[3] Appendix B sets forth the new Phase-9 fare formula.

assesment of general fare increase proposals as set forth below.

Discount Fare Adjustment

Several of the carriers argue that the Board should modify its adjustment for discount fare passengers. They contend that since every discount fare now offered must bear an expiry date no longer than 18-months into the future, the Board's policy effectively precludes the carriers from purchasing additional equipment for the purpose of handling discount fare passengers. The carriers allege that the Board's current discount fare policy is therefore short-term in nature and that present discount fares cannot burden the full-fare passengers. American has also asserted that the discount fare adjustment results in a double elimination of investment and interest expense in that any excess capacity is eliminated by the load factor standard.

The rationale for the Board's discount fare policies was explained in great detail in Phase 5 (Discount Fares) of the Domestic Passenger-Fare Investigation, Docket 21866-5, Order 72-12-18 at pages 40-58. The carriers have presented no arguments that would warrant a reconsideration of that decision at this late date. There is nothing new about the requirement that discount fares must be marked to expire 18 months from the effective date of the tariff. This standard was adopted in Phase 5 to allow the Board to monitor the short-run effects of discount fares, and to provide a vehicle for terminating any fare which the carrier concluded has served its short-run objectives. It does not address the problem that discount fares debase the overall yield of the carriers and would inevitably lead to higher normal fares, since the discounts are not cost-based, and indeed the cost of carrying discount traffic is virtually identical to the cost of carrying normal fare traffic. In order to prevent this burden on full fares, the Board in Phase 5 adopted the discount fare adjustment, which removes the impact of discount fares in computing the full fare level. This adjustment is used in conjunction with the 18 month expiration date requirement, not as an alternative.[4] While the carriers are correct in arguing that discount fares have not burdened normal fare traffic, this result has been achieved only because of the Board's insistence on effectuating the Phase 5 adjustment. American's argument that the Board's discount fare methodology results in a double elimination of investment and interest expense is simply incorrect. The carrier fails to consider that the load factor standard represents a standard for full fare traffic, and that the capacity disallowance included in the discount fare adjustment is therefore an integral part of bringing capacity into line with full fare demand.

Elimination of Interest and Investment

The carriers again argue that the Board employs inconsistent methodologies for eliminating interest and investment, pointing out that while the Board makes an adjustment equal to 75 percent of the ASM percentage reduction for the standard load factor adjustment,[5] and adjustment equal to 100 percent of the ASM percentage reduction is made for the discount fare adjustment and when annualizing past fare increases. However, the Board has previously stated, Order 76-4-182, April 30, 1976, that the differnt treatment of interest and investment reflects the fact that of the various adjustments—utilization, load factor, standard seating, discount fare, and fare annualization—only the latter two involve an adjustment to traffic, whereas the other three adjustments affect only aircraft capacity. Hence, our treatment of interest and investment is limited to that related to flight equipment in the case of the first three adjustments, i.e., 75 percent of a relative proportion of total interest and investment, but includes 100 percent of a relative proportion of interest and investment for the discount fare and fare annualization adjustments since both traffic and capacity are affected by them.

Reduction in Non-Capacity Costs

Both American and Eastern assert that the Board's current methodology of reducing noncapacity costs in conjunction with a fare increase is not consistent with the Board's decision in Phase 7 of the DPFI. There the Board's methodology reduced only capacity costs related to the reduction on capacity due to the loss in traffic resulting from application of an elasticity factor of −0.7. The Board did not adjust non-capacity costs in that decision, state the carriers, and followed this practice for the first two years following the Phase-7 decision. The carriers point out that presently, the Board's methodology eliminates not only capacity costs but also noncapacity or traffic-related costs. American alleges that the loss of traffic as a result of a fare increase is clearly temporary with traffic ultimately returning to the previous level as a result of normal growth; and that it is impossible for carriers to actually reduce non-capacity expense in proportion to the traffic decrease since many items of expense do not vary with short-term variations in traffic.

The carrier's arguments rest upon a footnote in the Board's decision (Order 71-4-59 and 71-4-60, April 9, 1971, mimeo. p. 52) which stated that "An additional cushion is provided by the recognition of normal non-capacity costs as forecast without any adjustment for cost savings related to loss of traffic resulting from the fare increase." However, the Board went on to say that this "* * * treatment combined with the use of a lower interim load-factor standard provides sufficient and adequate accommodation of the short and long-term factors and is appropriate for the phase-in period." We are now well beyond that "phase-in period" as we have employed our method of assessing revenue need for years.[6] The methodology now reflects the full cost adjustment associated with a reduction of traffic stemming from a fare increase.[7] While American correctly points out that due to the fixed nature of some portion of this cost element, a carrier cannot fully reduce the noncapacity cost in line with a reduction in traffic over the short-run, the Board's assessment is based upon the long-run unit costs of providing air service and therefore reflects the full, long-run savings in noncapacity costs in its evaluation. We realize that normal growth will bring traffic back to the level prior to the fare increase; nevertheless, traffic demand is lower after an increase than it would have been if no increase had been imposed. In our view, the current methodology correctly adjusts present cost levels for the full, long-range savings due to a reduction in traffic.

Utilization Adjustment

TWA and other carriers again criticize the Board's use of a utilization adjustment which, the carriers assert, works only to penalize the carriers; which is not economically feasible to implement due to an inability to make the required changes in fleet size to avoid the adjustment; and which creates a dilemma for the carriers between trying to meet the 1972 level by operating more hours, but in so doing, lowering load factors and creating a greater disallowance under the standard load-factor adjustment. American, in addition, argues that the Board's original purpose for the utilization adjustment was the abnormally low utilization rates experienced after the carriers grounded aircraft during the fuel crisis of 1974. American asserts that the fuel crisis is long past and that it is now time for the Board to stop making this adjustment since there is nothing abnormal about current utilization levels.

[4] In any event, the 18-month criterion for setting expiry dates has not altered the tendency of discount fares to become embedded in the fare-structure over the long-term. As the table in Appendix C points out, since the year ended March 31, 1975 when discount fare traffic was at a low of 24 percent of total coach traffic, the discount traffic share has risen to a point that today one of every three passengers traveling in the coach section of the aircraft is paying less than a cost-based fare.

[5] TWA has argued that in calculating the standard load factor adjustment the methodology should be altered to reduce capacity expense at a rate equal to 85 percent of the ASM reduction. The carrier supports this assertion from an alleged finding in the Night Coach Fare Investigation (NCFI) which found that "in the long-run, variable costs are estimated to be approximately 85 percent of total costs." Irrespective of TWA's reference to testimony in the NCFI, a basic principle of economics states that all costs are variable in the long-run. In our opinion, the reduction of capacity costs should be equal to the full reduction in ASM's.

[6] The long-term load factor standard of 55 percent has been utilized by the Board in lieu of the interim standard of 52.5 percent since September 1973.

[7] It should be noted that the final rate of return is unaffected by the elasticity computations as performed. The sole purpose of this computation is to show the impact of price changes on the level of traffic.

The necessity for the adjustment to utilization rates (and for that matter, any other variable which the Board may conclude results from abnormal conditions) stemmed from the significant distortion in then current utilization rates resulting from the carriers' reaction to the fuel embargo. As the Board explained when it first made the adjustment,[8] the prior methodology made no adjustment to account for higher load factors resulting from reduced frequencies and aircraft utilization resulting from the fuel crisis rather than from traffic growth as had been contemplated in the DPFI. The Board deemed such an adjustment in these atypical circumstances wholly consistent with the fundamental DPFI principal to protect the normal-fare level from the burden of excess capacity. While it is true that industry load factors no longer reflect abnormal operations due to the fuel crisis, current utilization rates of various aircraft types have not returned to 1972 levels. The Board has made an adjustment for the difference in utilization rates in our analysis of the instant proposals. As the results in Appendix A indicate, the proposed increase appears warranted regardless of the utilization adjustment, and therefore, the Board will reserve judgment on this question until a later date.

Cost-Escalation Factor

By Order 76-4-182, April 30, 1976, the Board requested comments with respect to the cost-escalation factor used in the Board's fare level evaluation methodology. This was done in response to carrier allegations that the Board's approach, i.e., adjusting base period average unit costs to the estimated level as of the tariff effective date, fails to recognize that costs continue to rise after the tariff becomes effective due to inflationary pressures and, as a result, that revenues lag behind expenses after a fare increase until such time as the carriers can gain a further fare increase. In response to the Board's request, nine carriers and four non-carrier parties submitted comments. In general, the carriers favor an approach which would adjust the cost-escalation factor to a point beyond the tariff effective date, principally because of the revenue lag resulting from the current methodology. Noncarrier parties, on the other hand, generally oppose any such approach, essentially due to the speculation involved in estimating costs beyond the tariff effective date. The comments are summarized in Appendix D.

The Board has now considered these comments and other matters, and has decided against any approach which would adjust the cost-escalation factor beyond the tariff effective date. A number of considerations move the Board to this conclusion. At the outset and in order to place the matter in perspective, we note that the attrition related to inflation beyond the tariff effective date represents only a small portion of the carriers' overall revenue need, less than one-half of one percent based upon the current level of cost inflation. The major cause of the carriers' actual ROI shortfall is a continuing full-fare load factor substantially below 55 percent. This is reflected in the load factor and discount fare adjustments which presently increase the ratemaking ROI by more than five points. Secondly, whatever the magnitude of the inflation problem in the past, the cost factor and hence the revenue shortfall involved has declined significantly. Furthermore, the Board's cost factor methodology, assumes a straight line trend in cost inflation, notwithstanding that in recent periods the trend in fact has been declining.

Opponents of adjusting the cost factor beyond the tariff effective date have presented various arguments, which include the high risk of error which could result in excessive fares, the problem of cross-subsidization since today's passenger would have to pay for tomorrow's inflation, and the effect of such a policy to feed inflation. Without necessarily accepting all or any of these points, the fact of the matter is that embodying future costs into present fares raises a number of such serious questions. In the absence of compelling need, which does not appear to be present here, we do not believe speculative costs should be built into the rate base.

There is, however, an element of revenue lag, and resulting ROI deficiency, which is caused by factors other than inflation, and which we believe can be alleviated without risk of overstating revenue need. For example, during the past year various fare increase proposals were suspended because they would have resulted in an ROI in excess of 12 percent, and other proposals which were permitted did not raise the ROI to 12 percent despite rather determined carrier efforts to increase fares to the maximum permissible under the present methodology. It appears likely that both results stemmed from failure to use the most up-to-date data.

The Board has determined to take steps to minimize this problem. First, we intend to issue press releases promptly each quarter which reflect our computation of actual 48-state results so that the carriers and the public will have the benefit of the most current data available. Secondly, notwithstanding prompt release of industry data via press releases, we recognize that the timing of fare increase proposals might be such, due to the tariff filing notice requirements, that the Board will be able to base its decision on more current data than is available to the carriers. For this reason, once a proposal is deemed to be excessive on the basis of more current data than available to the carriers at the time their proposal was submitted, the Board will consider permitting on short notice fare increases to which the carriers are entitled under established standards. We believe short notice may be justified, under particular circumstances, in view of the substantial adjustments made under the Board's ratemaking methodology in order to protect the travelling public from excessive fares. We would emphasize that we will consider fare increases on short notice only in instances when the carriers have proposed even greater increases on statutory notice with full opportunity for complaints and answers.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002 thereof,

It is ordered, That:

1. The complaints in Dockets 30079 and 30197 are hereby dismissed;

2. The investigation ordered in Docket 30149 is hereby vacated for travel commencing on and after January 15, 1977; and

3. Copies of this order be served upon all certificated scheduled carriers operating between points within the 48-contiguous states and the District of Columbia, and the National Passenger Traffic Association, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[9]

PHYLLIS T. KAYLOR,
Secretary.

CHAIRMAN ROBSON AND VICE CHAIRMAN O'MELIA CONCURRING AND DISSENTING IN PART

We concur fully in the Board's actions with the single exception of its determination not to adjust the cost-escalation factor to any point beyond the tariff effective date. We do not dismiss as frivolous the arguments against introducing speculative cost-determining features into our fare level evaluation methodology, and we concede that the other steps which the Board is taking will help to ameliorate the lag problem. Nonetheless, we believe that adjusting the cost-escalation factor to a point somewhat beyond the tariff effective date is the most straightforward way to deal with cost-revenue lag in an inflationary environment, is a faithful execution of our rate-setting formula, may reduce the frequency of carrier requests for fare changes, and can be applied consistently with our public responsibilities.

JOHN E. ROBSON.
RICHARD J. O'MELIA.

GENERAL COMMODITY RATES

[Docket 27573; Agreement C.A.B. 26320; Order 77-1-54]

Agreement Adopted by Traffic Conference 3 of the International Air Transport Association

JANUARY 11, 1977.

Issued under delegated authority.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of Traffic Conference 3 of the International Air Transport Association (IATA). The agreement, adopted by mail vote, has been assigned the above C.A.B. agreement number.

The agreement would establish general commodity rates between Port Moresby and Kagoshima. The rates are combinable with rates to/from U.S. points and thus have indirect application in air transportation as defined by the Act.

Pursuant to authority duly delegated by the Board in the Board's Regulations 14 CFR 385.14, it is not found that resolution 300 (Mail 87) 553, incorporated in Agreement C.A.B. 26320 as indicated, and which has indirect application in air transportation as defined by the Act, is adverse to the public interest or in violation of the Act.

Accordingly, *It is ordered* That:

Agreement C.A.B. 26320 be and hereby is approved.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-2160 Filed 1-21-77;8:45 am]

[Docket 27573; Agreement C.A.B. 26353; Order 77-1-52]

SPECIFIC COMMODITY RATES

Agreement Adopted by the Joint Traffic Conferences of the International Air Transport Association; Order

JANUARY 11, 1977.

Issued under delegated authority.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Traffic Conference 3 of the International Air Transport Association (IATA), and adopted pursuant to the provisions of Resolution 590 dealing with specific commodity rates.

The agreement names an additional specific commodity rate as set forth below, reflecting a reduction from general cargo rates, and was adopted pursuant to unprotested notices to the carriers and promulgated in IATA letter dated December 30, 1976.

Description and rate:	*Specific commodity item No.*
Dogs, 416 cents per kg.,[1] minimum weight 100 kgs. from Sydney to Guam	1020

[1] Based on the 021b rate 1 U.K. pence equals USD .02605.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the subject agreement is adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions hereinafter ordered.

Accordingly, *It is ordered*, that:

Agreement 26363, is approved, provided that (a) approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board unless within such period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

COMMISSION ON POSTAL SERVICE

PUBLIC SERVICE COSTS OF POSTAL SERVICE

Additional Hearing

Under section 7(c)(1) of the Postal Reorganization Act Amendments of 1976, Pub. L. 94-421, 90 Stat. 1309, the Commission on Postal Service gives notice of its intention to hold a hearing in Portland, Oregon, on February 4, 1977. This notice will supplement earlier notices of December 22, 1976 (41 FR 55738) and January 17, 1977 (42 FR 3191) that announced hearings to be held between January 18 and February 10, 1977, in 20 other cities throughout the nation, including Washington, D.C.

Members of the public are invited to appear before the Commission to address the five issues of postal policy enumerated in the FEDERAL REGISTER notice of (41 FR 51435-51436). Generally, these issues concern the definition and quantification of the public service costs of postal service to the American public, postal rates and classifications, and the impact of new and developing electronic communication systems upon the Postal Service. Persons wishing to testify should notify the Commission as soon as possible at the following address:

Commission on Postal Service, 1750 K Street, N.W., Suite 801, Washington, D.C. 20006.

Individuals testifying for themselves are to bring three copies of their testimony with them to the hearing. Organizations and businesses will be required to file 15 advance copies of their testimony at least 10 days before the hearing. Those copies should be mailed to the above address.

Each person notifying the Commission of his intent to testify will be informed by the Commission of the time and place of the hearing at which the person intends to testify.

By the Commission.

DAVID MINTON,
Executive Director.

JANUARY 18, 1977.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

LICENSING PROCEDURES SUBCOMMITTEE OF THE COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Open Meeting

Pursuant to Sec. 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Licensing Procedures Subcommittee of the Computer Systems Technical Advisory Committee will be held on Tuesday, February 8, 1977, at 1:00 p.m. in Room 3817, Main Commerce Building, 14th and Constitution Avenue, N.W., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974 and January 13, 1977, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Secretary 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Licensing Procedures Subcommittee of the Computer Systems Technical Advisory Committee was initially established on February 4, 1974. On July 8, 1975, the Director, Office of Export Administration, approved the reestablishment of this Subcommittee, pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, worldwide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to computer systems, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls. The Licensing Procedures Subcommittee was formed to review the procedural aspects of export license applications within the Office of Export Administration and recommend areas where improvements can be made.

The agenda for the meeting is:

(1) Opening remarks by the Subcommittee Chairman.

(2) Presentation of papers or comments by the public.

(3) Discussion of work program for 1977.

The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

Copies of the minutes of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3012, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

Dated: January 19, 1977.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

Foreign Trade Zones Board

[Order No. 115]

GEORGIA FOREIGN TRADE ZONE

Resolution and Order Approving Application for a Foreign-Trade Zone in Shenandoah, Coweta County, Georgia

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

The Board, having considered the matter hereby orders:

After consideration of the application of the Georgia Foreign Trade Zone, Inc., a Georgia non-profit public corporation, filed with the Foreign-Trade Zones Board (the Board) on July 30, 1976, requesting a grant of authority for establishing, operating and maintaining a foreign-trade zone in the new town of Shenandoah, Coweta County, Georgia, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

Since the proposal involves an industrial park type zone that envisages the construction of buildings by parties other than the grantee, this approval includes the authority to the grantee to permit the erection of such buildings, pursuant to Section 400.815 of the Board's regulations, as are necessary to carry out the zone proposal, providing that prior to its granting such permission it shall have the concurrences of the local District Director of Customs, the U.S. Army District Engineer, when appropriate, and the Board's Executive Secretary. Further, the grantee shall notify the Executive Secretary for approval prior to the commencement of any manufacturing operation within the zone. The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

TO ESTABLISH, OPERATE, AND MAINTAIN A FOREIGN-TRADE ZONE IN SHENANDOAH, COWETA COUNTY, GEORGIA

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u), (hereinafter referred to as "the Act"), the Foreign-Trade Zones Board (hereinafter referred to as "the Board") is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Georgia Foreign Trade Zone, Inc. (hereinafter referred to as "the Grantee"), has made application (filed July 30, 1976) in due and proper form to the Board requesting the establishment, operation, and maintenance of a foreign-trade zone in Shenandoah, Coweta County, Georgia;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and

Whereas, the Board has found that the requirements of the Act and the Board's regulations (15 CFR Part 400) are satisfied;

Now, therefore, the Board hereby grants to the Grantee the privilege of establishing, operating, and maintaining a foreign-trade zone, designated on the records of the Board as Zone No. 26, at the location mentioned above and more particularly described on the maps and drawings accompanying the application requesting authority for a foreign-trade zone in Shenandoah, Georgia, marked as Exhibits IX and X, said grant being subject to the provisions, conditions, and restrictions of the Act and the regulations issued thereunder, to the same extent as though the same were fully set forth herein, and also to the following express conditions and limitations, to-wit:

Operation of the foreign-trade zone shall be commenced by the Grantee within a reasonable time from the date of issuance of the grant, and prior thereto the Grantee shall obtain all necessary permits from Federal, State, and municipal authorities.

The Grantee shall allow officers and employees of the United States free and unrestricted access to and throughout the foreign-trade zone in the performance of their official duties.

The Grantee shall notify the Executive Secretary of the Board for approval prior to the commencement of any manufacturing operations within the zone.

The grant shall not be construed to relieve the Grantee from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said zone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and the District Army Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In witness whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer, Elliott L. Richardson, at Washington, D.C., this 17th day of January 1977 pursuant to Order of the Board.

FOREIGN-TRADE ZONES BOARD,
ELLIOTT L. RICHARDSON,
Chairman and Executive Officer.
JOHN J. DA PONTE, JR.,
Executive Secretary.

[Order No. 114]

VIRGINIA PORT AUTHORITY

Approval of Application to Relocate Foreign-Trade Zone No. 20 in Portsmouth, Virginia

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), and the Foreign-Trade Zones Board Regulations (15 CFR Part 400), The Foreign-Trade Zones Board (the Board) has adopted the following Order:

Whereas, the Virginia Port Authority, Grantee of Foreign-Trade Zone No. 20, Portsmouth, Virginia, has made application (filed October 18, 1976) for authority to relocate Foreign-Trade Zone No. 20 from its present site at the Portsmouth Marine Terminal to 2400 Wesley Street, Portsmouth;

Whereas, public notice of the application has been given and full opportunity has been afforded all interested parties to be heard (41 FR 46651, October 22, 1976);

Whereas, an Examiners Committee has investigated the proposal and recommends approval of the application; and

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Foreign-Trade Zones Board Regulations are satisfied and that the proposal is in the public interest;

Now, therefore, the Board hereby approves the relocation of Foreign-Trade Zone No. 20 from its present site at the Portsmouth Marine Terminal to its new site at 2400 Wesley Street, Portsmouth, Virginia.

The Grantee shall notify the Board's Executive Secretary for approval prior to the commencement of any manufacturing operation within the zone.

Signed at Washington, D.C. this 17th day of January 1977.

ELLIOT L. RICHARDSON,
Secretary of Commerce, Chairman and Executive Officer, Foreign-Trade Zones Board.

JOHN J. DA PONTE, JR.,
Executive Secretary, Foreign-Trade Zones Board.

ARMED FORCES EPIDEMIOLOGICAL BOARD

Open Meeting

1. In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463) announcement is made of the following committee meeting:

Name of committee: ad hoc subcommittee on Influenza of the Armed Forces Epidemiological Board.

Date of meeting: February 9, 1977.

Place and time: Room 3092, Walter Reed Army Institute of Research, Washington, D.C. 0900–1630.

Proposed Agenda: The purpose of this meeting is to review the DHEW and DOD epidemiological data regarding the association of influenza immunizations and Guillain-Barré Syndrome and to discuss prospective and retrospective studies needed to investigate this relationship. Immunization of active duty personnel and recruits during 1977 and 1978 will be discussed.

2. This meeting will be open to the public but limited by space accommodations. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. Interested persons wishing to participate should advise the Executive Secretary, DASG-AFEB, Room 1B472 Pentagon, Washington, D.C. 20310.

DUANE G. ERICKSON,
LTC, MSC, United States Army, Executive Secretary.

JANUARY 18, 1977.

Office of the Secretary

DEFENSE SCIENCE BOARD TASK FORCE ON VERIFICATION

Meeting

The Defense Science Board Task Force on Verification will meet in closed session on 11 February 1977, at 1500 Wilson Boulevard, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineering on overall research and engineering and to provide long range guidance in these areas to the Department of Defense.

The Task Force will examine trends in verification technology applicable to insuring foreign compliance with arms control agreements.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Task Force meeting concerns matters listed in Section 552(b) of Title 5 of the United States Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

JANUARY 18, 1977.

DEFENSE SCIENCE BOARD

Notice of Advisory Committee Meeting

The Defense Science Board will meet in closed session on 16-17 February 1977 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

A meeting of the Board has been scheduled for 16-17 February 1977 to discuss interim findings and tentative recommendations resulting from ongoing Task Force activities associated with Strategic, Tactical, Intelligence/Command, Control and Communication, and Technology issues. The Board will also discuss plans for future consideration of scientific and technical aspects of specific strategies, tactics, and policies as they may affect the U.S. national defense posture.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Defense Science Board meeting concerns matters listed in Section 552(b) of Title 5 of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

DEFENSE SCIENCE BOARD TASK FORCE ON NUCLEAR PROLIFERATION

Meeting

The Defense Science Board Task Force on Nuclear Proliferation will meet in closed session on 14-15 February 1977, at 1500 Wilson Boulevard, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Director of Defense Research and Engineering on overall research and engineering and to provide long range guidance in these areas to the Department of Defense.

The Task Force will examine trends in nuclear proliferation that bear on our national security interests. They will examine estimates of technical capabilities, military/political intentions, and resource available for countries that may acquire nuclear devices in the next decade.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Task Force meeting concerns matters listed in Section 552(b) of Title 5 of the United States Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Office of the Assistant Secretary of Defense (Comptroller).

PREVENTION OF SIGNIFICANT DETERIORATION, STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES AND NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS

Delegation of Authority to State of South Carolina

On December 5, 1974 (39 FR 42510), and June 12, 1975 (40 FR 25004) and September 10, 1975 (40 FR 42011), pursuant to section 110 of the Clean Air Act, as amended, the Administrator promulgated regulations for the prevention of significant air quality deterioration (PSD). On December 23, 1971 (36 FR 24876) and March 8, 1974 (39 FR 9808), and August 6, 1974 (39 FR 33152), and September 23, 1975 (40 FR 43850), and January 15, 1976 (41 FR 2231, 2332), and January 26, 1976 (41 FR 3826), pursuant to section 111 of the Clean Air Act, as amended, the Administrator promulgated regulations establishing standards of performance for five categories, seven categories, one category, five categories, four categories, and one category of new stationary sources (NSPS), respectively. On April 6, 1973 (38 FR 8820) and May 3, 1974 (30 FR 15396), and October 14, 1975 (40 FR 48291), pursuant to section 112 of the Clean Air Act, as amended, the Administrator promulgated national emission standards for three hazardous air pollutants (NESHAPS). Section 301 in conjunction with sections 101 and 110 authorizes the Administrator to delegate his authority to implement and enforce PSD to any State which has submitted adequate implementation and enforcement procedures. Sections 111(c) and 112(d) direct the Administrator to delegate his authority to implement and enforce NSPS and NESHAPS to any State which has submitted adequate procedures. Nevertheless, under sections 111(c)(2) and 112(d)(2), the Administrator is not prohibited from enforcing the standards.

During discussions held in the spring of 1975 with regard to the fiscal year 1976 program plan, EPA furnished to the State of South Carolina information setting forth the requirements for an adequate procedure for implementing and enforcing the standards for PSD, NSPS, and NESHAPS. On April 23, 1976, Mr. John E. Jenkins, Jr., Deputy Commissioner, Office of Environmental Quality Control, South Carolina Department of Health and Environmental Control submitted to the EPA Regional Office a request for delegation of authority. On August 10, 1976, Mr. Jenkins submitted information on his agency's procedures and resources for implementation and enforcement of PSD, NSPS, and NESHAPS. Included in the second submittal were copies of State procedures and legal determinations by the State Attorney General's office which provide the State with the requisite authority to enforce the Federally promulgated PSD, NSPS, and NESHAPS. After a thorough review of the request and information submitted, the Regional Administrator has determined that for the source categories set forth in the following official letters to the Deputy Commissioner the Office of Environmental Quality Control, delegation is appropriate subject to the conditions set forth in detail in this letter:

OCTOBER 19, 1976

MR. JOHN E. JENKINS,
P.E., Deputy Commissioner, Office of Environmental Quality Control, Department of Health and Environmental Control, 2600 Bull Street, Columbia, South Carolina 29201.

DEAR MR. JENKINS: This is in response to your letters of April 23, 1976, and August 10, 1976, requesting delegation of Federal authority for implementation and enforcement of the Standards of Performance for New Stationary Sources (NSPS), the National Emission Standards for Hazardous Air Pollutants (NESHAPS), and the Prevention of Significant Deterioration (PSD) program.

We have reviewed the pertinent laws of the State of South Carolina and the rules and regulations thereof, and have determined that they provide an adequate and effective procedure for implementation and enforcement of the NSPS, NESHAPS and PSD by the State of South Carolina. Therefore, pursuant to section 111 and section 112 of the Clean Air Act (1970), as amended, Pub. L. 91-604, we hereby delegate our authority for implementation and enforcement of the NSPS and NESHAPS to the State of South Carolina as follows:

A. Authority for all sources located in the State of South Carolina subject to the standards of performance for new stationary sources promulgated in 40 CFR Part 60 and amendments thereto as published in the FEDERAL REGISTER as of the date of this letter. The categories of new sources covered by this authority are: Fossil fuel-fired steam generators; incinerators; portland cement plants; nitric acid plants; sulfuric acid plants, asphalt concrete plants; petroleum refineries; storage vessels for petroleum liquids; secondary brass and bronze ingot production plants; iron and steel plants; sewage treatment plants; secondary lead smelters; phosphate fertilizer plants; primary aluminum plants; coal preparation plants; electric arc furnaces; and primary copper, zinc and lead smelters.

B. Authority for all sources located in the State of South Carolina subject to the national emission standards for hazardous air pollutants promulgated in 40 CFR Part 61 and amendments thereto as published in the FEDERAL REGISTER as of the date of this letter. The three hazardous air pollutants covered by this authority are: Asbestos; beryllium; and mercury.

This delegation is based upon the following conditions:

1. Existing quarterly reports normally submitted to EPA through program plan reporting will be expanded to contain pertinent information relating to the status of sources subject to 40 CFR Parts 60 and 61. As a minimum, the following information should be provided to EPA: The names, address, type and size of each facility subject to the standards; the compliance status of each facility with accompanying explanations of noncompliance where applicable; notice of enforcement actions brought against facilities subject to 40 CFR Parts 60 and 61; surveillance actions undertaken for each facility; and the results of all reports relating to emissions data.

2. Enforcement of NSPS and NESHAPS in the State of South Carolina will be the primary responsibility of the Office of Environmental Quality Control. If the State determines that such enforcement is not feasible and so notifies EPA, or where the State acts in a manner inconsistent with the terms of this granted authority, EPA will exercise its concurrent enforcement authority pursuant to section 113 of the Clean Air Act, as amended, with respect to sources within the State of South Carolina subject to the NSPS and NESHAPS.

3. Acceptance of this delegation of presently promulgated NSPS and NESHAPS does not commit the State of South Carolina to request or accept enforcement authority of future standards and requirements. A new request for enforcement authority will be required for any standards not included in Paragraphs A and B above.

4. This enforcement authority to the State of South Carolina does not include the authority to implement and enforce NSPS (40 CFR Part 60) and NESHAPS (40 CFR Part 61) for sources owned or operated by the United States, which are located in the State. This condition in no way relieves any Federal facility from meeting the requirements of 40 CFR Parts 60 and 61.

5. The State of South Carolina will at no time grant a waiver of compliance with NESHAPS (40 CFR Part 61). The State of South Carolina will at no time grant a variance or other temporary or permanent exemption from compliance with NSPS (40 CFR Part 60) and NESHAPS (40 CFR Part 61) regulations. Should the State grant such a variance or other exemption, EPA will consider the source receiving the variance or exemption to be in violation of the applicable Federal regulations and may initiate enforcement action against the source pursuant to section 113 of the Clean Air Act. The granting of such variances by the State shall also constitute ground for revocation of the pertinent portion of the delegation by EPA.

6. If at any time there is a conflict between a State regluation and a Federal regulation (40 CFR Parts 60 and 61); the Federal regulation must be applied if it is more stringent than that of the State. If the State does not have the authority to enforce a Federal regulation that is more stringent than the applicable State regulation, the pertinent portion of the delegation may be revoked.

7. Performance tests shall be conducted in accordance with the procedures set forth in 40 CFR Parts 60 and 61 unless alternate methods or procedures are approved by the EPA Administrator. Although the Administrator retains the exclusive right to approve equivalent and alternate test methods as specified in 40 CFR 60.8(b) (2) and (3), and 61.14, the State may approve minor changes in methodology provided these changes are reported to EPA. The Administrator also retains the right to change an opacity standard as specified in 40 CFR 60.11(e).

8. Alternatives to continuous monitoring procedures or reporting requirements, as outlined in 40 CFR 60.13(h)(i), may be approved by the State with the prior concurrence of the EPA Administrator.

9. If the Regional Administrator determines that the State procedure for enforcing or implementing the NSPS or NESHAPS is inadequate, or is not being effectively carried out, this delegation may be revoked in whole or part. Any such revocation shall be effective as of the date specified in a Notice of Revocation to the Office of Environmental Quality Control.

10. Information shall be made available to the public in accordance with 40 CFR 60.9 (b) and 61.15(b). Any records, reports, or information provided to, or otherwise obtained by, the State in accordance with the provisions of these Sections shall be made available to the designated representative of EPA upon request.

The State and EPA will develop a system of communication sufficient to guarantee a program that includes the items described below:

a. Each agency is informed of the current compliance status of subject sources in the State of South Carolina;

b. Prior EPA concurrence is obtained on any matter involving interpretaion of 40 CFR Parts 60 and 61 (including unique questions of applicability of the standards); and

c. Enforcement actions (including requests for information and enforcement actions based thereon) already initiated by EPA prior to this delegation, shall be completed by EPA.

Also, pursuant to 40 CFR 52.21 (1975), as amended in the FEDERAL REGISTER as of the date of this letter, we hereby delegate our authority for implementation and enforcement of the Federal PSD program to the State of South Carolina as follows:

A Authority for all sources located in the State of South Carolina subject to review for the prevention of significant air quality deterioration promulgated in 40 CFR 52.21, as of the date of this letter. The categories of new sources covered by the delegation are: Fossil-fuel fired electric plants of more than 100 million Btu per hour heat input; coal cleaning plants; kraft pulp mills; portland cement plants; primary zinc smelters; iron and steel mills; primary aluminum ore reduction plants; primary copper smelters; municipal incinerators capable of charging more than 250 tons of refuse per 24-hour day; sulfuric acid plants; petroleum refineries; lime plants; phosphate rock processing plants; by-product coke oven batteries; sulfur recovery plants; carbon black plants (furnace process); primary lead smelters; fuel conversion plants; and ferroalloy production facilities.

B. The delegation is based upon the following conditions: 1. Quarterly reports (or other reports as required by the Regional Administrator) will be submitted to EPA by the State of South Carolina as specified in 40 CFR 51.7.

2. Enforcement of PSD in the State of South Carolina will be the primary responsibility of the Office of Environmental Quality Control. If the State determines that such enforcement is not feasible and so notifies EPA, or where the State acts in a manner inconsistent with the terms of this granted authority, EPA will exercise its concurrent enforcement authority pursuant to Section 113 of the Clean Air Act, as amended, with respect to sources within the State of South Carolina subject to PSD requirements.

3. Acceptance of this delegation of presently promulgated PSD regulations does not commit the State of South Carolina to request or accept enforcement authority for future standards and requirements. A new request for enforcement authority will be required for any standards not included in Paragraph A above.

4. This enforcement authority to the State of South Carolina does not include the authority to implement and enforce PSD for sources owned or operated by the United States, which are located in the State. This condition in no way relieves any Federal facility from meeting the requirements of 40 CFR 52.21.

5. If at any time there is a conflict between a State regulation and a Federal regulation (40 CFR 52.21), the Federal regulation must be applied if it is more stringent than that of the State. If the State does not have the authority to enforce a Federal regulation, the pertinent portion of the delegation may be revoked.

6. If the Regional Administrator determines that the State procedure for enforcing or implementing PSD is inadequate, or is not being effectively carried out, this delegation may be revoked in whole or in part. Any such revocation shall be effective as of the date specified in a Notice of Revocation to the Office of Environmental Quality Control.

7. Any determination of "Best Available Control Technology" for any source category not covered by a New Source Performance Standard must be concurred in by EPA prior to the issuance of the final determination.

The State and EPA will develop a system of communication sufficient to guarantee a program that includes the items described below:

(a) Each agency is informed of the current compliance status of subject sources in the State of South Carolina;

(b) Prior EPA concurrence is obtained on any matter involving interpretation of 40 CFR 52.21 (including unique questions of applicability of the standards);

(c) Immediate notification is provided to the State upon the submittal of completed PSD application by any source owned or

operated by the United States which is located in the State; and

(d) Enforcement actions (including requests for information and enforcement actions based thereon) already initiated by EPA prior to this delegation, shall be completed by EPA.

A notice announcing this delegation will be published in the FEDERAL REGISTER in the near future. The notice will state, among other things, that, effective immediately, all reports required pursuant to NSPS, NESHAPS, and PSD by sources located in the State of South Carolina should be submitted to the Office of Environmental Quality Control, South Carolina Department of Health and Environmental Control, 2600 Bull Street, Columbia, South Carolina 29201. Any such reports which have been or may be received by EPA, Region IV will be promptly transmitted to the State agency.

Since this delegation is effective immediately, there is no requirement that the State notify EPA of its acceptance. Unless EPA receives from the State written notice of objectives within 10 days from the date of receipt of this letter, the State will be deemed to have accepted all of the terms of the delegation.

Sincerely yours,

JACK E. RAVAN,
Regional Administrator.

Therefore, pursuant to the authority delegated to him by the Administrator, the Regional Administrator notified the Deputy Commissioner of the Office of Environmental Quality Control on October 19, 1976, that authority to implement and enforce Prevention of Significant Deterioration (PSD), New Source Performance Standards (NSPS), and National Emission Standards for Hazardous Air Pollutants (NESHAPS) was delegated to the State of South Carolina.

Copies of the request for delegation of authority are available for public inspection at the Environmental Protection Agency, Region IV Office, 345 Courtland Street, NE., Atlanta, Georgia 30308.

Effective immediately, all reports required pursuant to the delegated Prevention of Significant Deterioration (PSD), New Source Performance Standards (NSPS), and National Emission Standards for Hazardous Air Pollutants (NESHAPS) should not be submitted to the EPA Region IV Office, but instead should be submitted to the State agency at the following address:

Office of Environmental Quality Control, Department of Health and Environmental Control, 2600 Bull Street, Columbia, South Carolina 29201.

Applications for PSD, NSPS, and NESHAPS review in process at the time of this delegation shall be processed through to completion by the EPA Region IV Office.

(Secs. 101, 110, 111, 112, 301, Clean Air Act, as amended (42 U.S.C. 1857, 1857c-5, 6, 7, g.))

Dated: January 11, 1977.

JOHN A. LITTLE,
Acting Regional Administrator.

ENVIRONMENTAL HEALTH ADVISORY COMMITTEE STUDY GROUP ON MUTAGENICITY TESTING

Meeting

Notice is hereby given that a meeting of the Study Group on Mutagenicity Testing of the Science Advisory Board's Environmental Health Advisory Committee will be held at 9:00 a.m. on February 10, 1977 in Conference Room A (Room 1112), Crystal Mall Building No. 2, 1921 Jefferson Davis Highway, Arlington, Virginia.

The purpose of the meeting will be (1) to review and comment on the scientific aspects of further revisions of portions of draft EPA Guidelines for the registration of pesticides relating to mutagenicity testing and (2) to discuss approaches presently contemplated by the Agency for the evaluation of test data relating to mutagenicity.

The meeting will be open to the public. Any member of the public wishing to attend or submit a paper should contact the Secretariat, Science Advisory Board (A-101), U.S. Environmental Protection Agency, Washington, DC 20460, by c.o.b. February 7, 1977. Please call Ms. Carol Luszcz on (703) 557-7720.

THOMAS D. BATH,
Staff Director,
Science Advisory Board.

CHICAGO REGIONAL PORT DISTRICT

Notice of Agreements Filed

Notice is hereby given that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreements at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreements at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before February 14, 1977. Any person desiring a hearing on the proposed agreements shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreements (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Maxim M. Cohen, General Manager, Chicago Regional Port District, Butler Drive—Lake Calumet Harbor, Chicago, Illinois 60633

Agreement No. T-3401, between the Chicago Regional Port District (Port) and Transoceanic Terminal Corporation (TOT), provides for the Port's 10-year lease to TOT of certain premises of Lake Calumet, Chicago, Illinois, to be used for the purpose of operating a ship, barge, railroad and truck terminal and warehouse thereon, and handling goods and merchandise in connection therewith.

As compensation, TOT shall pay Port $54,500.00 per annum the first 60 months and thereafter, $57,225.00 per annum. In addition to the fixed rent, TOT shall pay Port an annual volume usage charge equal to 50 percent of the dockage and wharfage collected for tonnage handled at the transit shed located on the leased premises, up to a maximum of $10,000 per annum. All charges are to be those assessed under the Port's tariff.

Agreement No. T-3401-1, between TOT and Calumet Barge Terminal, Inc., (CBT) is an assignment of lease whereby TOT in return for the consideration of $1.00, assigns to CBT those premises leased to TOT under FMC Agreement No. T-3401.

By Order of the Federal Maritime Commission.

Dated: January 18, 1977.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

AMERICAN ELECTRIC POWER SERVICE CORP.

[Docket No. ER77-143]

Changes in Rates and Charges

JANUARY 13, 1977.

Take notice that American Electric Power Service Corporation (AEP) on January 11, 1977, tendered for filing on behalf of its affiliate, Indiana & Michigan Electric Company (Indiana Company), Modification No. 7 dated December 15, 1976, to the Operating Agreement dated June 1, 1968, between Indiana & Michigan Electric Company and Central Illinois Public Service Company, designated I & M's Rate Schedule FPC No. 67.

Section 1 of Modification No. 7 provides for an increase in the Demand Charge for Short Term Power from $0.50 to $0.60 per kilowatt per week and Section 4 provides for an increase in the Demand Charge for Limited Term Power from $2.75 to $3.25 per kilowatt per month. Section 2 of Modification No. 7 provides for an increase in the transmission charge for third party Short Term Power transactions from $0.125 per kilowatt per week to $0.15 per kilowatt per week and Section 5 provides for an increase in the transmission charge for third party Limited Term transactions from $0.55 per kilowatt per month to $0.65 per kilowatt per month, both schedules proposed to become effective January 8, 1977.

The Company states that since the use of Short Term and Limited Term Power cannot be accurately estimated, it is impossible to estimate the increase in revenues resulting from the Modification.

The Company states that copies of the filing were served upon Central Illinois Public Service Company, the Public Service Commission of Indiana, the Michigan Public Service Commission and the Illinois Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 2, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

ARKANSAS LOUISIANA GAS CO.

Pipeline Rates: Settlement

JANUARY 12, 1977.

On July 26, 1976, Arkansas Louisiana (Arkla) filed a revised settlement proposal which would dispose of all issues in the above-referenced proceeding. The revised settlement incorporates certain changes to the previous settlement certified on February 25, 1976, by the Presiding Judge to the Commission. For the reasons set forth below, the Commission shall accept and approve the revised proposed stipulation and agreement.

This proceeding was initiated on September 15, 1975, when Arkla tendered for filing an increase in rates to be effective November 1, 1975, which would add $5,700,000 annually to company revenues for jurisdictional sales and service based on the 12-month period ended June 30, 1975, as adjusted. This filing proposed to increase the price of gas to the one customer served under Rate Schedule X-26, Cities Service Gas Company (Cities). The filing also included a proposed purchased gas adjustment clause in order to permit the pass-on of increases in purchased gas costs to Cities in accordance with Commission regulations. By order issued October 31, 1975, the Commission suspended for one day Arkla's PGA clause applicable to Cities, allowed it to become effective on November 2, 1975, subject to refund, and set the matter for hearing. The Commission also granted Cities' petition to intervene in the proceeding. Subsequently, the Commission instituted an investigation into the operation of Arkla's effective PGA under its G-2 rate schedule and consolidated the investigation with the Docket No. RP76-10 proceeding. Arkla's rate proceeding in Docket No. RP76-10 is still pending for hearing and is not affected by the present settlement, which pertains only to Arkla's PGA clauses under Rate Schedules X-26 and G-2.

Following settlement conferences attended by representatives of Arkla, Cities, and the Commission staff, a proposed Settlement Agreement was submitted to the Presiding Judge, who certified it to

the Commission on February 25, 1976. On March 24, 1976, the staff submitted comments in support of the proposed settlement. However, on July 15, 1976, the staff advised the Commission that upon further review the staff believed certain provisions contained in the settlement were not consistent with the Commission's applicable PGA orders, Nos. 452 and 452–A. In light of its objections, the staff requested the Commission to defer ruling on the settlement agreement pending further agreement discussion among the parties.

Following further discussion, Arkla submitted for filing on July 26, 1976, a revised settlement agreement and related revised and substitute tariff sheets.[1] The modified settlement agreement incorporates certain changes to the previous agreement including an adjustment to Arkla's base cost of gas to reflect the elimination of certain company-owned production. It provides for the inclusion in the base cost of gas for PGA purposes the following: (1) the net of non-concurrent exchange gas transactions in Account 806; (2) the net of storage gas transactions in Accounts 808 and 809; (3) system wide cost of purchased gas; and (4) production from post October 7, 1969, leases and new wells and old leases priced on area or nationwide rates. The effect of these changes would reduce the base cost of purchased gas from 26.56¢ per Mcf to 26.08¢ per Mcf as of June 30, 1975.

Public notice of the revised settlement agreement filing was issued on October 22, 1976, providing for comments by interested parties to be submitted on or before November 17, 1976. On November 17, 1976, the staff filed comments recommending that the agreement be approved and adopted.

Upon review of the entire record in this proceeding, the Commission finds that the settlement agreement represents a reasonable resolution of all issues in this proceeding. Accordingly, the proposed revised Stipulation and Agreement shall be incorporated herein by reference, and shall be approved and adopted.

The Commission orders:

(A) The revised Stipulation and Agreement filed by Arkla on July 26, 1976, is incorporated herein by reference, and is approved and adopted.

(B) Arkla's previously designated tariff sheets are hereby accepted for filing and made effective as of November 2, 1975.

(C) Within 15 days from the date of this order Arkla shall refund to Cities all amounts collected in excess of the rates determined in accordance with the terms of the settlement agreement herein approved, together with interest at the rate of 9 percent per annum. Arkla shall thereafter submit a report of the refunds and interest together with a release from Cities.

(D) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff or any party or person affected by this order in any proceeding now pending or hereafter instituted by or against Arkla or any person or party.

(E) Upon compliance by Arkla with the terms of this order, this proceeding shall be terminated.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77–114]

ARKANSAS OKLAHOMA GAS CORP., ET AL.

Application

JANUARY 11, 1977.

Take notice that on January 4, 1977, Arkansas Oklahoma Gas Corporation (Ark-Okla), 115 North 12th Street, Fort Smith, Arkansas 72901, Mississippi River Transmission Corporation (Mississippi), 9900 Clayton Road, St. Louis, Missouri 63124, and Arkansas Louisiana Gas Company (Arkla), P.O. Box 1734, Shreveport, Louisiana 71151, filed a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the tri-party exchange of natural gas among Ark-Okla, Mississippi and Arkla, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that Ark-Okla presently serves five communities on its eastern system in Randolph and Clay, Counties, Arkansas, with gas purchased from Mississippi. It is further stated that in 1973, Ark-Okla reached the Contract Demand it has under its Service Agreement with Mississippi, and Mississippi continues to be unable to increase Ark-Okla's Contract Demand. Ark-Okla proposes to alleviate this shortage in its eastern operations by means of a three-company exchange wherein Ark-Okla would deliver up to 1,000 Mcf of gas per day from its U.S.A. No. 1–8 Well in Sebastian County, Arkansas to Arkla, which would deliver equivalent volumes to Mississippi at its Sherrill connection in Jefferson County, Arkansas. Mississippi, it is stated, would deliver equivalent amounts of gas on a best-efforts basis to Ark-Okla at an existing delivery point near Pocahantas, Arkansas.

The Applicants state that they intend the transaction to be a straight gas-for-gas exchange with no monetary compensation being paid by or to any party. It is also stated that Ark-Okla would be responsible for the cost of any additional facilities required to effect the exchange.

It is asserted that the agreement would become effective on the date of first delivery and would continue for an initial period of two years, being extended on a year-to-year basis thereafter.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 1, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearings will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

ARKANSAS POWER & LIGHT CO.

[Docket Nos. E–8071, E–8142, E–8250, ER76–110]

Filing

JANUARY 13, 1977.

Take notice that on December 28, 1976, Arkansas Power & Light Company (AP&L) tendered for filing sheets revising the compliance report filed pursuant to the Order issued November 15, 1976, approving a Settlement Agreement reached in the above numbered dockets. AP&L states that the revised data sheets reflect corrections to billing for service to April 30, 1976 which was corrected on the Present Rate but not on the Settlement Rate or Prior Rate, causing the billings on each of the two latter rates to be $750.00 less than applicable. AP&L further states that the amount of $777.37 overpaid to Benton, including interest, will be added to their next billing.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–1987 Filed 1–21–77;8:45 a.m.]

[Docket No. CP77–117]

BACA GAS GATHERING SYSTEM, INC.

Application

JANUARY 11, 1977.

Take notice that on January 5, 1977, Baca Gas Gathering System, Inc. (Applicant), 1200 Hartford Building, Dallas, Texas 75201, filed in Docket No. CP77–117 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon by sale to Panhandle Eastern Pipe Line Company (Panhandle) all of its plant, equipment, rights-of-way, franchises, consents and interests in natural gas contracts, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is engaged in the transportation and sale of natural gas in interstate commerce by means of its gas gathering system in Baca County, Colorado, which gathers and transports gas to Morton County, Kansas, where it is delivered and sold for resale to Panhandle, Applicant's sole customer. It is further stated that Applicant has been relatively ineffective in acquiring new gas supplies and that it is unlikely that Applicant will be able to acquire supplies to be sold and delivered to Panhandle. It is asserted that the abandonment and sale of Applicant's facilities would allow Panhandle to acquire new reserves and to stimulate additional drilling in the vicinity of the pipeline. It is further asserted that no natural gas service would be terminated or interrupted if this abandonment is permitted and Panhandle's application in Docket No. CP77–91 to acquire said facilities is granted.

Applicant seeks permission and approval to abandon by sale to Panhandle the following:

(a) *Equipment.* All of Applicant's plant and equipment consisting of field pipelines, field compressor station equipment, field measuring and regulating equipment, miscellaneous equipment and intangible plant costs.

(b) *Rights-of-way.* Applicant's right, title and interest in and to fee simple interests, easements, rights-of-way and surface leases incidental to the use of the aforementioned equipment.

(c) *Franchises and Consents.* All of Applicant's franchises and consents incidental to that of a gas pipeline business.

(d) *Applicant's Contracts.* All of Applicant's interest in (i) gas purchases contracts with producers with respect to contract acreage, or any contracts with producers hereinafter entered into in the ordinary course of business; (ii) the "Irrigation Gas Contract" dated July 1, 1967, between Applicant and Baca Irrigation Gas Co.; (iii) the Gas Contract between Applicant and Panhandle dated August 6, 1964, as amended; (iv) the "Anadarko Contract," which is a gas processing and conditioning agreement between Applicant and Anadarko Production Company, dated April 1, 1967, as amended.

It is stated that pursuant to a sales agreement dated October 8, 1976, Panhandle would pay Applicant $400,000 for the facilities plus a sum equal to all right-of-way and construction costs paid or incurred from the date of the sales agreement.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 2, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–2027 Filed 1–21–77;8:45 am]

[Docket Nos. ER76–496 and ER76–396]

BANGOR HYDRO ELECTRIC CO.

Certification of Settlement Agreement

JANUARY 12, 1977.

Take notice that on January 4, 1976, the Presiding Administrative Law Judge certified to the Commission for its disposition a proposed settlement agreement between Bangor Hydro Electric Company and Eastern Maine Electric Cooperative, Inc., the only intervenor in these proceedings. The proposed settlement agreement would resolve all matters between the parties in these proceedings. The proposed settlement rates would reduce the originally requested annual rate increase of $175,838 (24 percent) to approximately $101,000 (14 percent) for service to the affected wholesale customers.

Any person desiring to be heard as to said settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, on or before January 27, 1976. Copies of the settlement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77–96]

BLUE DOLPHIN PIPE LINE CO.

Application

JANUARY 11, 1977.

Take notice that on December 17, 1976, Blue Dolphin Pipe Line Company (Applicant), P.O. Box 2099, Houston, Texas 77001, filed in Docket No. CP77–96 an application pursuant to Section 7(c) of the Natural Gas Act and § 157.7(c) of the Regulations thereunder (18 CFR 157.7 (c)), for a certificate of public convenience and necessity authorizing the construction, for a 12-month period commencing January 1, 1977, and operation of facilities to make miscellaneous rearrangements on its system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in making miscellaneous rearrangements which would not result in any material change in the service presently rendered by Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $10,000.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be

taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1991 Filed 1-21-77;8:45 am]

[Docket No. ER76-445]

BOSTON EDISON CO.

Electric Rates: Acceptance Subject to Refund

JANUARY 12, 1977.

On September 1, 1976, Boston Edison Company (Edison) tendered for filing Supplements to Third Revised Sheet No. 11 to Rate Schedule FPC Nos. 47, 48, 49 and 51 (Revised Rate S-3A) for service to the Towns of Concord, Norwood, Reading and Wellesley (Concord et al.). Edison states that the purpose of the filing is to reflect revisions in the base energy charge and the fuel adjustment factor contained in Edison's fuel adjustment clause filed on January 2, 1976 (as completed on January 30, 1976), in response to Commission Order No. 517. The tariff sheets which Edison here proposes to supplement were accepted for filing and suspended until March 1, 1976, subject to refund by Commission order issued February 27, 1976. The tariff was effective for the locked-in period March 1, 1976, through July 23, 1976.

Edison requests that the supplements be made effective retroactively, subject to refund, for the entire locked-in period. Edison states that it will refund the difference between the revenues collected under the original Order No. 517 filing and the revised filing upon issuance of the Commission order accepting this filing, offset by amounts Edison claims are owed by Concord et al. due to an inadvertent underbilling of November 1975 fuel adjustment revenues.

Edison advises that the base cost of fuel has been changed to reflect actual rather than estimated 1975 experience. The base cost of fuel has been increased from 15.4640 mills/kWh to 16.1490 mills/kWh. In addition to increasing the base cost of fuel, Edison has decreased the energy charges in the present rate to reflect the lower fuel costs.

The proposed revisions result in a reduction in charges of $275,537 for the locked-in period. If coupled with the offsetting underbilling in fuel adjustment revenues of $65,735, the net refund to the four customers would amount to $209.802.

Edison states that the changes effected by its filing are consistent with certain recommendations contained in intervenor (Reading) testimony in Docket No. ER76-445. Edison indicated that the proposed changes will simplify the issues in that docket, and are, within the context of an Order 517 filing, fair and reasonable.

Notice of Applicant's tendered filing was issued on September 23, 1976, with protests or petitions to intervene due on or before October 13, 1976. On October 13, 1976, the Towns of Norwood, Conford, and Wellesley (Towns) filed a "Response" opposing Edison's filing to the extent it uses underbillings as an offset to overcharges. On November 3, 1976, Edison filed an answer to the "Response."

In their "Response," the Towns assert that Ediston's remedy for the undercollection is with the S-3 proceeding, Docket No. E-8855, rather than the instant docket. Edison submits that the present proceeding is the appropriate one for the issue of underbilling for November 1975, that the matter is an integral part of the September 1, 1976, filing and should be heard and decided as part of that filing.

By the offset of $65,735, Edison proposes to recover from the customers the amount by which fuel clause collections for November 1975 were below the level of the filed, effective rate.

The record shows that Edison's Revised Rate S-3A together with explanatory testimony with respect to the November 1975 underbilling, was received in evidence in Docket No. ER76-445. Any questions with respect to Edison's entitlement to the amount sought to be recovered by the offset should be addressed in the ongoing proceeding. Edison offers to make further refunds if the offset is ultimately found to be wholly or partially unauthorized.

Accordingly, we shall accept for filing, subject to refund, the revised Rate S-3A in Docket No. ER76-445, effective for the locked-in period and order refunds. of the difference between the amounts collected under the original Order No. 517 filing and the amounts that would have been collected under revised Rate S-3A, plus interest at 9 percent per annum computed on the gross amount of the refund, less the offset proposed by Edison.

The Commission finds: Good cause exists to accept Edison's revised Rate S-3A as described above, subject to refund, with an effective date of March 1, 1976. Any questions with respect to Edison's entitlement to the proposed offset for November 1975 underbillings should be addressed in the ongoing proceeding.

The Commission orders:

(A) The proposed revised Rate S-3A is hereby accepted for filing subject to refund in the ongoing proceedings effective as of March 1, 1976.

(B) Edison shall refund the difference between the amounts collected under the original Order No. 517 filing and the amounts that would have been collected under revised Rate S-3A, plus interest at 9 percent per annum computed on the gross amount of the refund, less the offset proposed by Edison.

(C) Within 30 days of the date of this Order, Edison shall report to the Commission the dates and amounts of refunds paid to each customer affected by the revised rate. A copy of such report shall also be furnished to each State Commission within whose jurisdiction the wholesale customers distribute and sell electric energy at retail.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-2034 Filed 1-21-77;8:45 am]

[Docket Nos. E-9548 and E-9549]

CITY OF MISHAWAKA, INDIANA, ET AL. V. AMERICAN ELECTRIC POWER CO., ET AL.

Offer of Settlement

JANUARY 13, 1977.

Please take notice that in a letter dated January 6, 1977, addressed to Staff Counsel in the captioned Dockets, counsel for Indiana & Michigan Electric Company (I&M) proposed an Offer of Settlement of the captioned Dockets pursuant to § 1.18 of the Commission's Rules of Practice and Procedure. According to I&M, its Offer of Settlement disposes of all of the issues in the captioned Dockets. Copies of I&M's letter of January 6, 1977 and the attachments thereto are available for inspection in the offices of the Commission.

Any party desiring to file comments with respect to the Offer of Settlement may do so and all such comments, if any, shall be filed on or before January 26, 1977. Comments so filed, if any, will be considered by the Commission in determining what action it should take on the Offer of Settlement, but will not serve to make the party filing such comments an intervenor herein. Persons wishing to become parties shall, unless they have already done so, file a petition to intervene.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-2015 Filed 1-21-77;8:45 am]

[Docket No. ER77-73]

THE CLEVELAND ELECTRIC ILLUMINATING CO., ET AL.

Supplements to Interconnection Agreement

JANUARY 13, 1977.

Take notice that on November 22, 1976, the CAPCO Group filed Appendices 3 and 4 as supplements to Schedule E of the CAPCO Basic Operating Agreement dated as of January 1, 1975 which is filed with the Commission under the following Rate Schedule designations:

Company:		Rate schedule
The Cleveland Electric Illuminating Co	FPC	No. 13
Duquesne Light Co	FPC	No. 14
Ohio Edison Co	FPC	No. 120
Pennsylvania Power Co	FPC	No. 29
The Toledo Edison Co	FPC	No. 20

Appendix 3 and Appendix 4 to Schedule E of the CAPCO Basic Operating Agreement provide the basis for the determination of charges applicable to Unit Capacity and Energy transactions by the CAPCO member companies from Bruce Mansfield Unit No. 1 and Beaver Valley Unit No. 1, respectively. The services and compensation for Unit Capacity and Energy transactions from base load CAPCO Units are set forth generally in Schedule E, with specific charges from particular CAPCO Units being set forth in Appendices to Schedule E as the particular Unit comes into commercial operation. It is requested that Appendix 3 become effective on April 5, 1976 and Appendix 4 become effective on October 1, 1976.

Any person desiring to be heard or to make any protest with reference to the subject matter of this Notice should, on or before February 4, 1977, file with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The documents referred to herein are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-65 (PGA77-2)]

COLUMBIA GAS TRANSMISSION CORP.

Proposed Changes in FPC Gas Tariff

JANUARY 13, 1977.

Take notice that Columbia Gas Transmission Corporation (Columbia) on December 29, 1976, tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 1. The proposed changes to be effective February 1, 1977, provide for a purchased gas adjustment to reflect increased costs of gas purchased from pipeline suppliers of $48,211,562.

Copies of the filing were served upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, Union Center Plaza Building, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before January 28, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commisison and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-1986 Filed 1-21-77;8:45 am]

[Docket Nos. RI76-35, CI76-804; RI76-51, CI76-805; RI76-42, CI76-802]

CONTINENTAL OIL CO. ET AL.

Special Relief Proceeding

JANUARY 13, 1977.

Background. By motion of November 15, 1976, as amended November 23, 1976, Getty Oil Company (Getty) requests permission to reinstate its petition for special relief filed in Docket No. RI76-42, which was previously consolidated by Commission order of April 28, 1976, with applications for certificates of public convenience and necessity and special relief of Continental Oil Company (Continental), Docket No. RI76-35, and Cities Service Oil Company (Cities Service), Docket No. RI76-51. By Commssion order of October 15, 1976, Getty's petition for special relief was permitted to be withdrawn at its request and its Docket No. RI76-42 was severed from the consolidation. Such order also issued Getty a temporary certificate, subsequently rejected by Getty, to sell the gas involved at the national rate. By its motion, as amended, Getty also seeks to reconsolidate its special relief petition with Docket No. RI76-35, et al. Getty bases its request on the ground that the national rate applicable to its gas was substantially reduced by Commission Opinion No. 770-A[1] issued shortly after it withdrew its petition.[2] Getty asks that its petition be deemed a petition for special relief at the rates sought by Continental and Cities Service. It further states that if readmitted to Docket No. RI76-35 et al., it would take the record as it finds it and rely on the evidence presented by Continental and Cities Service. It does not request further hearing, reopening of the record, or opportunity to file briefs. It adopts the position and arguments contained in the briefs of Continental and Cities Service.

In a response to Getty's motion, as amended, filed by the Commission Staff on December 8, 1976, Staff stated it had no objection to the granting of Getty's motion provided that the record could be reopened for the limited purpose of receiving into evidence a discounted cash flow analysis, attached to Staff's motion as an appendix, along with the motion itself, which explains that analysis. The motion and analysis present Staff's rate recommendation for Getty's gas, 129.72 cents per Mcf, as opposed to a 160.0 cents per Mcf rate which it recommends for gas from Continental and Cities Service. Staff states that this difference relates entirely to the fact that Getty received a larger advance payment than Continental and Cities Service, which makes a difference under its theory of the case, and that Staff's analysis does nothing more than restate its discounted cash flow analysis applicable to Continental and Cities Service (Staff Exhibit No. 17), with the different advance payment put in. Staff further states that it is informed that Getty, Continental, Cities Service, Tennessee Gas Pipeline Company (the purchaser), and Public Service Commission of the State of New York have no objection to this procedure.

On another matter, Staff moves that the certificate dockets involved in this proceeding be formally consolidated herein. In this connection Staff states:

> These dockets were created for administrative purposes after the other dockets were consolidated and set for hearing. This is a matter of administrative convenience only and does not affect this proceeding in any substantive way.

Discussion and Conclusions. We are in general agreement with Getty's and Staff's motions. We also believe the certificate dockets should be consolidated herewith to reflect more clearly that all aspects, certificate as well as rate, of the applications of Continental, Cities Service, and Getty are before the Presiding Administrative Law Judge for decision and disposition.

Upon full consideration of this matter, and it appearing that there be no objection, the Commission finds that Staff's and Getty's motions should be granted.

The Commission orders:

(A) Getty's certificate and special relief application filed in Docket No. RI76-42 is hereby reconsolidated with Continental Oil Company, et al, Docket No. RI76-35, et al. Its petition for special relief is reinstituted and deemed to be a petition for special relief at the rates sought, and on the evidence presented by

[1] Opinion And Order On Rehearing Modifying In Part Opinion No. 770 And Granting Petitions For Intervention, Docket No. RM75-14, issued November 5, 1976, which modified Opinion No. 770, Opinion And Order Prescribing Uniform National Rate For Sales Of Natural Gas Dedicated To Interstate Commerce On Or After January 1, 1973, For The Period January 1, 1975, To December 31, 1976, issued July 27, 1976.

[2] Getty states that if its motion is granted, it will withdraw its rejection of a temporary certificate of public convenience and necessity issued it by the Commission on October 15, 1976, and accept such certificate pending disposition of its petition for special relief. Getty states that deliveries have not been initiated under this certificate.

Continental and Cities Service in RI76-35, et al. The Presiding Administrative Law Judge is directed to consider and determine Getty's certificate and special relief application concurrently with those of Continental and Cities Service in Docket No. RI76-35, et al.

(B) The Presiding Administrative Law Judge is hereby directed to reopen the record in Docket No. RI76-35, et al., for the limited purpose of receiving into evidence the response and motion filed herein by the Commission Staff on December 8, 1976, along with the appendix thereto.

(C) The following certificate dockets are hereby consolidated with this proceeding:

CI76-804 (Continental Oil Company)
CI76-805 (Cities Service Oil Company)
CI76-802 (Getty Oil Company)

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-133]

CONNECTICUT LIGHT & POWER CO.

Purchase Agreement

JANUARY 13, 1977.

Take notice that on January 3, 1977, the Connecticut Light and Power Company (CL&P) tendered for filing a proposed Purchase Agreement with Respect to Various Gas Turbine Units, dated November 30, 1976 between (1) CL&P and The Hartford Electric Light Company (HELCO), and (2) Littleton Electric Light and Water Department (LEL&WD).

CL&P states that the Purchase Agreement provides for a sale to LEL&WD of a specified percentage of capacity and energy from five gas turbine generating units (Norwalk Harbor, Devon, South Meadow 10, Middletown and Torrington Terminal) during the period from December 1, 1976 to December 31, 1976 together with related transmission service.

CL&P states that questions as to LEL&WD's Capability Responsibility Obligation, under the terms of the New England Power Pool (NEPOOL) Agreement, during the Term of this Purchase Agreement affected the amounts of gas turbine capacity that could be purchased by LEL&WD and thus delayed execution of the agreement until a date which prevented the filing of such rate schedule more than thirty days prior to the proposed effective date.

CL&P therefore requests waiver of the notice requirement pursuant to § 35.11 and requests that the rate schedule filed herein be permitted to become effective on December 1, 1976.

CL&P states that the capacity charge for the proposed service was a negotiated rate, the monthly transmission charge is equal to one-twelfth of the annual average unit cost of transmission service on the Northeast Utilities (NU) system determined in accordance with § 13.9 of the New England Power Pool (NEPOOL) Agreement and the uniform rules adopted by the NEPOOL Executive Committee, multiplied by the number of kilowatts of winter capability which LEL&WD is entitled to receive, reduced to give due recognition of the payments made by LEL&WD for transmission services on intervening systems, and the variable maintenance charge was arrived at through negotiations.

CL&P requests an effective date of December 1, 1976 for the LEL&WD agreement.

HELCO has filed a certificate of concurrence in this docket.

CL&P states that copies of this rate schedule have been mailed or delivered to CL&P, Hartford, Connecticut; HELCO, Hartford, Connecticut; and LEL&WD, Littleton, Massachusetts.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 24, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2010 Filed 1-21-77;8:45 am]

[Docket No. ER77-134]

CONNECTICUT LIGHT & POWER CO.

Amendment to Purchase Agreement

JANUARY 13, 1977.

Take notice that on January 3, 1977, the Connecticut Light and Power Company (CL&P) tendered for filing a proposed Amendment to Purchase Agreement with respect to Various Gas Turbine Units (II) (Amendment), dated October 1, 1976 between (1) CL&P, the Hartford Electric Light Company (HELCO) and Western Massachusetts Electric Company (WMECO), and (2) Vermont Electric Cooperative, Inc. (VEC).

CL&P states that the Amendment provides for a change in the Percentages of Capability to be purchased by VEC for the period from April 1, 1976 to November 30, 1976 and extends the terms of the First and Second Capability Periods.

CL&P states that although the parties agreed to the principals of the First Capability Period at an early date, the details of the Second Capability Period were not decided until a date which prevented the execution and filing of the Amendment with the Commission until this date.

CL&P requests waiver of the notice requirement pursuant to § 35.11 and requests that the Amendment be permitted to become effective on November 1, 1976.

HELCO and WMECO have filed certificates of concurrence in this docket.

CL&P states that copies of this rate schedule have been mailed or delivered to CL&P, Hartford, Connecticut; HELCO, Hartford, Connecticut; WMECO, West Springfield, Massachusetts; and VEC, Johnson, Vermont.

CL&P also states that no facilities are to be installed or modified in order to supply the service to be furnished under the Amendment.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 24, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-157 (PGA77-4)]

CONSOLIDATED GAS SUPPLY CORP.

Proposed Changes in FPC Gas Tariff

JANUARY 13, 1977.

Take notice that Consolidated Gas Supply Corporation (Consolidated) on December 30, 1976 tendered for filing proposed changes in its FPC Gas Tariff, Second Revised Volume No. 1, pursuant to its PGA clause for rates to be effective February 1, 1977. The proposed rate increase would generate $30.5 million annually in additional jurisdictional revenues.

Consolidated states that the PGA filing was triggered by rate increases filed by Tennessee Gas Pipeline Company, Texas Eastern Transmission Corporation, Transcontinental Gas Pipeline Corporation, and Texas Gas Transmission Corporation, all for effectiveness February 1, 1977.

Consolidated is requesting a waiver of any of the Commission's Rules and Regulations in order to permit the proposed rates shown on Nineteenth Revised Sheet Nos. 8 and 9 to become effective February 1, 1977.

Copies of this filing were served upon Consolidated's jurisdictional customers, as well as interested State Commissions.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 28, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI77-20]

DORFMAN PRODUCTION CO.

Petition for Special Relief

JANUARY 13, 1977.

Take notice that on December 27, 1976, Dorfman Production Company, Operator, 1848 Mercantile Dallas Building, Dallas, Texas 75201, filed a petition for special relief in Docket No. RI77-20 pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76).

Petitioner seeks authorization to charge 65.94 cents per Mcf for the sale of gas to United Gas Pipe Line Company from 16 wells located in the Willow Springs Field, Gregg County, Texas. Petitioner also seeks authorization to charge 72.6842 cents per Mcf for the sale of gas to Texas Eastern Transmission Corporation from 3 wells located in the same field. In consideration for the increased rates, petitioner proposes to perform substantial workovers of the wells. Petitioner is currently receiving an average rate of 40 cents per Mcf for the subject gas.

Any person desiring to be heard or to make any protest with reference to said petition should on or before February 4, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2009 Filed 1-21-77;8:45 am]

[Docket No. ES77-9]

EL PASO ELECTRIC CO.

Application

JANUARY 12, 1977.

Take notice that on January 3, 1977, El Paso Electric Company (Company) filed a petition with the Federal Power Commission seeking an order declaring that the Company, as a result of the transaction described below, will not involve the issue of any security, or assumption of any obligation or liability as a guarantor, endorser, surety, or otherwise in respect of any security of another person, within the meaning of Section 204 of the Federal Power Act, or alternatively, that the Commission authorize the Company to enter into the transaction if the Commission concludes that approval under Section 204 is warranted.

The Company is incorporated under the laws of the State of Texas with its principal business office at El Paso, Texas, and is engaged in the electric utility business in the States of Texas and New Mexico in an area in the Rio Grande Valley extending approximately 110 miles northwesterly from El Paso to the Caballo Dam in New Mexico and 120 miles southeasterly from El Paso to Van Horn, Texas, with a population of approximately 480,000 of whom 356,000 reside in metropolitan El Paso.

The Company proposes to discontinue the direct purchase and storage of fuel oil inventory, which ties up substantial amounts of the Company's capital. Instead, the following arrangement is proposed:

(a) An independent trust (the "Trust") to be known as Big Bend Resources Trust will be established by Bradford Trust Company, a New York corporation, for the purpose of making payments to the supplier, Southern Union Oil Products Company, taking title to the fuel oil on delivery, paying the cost of transportating the fuel oil, holding the fuel oil in storage and selling it to the Company upon request. Bradford is to be creator of the Trust.

(b) The Company and the Trust will enter into a ten-year Fuel Supply Agreement under which the Trust will agree to make payments of the purchase price for fuel oil delivered and to pay the expenses related to the transportation thereof from point of delivery to the storage facilities.

(c) Under the Fuel Supply Agreement the Trust will agree to sell fuel oil to the Company upon request, and the Company will agree to purchase all of the fuel oil owned by the Trust at or prior to the termination of the Agreement on December 31, 1986. The Company will agree to pay a purchase price for the fuel oil equivalent to the Trust's costs related thereto. The Trust's costs will include the purchase price paid to the supplier, payments made in respect to transportation, administration expenses, taxes, fees of the Trustees and costs and expenses incurred under the credit arrangements between the Trust and the lenders. The purchase price to the Company will be calculated in terms of a price per barrel of fuel oil.

(d) The Trust will issue a ten-year note or notes to institutional investors in the amount of approximately $7,000,000 which will be placed by an investment banker. These funds, plus additional funds borrowed by the Trust from commercial banks, if needed, will be used to purchase the Company's present inventory currently valued at approximately $7,000,000. The Trust will purchase the Company's existing inventory at the Company's present book value. The Trust will obtain additional funds as required to finance future oil purchases by issuing time drafts which may be "accepted" by bank or group of banks (bankers acceptances). The Company will not guarantee the debt securities issued by the Trust.

(e) At the termination of the transaction on December 31, 1986, the Company will purchase the remainnig fuel oil held by the Trust at a price equal to the Trust's cost of such fuel oil plus any unamortised transaction costs.

(f) The Company and the Trust will also enter into an agreement pursuant to which the Company will grant to the Trust the irrevocable right to use the storage facilities of the Company cost free for the purpose of storing fuel oil delivered for the account of the Trust until such time as it is sold to the Company under the Fuel Supply Agreement.

(g) The Trust will appoint the Company as its Agent for the performance of all obligations required to be performed under the Fuel Supply Agreement other than paying the purchase price for the fuel oil, paying for its transportation, and holding the accompanying title thereto.

The Company states that the proposed arrangement is advantageous to it for the following reasons:

(1) It immediately frees up approximately $7 million for use by the Company;

(2) It provides a relatively inexpensive source of funds (possibly less than normal bank borrowings over a ten-year period) which is supplemental to other financings and need not impose upon existing lines of credit;

(3) It diminishes, by the amount of this financing, the necessity for the Company's line banks to provide funds under existing credit lines, which is attractive to both the Company and its banks; and

(4) It provides the Company with the flexibility to adjust fuel oil reserves upward or downward as required.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 28, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to the proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI77-15]

FRED W. SHIELD

Petition for Special Relief

JANUARY 11, 1977.

Take notice that on December 7, 1976, Fred W. Shield (Petitioner), Milam Building, San Antonio, Texas 78205, filed a petition for special relief in Docket No. RI77-15, seeking a rate increase from 37.6323 cents per Mcf to 51.72 under Order No. 481. The price increase is in consideration for the installation of compression facilities to serve the Heard Ranch Field, Bee County, Texas.

Any person desiring to be heard or to make any protest with reference to said petition should on or before February 4, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to parficipate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2026 Filed 1-21-77;8:45 am]

[Docket No. CP77-107]

GAS GATHERING CORP.

Application

JANUARY 11, 1977.

Take notice that on December 13, 1976,[1] Gas Gathering Corporation (Applicant), P.O. Box 519, Hammond, Louisiana 70401, filed in Docket No. CP77-107 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 5,000 Mcf of natural gas per day to Transcontinental Gas Pipe Line Corporation (Transco) for the account of Southern Natural Gas Company (Southern), for a period of one year from date of first delivery, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport for Southern pursuant to an agreement dated November 17, 1976, a maximum of 5,000 Mcf of gas per day, less shrinkage, purchased by Southern from American Quasar Petroleum Company of New Mexico and Southland Royalty Company. It is stated that such gas would be exclusively from American Quasar Petroleum Company's (Quasar) Grief Brothers' No. 1 Well, located in St. Martin Parish, Louisiana. Applicant asserts that it would transport such gas from the outlet of Southern's American Quasar meter to Transco's Sherbourne Meter Station located in Pointe Coupee Parish, Louisiana, on a pressure base of 15.025 psia and for a transportation charge of 4.0 cents per Mcf. It is further stated that for any shrinkage resulting from Applicant's processing exceeding 5.5 percent, Applicant would reimburse Southern for all shrinkage in excess of 5.5 percent at the rate at which Southern pays the producers for such gas.

Applicant states that Quasar has installed approximately one mile of two-inch pipeline to deliver such gas to Applicant's meter station, and the cost to Applicant of tieing in Quasar's delivery line would be less than $1,000.00.

It is asserted that in the event Southern commences deliveries of gas produced from the Quasar Well into its own pipeline facilities prior to the end of the 12-month term of said agreement, Southern would continue to pay Applicant the 4.0 cents per Mcf transportation charge based on actual daily volumes delivered from the Quasar Well as measured by Southern's Quasar meter, until the expiration of said 12-month term.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 4, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2001 Filed 1-21-77;8:45 am]

[1] The application was initially tendered for filing on December 13, 1976, however, the fee required by § 159.1 of the Regulations under the Natural Gas Act (18 CFR 159.1) was not paid until January 6, 1977; thus, filing was not completed until the latter date.

[Docket No. RP72-140 (PGA77-2)]

GREAT LAKES GAS TRANSMISSION CO.

Proposed Changes in PGA Gas Tariff

JANUARY 13, 1977.

Take notice that Great Lakes Gas Transmission Company (Great Lakes), on December 30, 1976, tendered for filing Twenty-Second Revised Sheet No. 57, to its FPC Gas Tariff, First Revised Volume No. 1, proposed to be effective February 15, 1977.

Great Lakes states that the cost of gas purchased from TransCanada Pipelines Limited, its sole supplier of natural gas, is reduced as a result of the recent decrease in the conversion rate between United States and Canadian currency.

Great Lakes also states that copies of this filing have been served upon its customers and the Public Service Commissions of Minnesota, Wisconsin and Michigan.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E. Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 28, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-2012 Filed 1-21-77;8:45 am]

[Docket No. ES77-8]

INTERSTATE POWER CO.

Application

JANUARY 11, 1977.

Take notice that on December 29, 1976, an application was filed with the Federal Power Commission pursuant to Section 204(a) of the Federal Power Act by Interstate Power Company (Applicant), seeking an order authorizing the issuance of not exceeding 200,000 additional shares of its presently authorized Common Stock, par value $3.50 per share, pursuant to its Employee and Stockholder Automatic Dividend Reinvestment and Stock Purchase Plan ("Plan").

Applicant is incorporated under the laws of the State of Delaware, with its principal business office in Dubuque, Iowa, and is engaged principally in the electric utility business in northern and northeastern Iowa, in southern Minnesota and a few small communities in Illinois.

Applicant proposes to issue and sell to its employees and stockholders a sufficient number of additional shares of its Common Stock to satisfy its obligations under the Plan.

The purpose of the Employee and Stockholder Dividend Reinvestment and Stock Purchase Plan is to provide employees and registered holders of shares of Common Stock with a convenient method of investing case dividends and/or optional payments of not less than $25 nor more than $3,000 per quarter in additional shares of Common Stock at a price equal to market value, without payment of any brokerage commission or service charge.

According to the application, the net proceeds to be received by the Applicant from the issuance and sale of the shares of the additional Common Stock will be used by the Applicant to discharge a portion of the indebtedness on short-term borrowings made by the Applicant which were used to pay for a portion of its construction program and for other corporate purposes.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 27, 1977, file with the Federal Power Commission, Washington, D.C., 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-1998 Filed 1-21 77;8:45 am]

[Docket No. ES77-6]

IOWA POWER & LIGHT CO.

Application

JANUARY 11, 1977.

Take notice that on December 30, 1976, Iowa Power and Light Company (Applicant) filed an application with the Federal Power Commission for an order pursuant to Section 204(a) of the Federal Power Act authorizing the Applicant to enter into Loan Agreements to borrow the proceeds from the sale of, to provide for the payment of, Pollution Control Revenue Bonds to be issued by the City of Council Bluffs, Iowa: authorizing the proposed issuance of Additional First Mortgage Bonds and unsecured promissory notes by the Applicant to provide for the payment of such Pollution Control Revenue Bonds; authorizing the Applicant to execute and deliver letters to said City and underwriters to induce the issuance and sale of said Pollution Control Bonds; and exempting the transaction from the competitive bidding requirements of § 34.1(a) of the Commission's Regulations under the Federal Power Act.

The Applicant is an operating electric and gas utility, primarily engaged in the generation, transmission, distribution and sale at retail of electric energy and in purchase, distribution and sale at retail of natural gas in central and southwestern Iowa.

Applicant states that the First Mortgage Bonds and Notes are to be issued, and Loan Agreements are to be entered into and Inducement Letters are to be executed and delivered, in connection with the sales by the City of Council Bluffs, Iowa, of $18 million aggregate principal amount of its Series 1977-A and $1 million aggregate principal amount of its Series 1977-B Bonds. Pursuant to the Loan Agreements, the proceeds from the sale of the Series 1977-A and Series 1977-B Bonds will be borrowed by the Applicant to finance part of the cost of Applicant's undivided interest in certain pollution control facilities at Unit No. 3 of the Council Bluffs Power Station in Council Bluffs, Iowa.

Any person desiring to be heard or to make any protest with reference to the application should on or before January 28, 1977, file with the Federal Power Commission, Washington, D.C. 20426 petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Persons wishing to become parties to a proceeding or to participate as a party in any hearing herein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1995 Filed 1-21-77;8:45 am]

[Docket No. E-9130]

IOWA PUBLIC SERVICE CO.

Application

JANUARY 13, 1977.

Take notice that on January 10, 1977, Iowa Public Service Company (Applicant) filed an application pursuant to Section 204 of the Federal Power Act seeking authority to issue $50 million of short-term unsecured promissory notes to commercial banks and commercial paper dealers. All proposed notes are to be issued on or before March 31, 1978 and will bear final maturity dates not later than March 31, 1979.

The application states that the bank notes will bear interest at the prime rate in effect at the lending bank at the date of each borrowing. The commercial paper, having maturities not to exceed nine months, will be sold directly to commercial paper dealers and will bear interest rates determined by the market conditions at the time of each borrowing. The aggregate amount of commercial paper outstanding at any one time will not exceed 25% of the Applicant's gross operating revenues for the twelve months ending December 31, 1976.

Applicant proposes to use the funds for construction or acquisition of permanent improvements, extensions and additions to Applicant's property and/or to pay off maturing short-term loans. Its estimated construction expenditures for the year 1977 are $96,600,000.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 4, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Project No. 2640]

KANSAS CITY STAR CO.

Application for Use of Project Property

JANUARY 12, 1977.

Public notice is hereby given that application for approval of use of project property was filed on October 14, 1976, and supplemented on November 4, November 11, and November 16, 1976, under the Federal Power Act (16 U.S.C. 791a-825r) by The Kansas City Star Company, Flambeau Paper Division (correspondence to: Mr. Norman G. Hoefferle, President, The Flambeau Paper Company, Park Falls, Wisconsin 54552) for its constructed Upper Hydro-Electric Project, FPC No. 2640, located on the North Fork of the Flambeau River in the City of Park Falls, Price County, Wisconsin. The Licensee seeks permission to construct a fire access road, bridge, and blow tank along the west bank of the powerplant headrace, within the project boundary.

The access road would extend 230 feet along the canal and would require riprapping of that section of the canal bank. The bridge, 15 feet in width and 90 feet in length, would be supported over the water on bearing piles and would connect the access road with the blow tank. The blow tank would be built partly on shore and partly on sand and/or gravel fill placed behind sheet piling in the headrace. Maximum dimensions of the blow tank foundation and necessary working area would be 47 feet by 27 feet. The blow tank and access road would be integral portions of Licensee's proposed counter-current, pulp-washing installation, which is necessary in order to comply with the pollution abatement program ordered by the Wisconsin Department of Natural Resources (Permit No. 0003212) to meet the prescribed pol-

lution limits set by the United States Environmental Protection Agency by June 30, 1977. The effluent from the treatment plant will be discharged into the powerhouse intake just above the No. 1 water wheel by a pipeline about 388 feet long which will be located within the project boundary.

Applicant has requested the shortened procedures pursuant to § 1.32(b) of the Commission's Regulations under the Federal Power Act.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 28, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection.

Take further notice that, pursuant to the authority contained in and conferred upon the Federal Power Commission by Sections 308 and 309 of the Federal Power Act (16 U.S.C. 825g and 825h) and the Commission's Rules of Practice and procedure, specifically § 1.32(b), as amended by Order No. 518, a hearing may be held without further notice before the Commission on this application if no issue of substance is raised by any request to be heard, protest or petition filed subsequent to this notice within the time required herein. If an issue of substance is so raised, further notice of hearing will be given.

Under the shortened procedure herein provided for unless otherwise advised, it will be unnecessary for applicant or initial pleader to appear or be represented at the hearing before the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2033 Filed 1-21-77;8:45 am]

[Docket No. E-9567]

LAC VIEUX DESERT RIPARIAN OWNERS ASSOCIATION, INC. v. WISCONSIN VALLEY IMPROVEMENT CO.

Public Hearing Session

JANUARY 13, 1977.

By letter issued December 17, 1976, the Federal Power Commission directed that a public hearing session be held in the vicinity of Lac Vieux Desert Reservoir of FPC Project No. 2113 for the purpose of receiving statements of position from interested members of the public regarding matters raised in the April 23, 1976 complaint filed by the Lac Vieux Desert Riparian Owners Association, Inc. against the Wisconsin Valley Improvement Company, Licensee for the Lac Vieux Desert Reservoir, said reservoir being located in Vilas County, Wisconsin and Gogebic County, Michigan and constituting the headwaters of the Wisconsin River.

In accordance with such direction, Commission staff counsel will convene a public session in the vicinity of the project at the Court House in Eagle River, Wisconsin beginning at 10:00 a.m., on March 24, 1977, and continuing thereafter until concluded so that members of the public, including parties to this proceeding, may be afforded an opportunity to state their views orally and in writing and to have their positions and statements considered along with the pleadings filed in this proceeding.

This proceeding was initiated when Complainant alleged (1) that Licensee's failure to draw down the water level of the reservoir in accordance with provisions of the license has caused riparian lands to be eroded, damaged, destroyed, or submerged by ice and waters of the reservoir; (2) that excessively high and fluctuating water levels maintained by Licensee have prevented the reproduction of wild rice, thus depriving the reservoir of nutrients and permitting an abnormal weed-growth; (3) that Licensee's operation of the lift-gate type dam of Lac Vieux Desert Reservoir annually causes a substantial kill-off of the fish population by trapping fish in the water escaping under high pressure from the gate at the foot of the dam; and (4) that Licensee has at times completely closed the lift-gate at the dam, thus permitting no water to pass into the Wisconsin River in violation of the rights of riparain owners below the dam.

By way of relief, Complainant requested that (1) Licensee be required to remove the existing lift-gate type dam and, in lieu thereof, construct a spill-way type dam and fish ladder; (2) that Licensee be required to maintain a constant, stabilized water level of 16.5 inches above 0.0 gage; (3) that future operation and maintenance of the dam be conducted under the direct supervision of a Federal officer for the protection of wildlife and riparian property; and (4) that, in the alternative, future operation and maintenance of the dam be conducted by the Federal Government.

In order to avoid possible confusion and to insure that all parties desiring to be heard are afforded the opportunity to state their positions, it is necessary that the following procedures be observed at the public session:

All those desiring to be heard, or wishing to submit written statements, should, prior to the convening of the session at 10:00 a.m., fill out cards or slips with their names, addresses, and organization, if any, and give such cards to the Commission staff counsel. Blank cards will be made available for that purpose at the entrance of the court room. Parties will be called in the order in which their cards are received.

When a party's name is called, he will please come forward, identify himself and give the reporter a copy of the written statement, if any. If an oral statement is to be given, kindly state your name, address, and organization, if any. In order to conserve time, it would be desirable in cases where a written statement is to be submitted, to confine oral remarks to substantive matters since the entire remarks will be reported in the transcript by the transcription of the written statements. The reporter is being directed to copy all written statements into the record as though read. The statements made at the public session will have the same effect and the same weight as if they were copied into the record. They do not constitute evidence and the parties giving statements will not be subject to cross-examination.

In the event that any party desiring to make a statement is unable to be present at the time his name is called, he may leave a copy of his statement with the reporter and such statement will be copied into the record as though read or presented orally. If for any reason any party desiring to be heard is unable to attend this public session in person, he may submit a written statement to be received no later than April 4, 1977, by the Secretary, Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 and such statement will be made a part of the record of the public session.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1985 Filed 1-21-77;8:45 am]

[Docket No. CP77-106]

MISSISSIPPI RIVER TRANSMISSION CORP.

Application

JANUARY 11, 1977.

Take notice that on December 22, 1976, Mississippi River Transmission Corporation (Applicant), 9900 Clayton Road, St. Louis, Missouri 63124, filed in Docket No. CP77-106 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas pipeline facilities and the sale of natural gas, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

Applicant requests authorization to construct and operate approximately 12.3 miles of 6-inch trunk pipeline running from a point in the Little Washita Area, Grady County, Oklahoma, to a point of connection with an existing 8-inch pipeline of Natural Gas Pipeline Company of America (Natural) in Grady County, Oklahoma. Applicant also requests authorization to sell natural gas to Natural in accordance with the provisions of a November 18, 1976, Gas Transportation and Sales Agreement between Natural and Applicant.

It is stated that Applicant would deliver gas from the Little Washita Area to Natural at a side tap to be installed by Natural on its 8-inch Chitwood pipeline in Grady County, Oklahoma. It is further stated that the maximum volume of gas which Natural is obligated to receive at the point of receipt is 15,000 Mcf per day. Natural would redeliver to Applicant at an existing gas sales point in Clinton County, Illinois, or at Applicant's option, at an existing point of interconnection in Randolph County, Arkansas, seventy-five percent of the volumes of gas delivered by Applicant to Natural at the point of receipt in Grady County, Oklahoma, and the remaining twenty-five percent of the volumes would be sold to Natural. Applicant states that for the transportation service to be performed by Natural Applicant would pay Natural 15 cents per Mcf of gas redelivered. It is further stated that Applicant would sell to Natural twenty-five percent of the volumes delivered at the point of receipt of Grady County, Oklahoma, at a price equal to the product of the volume of such gas times the volume-weighted average purchase price per Mcf paid by Applicant for such gas. The estimated initial price which Applicant would charge for gas sold to Natural would be $1.54 per Mcf, it is said.

It is stated that the total estimated cost of the 6-inch trunkline and appurtenant facilities is $645,000. Applicant indicates that this cost would be financed initially from available funds and/or shortterm borrowings. Any gathering facilities required to be installed by Applicant in order to effectuate this proposal would be constructed under Applicant's budget-type authorization for gas purchase facilities, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 1, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2028 Filed 1-21-77;8:45 am]

[Docket No. RP72-149 (PGA77-4)]

MISSISSIPPI RIVER TRANSMISSION CORP.

Proposed Change in Rates

JANUARY 13, 1977.

Take notice that Mississippi River Transmission Corporation ("Mississippi") on December 27, 1976, submitted for filing Fifty-Third Revised Sheet No. 3A to its FPC Gas Tariff, First Revised Volume No. 1, to become effective February 1, 1977.

The instant filing is being made pursuant to the provisions of Mississippi's purchased gas cost adjustment clause to track a rate change filing of Trunkline Gas Company made pursuant to the terms of the PGA provisions of its tariff and the Advance Payment and Transportation Tracking provisions of its Agreement as to Rates and Related Matter at Docket No. RP74-89.

Mississippi submitted schedules containing computations supporting the rate changes to be effective February 1, 1977. Mississippi states that copies of its filing were served on Mississippi's jurisdictional customers and the State Commissions of Arkansas, Illinois and Missouri.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 28, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene unless such petition has previously been filed. Copies of the filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1988 Filed 1-21-77;8:45 am]

[Docket No. CP75-154]

MONTANA-DAKOTA UTILITIES CO.

Amendment to Application

JANUARY 13, 1977.

Take notice that on December 27, 1976, Montana-Dakota Utilities Co. (Applicant), 400 North Fourth St., Bismarck, North Dakota 58501, filed in Docket No. CP75-154 an amendment to its pending application for a certificate of public convenience and necessity filed pursuant to Section 7(c) of the Natural Gas Act on November 20, 1974. The amendment requests a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in the state of Montana, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant states that in its application filed November 20, 1974, in the instant docket, it sought authorization to construct and modify certain facilities in Fallon, Wilbaux, Valley, Dawson, and McCone Counties, Montana, at an estimated cost of $6,830,000. Further, Applicants requested authorization to transport natural gas, by exchange, for Kansas-Nebraska Gas Company, Inc. (K-N). On July 3, 1975, the Commission granted Applicant temporary authorization for the transportation and exchange of natural with K-N. Applicant was not authorized to construct facilities nor were facilities required for receipt of initial, temporary volumes.

Applicant proposes in its amendment a revised construction program to be carried out in lieu of its original proposal in its application filed November 20, 1974. Applicant now proposes the following:

1. Construction and operation of two gas engine driven compressors (900 HP total) and related facilities at a new compressor station to be located in Sec. 22, T.25 N., R. 49 E., near Vida in McCone County, Montana.

2. Construction and operation of two additional gas engine driven compressors (1,080 HP total) and related facilities at the new Vida compressor station.

3. Construction and operation of two gas engine driven compressors (900 HP total) and related facilities at the existing Saco compressor station located in Valley County, Montana.

4. Uprating of three existing compressors including headers, piping and valves for 400 psig operation at the Saco compressor plant.

5. Uprating of the existing 8-inch transmission line from the Fort Peck compressor plant in Valley County, Montana, to Morgan Creek Junction in Dawson County, Montana, for 800 psig operation.

6. Uprating of the existing 10-inch and 8-inch parallel transmission lines between the Saco compressor plant and the Fort Peck compressor plant for 400 psig operation.

Applicant states that the new Vida compressor station would be constructed and the first two compressors (900 HP total) would be installed in 1977 and the remaining construction and improvements would be carried out in 1978. Applicant estimates that total cost its proposal would be $1,854,000 to be financed by funds generated internally and/or short-term bank notes.

Applicant states that the facilities proposed in the instant amendment would permit it to take an average of 10,000 Mcf of natural gas from K-N in the summer of 1977 and 12,000 Mcf in the winter of 1977 with the proposed Vida sta-

tion in operation. With all the facilities in operation in 1978 the capacity would be increased so as to allow for the receipt of an estimated average of 14,000 Mcf of gas from K–N in the summer and 17,000 Mcf of gas in a winter month. It is indicated that the gas purchased from and transported by exchange for K–N under the Commission's temporary authorization granted July 3, 1975, was from production developed by K–N in fields located in the Bowdoin area of Phillips and Valley Counties, Montana. Applicant states that the temporary authorization permitted and K–N to evaluate well production data so as to design better the facilities required for implementation of Applicant's commitment under a sale, transportation and exchange agreement entered into by it and K–N. It is indicated that the facilities proposed in the instant amendment would allow Applicant to conform to the intent of the agreement and at the same time be less expensive than those originally proposed.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before February 4, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any persons wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Persons who already have filed in the subject docket need not do so again.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2004 Filed 1-21-77;8:45 am]

[Docket No. CP76-517]

NATURAL GAS PIPE LINE CO. OF AMERICA

Additional Storage Service

JANUARY 13, 1977.

On September 9, 1976, Natural Gas Pipe Line Company of America (Natural) filed an application in Docket No. CP76-517, pursuant to Section 7(c) of the Natural Gas Act, for a certificate of public convenience and necessity authorizing the construction and operation of transmission and storage facilities to enable Natural to provide an additional storage service to its customers under proposed new Rate Schedule LS–2. In order to provide its customers with additional flexibility in the operation of their systems and to enhance reliability of service to the ultimate consumer, Natural proposes to expand its storage fields in Iowa and Illinois to increase daily withdrawal capacity by 124,000 Mcf in order to provide the proposed new LS–2 service to its customers. A total of 100 days' top storage withdrawal will be available for the period beginning December 1 of each year and continuing through March 31, of the next year with the maximum available to each customer being a hundred times its contracted daily withdrawal quantity. To enable Natural to provide this lease storage service. Natural proposes to allocate from the existing entitlements of participating customers the following:

(1) 12,400,000 Mcf of top storage gas each year;
(2) 3,100 Mcf of fuel gas each year; and
(3) 24,000,800 Mcf of cushion gas for the first year of LS–2 service only.

The service agreements covering the LS–2 service would be for a period of 10 years commencing April 1, 1977, but would be cancellable on one year's notice by Natural if, in its judgment, the severity of curtailment on its system required it. Upon termination of the LS–2 service, cushion gas would be returned to Natural's customers. It is proposed that the LS–2 service would be offered to all customers, allocating the 124,000 Mcf per day among them prorata to their existing daily contract quantities under Rate Schedules DMQ–1 and G–1 and that the volumes not accepted would then be re-offered to those customers who did not elect to participate in the LS–2 storage service until the total volume is contracted.

In addition, Natural requested that the inventory limitations of the storage fields, imposed as conditions to certificate authorization, heretofore issued, be increased to designated levels set forth in the application. Natural also proposes to construct and operate several additional small gathering lines in order to connect injection-withdrawal wells and other miscellaneous facilities—all such construction and operation as outlined in the application.

The estimated cost of these facilities, excluding cushion gas which will be provided by the participating customers, is approximately $23,575,000. Pursuant to § 2.55(a) of the Commission's General Policy and Interpretations, Natural also proposes to construct and operate six observation wells, dehydration units and other miscellaneous facilities at a cost of approximately $1,609,000. It is indicated that these costs would be financed with funds obtained from interim and permanent financing.

This application was noticed on September 22, 1976, (41 FR 43,464 (October 1, 1976)). General Motors Corporation (GM) filed a protest, petition to intervene and request for hearing on October 15, 1976. Petitions for leave to intervene in support of Natural's application were filed by several of Natural's customers planning to participate in the proposed new storage service, Peoples Gas Light and Coke Company (Peoples), North Shore Gas Company (North Shore), Iowa-Illinois Gas and Electric Company, and Iowa Power and Light Company (Iowa). Petitions to intervene out-of-time were filed by Iowa Electric Light and Power Company, Interstate Power Company, and the City of Chicago. On November 1, Peoples and North Shore jointly and Natural filed answers in opposition to GM's petition to intervene.

In order to reflect a minor modification in the facilities and provide additional information, Natural filed an amendment to its initial application on November 18, 1976. Subsequently on December 9, 1976, Natural filed a request for a temporary certificate to commence construction and operation of the facilities to provide the LS–2 service prior to March 15, 1977. Natural alleged that an emergency exists in that if temporary authorization is not granted, the currently available supply from Peoples' SNG plant may be diverted to a lower priority summer interruptible market. Information subsequently received by our staff indicates that this supply may not be available. We therefore find that it would be more appropriate to review the question of whether temporary authorization should be granted, in March, 1977 when the amount of available supply is ascertainable.

We find these proceedings should be set for hearing. GM's pleadings raise the issue of whether a pipeline, which is presently curtailing its firm customers, should be permitted to increase its storage capacity from storage to meet the additional demands of its distributor customers resulting from their attachment of new high-priority customers. We believe that this question should be explored at a hearing. While the Commission has consistently required pipelines to husband existing supplies of gas through the use of storage and has favored the development of new storage projects to assist pipelines in meeting existing peak day requirements, the question of whether pipelines should be permitted to increase storage to meet the demands of new high-priority customers has not been resolved. If gas supplies continue to decline, then all increased storage capability will ultimately be needed to meet the demands of existing customers. However, if growth occurs in the interim, the new customers will be assigned to the appropriate curtailment priorities with existing customers and curtailed proportionately. This could lead to a situation where other existing high-priority users, such as industrial feedstock consumers, are curtailed significantly in advance of the date that they would otherwise be curtailed because a pipeline has used its expanded storage capability to permit its distributors to add new residential and small commercial customers.

Because growth is a factor in these proceedings, we believe the hearing established below should address the question of whether Natural should be permitted to increase its storage capability to satisfy additional demands represented by growth and, if the question is answered negatively, what conditions should be attached to any permanent certificates issued in these proceedings to prohibit such use. Thus, the hearing prescribed in these consolidated proceedings is to develop a record regarding the following issues:

i. How is the public convenience and necessity advanced by the construction and operation of these proposed facilities?

ii. What customers and which markets will be served if the proposed facilities are constructed?

iii. What effect would the construction and operation of the proposed facilities have on existing customers?

iv. Who should pay the cost of the proposed facilities and service?

v. Describe the impact of diverting additional gas supplies to storage during the summer period on existing customers.

vi. Will any existing customers of Natural receive less gas on an annual and peak day basis as a result of the proposed facilities?

vii. If new customers are proposed to be served, identify these customers and their peak day and annual requirements according to the priorities prescribed in 18 C.F.R. § 2.78(a) (1).

viii. Does the continued addition of new customers advance the public interest?

ix. What conditions, if any, should be attached to the permanent certificates, if any, issued in these proceedings?

The responses to these issues should give consideration to the Commission's determination in Northern Natural Gas Company, Opinion No. 773, — F.P.C. — (August 13, 1976), wherein we stated (id. at 2–3):

> In general, we agree with the conclusion of the Administrative Law Judge, that a pipeline presently curtailing existing customers should not be authorized to attach new customers regardless of the priority of use to which the new customers would put any natural gas which they receive. In the absence of some compelling public interest consideration, existing customers should not be cut off in order that new customers may receive service who had never previously received natural gas deliveries. In addition we agree with the Judge that the de minimis nature of the proposed new service cannot be controlling since one de minimis approval after another can accumulate to the point where there is a substantial effect on the other customers of the pipeline. We further agree with the Judge that the availability of alternate fuels is not controlling where the customers' facilities for using gas or other fuels have not yet even been installed and no determination on either an absolute or economic basis can be made.

The Commission finds:

(1) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that a public hearing be held on the matters involved and the issues presented in these proceedings as hereinbefore described.

(2) Participation in these proceedings by aforementioned intervenors may be in the public interest. Permitting the filing of the late petitions to intervene will not delay the proceedings and may be in the public interest.

The Commission orders:

(A) The proceedings in Docket No. CP76–517 are hereby set for hearing and disposition.

(B) Pursuant to the authority of the Natural Gas Act, particularly Sections 4, 5 and 15 thereof, the Commission's Rules of Practice and Procedure (18 CFR Part 1, and the Regulations under the Natural Gas Act (18 CFR Chapter I, Subchapter E), a prehearing conference shall be held on March 7, 1977, commencing at 10:00 a.m. in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, to discuss procedural issues and the clarification of issues.

(C) An Administrative Law Judge, to be designated by the Chief Administrative Law Judge for that purpose. (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at the prehearing conference in this proceeding, with authority to establish and change all procedural dates, and to rule on all motions (with the sole exception of petitions to intervene, motions to consolidate and sever, and motions to dismiss), as provided for in the Rules of Practice and Procedure.

(D) The direct case of Natural, including testimony on the issues raised by this order, shall be filed and served on all parties, the Presiding Administrative Law Judge, and the Commission Staff on or before February 4, 1977. All supporting intervenors shall file testimony and exhibits comprising their cases in chief on or before February 18, 1977.

(E) The above-mentioned intervenors are permitted to intervene in the instant consolidated proceeding subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in the petitions to intervene; and *Provided, further,* That the admission of such intervenors shal not be construed as recognition by the Commission that they might be aggrieved because of any order of the Commission entered in the proceeding.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1984 Filed 1-21-77;8:45 am]

[Docket No. CP74-134]

NATURAL GAS PIPELINE CO. OF AMERICA

Petition to Amend

JANUARY 11, 1977.

Take notice that on December 27, 1976, Natural Gas Pipeline Company of America (Petitioner), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP74–134 a petition to amend the Commission's order issued pursuant to Section 7(c) of the Natural Gas Act on May 29, 1975 (53 FPC——), in the instant docket so as to authorize the operation of three additional exchange points and an increase in maximum daily exchange volumes in accordance with the gas exchange agreement dated June 29, 1973, as amended, between Petitioner and Northern Natural Gas Company (Northern), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is stated that on May 29, 1975, the Commission authorized the exchange of up to 2,000 Mcf of natural gas per day between Petitioner and Northern at two exchange points, one in Wheeler County, Texas, and one in Carson County, Texas. It is also stated that the Commission in a temporary certificate issued April 8, 1976, permitted the exchange of gas at additional exchange points in Hansford County, Texas, and Beaver County, Oklahoma.

Petitioner proposes, pursuant to a further amendment dated September 9, 1976, to the subject Gas Exchange Agreement, to:

(1) Add a new exchange point (Kirtley Exchange Point) in Beckham County, Oklahoma, for deliveries to Petitioner from Northern from the Kirtley Well.

(2) Add a new exchange point for deliveries from Northern to Petitioner, if required to eliminate an imbalance of exchange volumes owed to Petitioner, at a mutually agreeable point in Carson County, Texas (Carson Exchange Point No. 2).

(3) Add a new exchange point in Woodward County, Oklahoma (Stricker Exchange Point), for deliveries to Northern from Petitioner from the Stricker Well.

(4) Increase maximum daily volumes for exchange from 2,000 Mcf per day to 5,000 Mcf per day.

Petitioner states that it has requested authorization in Docket No. CP76–528 to construct a tap connection on its pipeline in Beckham County, Oklahoma, to effectuate a transportation service for Panhandle Eastern Pipe Line Company, which point would be utilized as an exchange point with Northern (Kirtley Exchange Point). It further states that any facilities required at the proposed Stricker and Carson No. 2 Exchange Points would be constructed under Petitioner's currently effective Gas Purchase Facilities Budget Authorization.

It is asserted that the amended agreement between Petitioner and Northern is mutually beneficial in that it continues to provide a means for each party to connect remote sources of gas supply into their respective systems while obviating the necessity to construct and operate extensive and/or duplicate facilities otherwise required if they were to proceed independently. Petitioner further states that the exchange would have no effect on any of the other sales or services it now renders nor would there by any change in its operation.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before January 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the

Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-111]

NATURAL GAS PIPELINE CO. OF AMERICA

Application

JANUARY 12, 1977.

Take notice that on December 28, 1976, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP77-111 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the establishment of a new delivery point to take natural gas from Colorado Interstate Gas Company (CIG) and the construction and operation of facilities necessary therefor, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it and CIG have entered into a letter agreement, dated November 22, 1976, whereby a new delivery point for gas from CIG to Applicant, to be designated CIG's Willis Meter Station, would be established in Sec. 3, Camp County School Survey, Wheeler County, Texas. CIG would deliver up to 20,000 Mcf of natural gas per day to Applicant at the new point. Applicant states that deliveries would be made under CIG's effective Rate Schedule F-1 and that, therefore, Applicant would receive no additional volumes of gas from CIG than presently are authorized and contracted for.

Applicant proposes to construct and operate a 6-inch tap connection on its existing 12-inch pipeline in Wheeler County. The estimated cost of construction is $11,600 which would be reimbursed to Applicant by CIG. Applicant indicates that the new delivery point is required to allow CIG to deliver gas purchased by CIG from production in the Lott Area of Wheeler County.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 1, 1977, filed with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own revelw of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1982 Filed 1-21-77;8:45 am]

[Project No. 2266]

NEVADA IRRIGATION DISTRICT

Application for Amendment of License

JANUARY 12, 1977.

Public notice is hereby given that application has been filed under the Federal Power Act (16 U.S.C. 791a-825r) by Nevada Irrigation District (correspondence to: Albert W. Scurr, General Manager, Nevada Irrigation District, P.O. Box 1019, Grass Valley, California 95945; and David Minasian, Esq., Minasian, Minasian, Minasian, Spruance and Baber, Attorneys at Law, P.O. Box 1679, Oroville, California 95965) for amendment of license for Project No. 2266, known as the Yuba-Bear Hydroelectric Project located on the Middle and South Yuba and Bear Rivers and their tributaries in Sierra, Nevada and Placer Counties, California.

By its application, Nevada Irrigation District proposes to construct a powerhouse adjacent to its existing Rollins Reservoir dam licensed as part of the Yuba-Bear Hydroelectric Project. The 50-foot by 44.5-foot outdoor type powerhouse would contain one generating unit with an installed capacity of 11,000 kW. A 9-foot diameter penstock approximately 500 feet long would be constructed in an existing tunnel beneath the dam. A substation would be constructed adjacent to the powerhouse to provide power to Pacific Gas and Electric Company's transmission system.

Any person desiring to be heard or to make any protest with reference to said application, should on or before February 28, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own revelw of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Project No. 2266]

NEVADA IRRIGATION DISTRICT

Application for Amendment of License

JANUARY 12, 1977.

Public notice is hereby given that application has been filed under the Federal Power Act (16 U.S.C. 791a-825r) by Nevada Irrigation District (correspondence to: Albert W. Scurr, General Manager, Nevada Irrigation District, P.O. Box 1019, Grass Valley, California 95945; and David Minasian, Esq., Minasian, Minasian, Minasian, Spruance and Baber, Attorneys at Law, P.O. Box 1679, Oroville, California 95965) for amendment of license for Project No. 2266, known as the Yuba-Bear Hydroelectric Project located on the Middle and South Yuba and Bear Rivers and their tributaries in Sierra, Nevada and Placer Counties, California.

By its application, Nevada Irrigation District proposes to construct a powerhouse adjacent to its existing Rollins Reservoir dam licensed as part of the Yuba-Bear Hydroelectric Project. The 50-foot by 44.5-foot outdoor type powerhouse would contain one generating unit with an installed capacity of 11,000 kW. A 9-foot diameter penstock approximately 500 feet long would be constructed in an existing tunnel beneath the dam. A substation would be constructed adjacent to the powerhouse to provide power to Pacific Gas and Electric Company's transmission system.

Any person desiring to be heard or to make any protest with reference to said application, should on or before February 28, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and conferred upon the Federal Power Commission by Sections 308 and 309 of the Federal Power Act (16 U.S.C. 825g, 825h) and the Commission's Rules of Practice and Procedure, specifically § 1.32(b) (18 CFR 1.32(b)) as amended by Order No. 518, a hearing may be held without further notice before the Commission on this application if no issue of substance is raised by any request to be heard, protest or petition filed subsequent to this notice within the time required herein and if the applicant or initial pleader requests that the shortened procedure of 1.32(b) be used. If an issue of substance is raised or applicant or initial pleader fails to request the shortened procedure further notice of hearing will be given.

Under the shortened procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant or initial pleader to appear or be represented at the hearing before the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-130]

NEW ENGLAND POWER CO.

Filing

JANUARY 12, 1977.

Take notice that on January 3, 1977, New England Power Company (NEPCO) tendered for filing a proposed rate schedule for 11 Transmission Contracts between NEPCO and Montaup Electric Company, Newport Electric Corporation, Town of Danvers, Mass., Town of Marblehead, Mass., Town of Middleborough, Mass., Town of Middleton, Mass., City of Peabody, Mass., Town of Shrewsbury, Mass., Town of Wakefield, Mass., Inhabitants of the Town of Boylston, Mass., and Town of West Boylston, Mass. (Receivers), respectively.

The Transmission Contracts provide for transmission by NEPCO across its system of Receivers' purchases from Maine Electric Power Company (MEPCO) of various entitlements to the power MEPCO receives under a Unit Participation Agreement dated November 15, 1971, between New Brunswick Electric Power Commission and MEPCO.

NEPCO requests waiver of the notice requirements so as to permit the Transmission Contracts to become effective as of May 24, 1976, in accordance with their terms. NEPCO states that a copy of this filing was mailed to the parties to the Transmission Contracts.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 24, 1977. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-135]

NIAGARA MOHAWK POWER CORP.

Cancellation

JANUARY 12, 1977.

Take notice that Niagara Mohawk Power Corporation, on January 5, 1977, tendered for filing proposed changes in its FPC Electric Service Tariff, No. 94. The proposed change is the cancellation of the transmission agreement between Niagara Mohawk Power Corporation and Consolidated Edison Company of New York, Inc. for the transmission of up to 150 Mw of power from Niagara Mohawk Power Corporation's transmission connections with Rochester Gas and Electric Corporation and Niagara Mohawk Power Corporation's transmission interconnections with Consolidated Edison Company of New York, Inc.'s Pleasant Valley Substation.

The transmission agreement between Niagara Mohawk Power Corporation and Consolidated Edison Company of New York, Inc. was effective October 26, 1975 and terminated October 30, 1976.

Copies of the filing were served upon Consolidated Edison Company of New York, Inc.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 31, 1977. Protests will be considered in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1978 Filed 1-21-77;8:45 am]

[Docket No. CP77-99]

NORTHERN NATURAL GAS CO.

Application

JANUARY 11, 1977.

Take notice that on December 17, 1976, Northern Natural Gas Company (Applicant), 2223 Dodge Street, Omaha, Nebraska, filed in Docket No. CP77-99 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a new 2,100 horsepower compressor station (Stevens County No. 5) and 6.1 miles of 16-inch pipeline to connect such station to Applicant's existing Stevens County No. 1 gathering system in Stevens County, Kansas, all as more fully set forth in the application on file with the Commission and open to public inspection.

It is stated that the proposed compressor station would compress gas produced from 39 wells in Applicant's Hugoton System, which are presently connected via Applicant's 14-inch and 16-inch gathering lines to the suction side of Stevens County No. 1 compressor where recent declines in the flowing wellhead pressure require the lowering of the gathering line pressure to enable Applicant to maintain production volumes from these wells. Applicant states that the proposed Stevens County No. 5 gathering compressor station would permit a subsystem delivery capability of 32,000 Mcf per day and would result in a total delivery of 1,069,000 Mcf per day at the discharge of existing field service compressor facilities located at Stevens County No. 1.

Applicant proposes to construct and operate two 1,050 horsepower compressor units and 6.1 miles of 16-inch pipeline at an estimated cost of $2,740,000. Applicant states that if the additional horsepower is not available during the 1977-78 heating season, its wintertime deliverability would be reduced approximately 17,000 Mcf per day, which volumes cannot be made up from other sources of supply, and there would be an even greater reduction in deliverability during the 1978-79 heating season.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 31, 1977, filed with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1997 Filed 1-21-77;8:45 am]

[Docket No. ER77-96]

NORTHERN STATES POWER CO. (WISCONSIN)

Tariff Change

JANUARY 12, 1977.

Take notice that Northern States Power Company (Wisconsin) on December 6, 1976, tendered for filing proposed changes in its FPC Electric Service Tariff FPC Rate Schedule No. 42, Supplement No. 5. The proposed changes are requested to alter its agreement with the Village of Cadott, Wisconsin, and are proposed to be effective as of January 1, 1977.

This Agreement was renegotiated at this time to recognize the change in delivery voltage from 2,400 volts to 4.160 volts at the request of the Village of Cadott.

Copies of the filing were served upon the Village of Cadott.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2031 Filed 1-21-77;8:45 am]

[Docket No. CP73-332]

NORTHWEST PIPELINE CORP.

Petition To Amend

JANUARY 11, 1977.

Take notice that on December 23, 1976, Northwest Pipeline Corporation (Peti-

tioner), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP73-332 a petition to amend the Commission's orders issued pursuant to Section 7(c) of the Natural Gas Act on September 9, 1976 (56 FPC ——), December 17, 1976 (56 FPC ——), and February 26, 1975 (54 FPC ——), in the instant docket so as to 1) excise Docket No. CP73-332 from the orders issued September 9, 1976, and December 17, 1976, and 2) amend the pricing conditions of the order issued February 26, 1975, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that the Commission affirmed an Initial Decision, with modification, approving the short-term import from Canada of additional natural gas volumes from Westcoast Transmission Company Limited (Westcoast), up to 55,000 Mcf per day, in Docket No. CP73-332, at an average border price ranging from $1.61 to $1.91 per Mcf over the life of the contract, subject to certain carrying costs and currency exchange rates. It is further stated that Westcoast's Export License GL-41 was amended October 8, 1974, to permit the exemption of these short-term, emergency gas purchases from the general pricing provisions affecting Canadian natural gas exports, continuing even with the increase of the Canadian border price from $1.00 per Mcf to $1.40 and $1.60 per Mcf. Petitioner asserts that the National Energy Board (NEB), by Order No. AO-11-GL-41, revoked the previous pricing exemption and made Petitioner's subject gas volumes subject to the general border prices of $1.60 per Mcf effective September 10, 1976, and $1.94 per Mcf effective January 1, 1977, and the Commission by its orders of September 9, 1976, and December 17, 1976, approved such increases.

Petitioner further states that the border price exemption was reinstated by NEB in its Order of October 21, 1976, for gas authorized to be imported by Petitioner under the 1974 Temporary Agreement. It is indicated that said order required that the amount paid Pan-Alberta Gas Ltd. (Pan-Alberta) would be the amount provided in the Temporary Agreement adjusted by an additional amount of 14.07 cents and 23.109 cents per million Btu's, effective October 1, 1976, and January 1, 1977, respectively. It is stated that Pan-Alberta has agreed that in view of this provision, and the fact that it was unable to deliver full contract quantities during the 1975-76 heating season, that it would reduce its other charges to Westcoast, which are passed on to Petitioner, to the extent required so that the total amount due Pan-Alberta and Westcoast over the term of the 1974 Temporary Agreement would not exceed $1.91 per Mcf, assuming that the full volumes are delivered for the period October 1, 1976, through April 1, 1977.

Petitioner states that although Pan-Alberta has agreed to limit Petitioner's costs to $1.91 per Mcf based on full contract deliveries from October 1, 1976, through the term of the Agreement, Petitioner was unable to take full contract volumes during October 1976, which resulted from the fact that gas may be imported under the 1974 Temporary Agreement only to the extent that Westcoast cannot deliver, from its own gas supply sources in British Columbia, the full contract volumes at Sumas, Washington, under its GL-41 export authorization. It is stated that Westcoast had a gas supply available in excess of Petitioner's requirements at the Sumas import point during certain days in October and, therefore, Petitioner was unable to import the full volumes available under the 1974 Temporary Agreement, and as a result Petitioner estimates the average cost of all volumes of gas actually imported for the term of the 1974 Temporary Agreement would be $1.96 per Mcf if full deliveries can be taken during the remaining months of the term. The Petitioner states that if it was unable to take gas for an additional 15 days, the unit cost would increase to $2.05 per Mcf, and since it is impossible to predict with certainty the volumes that will be imported, Petitioner requests an order from the Commission allowing it to pay up to $2.05 per Mcf in lieu of the previously authorized $1.91 per Mcf of gas.

Accordingly, Petitioner requests the aforementioned orders be amended and that Petitioner be authorized to continue to import gas under the 1974 Temporary Agreement at an average culminative price of up to $2.05 per Mcf. Further, Petitioner requests that said authorization be effective September 10, 1976.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before January 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1996 Filed 1-21-77;8:45 am]

[Docket Nos. E-8999 and E-9000, E-9001]

ORANGE & ROCKLAND UTILITIES, INC. AND ROCKLAND ELECTRIC CO.

Electric Rates: Settlement

JANUARY 10, 1977.

On November 24, 1976, Orange and Rockland Utilities, Inc. (Orange and Rockland) and Rockland Electric Company (Rockland Electric) filed a Settlement Agreement (Agreement). For the reason set forth below, the Commission approves the Agreement which effectively terminates this proceeding.

Proceedings were initiated on August 30, 1974, when Orange and Rockland tendered for filing proposed amendments to its contract with its wholly-owned subsidiary, Pike County Light and Power Company (Pike County) in Docket No. E-8999 and amendments to its contract with its other wholly-owned subsidiary Rockland Electric in Docket No. E-9000. Orange and Rockland's contracts with Pike County and Rockland Electric cover its wholesale sales to those subsidiaries and are filed with the Commission as rate schedules. The proposals included a request to change the return on equity to 14 percent, a request that the rate of return be automatically adjusted as of the end of the preceding year to reflect changes in embedded cost of debt and preferred stock capital, and a request to change the method of computing working capital.

On the same date, Rockland Electric filed a fuel adjustment clause and an increase in its rates to its wholesale customer, the Board of Public Works in the Borough of Park Ridge (Park Ridge) in Docket No. E-9001. The requested effective date in all cases was November 1, 1974, except in Docket No. E-9001 for which an effective date of October 1, 1974, was requested subsequent to the August 30 filing.

By order issued on September 27, 1974, the Commission accepted and suspended the proposed rates in Docket Nos. E-8999 and E-9000 for one day, permitted them to go into effect on November 2, 1974, subject to refund, ordered a hearing, and consolidated the two dockets for the purpose of hearing and decision. By order issued in Docket No. E-9001 on the same date, the Commission permitted the intervention of Park Ridge and the Public Advocate of the State of New Jersey, Division of Rate Counsel (the Public Advocate), accepted and suspended the proposed rates, permitting them to become effective on November 15, 1974, but refused to permit the proposed fuel adjustment clause to become effective because it reflected the total cost of economy purchases, rather than merely the fuel component thereof, and ordered a hearing.

By order issued on October 25, 1974, the Commission denied a Rockland Electric request in E-9001 for a shortened suspension period and accepted for filing Rockland Electric's revised fuel adjustment clause which was permitted to become effective on November 1, 1974, without suspension and not subject to refund. By order issued on December 2, 1974, the Commission granted a request filed by Park Ridge that a limited examination of the lawfulness of the proposed fuel adjustment clause be included at the hearing.

On February 7, 1975, the Commission ordered consolidation of the three proceedings, permitting Park Ridge and the Public Advocate to intervene in Docket Nos. E-8999 and E-9000. By order of October 14, 1975, the Commission ordered Rockland Electric to refund to Park Ridge the amounts attributable to inclusion of construction work in progress in the rate base.

Hearings before an Administrative Law Judge were held on August 26 and October 8, 1975. On July 19, 1976, an Initial Decision in the combined proceeding was issued.

Public notice of the filing on November 24, 1976, of the proposed Settlement Agreement was issued on November 30, 1976, with comments due by December 14, 1976. On December 14, 1976, the Commission Staff filed comments supporting the Agreement. No other comments were received.

Based on our review of the Settlement Agreement and record in these proceedings, we conclude that the Agreement represents a reasonable resolution of the issues in the proceedings in the public interest, and that the settlement should be approved accordingly.

The Commission finds: The Settlement Agreement filed in this docket on November 24, 1976, should be approved and made effective, as hereinafter ordered.

The Commission orders: (A) the Settlement Agreement filed with the Commission in this proceeding on November 24, 1976 is incorporated herein by reference, accepted and approved.

(B) Within 30 days of the date of issuance of this order, Orange and Rockland and Rockland Electric shall file revised tariff sheets to effectuate the provisions of the Agreement and upon acceptance by the Commisison of the filing of the revised tariff sheets, Orange and Rockland and Rockland Electric shall make refunds to Park Ridge, as a lump sum payment, of all amounts collected in excess of the settlement rates provided for in the Agreement and approved herein. Said refunds shall be made in accordance with the terms of the Agreement and shall bear interest at the rate of 9 percent per annum.

(C) Within 15 days after refunds are made, Orange and Rockland and Rockland Electric shall file a refund report with the Commission, shall serve a copy thereof upon all affected customers, and shall furnish a copy to each State Commission within whose jurisdiction the wholesale customers distribute and sell electric energy at retail.

Such report shall show monthly billing determinants and revenues under prior, present and settlement rates; the monthly settlement rate increase; the monthly refund; and the monthly interest computation together with a summary of such information for the total refund period.

(D) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff, or any party or person affected by this order in any proceeding now pending or hereafter instituted by or against Orange and Rockland and Rockland Electric or any other person or party.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1992 Filed 1-21-77;8:45 am]

[Docket No. CP74-160, etc.]

PACIFIC INDONESIA LNG CO.

Amendment

JANUARY 12, 1977.

Take notice that on December 21, 1976, Pacific Indonesia LNG Company (Applicant), 720 West Eight Street, Los Angeles, California 90017, filed in Docket No. CP74-160, et al., an amendment to its pending applications in Docket Nos. CP 74-160 and CP74-207 pursuant to sections 3 and 7(c) of the Natural Gas Act so as to authorize the sale of regassified LNG to Pacific Gas and Electric Company (PG&E) and Southern California Gas Company (SoCal), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

It is stated that on September 30, 1973, Applicant filed an application in Docket No. CP74-160 requesting authorization pursuant to section 3 of the Natural Gas Act to import LNG from the Republic of Indonesia. It is further stated that on February 15, 1974, Applicant filed an application pursuant to section 7(c) of the Natural Gas Act for authorization to construct and operate facilities necessary to receive, store and regasify the LNG and to sell the resultant natural gas to SoCal for resale. It is stated that on March 31, 1975, Applicant in Docket Nos. CP74-160 and CP74-207, filed amendments to its pending applications which reflected: (1) A change in the purchase price of the LNG; and (2) The fact that Applicant no longer would construct or operate facilities for the receipt, storage and regasification of LNG or for its delivery to SoCal. On September 17, 1974, as supplemented on March 31, 1975, Western LNG Terminal Company (Western Terminal), an affiliate of Applicant, filed an application in Docket No. CP75-83 pursuant to section 7(c) of the Natural Gas Act for authorization to construct and operate facilities at Oxnard, California, for the receipt, storage, and regasification of the LNG to be imported by Applicant and for the delivery of the resultant natural gas to SoCal for Applicant's account, it is said.

By the subject amendment Applicant seeks authorization to sell 50 percent of its available resultant natural gas to SoCal and 50 percent to PG&E pursuant to the Agreement among Applicant, PG&E and SoCal dated January 27, 1976. It is stated that SoCal and PG&E would purchase such gas totaling approximately 190,000,000 Mcf per year for a term equivalent to that of Applicant's contracted term of LNG purchase. It is further stated that no additional facilities are required as a result of the January 27, 1976, agreement and that existing interconnections are sufficient to move PG&E's share of the gas to PG&E's system either through delivery or exchange of equivalent volumes.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before February 1, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons who have heretofore filed need not do so again.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-113]

PANHANDLE EASTERN PIPE LINE CO.

Application

JANUARY 12, 1977.

Take notice that on December 30, 1976, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP77-113 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 35 Mcf of natural gas per day on an interruptible basis for Cabot Corporation (Cabot), and the exchange and transportation of up to 30 Mcf of gas with Cities Service Gas Company (Cities) for the account of Cabot, for a period of two years from the date of first delivery, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport for Cabot, pursuant to an agreement dated May 11, 1976, up to 35 Mcf per day from Cabot's No. 2-34 Barby Ranch Unit Well in Beaver County, Oklahoma, and up to 30 Mcf of gas per day from Cities, for the account of Cabot, from an existing point of interconnection of the facilities of Applicant and Cities located in Grant County, Kansas.

It is asserted that Applicant would redeliver such gas to Cabot's Satellite Division plant located in Kokomo, Indiana, an existing direct industrial customer of Kokomo Gas and Fuel Company (Kokomo), who in turn is an existing resale customer of Applicant, at an existing point of delivery between Kokomo and Applicant, and to Cabot's Cab-O-Sil plant an existing direct industrial cus-

tomer of Applicant located near Tuscola, Illinois, at an existing point of delivery to Cabot in Douglas County, Illinois.

Applicant, it is stated, would redeliver the stated volumes less 10 percent reduction for fuel usage, and Cabot would pay Applicant a monthly charge of $442.00, subject to an upward or downward adjustment of 22.36 cents per Mcf to be applied to any deficiency or excess in volumes transported.

Applicant states that the exchange of gas with Cities is pursuant to an exchange agreement dated July 20, 1976, which agreement provides no reimbursement other than the exchange of gas volumes between parties.

It is stated that Cabot's Cab-O-Sil plant anticipates an approximate curtailment of 26 percent over the next twelve months, and Cabot has advised Applicant that the gas to be transported is to be used as Category 2 process gas for the manufacturing of a water repellent compound manufactured through silicone dioxide combustion. It is further stated that Applicant's deliveries to Kokomo are being curtailed by 30 percent because of a gas supply deficiency, and short-term emergency supplementary supplies can no longer be relied upon by Kokomo. Said gas, it is stated, is required for use as a Category 2 process gas for the manufacturing of high performance alloys.

Applicant states that its facilities are adequate to handle the volumes to be transported for Cabot, and that no new facilities are required to perform this transportation and exchange service.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-131]

PORTLAND GENERAL ELECTRIC CO.

Rate Filing

JANUARY 12, 1977.

Take notice that Portland General Electric Company (PGE) on January 3, 1977, tendered for filing in accordance with section 35 of the Commission's regulations a Rate Schedule designated ICP Service Rate Schedule PGE-1 which provides for sale of non-firm energy to utilities that are parties to the Intercompany Pool Agreement (Revised), dated September 1, 1973, or to other utilities.

This Tariff applies to deliveries of non-firm energy at such time and in such amounts as PGE, in its sole discretion, makes available. PGE states that the Tariff is intended to achieve fuel-saving and cost benefits between PGE and any interested purchasers.

Copies of this filing were served upon the Public Utility Comimssioner of Oregon and the following potential purchasers: Pacific Power & Light Company, Puget Sound Power & Light Company, The Washington Water Power Company, The Montana Power Company, Idaho Power Company, Utah Power Company, Pacific Gas and Electric Company, and Southern California Edison Company.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2037 Filed 1-21-77;8:45 am]

[Docket No. ER76-505]

PUBLIC SERVICE CO. OF NEW HAMPSHIRE

Settlement Agreement

JANUARY 13, 1977.

Take notice that on January 6, 1977, Public Service Company of New Hampshire (PSNH) filed a Revised Settlement Agreement in the referenced proceeding. PSNH states that the Revised Settlement Agreement resolves all issues in this docket. PSNH filed also a motion to withdraw a proposed partial settlement agreement certified to the Commission on November 3, 1976. The Revised Settlement Agreement, according PSNH, produces a revenue increase of $3,861,474 on a 1976 test year basis.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before February 4, 1977. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2003 Filed 1-21-77;8:45 am]

[Docket No. RP75-84]

SOUTHERN NATURAL GAS CO.

Order Approving Rate Settlement

JANUARY 11, 1977.

On November 9, 1976, the Presiding Administrative Law Judge certified to the Commission a proposed settlement agreement in the above-entitled proceeding together with the entire record relating thereto. The settlement, if approved, would resolve all issues in the proceeding except those pertaining to advance payments, which are reserved for hearing and formal decision. For the reasons stated below, the settlement agreement shall be approved.

This proceeding was initiated on March 31, 1975, when Southern Natural Gas Company (Southern) tendered for filing a proposed general rate increase amounting to approximately $91.1 million annually based on costs and sales volumes for calendar year 1974, as adjusted. On May 15, 1975, the Commission by order suspended Southern's proposed increase for five months, following which it became effective, subject to refund, on October 16, 1975. In accordance with conditions contained in the suspension order, Southern submitted revised rates purporting to reflect the "United"[1] method of cost classification for purposes of rate design, and reducing the amount of the proposed rate increase from $91.1 to $65.2 million annually. The settlement agreement would allow an increase in Southern's of $32.7 million, representing a further reduction of $32.5 million from the restated rates claimed by Southern.

Notice of the settlement agreement was issued on November 16, 1976, providing for comments by interested parties to be submitted on or before November 30, 1976. No comments opposing the settlement have been received.

The settlement rates and refunds are predicated upon the settlement cost of service set forth on Appendix C of the settlement agreement. The settlement cost of service includes a rate of return of 10.08 percent on Southern's net investment rate base and a return of 12.75 percent on common equity. The settlement cost of service and rate of return appear reasonable and are approved.

The settlement provides for two sets of rates, as shown on Appendices A and B of the settlement. The Appendix B rates are to be effective from October 16, 1975, through July 15, 1976. The Appendix A rates are to be effective commencing July 16, 1976. The differences between the appendix A and B rates are due to changes in Southern's cost of gas, the elimination of the depletion allowance, and the surcharge to recover demand charge credits.

Other important provisions of the settlement agreement are as follows:

Article IV provides for functional depreciation rates to be utilized by Southern of 3.85 percent for onshore transmission plant, 4.25 percent for underground storage, and 7.35 percent for gas supply transmission and gathering facilities. The settlement depreciation rates cannot be changed prior to October 16, 1977.

Article V provides for additional refunds if Southern's total sales for the 12 month period ending September 30, 1977, exceed the test period sales or if sales to Southern's direct customers and rate schedule "AO" customers exceed the test period sum of sales to these customers.

Article VI prescribes the procedures for hearing and decision on the reserved advance payments issues. These issues shall be disposed of as a result of the hearings held before the Presiding Judge on October 28, 1976.

Article VII provides that for the period November 28, 1975, through December 31, 1977, Southern shall give demand charge credits to its rate schedule "OCD" and "OCDL" customers to the extent requirements within contract demand are curtailed. In addition, Southern shall recover the credits given through a surcharge to its commodity rate under its "OCD", "OCDL", "AO", and "AOL" rate schedules. The surcharge will be computed by dividing the credits given by the sum of the sales under the "CD" and "AO" rate schedules and Southern's direct sales. Southern's small general service customers will not be liable for any recovery of demand charge credits. The computations will be made every six months to coincide with Southern's PGA rate adjustments.

Article VIII of the settlement permits Southern to recover carrying charges of 9 percent per annum on unrecovered purchased gas costs, and requires interest of 9 percent on credit balances in the deferred purchased gas cost account. Southern is limited to semi-annual PGA filings to be effective January 1 and July 1 of each year. The carrying charge provision is subject to the Commission's final determination of this issue in Docket No. R-406 and is proposed to be effective on the date of the Commission's order approving the settlement or December 1, 1976, whichever is sooner.

Based upon a review of the entire record of this proceeding, including the settlement agreement, and the evidence, pleadings, and other materials submitted by the parties, the Commission finds the settlement agreement represents a reasonable resolution of the issues in this proceeding in the public interest, and that the agreement should accordingly be approve and adopted.

The Commission finds. It is in the public interest and in carying out the provisions of the Natural Gas Act that the proposed settlement agreement be approved and adopted as hereinafter ordered.

The Commisison orders: (A) the settlement agreement certified to the Commission on November 9, 1976, in this proceeding, is incorporated herein by reference and is approved and adopted.

(B) Proposed § 17.4(3) of Southern's tariff is approved to be effective as of December 1, 1976.

(C) Within 15 days of the issuance of this order, Southern shall file revised tariff sheets in accordance with the terms of the settlement agreement and of this order.

(D) Within 30 days from the date of this order, Southern shall make refunds to its customers pursuant to the settlement, and shall submit a report thereof to the Commission.

(E) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, the staff or any other party or person affected by this order in any proceeding now pending or hereinafter instituted by or against Southern or any other person or party.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP76-16]

TENNECO LNG, INC.

Extension of Time

JANUARY 11, 1977.

On December 29, 1976, Tenneco LNG, Inc., filed a motion to extend the time for filing comments on Staff's Draft Environmental Impact Statement, in the above-designated proceeding. The motion states that Staff has no objection to the requested extension.

Upon consideration, notice is hereby given that the time for filing comments is extended to and including February 14, 1977.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2030 Filed 1-21-77;8:45 am]

[Docket No. CI76-753]

TENNECO OIL CO.

Application for Optional Procedural Certification

JANUARY 13, 1977.

Take notice that on November 18, 1976, Tenneco Oil Company (Tenneco Oil) filed an amendment to its September 3, 1976 application for a certificate of public convenience and necessity filed pursuant to § 2.56a of the Commission's General Policy and Interpretations. Tenneco Oil requests certification under § 2.75 for natural gas from Eugene Island Block 367, offshore Louisiana, at an initial rate of $2.8037 per Mcf with escalations of 5 cents per Mcf at the end of each contract year.

The subject gas will be produced by Tenneco Exploration, Ltd. and Tenneco Exploration II, Ltd. and sold to Tenneco Oil for resale to Tennessee Gas Pipeline Company, less one-fourth (¼), which amount Tenneco Oil proposes to transport onshore for its own uses.

Any person desiring to be heard or to make any protest with reference to said petition should on or before February 7, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2002 Filed 1-21-77;8:45 a.m.]

[Docket No. E-9578]

TEXAS POWER & LIGHT CO.

Petition to Institute Investigation to Determine Jurisdiction

JANUARY 11, 1977.

Take notice that on December 22, 1976, Tex-La Electric Cooperative, Inc. (Tex-La) tendered for filing a petition requesting the Commission to investigate to determine whether rates for electric power sales for resale of Texas Power and Light Company are subject to the jurisdiction of the Commission.

The cooperative states that a copy of this petition was hand-delivered to the Vice-President of Texas Power and Light Company.

Any person desiring to be heard or to protest said petition should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or

[1] United Gas Pipe Line Company, Opinion No. 671, (50-FPC 1348).

before January 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this petition are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1994 Filed 1-21-77;8:45 am]

[Docket No. CP76-107]

TRANSWESTERN PIPELINE CO.

Petition to Amend

JANUARY 12, 1977.

Take notice that on December 27, 1976, Transwestern Pipeline Company (Petitioner), P.O. Box 2521, Houston, Texas 77001, filed in Docket No. CP76-107 a petition to amend the Commission's order issued pursuant to section 7(c) of the Natural Gas Act on April 2, 1976 (55 FPC), as amended on November 3, 1976 (56 FPC), in the instant docket so as to authorize the transportation of gas for Pacific Interstate Transmission Company (Pacific Interstate) from three additional wells, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that it was authorized by the Commission's order issued April 2, 1976, to transport natural gas in interstate commerce for the account of Pacific Interstate, which gas Pacific Interstate is purchasing from Pacific Lighting Gas Development Company (PLGD) and is selling to its sole customer, Pacific Lighting Service Company (Service Company). It is stated that the Commission in its order issued November 3, 1976, authorized the transportation of gas by Petitioner to Service Company for the account of Pacific Interstate from four additional wells in Petitioner's supply area.

Petitioner states that it has entered into an agreement with Pacific Interstate to further amend the Transportation Agreement between them dated September 29, 1975, so as to include the transportation of gas from three additional wells to Service Company for the account of Pacific Interstate, and requests authorization for this transportation service. It is stated that Pacific Interstate would purchase such natural gas from PLGD from the following wells:

(1) The Nash No. 3 Well, Eddy County, New Mexico;

(2) The O. R. Tipps No. 1 Well, Roberts County, Texas;

(3) The University "21-2" No. 1 Well, Winkler County, Texas.

It is stated that Petitioner would transport the gas described herein through its existing main line system and would deliver it to Service Company at an existing interconnection between the two companies' systems at the Arizona-California border near Needles, California; hence, no new facilities are required. It is further stated that the proposed transportation service would be rendered in accordance with Petitioner's Rate Schedule TP-1, and Petitioner is still obligated to transport on a best-efforts basis no more than 25,000 Dth of gas per day as stated in the Transportation Agreement dated September 29, 1975.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before February 1, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-132]

UNION ELECTRIC CO.

Filing of Boundary Line Agreement

JANUARY 12, 1977.

Take notice that on January 3, 1977, Union Electric Company (Union) tendered for filing a new Boundary Line Agreement dated December 20, 1976, between the City of Farmington, Mo. and Union. Said Agreement modifies rate and termination provisions under the existing agreement dated December 5, 1960. It raises the rate for energy delivered from 1.25¢ to 2.12¢ per kilowatt hour.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are available for public inspection at the Federal Power Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2036 Filed 1-21-77;8:45 am]

[Docket No. ER77-137]

UNION ELECTRIC CO.

Filing of Revisions to Interchange Agreement

JANUARY 13, 1977.

Take notice that on January 7, 1977, Union Electric Company (Union) tendered for filing an Amendment and revised Schedule II to the Interchange Agreement dated November 1, 1967 between Kansas City Power & Light Company and Union. Said changes add "Excess Energy" to the Interchange Agreement and revise certain rates under such agreement.

The rates provided for in revised Schedule II are identical to rates accepted for filing by the Commission as supplement No. 10 to Union's Rate Schedule FPC No. 67 (Docket No. ER76-667).

Copies of the Amendment and revised Schedule II have been sent to Kansas City Power & Light Company, Kansas City, Missouri, and to the Missouri Public Service Commission, Jefferson City, Missouri.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.3 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 28, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are available for public inspection at the Federal Power Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2006 Filed 1-21-77;8:45 am]

[Docket No. CP77-95]

UNITED GAS PIPE LINE CO. AND MID LOUISIANA GAS CO.

Application

JANUARY 11, 1977.

Take notice that on December 17, 1976, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, and Mid Louisiana Gas Company (Mid Louisiana), 300 Poydras Street, New Orleans, Louisiana 70130, filed a joint application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the relocation of an existing exchange point of United's Baton Rouge-New Orleans pipeline, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that United and Mid Louisiana presently exchange gas in accordance with an Exchange Agreement between them dated March 26, 1968, as amended, filed as United's Rate Schedule X-24 and Mid Louisiana's Rate Schedule X-3. United and Mid Louisiana propose, by letter agreement dated September 22, 1976, to amend further the Exchange Agreement to provide for relocation of the Inniswold Plantation exchange point from its present location at Mile Post 10.84 on United's Baton Rouge-New Orleans 18-inch Main Line to Mile Post 15.42 on the same line. United states that it is willing to relocate this exchange point and to maintain the maximum daily delivery obligation of 1,000 Mcf.

It is asserted that relocation of such delivery point would involve the movement of a meter station owned by Mid Louisiana from Mile Post 10.84 to Mile Post 15.42. United, it is further stated, would relocate said facilities and Mid Louisiana would reimburse United for its costs incurred in such relocation.

Relocation of the exchange point, it is stated, would assist Mid Louisiana in the maintenance of pressures required to serve the distributor in the area, Gulf Station Utilities Company, by placing the exchange point approximately 4.6 miles nearer the center of the Inniswold Plantation system load.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-1999 Filed 1-21-77;8:45 am]

[Docket No. CP77-110]

UNITED GAS PIPE LINE CO.

Application

JANUARY 11, 1977.

Take notice that on December 27, 1976, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP77-110 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon approximately 2.0 miles of 6-inch pipeline located in Angelina County, Texas, by sale to Entex, Inc. (Entex), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to abandon 2.0 miles of pipeline connecting the Lufkin Town Border Station No. 1 with Applicant's Waskom-Goodrich 22-inch main line. It is indicated that Applicant owns a parallel 8-inch line which is adequate to maintain service between its main line and the town border station. Applicant would sell subject facilities to Entex for $14,000. It is further indicated that as partial consideration for the purchase of the pipeline, Entex would operate and maintain, on behalf of and at no cost to Applicant, an odorizing unit to be installed by Applicant on Applicant's 8-inch line which runs parallel to the subject pipeline. It is stated that Entex would be able to utilize the subject pipeline as part of its gas distribution system.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 1, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

VEPCO states that the revised contract supplements are intended to supersede the listed FPC Rate Schedules and requests that the revised supplements be allowed to become effective on December 1, 1976, the requested effective date.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 26, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-150]

WISCONSIN PUBLIC SERVICE CORP.

Order Approving Settlement

JANUARY 10, 1977.

On September 25, 1975, Wisconsin Public Service Corporation (WPS) submitted for filing changes in its FPC Electric Tariff Rate for electric service to eight municipal customers. WPS subse-

quently completed its filing on November 21, 1975. The proposed rates would increase revenues from jurisdictional sales by $1,186,277 based on a twelve month test period ending August 31, 1976.

By order issued December 19, 1975, the Commission accepted WPS's filing and suspended the proposed rates until February 22, 1976, subject to refund. As a result of settlement negotiations between WPS and its wholesale customers, an uncontested agreement was reached, which was submitted to the Commission on October 1, 1976, with revised rate schedules intended to reflect the terms of the proposed agreement.

Based on our review of the record in these proceedings, including the settlement agreement itself, we conclude that the settlement agreement represents a reasonable resolution of the issues in the proceeding in the public interest, and that accordingly the settlement should be approved.

The Commission finds: The settlement agreement submitted to the Commission in this docket should be approved and made effective, as hereinafter ordered.

The Commission orders: (A) The settlement agreement submitted to the Commission in this docket on October 1, 1976, is incorporated herein by reference, accepted and approved.

(B) The revised tariff sheets submitted to the Commission in this docket on October 1, 1976, concurrently with the settlement agreement, are hereby accepted for filing to become effective in conformity with the terms of the agreement approved herein.

(C) Within 30 days from the date of issuance of this order, WPS shall refund all amounts collected in excess of the settlement rates with interest at 9 percent per annum.

(D) Within 15 days after refunds are made, WPS shall file a refund report with the Commission, shall serve a copy thereof upon all affected customers, and shall furnish a copy to each State Commission within whose jurisdiction the wholesale customers distribute and sell electric energy at retail. Such report shall show monthly billing determinants and revenues under prior, present and settlement rates; the monthly settlement rate increase; the monthly refund; and the monthly interest computation together with a summary of such information for the total refund period.

(E) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff, or any party or person affected by this order in any proceeding now pending or hereafter instituted by or against WPC or any other person or party.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Project No. 2113]

WISCONSIN VALLEY IMPROVEMENT CO.

Application for Change in Land Rights

JANUARY 13, 1977.

Public notice is hereby given that an application for change in land rights was filed on September 27, 1976, under the Federal Power Act (16 U.S.C. 791a–825r) by the Wisconsin Valley Improvement Company (Correspondence to: Mr. L. L. Sheerar, Secretary, Wisconsin Valley Improvement Company, 501 Jefferson Street, Box 988, Wausau, Wisconsin 54401) for the Big Eau Pleine Reservoir of Project No. 2113, said reservoir being located in Marathon County, Wisconsin on the Wisconsin River, a navigable waterway of the United States.

Wisconsin Valley Improvement Company, Licensee for Project No. 2113, proposes to convey a 60-foot strip of land (approximately 0.80 acre) in Bergen Township to Marathon County so that the County Highway Department may realign the approaches to the existing Moon Bridge, thereby improving a site where numerous traffic accidents have occurred.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 23, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

Take further notice, that, pursuant to the authority contained in and conferred upon the Federal Power Commission by sections 308 and 309 of the Federal Power Act (16 U.S.C. 825g, 825h) and the Commission's rules of practice and procedure, specifically § 1.32(b) (18 CFR 1.32(b)), as amended by Order No. 518, a hearing may be held without further notice before the Commission on this application if no issue of substance is raised by any request to be heard, protest or petition filed subsequent to this notice within the time required herein, and if the applicant requests that the shortened procedure of § 1.32(b) be used. If an issue of substance is so raised or applicant fails to request the shortened procedure, further notice of hearing will be given.

Under the shortened procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing before the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2014 Filed 1-21-77;8:45 am]

[Docket No. CP76-138]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Petition to Amend

JANUARY 19, 1977.

Take notice that on January 14, 1977, Transcontinental Pipe Line Corporation (Petitioner), P.O. Box 1396, Houston, Texas 77001, filed in Docket No. CP76–138 a petition to amend the Commission's order of December 22, 1975, issued in the instant docket pursuant to Section 7(c) of the Natural Gas Act and 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79) so as to authorize the addition of one Cannon Mills Company (Cannon) facility in Maiden, North Carolina, to the existing transportation arrangement, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that it is presently authorized to transport up to 1,500 Mcf of natural gas per day on an interruptible basis for Cannon to Public Service Company of North Carolina, Inc. (Public Service), a resale customer of Petitioner, for use in two Cannon facilities in North Carolina. It stated that Petitioner collects as initial charge of 22.0 cents per Mcf for all quantities transported and delivered to Public Service for Cannon's account and retains 3.8 percent of the volumes received for transportation to Public Service as makeup for compressor fuel and line loss.

Petitioner by its petition to amend requests authorization to add an additional Cannon facility in Maiden, North Carolina, to be served under the transportation arrangement authorized by the Commission order of December 22, 1975, pursuant to Petitioner's Rate Schedule X–81. It is stated that the Maiden, North Carolina, facility would be served from the same 1,500 Mcf of gas per day presently authorized to be transported. Deliveries would be made by Petitioner to Piedmont Natural Gas Company (Piedmont), an existing customer of Petitioner under Rate Schedule CD–2. It is indicated that a transportation agreement among Petitioner, Piedmont, and Cannon would be entered into in the near future and the deliveries by Petitioner to Piedmont would be made at existing delivery points to Piedmont.

The petition to amend indicates that Cannon requires at its Maiden facility 73 Mcf of gas on an average day and 135 Mcf of gas on a peak day. The gas would be used to resin treat fabric and in bulking operations. These are said to be process applications which require precise temperature control and a clean burning fuel.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before February 3, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-2319 Filed 1-19-77;3:53 pm]

FEDERAL RESERVE SYSTEM

BANCORPORATION OF WISCONSIN

Formation of Bank Holding Company

Bancorporation of Wisconsin, West Allis, Wisconsin, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 80 percent or more of the voting shares of West Allis State Bank, West Allis, Wisconsin and Southwest Bank, New Berlin, Wisconsin. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than February 10, 1977.

Board of Governors of the Federal Reserve System, January 17 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-2094 Filed 1-21-77;8:45 a.m.]

MOUNTAIN FINANCIAL SERVICES, INC.

Order Approving Acquisition of Bank and Engaging in Insurance Agency Activities

Mountain Financial Services, Inc., Denver, Colorado, a bank holding company within the meaning of the bank Holding Company Act, has applied for the Board's approval under Section 3(a)(3) of the Act (12 U.S.C. Section 1842(a)(3)) to acquire 98 per cent or more of the voting shares of Southeast State Bank, Denver, Colorado ("Bank"). Applicant has also applied, pursuant to Section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. Section 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to engage de novo in the sale as agent of credit life, credit accident and health insurance directly related to extensions of credit by Bank. Such activities have been determined by the Board to be closely related to banking (12 CFR 225.4(a)(9)).

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with Sections 3 and 4 of the Act. The time for filing comments and views has expired, and the Board has considered the applications together with all comments received, in light of the factors set forth in Section 3(c) of the Act, and the considerations specified in Section 4(c)(8) of the Act.

Applicant presently controls only one bank subsidiary, located in the Denver banking market[1] (the relevant market), with aggregate deposits of approximately $5.1 million.[2] Applicant is among the smaller banking organizations in Colorado. Acquisition of Bank (deposits of $3.8 million) would result in Applicant's controlling 0.11 per cent of total commercial bank deposits in the State. Accordingly, acquisition of Bank would not have a significant effect upon the concentration of banking resources in Colorado.

Bank ranks 51st out of the 54 banking organizations competing in the Denver market, with 0.1 per cent of total deposits in commercial banks in the market. As indicated above, Applicant is represented in the Denver banking market; however, upon consummation of the subject proposal Applicant will rank only 42nd in the Denver market, and will control only 0.2 per cent of market deposits. It is the Board's view that consummation of the proposal would not have any significant adverse effect on existing competition in view of the relevant sizes of these organizations and their small market shares; furthermore, no significant future competition would be eliminated by approval of this application. Accordingly, on the basis of the facts of record, the Board concludes that competitive considerations are consistent with approval.

The financial and managerial resources and future prospects of Applicant, its subsidiary bank, and Bank are satisfactory. As a result of consummation of this proposal, Bank's financial and managerial resources and future prospects will be somewhat strengthened. Accordingly, considerations relating to banking factors are consistent with approval of the application. Considerations relating to convenience and needs are also regarded as being consistent with approval of the application to acquire Bank. Accordingly, it is the Board's judgment that the proposed acquisition of Bank would be in the public interest and the application should be approved.

In connection with the application to acquire Bank, Applicant has also applied, pursuant to § 225.4(a)(9)(ii)(a) of Regulation Y, to engage de novo in the sale as agent of credit life and credit accident and health insurance directly related to extensions of credit by Bank. Approval of the application to engage in such activities would insure a convenient source of credit related insurance services to Bank's customers. It does not appear that Applicant's engaging in such activities would have any significant adverse effect on existing or potential competition. Furthermore, there is no evidence in the record indicating that consummation of the approval would result in any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects on the public interest.

Based upon the foregoing and other considerations reflected in the record, the Board has determined, in accordance with the provisions of section 4(c)(8), that consummation of this proposal can reasonably be expected to produce benefits to the public that outweigh possible adverse effects, and the application to engage in the above-described insurance activities should be approved.

Accordingly, the applications are approved for the reasons summarized above. The acquisition of Bank shall not be made before the thirtieth calendar day following the effective date of this Order. The acquisition of Bank and commencement of credit related insurance activities shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City pursuant to delegated authority. The determination as to Applicant's insurance activities is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,[3] effective January 14, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[1] The Denver market is approximated by Adams, Arapahoe, Denver, and Jefferson Counties and the Broomfield portion of Boulder County.

[2] All banking data are as of December 31, 1975.

[3] Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Partee and Lilly. Absent and not voting: Chairman Burns and Governor Jackson.

[FR Doc 77-2095 Filed 1-21-77;8:45 am]

SEILON, INC.

Order Denying Retention of Additional Shares of Bank Holding Company

Seilon, Inc., Toledo, Ohio, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to retain 5509 voting shares (approximately .42 per cent) of Nevada National Bancorporation, Reno, Nevada ("NNB"), a one-bank holding company that controls Nevada National Bank, Reno, Nevada ("Bank").[1]

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with Section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those submitted by the Comptroller of the Currency, in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Seilon currently owns 39.4 per cent of the voting shares of NNB, a one-bank holding company that owns 100 per cent of the voting shares (less directors' qualifying shares) of Bank.[2] Bank (deposits of $192.6 million) is the fourth largest of eight commercial banking organizations in Nevada and through its 24 banking offices, controls approximately 10.2 per cent of the total deposits held by commercial banks in that State.[3] Inasmuch as Seilon's proposal involves the retention of voting shares of a bank holding company that it already controls, the proposed retention would eliminate neither existing nor potential competition, and would not increase the concentration of banking resources in any relevant area. Therefore, competitive considerations are consistent with approval of the application.

The Board has indicated on previous occasions that it believes a bank holding company should constitute a source of both financial and managerial strength to its subsidiary bank(s). Accordingly, in acting upon any application under the Act, the Board will closely examine the financial condition, managerial resources, and future prospects of an applicant and its subsidiary bank(s) with these factors in mind. Based upon an evaluation of such factors with respect to this application the Board has determined that denial of this application is warranted.

[1] Formerly known as First Bancorporation

[2] Seilon became a bank holding company on December 31, 1970, by virtue of its ownership of 36.5 per cent of the voting shares of NNB and the 1970 Amendments to the Act. Seilon engages, through its subsidiaries, in various activities including banking and personal property leasing. In addition, it engages in manufacturing, selling, and distributing agricultural machinery in the United States and abroad, which activities are impermissible for bank holding companies and must be divested by December 31, 1980 pursuant to § 4(a)(2) of the Act.

[3] All banking data are as of December 31, 1975, unless otherwise indicated

With respect to the financial resources and future prospects associated with this application, the Board notes the continued existence of some of the same concerns that it expressed in its Order of July 20, 1972, denying Seilon's application to acquire up to an additional 63.5 per cent of NNB.[4] In this regard, Seilon's overall financial condition still does not permit it to be a source of financial strength to Bank. Rather, based upon an examination of all the facts of record, the Board concludes that Seilon, through NNB, has sought to improve its overall financial condition at the expense of Bank through liberal dividends drawn from Bank. It appears that such a continued program could hinder Bank's financial condition. Therefore, the Board concludes that banking factors weigh against approval of this application.

With respect to the managerial resources associated with this application, the Board is concerned, as it was in its denial Order in 1972, with absentee management of the nature involved in Seilon's structure. Furthermore, as the Board has previously indicated, the reference to "managerial resources" does not refer solely to the business abilities of management or to its past financial success or failure but also to management's disposition to conduct the affairs of the bank holding company in accordance with the requirements of law.[5]

Section 3(a)(3) of the Act states that it shall be unlawful, except with the prior approval of the Board "for any bank holding company to acquire direct or indirect ownership or control of any voting shares of any bank if, after such acquisition, such company will directly or indirectly own or control more than 5 per centum of the voting shares of such bank. * * *"

It appears from the facts of record in this case that Seilon, without prior Board approval, acquired 5,509 voting shares of NNB that are the subject of this retention application in settlement of a lawsuit threatened by two shareholders of NNB. These voting shares were acquired, at a cost of $52,500, in three installments over a one-year period.[6] It appears that at the time of the acquisition in question, Seilon was fully aware of the Act's requirement of prior Board approval. Despite this knowledge, and without any obligation to do so, Seilon acquired the 5,509 voting shares of NNB. In its application, Seilon has stated that:

> We were familiar as our application in 1971 [to acquire an additional 63.5 per cent of the voting shares of NNB] indicates that tender offers or market purchases of First Bancorporation [now known as NNB] common stock by Seilon required the prior approval of the Federal Reserve System. We were not aware that the . . . Act went so far as to prohibit management from exercising its responsibilities in the resolution of litigation by requiring the prior approval of the Federal Reserve where the acquisition of a miniscule number of shares is a part of a larger settlement of litigation problem

In assessing the managerial resources of an applicant the Board must consider all the factors that bear upon the management's competence, quality, and disposition to conduct in accordance with the requirements of law the affairs of any bank holding company seeking to acquire, or to retain, control of a bank or of any other bank holding company. The Board previously has stated that when it comes to the Board's attention that an acquisition has been made, or activities have been commenced, without the requisite prior approval of the Board, whether or not such violation of the law appears to have been "willful," such conduct may reflect so adversely upon the managerial factors in connection with an application for permission to retain the illegally acquired shares or activity that the conduct, in and of itself, constitutes grounds for denial of such an application.

Section 3(a) of the Act is explicit that prior Board approval is required for *any* acquisition by a company of voting shares of a bank in which it owns less than a majority interest if, thereafter, that company will own or control more than 5 per cent of the bank's voting shares. While the Board recognizes that Seilon was desirous of avoiding potential legal expenses in the defense of a threatened lawsuit, the Board notes that the two shareholders involved were shareholders of NNB and not of Seilon and that Seilon was not obligated to acquire the shares in question. In view of the fact that Seilon was fully aware of the Act's requirement of prior Board approval in 1972 when it sought to acquire 63.5 per cent of NNB's voting shares; that the Board had issued an order in 1972 denying Seilon's previous application because of less than satisfactory financial and managerial considerations at that time; and that Seilon was unable to substantiate its position that acquisitions of small amounts of shares in settlement of threatened lawsuits were exempt from the Act's prior approval requirements; the Board concludes that insofar as this application is concerned the management of Seilon has not demonstrated a disposition to conform the conduct of Seilon's affairs to the requirements of the Act. As was mentioned earlier, section 3(a) of the Act is explicit as to acquisitions of voting shares for which prior Board approval is required. When an acquisition of voting shares is made without obtaining such prior Board approval, under circumstances such as those presented here, the Board believes that it should not approve an application to retain the illegally acquired shares and, thereby, allow the offending party to reap the fruits of its violation.

There is evidence in the record that the convenience and needs of the community are currently being adequately served by Bank. Therefore, within the context of this application, these considerations are not sufficient to outweigh the adverse managerial and banking factors associated with this proposal. Accordingly, it is the Board's judgment that approval of the application would not be in the public interest and that the application should be denied.

On the basis of the record, and in light of the factors set forth in § 3(c) of the Act, the application is denied for the reasons summarized above. Seilon is hereby ordered to take all necessary steps to divest the 5,509 voting shares of NNB that were illegally acquired by Seilon no later than thirty days after the effective date of this order.

By order of the Board of Governors,[7] effective January 14, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[4] 37 F.R. 15052 (1972); 58 Federal Reserve *Bulletin* 729 (August 1972).

[5] See the Board's order dated July 29, 1976, denying the application by Florida National Banks of Florida, Inc., Jacksonville, Florida, to acquire Citizens Bank of Bunnell, Bunnell, Florida. 41 F.R. 33334 (1976); 1976 Federal Reserve Bulletin 696. As originally enacted, section 3(c)(3) of the Bank Holding Company Act provided that among the factors to be considered by the Board is the "character of [the] management." Also see Senate Report No. 1095, 84th Cong., 1st Sess., at page 10, accompanying the 1956 Act. The present § 3(c) of the Act includes the same standard without any substantive change in its meaning having been made by the 1966 Amendments to the Act that brought this section into harmony with the Bank Merger Act. The Federal Home Loan Bank Board has had occasion in a similar context to consider the scope of the "managerial resources" standard as contained in that section of the National Housing Act dealing with savings and loan holding companies. (12 U.S.C. § 1730a(e)(2)). The Bank Board concluded that its standard was adopted from the Bank Holding Company Act and that the phrase "managerial resources" encompasses considerations relating to the integrity of management. Opinion and Order of the Federal Home Loan Bank Board in the matter of the Joint Applications of Fidelity Financial Corporation and Fidelity Savings and Loan Association, Sacramento, California, and Six Rivers Savings and Loan Association, Eureka, California (Resolution No. 73-1772, December 7, 1973), at page 20

[6] The shares were purchased as follows: 2,369 shares on November 1, 1973; 1,570 shares on May 1, 1974; and 1,570 shares on November 1, 1974.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on January 13, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FEA request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before February 11, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street, NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

FEDERAL ENERGY ADMINISTRATION

FEA is requesting clearance of Form U516-S-1, State Energy Conservation Plan Report. Form U516-S-1 is a revision of Form U516-S-0, Application Form for Financial Assistance to States for Development of a State Energy Conservation Plan. The Energy Policy and Conservation Act, Title III, Part C (Pub. L. 94-163) signed into law on December 22, 1975, requires in part, for the creation of the State Energy Conservation Program and authorizes financial and technical assistance to participating States. Form U516-S-1 is required for States to receive Federal financial assistance in implementing a State energy conservation plan report. Section 362(b) of EPCA requires that within six months after its enactment, FEA establish State energy conservation plan guidelines for the preparation of a State energy conservation plan report. The application form (U516-S-1) for providing financial assistance to the States is a necessary part of the State plan report as the States will use this form to provide FEA with a detailed State energy conservation plan report. The State Energy Conservation Plan Report guidelines must be completed within five months after the guidelines are printed. Form U516-S-1, State Energy Conservation Plan Report (adapted from Standard Form 424, Federal Assistance, consisting of four parts) has been revised in that Part IV has been modified to satisfy FEA's requirements for more definitive information and unnecessary information has been blocked out in Part III, Budget Information. Potential respondents to Form U516-S-1 are estimated by FEA to be approximately 56 (United States and Territories) and reporting burden is estimated to be 120 hours per response.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

GENERAL SERVICES ADMINISTRATION

[Federal Property Management Regs.; Temporary Reg. F-410]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government in an electric and gas rulemaking proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d)(40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Hawaii Public Utilities Commission (Docket No. 2793) in proceedings involving an investigation of rate schedules of electric and gas utilities in the State of Hawaii.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

WALLACE H. ROBINSON, JR.,
Acting Administrator of General Services.

CALIFORNIA PSRO AREA XXIII: RESULTS OF NOTIFICATION

Notice to Physicians Regarding Agreement To Designate Professional Standards Review Organizaiton

On November 23, 1976, the Secretary of Health, Education, and Welfare published in the FEDERAL REGISTER a notice in which he announced his intention to enter into an agreement with the California PSRO Area XXIII designating it as the Professional Standards Review Organization for PSRO Area XXIII of the State of California, which area is designated a Professional Standards Review Organization Area in 42 CFR 101.7.

Such notice was also published in three consecutive issues of the *Los Angeles Times* on November 23, 24, and 25, 1976. In addition, copies of the notice were mailed to organizations of practicing doctors of medicine or osteopathy, including the appropriate State and County medical and specialty societies, and hospitals and other health care facilities in the area, with a request that each such society or facility inform those doctors in its membership or on its staff who are engaged in active practice in PSRO Area XXIII of the State of California of the contents of the notice.

The notice requested that any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area

[7] Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Jackson, and Partee. Absent and not voting: Chairman Burns and Governor Lilly.

XXIII of the State of California who objects to the Secretary entering into an agreement with the California PSRO Area XXIII on the grounds that such organization is not representative of doctors in PSRO Area XXIII of the State of California, mail such objection in writing to the Secretary, Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022 on or before December 23, 1976.

After reviewing the final tabulation of objections from doctors of medicine or osteopathy in PSRO Area XXIII of the State of California, the Secretary has determined, pursuant to 42 CFR 101.105, that not more than 10 percentum of the doctors engaged in the active practice of medicine or osteopathy in PSRO Area XXIII of the State of California have expressed timely objection to the Secretary entering into an agreement with the California PSRO Area XXIII. Therefore, the Secretary will proceed to enter into an agreement with the California PSRO Area XXIII designating it as the Professional Standards Review Organization for PSRO Area XXIII of the State of California.

Dated: January 18, 1977.

JOHN H. KELSO,
Acting Administrator,
Health Services Administration.

NEW YORK PSRO AREA XIV: RESULTS OF NOTIFICATION

Notice to Physicians Regarding Agreement To Designate Professional Standards Review Organization

On November 23, 1976, the Secretary of Health, Education, and Welfare published in the FEDERAL REGISTER a notice in which he announced his intention to enter into an agreement with the PSRO of Queens County, Inc., designating it as the Professional Standards Review Organization for PSRO Area XIV of the State of New York, which area is designated a Professional Standards Review Organization Area in 42 CFR 101.36.

Such notice was also published in three consecutive issues of *The New York Times* and the *New York Post* on November 23, 24, and 25, 1976. In addition, copies of the notice were mailed to organizations of practicing doctors of medicine or osteopathy, including the appropriate State and County medical and specialty societies, and hospitals and other health care facilities in the area, with a request that each such society or facility inform those doctors in its membership or on its staff who are engaged in active practice in PSRO Area XIV of the State of New York of the contents of the notice.

The notice requested that any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area XIV of the State of New York who objects to the Secretary entering into an agreement with the PSRO of Queens County, Inc., on the grounds that such organization is not representative of doctors in PSRO Area XIV of the State of New York, mail such objection in writing to the Secretary, Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022 on or before December 23, 1976.

After reviewing the final tabulation of objections from doctors of medicine or osteopathy in PSRO Area XIV of the State of New York, the Secretary has determined, pursuant to 42 CFR 101.105, that not more than 10 percentum of the doctors engaged in the active practice of medicine or osteopathy in PSRO Area XIV of the State of New York have expressed timely objection to the Secretary entering into an agreement with the PSRO of Queens County, Inc. Therefore, the Secretary will proceed to enter into an agreement with the PSRO of Queens County, Inc., designating it as the Professional Standards Review Organization for PSRO Area XIV of the State of New York.

Dated: January 18, 1977.

NORTH CAROLINA PSRO AREA II: RESULTS OF NOTIFICATION

Notice to Physicians Regarding Agreement to Designate Professional Standards Review Organization

On November 23, 1976, the Secretary of Health, Education, and Welfare published in the FEDERAL REGISTER a notice in which he announced his intention to enter into an agreement with the Piedmont Medical Foundation, Inc., designating it as the Professional Standards Review Organization for PSRO Area II of the State of North Carolina, which area is designated a Professional Standards Review Organization Area in 42 CFR 101.37.

Such notice was also published in three consecutive issues of the *Winston-Salem Journal, Winston-Salem Sentinel,* and the *Statesville Record and Landmark* on November 23, 24, and 25, 1976. In addition, copies of the notice were mailed to organizations of practicing doctors of medicine or osteopathy, including the appropriate State and County medical and specialty societies, and hospitals and other health care facilities in the area, with a request that each such society or facility inform those doctors in its membership or on its staff who are engaged in active practice in PSRO Area II of the State of North Carolina of the contents of the notice.

The notice requested that any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area II of the State of North Carolina who objects to the Secretary entering into an agreement with the Piedmont Medical Foundation, Inc., on the grounds that such organization is not representative of doctors in PSRO Area II of the State of North Carolina, mail such objection in writing to the Secretary, Department of Health, Education, and Welfare, P.O. Box 1583, FDR Station, New York, New York 10022 on or before December 23, 1976.

After reviewing the final tabulation of objections from doctors of medicine or osteopathy in PSRO Area II of the State of North Carolina, the Secretary has determined, pursuant to 42 CFR 101.105, that not more than 10 percentum of the doctors engaged in the active practice of medicine or osteopathy in PSRO Area II of the State of North Carolina have expressed timely objection to the Secretary entering into an agreement with the Piedmont Medical Foundation, Inc. Therefore, the Secretary will proceed to enter into an agreement with the Piedmont Medical Foundation, Inc., designating it as the Professional Standards Review Organization for PSRO Area II of the State of North Carolina.

Health Services Administration

POLL OF PHYSICIANS IN PSRO AREA VII OF THE STATE OF NEW JERSEY

Announcement of Results to Physicians

On July 30, 1976, the Secretary of the Department of Health, Education, and Welfare published in the FEDERAL REGISTER a notice in which he announced his intention to enter into an agreement with the Central New Jersey Professional Standards Review Organization, Inc., designating it as the Professional Standards Review Organization for PSRO Area VII located in the State of New Jersey, which area is designated a Professional Standards Review Organization Area in 42 CFR 101.34.

Such notice was also published in three consecutive issues of the Newark Star Ledger and the Trentonian on July 30, 31, and August 2, 1976. In addition, copies of the notice were mailed to organizations of practicing doctors of medicine or osteopathy, including the appropriate State and County medical and specialty societies, and hospitals and other health care facilities in the area, with a request that each such society or facility inform those doctors in its membership or on its staff who are engaged in active practice in PSRO Area VII of the State of New Jersey of the contents of the notice.

The notice requested that any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area VII of the State of New Jersey who objected to the Secretary entering into an agreement with the Central New Jersey Professional Standards Review Organization, Inc., on the grounds that such organization is not representative of doctors in PSRO Area VII of the State of New Jersey, mail such objection in writing to the Secretary of the Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022, on or before August 30, 1976.

After reviewing the final tabulation of objections from doctors of medicine or osteopathy in PSRO Area VII of the State of New Jersey, the Secretary determined, pursuant to 42 CFR 101.105, that more than 10 percentum of the doctors engaged in the active practice of medicine or osteopathy in PSRO Area VII of the State of New Jersey had expressed timely objection to entering into an agreement with the Central New Jersey Professional Standards Review Organization, Inc.

Therefore, on November 1, 1976, in accordance with 42 CFR 101.106, the Secretary of the Department of Health, Education, and Welfare published in the FEDERAL REGISTER a notice announcing a poll to be conducted of all doctors of medicine or osteopathy engaged in active practice in PSRO Area VII of the State of New Jersey to determine whether the Central New Jersey Professional Standards Review Organization, Inc., was representative of such doctors in the area.

Such notice was also published in the Newark Star Ledger and the Trentonian on November 1, 1976. In addition, copies of the notice were mailed to organizations of practicing doctors of medicine or osteopathy, including the appropriate State and County medical and specialty societies, and hospitals and other health care facilities in the area, with a request that each such society or facility inform those doctors in its membership or on its staff who are engaged in active practice in PSRO Area VII of the State of New Jersey of the contents of the notice.

The notice stated that a ballot was to be mailed to each such doctor on which he was to indicate whether in his opinion the Central New Jersey Professional Standards Review Organiaztion, Inc., was or was not representative of the doctors of medicine or osteopathy engaged in active practice in PSRO Area VII of the State of New Jersey. The notice also requested that any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area VII of the State of New Jersey who had not received a ballot by November 6, 1976, might request in writing a ballot from the Secretary of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022. According to the notice, only those ballots postmarked no later than December 1, 1976, and returned in the stamped self-addressed envelope provided to each individual doctor would be considered valid.

A ballot and envelope together with a letter of explanation was mailed to each individual doctor of medicine or osteopathy who the Secretary determined, pursuant to 42 CFR 101.103, to be engaged in the active practice of medicine or osteopathy in the PSRO area.

The counting of the ballots took place in a proceeding open to the public at the City Council Chambers, Trenton City Hall, 319 East State Street, Trenton, New Jersey 08608, on December 9, 1976.

After reviewing the final tabulation of valid ballots received from doctors of medicine or osteopathy in PSRO Area VII of the State of New Jersey, the Secretary has determined, pursuant to 42 CFR

101.107, that more than 50% of the doctors responding to the poll indicated that the Central New Jersey Professional Standards Review Organization, Inc., was not representative of the medical and osteopathic communities. Therefore, the Secretary will not designate the Central New Jersey Professional Standards Review Organization, Inc., as a conditional Professional Standards Review Organization for PSRO Area VII of the State of New Jersey.

Any doctor in the area who files a written request for a recount for purposes of challenging the eligibility of a physician to participate in the poll shall identify the particular physician and state the reasons that form the basis for the challenge. If the total number of ballots challenged and/or the total number of ballots found to be invalid do not exceed the difference between the number of tabulated ballots which indicate that the organization is representative of the doctors in the area and the number of tabulated ballots which indicate that the organization is not representative of the doctors in the area, the Secretary will so state in a notice in the FEDERAL REGISTER and the results of the polling will be final. If the total number of ballots challenged and/or the total number of ballots found to be invalid do exceed the difference between the number of tabulated ballots which indicate that the organization is representative of the doctors in the area and the number of tabulated ballots which indicate that the organization is not representative of the doctors in the area, a recount will be conducted.

If five doctors file written requests for a recount on or before February 3, 1977 for purposes of obtaining a second tabulation of the ballots, a recount shall be conducted without a reverification of the ballots.

Dated: January 18, 1977.

JOHN H. KELSO,
Acting Administrator,
Health Services Administration.

[FR Doc.77-2247 Filed 1-21-77;8:45 am]

POLL OF PHYSICIANS IN PSRO AREA XVI OF THE STATE OF CALIFORNIA

Announcement of Results to Physicians

On August 16, 1976, the Secretary of the Department of Health, Education, and Welfare published in the FEDERAL REGISTER a notice in which he announced his intention to enter into an agreement with the Organization for Professional Standards Review of Santa Barbara and San Luis Obispo Counties, designating it as the Professional Standards Review Organization for PSRO Area XVI of the State of California, which area is designated a Professional Standards Review Organization Area in 42 CFR 101.7.

Such notice was also published in three consecutive issues of the San Barbara News-Press and the San Luis Obispo Telegram-Tribune on August 16, 17, and 18, 1976. In addition, copies of the notice were mailed to organizations of practicing doctors of medicine or osteopathy, including the appropriate State and County medical and specialty societies, and hospitals and other health care facilities in the area, with a request that each such society or facility inform those doctors in its membership or on its staff who are engaged in active practice in PSRO Area XVI of the State of California of the contents of the notice.

The notice requested that any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area XVI of the State of California who objected to the Secretary entering into an agreement with the Organization for Professional Standards Review of Santa Barbara and San Luis Obispo Counties, on the grounds that such organization is not representative of doctors in PSRO Area XVI of the State of California, mail such objection in writing to the Secretary of the Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022, on or before September 15, 1976.

After reviewing the final tabulation of objections from doctors of medicine or osteopathy in PSRO Area XVI of the State of California, the Secretary determined, pursuant to 42 CFR 101.105, that more than 10 percentum of the doctors engaged in the active practice of medicine or osteopathy in PSRO Area XVI of the State of California had expressed timely objection to entering into an agreement with the Organization for Professional Standards Review of Santa Barbara and San Luis Obispo Counties.

Therefore, on November 1, 1976, in accordance with 42 CFR 101.106, the Secretary of the Department of Health, Education, and Welfare published in the FEDERAL REGISTER a notice announcing a poll to be conducted of all doctors of medicine or osteopathy engaged in active practice in PSRO Area XVI of the State of California to determine whether the Organization for Professional Standards Review of Santa Barbara and San Luis Obispo Counties, was representative of such doctors in the area.

Such notice was also published in the Santa Barbara News-Press and the San Luis Obispo County Telegram-Tribune on November 1, 1976. In addition, copies of the notice were mailed to organizations of practicing doctors of medicine or osteopathy, including the appropriate State and County medical and specialty societies, and hospitals and other health care facilities in the area, with a request that each such society or facility inform those doctors in its membership or on its staff who are engaged in active practice in PSRO Area XVI of the State of California of the contents of the notice.

The notice stated that a ballot was to be mailed to each such doctor on which he was to indicate whether in his opinion the Organization for Professional Standards Review of Santa Barbara and San Luis Obispo Counties, was or was not representative of the doctors of medicine or osteopathy engaged in active practice in PSRO Area XVI of the State of California. The notice also requested that any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area XVI of the State of California who had not received a ballot by November 6, 1976, might request in writing a ballot from the Secretary of Health, Education, and Welfare, P.O. Box 1588, FDR station, New York, New York 10022. According to the notice, only those ballots postmarked no later than December 1, 1976, and returned in the stamped self-addressed envelope provided to each individual doctor would be considered valid.

A ballot and envelope together with a letter of explanation was mailed to each individual doctor of medicine or osteopathy whom the Secretary determined, pursuant to 42 CFR 101.103, to be engaged in the active practice of medicine or osteopathy in the PSRO area.

The counting of the ballots took place in a proceeding open to the public at the City Council Chambers, Santa Barbara City Hall, Santa Barbara, California on December 13, 1976.

After reviewing the final tabulation of valid ballots received from doctors of medicine or osteopathy in PSRO Area XVI of the State of California, the Secretary has determined, pursuant to 42 CFR 101.107, that more than 50 percent of the doctors responding to the poll indicated that the Organization for Professional Standards Review of Santa Barbara and San Luis Obispo Counties, was representative of the doctors in the area. Therefore, the Secretary intends to enter into an agreement designating the Organization for Professional Standards Review of Santa Barbara and San Luis Obispo Counties as a conditional Professional Standards Review Organization for PSRO Area XVI of the State of California.

Any doctor in the area who files a written request for a recount for purposes of challenging the eligibility of a physician to participate in the poll shall identify the particular physician and state the reasons that form the basis for the challenge. If the total number of ballots challenged and/or the total number of ballots found to be invalid do not exceed the difference between the number of tabulated ballots which indicate that the organization is representative of the doctors in the area and the number of tabulated ballots which indicate that the organization is not representative of the doctors in the area, the Secretary will so state in a notice in the FEDERAL REGISTER and the result of the polling will be final. If the total number of ballots challenged and/or the total number of ballots found to be invalid do exceed the difference between the number of tabulated ballots which indicate that the organization is representative of the doctors in the area and the number of tabulated ballots which indicate that the organization is not representative of the doctors in the area, a recount will be conducted.

If five doctors file written requests for a recount on or before February 3, 1977 for purposes of obtaining a second tabulation of the ballots, a recount shall be conducted without a reverification of the ballots.

Dated: January 18, 1977.

JOHN H. KELSO,
Acting Administrator,
Health Services Administration.

SICKLE CELL DISEASE ADVISORY COMMITTEE

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Sickle Cell Disease Advisory Committee, National Heart, Lung, and Blood Institute, February 8 and 9, 1977. The meeting will be held in Conference Room 9, C-Wing, on February 8, and Conference Room 10, C-Wing, on February 9. The entire meeting will be open to the public from 8:30 a.m. to 5:00 p.m. on both days, to discuss recommendations on the implementation and evaluation of the Sickle Cell Disease Program. Attendance by the public will be limited to space available.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, NHLBI, Building 31, Room 5A03, (301) 496-4236, will provide summaries of the meeting and rosters of committee members.

Mr. Howard F. Manly, Executive Secretary, Sickle Cell Disease Advisory Committee, NHLBI, NIH, Building 31, Room 4A29, (301) 496-6931, will furnish substantive program information.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

JANUARY 18, 1977.

Assistant Secretary for Education

NATIONAL CENTER FOR EDUCATION STATISTICS

Comments on Collection of Information and Data Acquisition Activity

Pursuant to Section 406(g)(2)(B), General Education Provisions Act, notice is hereby given as follows:

The U.S. Office of Education has proposed collections of information and data acquisition activities which will request information from educational agencies or institutions.

The purpose of publishing this notice in the FEDERAL REGISTER is to afford each educational agency or institution subject to a request under the proposed collection of information and data acquisition activities and their representative organizations an opportunity, during a 30-day period before transmittal to the Director of the Office of Management and Budget, to comment to the Administrator of the National Center for Education Statistics on the collections of information and data acquisition activities.

Descriptions of the proposed collections of information and data acquisition activites follow below.

Written comments on the proposed activity are invited. Comments must be received on or before February 23, 1977 and should be addressed to Administrator, National Center for Education Statistics, Attn.: Manager, Information Acquisition, Planning, and Utilization, Room 3001, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

Further information may be obtained from Elizabeth M. Proctor of the National Center for Education Statistics, 202-245-1022.

Dated: January 17, 1977.

MARIE D. ELDRIDGE,
Administrator, National Center
for Education Statistics.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity:

Career Education Evaluation: Collection of Input and Process Data.

2. Agency/bureau/office:

U.S. Office of Education/Office of Career Education.

3). Agency form numbers:

OE541-1; OE541-2; OE541-3; and OE541-4.

4. Legislative authority for this activity:

(b) It is the purpose of this section to assist in achieving the policies set forth in subsection (a) by—

(3) Assessing the status of career education programs and practices • • •

(4) Providing for the demonstration of the best career education programs and practices by the development and testing of exemplary programs and practices • • • • (Pub. L. 93-380, 20 U.S.C. 1865, Section 406).

Each application • • • must set forth a detailed plan which includes:

• • • • • •

(d) A specific plan to be utilized in evaluating the accomplishment of each of the process and learner outcome objectives listed pursuant to § 160d.6(b)(1), including

(1) The criteria of success for evaluating each objective;

(2) The evaluation design to be used for each objective;

(3) The data collection instruments or other techniques to be used for each objective;

(4) The data analysis to be conducted for each objective;

(5) The dates by which data on the various objectives will be available; and

(6) The evaluation resources of personnel and budget that will be utilized; • • •"

(45 CFR Part 160d.6)

5. Voluntary/obligatory nature of response:

Voluntary

6. How information to be collected will be used:

Evaluation: the data will be used to evaluate the effectiveness of each of the 15 exemplary career education projects participating in the study as well as to test evaluation methods and techniques for future use in other career education projects funded by the Office of Career Education. Data will be used to determine the extent to which project learner outcome objectives have been achieved and the extent to which various process and input factors in each project contribute to the attainment of learner outcomes.

7. Data acquisition plan:

a. Method of collection: Group administration to students; individual administration to teachers, counselors, and building administrators.

b. Time of collection: Spring, 1977.

c. Frequency: One-time data collection

8. Respondents:

a. Type: Students, public elementary secondary schools.

b. Number: Sample—15,000.

c. Estimated average man-hours per respondent: 0.5.

a. Type: Teachers, elementary/secondary.

b. Number: Sample—1,931.

c. Estimated average man-hours per respondent: 0.5.

a. Type: Counselors, elementary/secondary.

b. Number: Sample—262.

c. Estimated average man-hours per respondent: 0.5.

a. Type: School administrators and supervisors.

b. Number: Sample—106.

c. Estimated average man-hours per respondent: 0.5.

9. Information to be collected:

a. Students: information will be collected on student background characteristics (e.g. age, sex, ethnicity, and socioeconomic status), in-school and out-of-school experiences related to career education (e.g. curriculum activities, work experience, etc), and student career aspirations and expectations.

b. Teachers: information will be collected on teacher background characteristics, educational and related work experiences, career education activities conducted for students, and attitudes towards career education.

c. Counselors: information will be collected on counselor background characteristics, educational and related work experiences, career education activities conducted for students, and attitudes toward career education.

d. School administrators and supervisors: information will be collected on administrator background characteristics, characteristics of school and school programs, educational and related work experience, career education activities engaged in, and attitudes toward career education.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. Title of proposed activity:

The Status of Physical Education in the Public Schools in the Coterminous United States (A survey of certain practices and conditions in local school districts).

2. Agency bureau/office:

U.S. Office of Education, Bureau of Elementary and Secondary Education.

3. Agency form number:

OE 548.

4. Legislative authority for this activity:

The Commissioner shall:

(1) Prepare and disseminate to State and local educational agencies and institutions information concerning applicable programs. • • •

(3) Collect data and information on applicable programs for the purpose of obtaining objective measurements on the effectiveness of such programs in achieving their purposes; and (4) prepare and publish an annual report • • • on (a) the condition of education in the nation, (b) developments in the administration, utilization and impact of applicable programs, (c) results of investigations and activities by the Office of Education. • • •" (General Education, Provisions Act, Sec. 422(a), 20 U.S.C. 1231a.)

5. Voluntary/obligatory nature of response:

Voluntary

6. How information to be collected will be used:

The study will provide descriptive data that will establish a baseline for determining the present status of physical education programs and will provide analytical potential for program improvement and for future trends. It will, also, provide a screening and ranking of basic problems in the field as seen by the educators who are most directly involved in administering and supervising local programs of physical education, the directors of physical education in local school districts.

The information to be derived will be used by the U.S. Office of Education, the American Alliance for Health, Physical Education and Recreation, the Society of State Directors, HPER, the President's Council on Physical Fitness and Sports, the National Council of City and County Directors of HPER and other sponsors of a national conference.

This conference is designed to implement recommendations stemming from the 1st International Conference of Ministers and Senior Officials Responsible for Physical Education and Sport in the Education of Youth, sponsored by UNESCO, 5–10 April 1976. The national implementation conference will be held in late Spring 1977. An international symposium will be held in conjunction with this meeting.

The above mentioned organizations will also use the study results to sharpen their efforts to improve school programs of physical education and to promote innovative and exemplary programs throughout the nation. The President's Council on Physical Fitness and Sports is particularly interested in having up-to-date information. Certain basic questions on physical education programs for handicapped children will engender baseline information that will be useful in implementing the new Education Of All Handicapped Children Act, Pub. L. 94–142 and in making comparisons in later years.

7. Data acquisition plan:

A. Method of collection: Mail and personal interview.
B. Time of collection: Spring, 1977.
C. Frequency: One-time study.

8. Respondents:

A. Type: Local Educational Agencies (directors of physical education).
B. Number: 689.
C. Estimated average man-hours per respondent: 1.5 man-hours.

9. Information to be collected:

a. The characteristics of local directors of physical education—age, sex, title, educational and professional experience.

b. The nature and scope of the directors' responsibilities, i.e., subject fields (physical education, health education, athletics, safety, etc.) and the percent of time devoted to administrative supervisory, coaching, and/or teaching duties, as well as the percent of time the directors would prefer to spend in such duties.

c. Number and percent of boys and girls enrolled in physical education classes by grade level in both required and elective programs.

d. Identification by grade level of type of teacher, i.e., certified specialist, non-specialist or combination.

e. Indication of the increase or decrease of time allotted for required and elective programs of physical education since 1970.

f. Reasons, if any, for exemption from the physical education requirement by grade level.

g. Identification by grade level of special programs designed for students who are physically underdeveloped or who have handicap or learning disability.

h. Identification of districts, by grade level, which evaluate the physical fitness level of students, type of test(s) used and availability of districts norms.

i. Expression of respondent opinion about results of two previous national surveys of youth fitness.

j. A description of impending changes or other aspects of school district physical education programs not covered in the survey questionnaire.

k. How directors of physical education perceive the status of their programs as viewed by various groups. These groups are administrators, parents, students, other teachers and physical education teachers.

l. How directors of physical education view public or "consumer demands" for programs.

m. How directors of physical education perceive different groups, such as administrators, parents and students, as potential supporters of or obstacles to the maintenance and/or improvement of current programs.

n. A paired comparison technique which ranks and scales ten major problem areas. These problem areas are (1) discipline/student conduct, (2) adequacy of equipment/supplies, (3) adequacy of facilities, (4) status of physical education in total school program, (5) staff/teachers, (6) legal liability, (7) relationships with athletics, (8) accountability/evaluation, (9) Title IX regulations, and, (10) provision for needs of special students such as handicapped or physically underdeveloped.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Serial No. I-7435]

IDAHO

Partial Termination of Proposed Withdrawal and Reservation of Lands

JANUARY 14, 1977.

Notice of an application, Serial No. I-7435, for withdrawal and reservation of lands was published as FR Doc. No. 74-2518 on page 3977 of the issue for January 31, 1974. The Energy Research and Development Administration, formerly the Atomic Energy Commission, has cancelled its application insofar as it involved the lands described below. Therefore, pursuant to the regulations contained in 43 CFR, Subpart 2091, such lands will be at 10:00 a.m. on February 18, 1977 relieved of the segregative effect of the above-mentioned application.

The lands involved in this notice of termination are:

BOISE MERIDIAN, IDAHO

T. 13 S., R. 26 E.,
Sec. 35, all.
T. 14 S., R. 26 E.
Sec. 1, S½;
Sec. 2, all;
Secs. 11 to 14 inclusive, 23-26 inclusive and 35.
T. 14 S., R. 27 E.,
Sec. 18, W½SE¼, SE¼SW¼;
Sec. 19, all;
Sec. 30, lots 1 to 4 inclusive, E½W½, W½E½, E½NE¼, NE¼SE¼;
Sec. 31, lots 1 to 4 inclusive, E½W½, NW¼NE¼.
T. 15 S., R. 25 E.,
Sec. 34, E½, NW¼, N½SW¼, SE¼SW¼;
Sec. 34, all.
T. 15 S., R. 26 E.,
Secs. 1, 2 and 11;
Sec. 12, N½NW¼, SW¼NW¼;
Sec. 14, NW¼NE¼, NW¼, NW¼SW¼;
Secs. 15 and 21;
Sec. 22, NW¼NE¼, NW¼, NW¼SW¼;
Sec. 28, NW¼NE¼, NW¼;
Sec. 29, lots 1 to 6 inclusive, W½NE¼, NW¼, N½SW¼, NW¼SE¼;

Bureau of Reclamation

CORONADO PROJECT

Public Hearing on Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement for the Coronado Project. This statement (INT DES 77-2), filed with the Council on Environmental Quality on January 14, 1977, is available to the public as specified in the notice of availability.

Public hearings will be held at the following locations to receive views and comments from interested organizations or individuals relating to the environmental impact of the project.

Place	Address	Date	Time
St. John's, Ariz.	Community Building	Feb. 23, 1977	2 to 5 p.m. and 6:30 p.m.
Kearny, Ariz.	Cafeteria, Ray Unified School District	Feb. 24, 1977	2 to 5 p.m. and 6:30 p.m.
Phoenix, Ariz.	Auditorium, Maricopa County Board of Supervisors, 205 West Jefferson.	Feb. 25, 1977	2 to 5 p.m. and 6:30 p.m.

Oral statements at the hearings will be limited to periods of 10 minutes. Speakers will not trade their time to obtain a longer oral presentation: however, the person authorized to conduct the hearings may allow any speaker to provide additional comment after all persons wishing to comment have been heard. Speakers will be scheduled according to the time preferences mentioned in their letters or telephone requests whenever possible. Any scheduled speaker not present when called will lose his or her position in the scheduled order and will not be called again until the end of the order. Requests for scheduled presentations will be accepted up to 4:00 p.m. on February 18, 1977; any subsequent requests will be handled on a first-come-first-served basis following the scheduled presentations.

Organizations or individuals desiring to present statements at the hearings should contact Regional Director Manuel Lopez, Jr., Bureau of Reclamation, P.O. Box 427, Boulder City, Nevada 89005, telephone (702) 293–8464, and announce their intentions to participate. Written comments from those wishing to supplement their oral presentations at the hearings should be received by March 7, 1977, for inclusion in the hearing record.

Dated: January 18, 1977.

E. F. SULLIVAN,
Acting Commissioner of Reclamation.

Bureau of Land Management

OUTER CONTINENTAL SHELF; ALASKA

Oil and Gas Lease Sale No. CI, February 23, 1977

On January 19, 1977, a notice appeared in the FEDERAL REGISTER 42 FR 3804, announcing the above outer continental shelf oil and gas lease sale in the lower Cook Inlet.

In order to clarify any confusion that might have been caused by the presentation of paragraph 12, Tract Descriptions, beginning on page 3804, interested parties are advised that the tract descriptions appearing on page 3807 under the heading OCS OFFICIAL PROTRACTION DIAGRAM, AFOGNAK NO 5-4 should appear as part of paragraph 12 in sequence immediately following Tract No. CI-145 on page 3806. The affected tracts are CI-146 through CI-152.

It should also be noted that the sentence beginning on the 25th line of the middle column on page 3804 should read as follows: "The form for this statement appears in paragraph 17."

Dated: January 21, 1977.

CURT BERKLUND,
Director, Bureau of Land Management.

[USITC SE-77-4]

INTERNATIONAL TRADE COMMISSION

MEETING

Interested members of the public are invited to attend and to observe the meeting of the United States International Trade Commission to be held on January 24, 1977, beginning at 9:30 a.m., in the Hearing Room of the United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436. The Commission plans to consider the following agenda items in open session:

1. Agenda for meetings during the week of February 7, 1977;
2. Minutes;
3. Reorganization—discussion of items the Commission needs to act on before February 4, 1977, such as the filling of positions which are vacant or about which there is a question as to their status—e.g., the selection procedure for the positions of Investigator, GS-14 and below, and additional vacant positions such as the Deputy General Counsel;
4. Status report on self-initiated studies;
5. Review of position descriptions in the Office of the General Counsel;
6. Sugar (Inv. TA-201-16)—briefing by the staff (to be held after 3 p.m., EST);
7. Appeal, pursuant to the Freedom of Information Act, filed by Mr. James M. Goldberg of the law firm of London and Goldberg;
8. Footwear (Inv. TA-201-18)—further consideration of the Commission's determination if necessary;
9. Further consideration of revisions to the Commission Policy Manual;
10. Any items left over from previous agenda.

If you have any questions concerning the agenda for the January 24, 1977, Commission meeting, please contact the Secretary to the Commission at (202) 523-0161. Access to documents to be considered by the Commission at the meeting is provided for in Subpart C of the Commission's rules (19 CFR 201.17-201.21).

On the authority of 19 U.S.C. 1335 and in conformity with proposed 19 CFR 201.39(a), when a person's privacy interests may be directly affected by holding a portion of a Commission meeting in public, that person may request the Commission to close such portion to public observation. Such requests should be communicated to the Office of the Chairman of the Commission.

Pursuant to the specific exemptions of 5 U.S.C. 552b(c)(2) and (6), on the authority of 19 U.S.C. 1335, and in conformity with proposed 19 CFR 201.37(b)(2) and (6), Commissioners Parker, Moore, Bedell, and Ablondi voted to hold the portion of the January 24, 1977, meeting with respect to item No. 3 on reorganization in closed session. Commissioners Minchew and Leonard voted against closing this portion to the public.

A majority of the entire membership of the Commission felt that this portion of the meeting should be closed to the public since: (1) the discussion would only concern internal personnel practice and procedures; and (2) the information discussed in such portion would be likely to disclose information of a personal nature which could constitute a clearly unwarranted invasion of personal privacy.

Those persons expected to be present at this closed portion, and their corresponding affiliations, are listed as follows:

Daniel Minchew, Chairman; Joseph O. Parker, Vice Chairman; Will E. Leonard, Commissioner; George M. Moore, Commissioner; Catherine Bedell, Commissioner; Italo H. Ablondi, Commissioner; Kenneth R. Mason, Secretary; E. Bernice Morris, Staff Assistant; Russell N. Shewmaker, General Counsel; Rhond Roth, Attorney-Adviser (if the General Counsel is not available); Charles R. Ramsdale, Acting Director, Personnel; Norma H. Warbis, Personnel Management Specialist (If Mr. Ramsdale is not available); and Bruce N. Hatton, Assistant to Commissioner Leonard.

The General Counsel to the Commission certified that it is his opinion that the Commission's action in closing this portion of its meeting of January 24, 1977, was properly taken by a vote of a majority of the entire membership of the Commission pursuant to 5 U.S.C. 552b(d)(1) and in conformity with proposed 19 CFR 201.37(d). The discussion to be held in closed session is within the specific exemptions of 5 U.S.C. 552b(c)(2) and (6) and proposed 19 CFR 201.37(b)(2) and (6).

By order of the Commission.

Issued: January 17, 1977.

RUSSELL N. SHEWMAKER,
General Counsel.
KENNETH R. MASON,
Secretary.

[USITC SE-77-5]

MEETING

Interested members of the public are invited to attend and to observe the

meeting of the United States International Trade Commission to be held on February 1, 1977, beginning at 9:30 a.m., in the Hearing Room of the United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436. The Commission plans to consider the following agenda items in open session:

1. Agenda for future meetings;
2. Minutes;
3. Reorganization:
4. Vote on Sugar (Inv. TA-201-16)—after 3 p.m.;
5. Stainless steel pipes—vote on whether to institute an investigation pursuant to section 337;
6. Items left over from previous agenda.

If you have any questions concerning the agenda for the February 1, 1977, Commission meeting, please contact the Secretary to the Commission at (202) 523-0161. Access to documents to be considered by the Commission at the meeting is provided for in Subpart C of the Commission's rules (19 CFR 201.17-201.21).

On the authority of 19 U.S.C. 1335 and in conformity with proposed 19 CFR 201.39(a), when a person's privacy interests may be directly affected by holding a portion of a Commission meeting in public, that person may request the Commission to close such portion to public observation. Such requests should be communicated to the Office of the Chairman of the Commission.

By order of the Commission.

Issued: January 17, 1977.

KENNETH R. MASON,
Secretary.

[FR Doc.77-2099 Filed 1-21-77;8:45 am]

[USITC SE-77-6]

MEETING

Interested members of the public are invited to attend and to observe the meeting of the United States International Trade Commission to be held on February 3, 1977, beginning at 9:30 a.m., in the Hearing Room of the United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436. The Commission plans to consider the following agenda items in open session:

1. Reorganization.

If you have any questions concerning the agenda for the February 3, 1977, Commission meeting, please contact the Secretary to the Commission at (202) 523-0161. Access to documents to be considered by the Commission at the meeting is provided for in Subpart C of the Commission's rules (19 CFR 201.17-201.21).

On the authority of 19 U.S.C. 1335 and in conformity with proposed 19 CFR 201.39(a), when a person's privacy interests may be directly affected by holding a portion of a Commission meeting in public, that person may request the Commission to close such portion to public observation. Such requests should be communicated to the Office of the Chairman of the Commission.

Issued: January 17, 1977.

By order of the Commission.

KENNETH R. MASON,
Secretary.

[337-TA-22]

RECLOSABLE PLASTIC BAGS

Commission Determination and Order

On the basis of the record in investigation No. 337-TA-22, Reclosable Plastic Bags, the United States International Trade Commission,[1] under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and the Administrative Procedure Act (5 U.S.C. 551 et seq.)—

1. Determines that there are violations of section 337 in the unlicensed importation into the United States of reclosable plastic bags by reason of their having been made in accordance with claims 1 and/or 2 of the U.S. Patent No. 3,198,228 (which reissued as U.S. Patent Re. 28,969 on September 21, 1976) and in their unlicensed sale by the owner, importer, consignee, or agent of either, the effect or tendency of which is to substantially injure an industry, efficiently and economically operated, in the United States;

2. Determines that there is no violation of section 337 in the importation of reclosable plastic bags into the United States which allegedly infringe U.S. Trademark Reg. No. 946,120, since the effect or tendency of such alleged infringement is not to substantially injure or destroy an industry, efficiently and economically operated, in the United States, to prevent the establishment of such an industry, or to restrain or monopolize trade and commerce in the United States;

3. Finds as a result of the determination of violation, and after considering the effect of an exclusion upon the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, or U.S. consumers, that the articles concerned, reclosable plastic bags made in accordance with claims 1 and/or 2 of U.S. Patent No. 3,298,228 (Re. 28,969) should be excluded from entry into the United States for the term of this patent;

4. Determines that the bond provided for in subsection 337(g)(3) is to be as prescribed by the Secretary of the Treasury in the amount of 100 percent of the value of the articles concerned, f.o.b. foreign port.

Accordingly, it is ordered—

1. Articles made in accordance with claims 1 and/or 2 of U.S. Patent No. 3,198,228 (Re. 28,969) shall upon the publication of this notice in the FEDERAL REGISTER and until the expiration of such patent be excluded from entry into the United States except (1) as provided in paragraph 2 below of this order or (2) as such importation is under sublicense of the exclusive U.S. licensee of said patent.

2. Notwithstanding the foregoing from the day after the day this order is received by the President pursuant to section 337(g) of the Tariff Act of 1930, as amended, until such time as the President approves or disapproves this Commission action (but in any event, no later than sixty (60) days after such day of receipt), the articles concerned shall be entitled to entry under bond in the amount of one hundred per centum (100%) of the value, f.o.b. foreign port, of the articles concerned.

3. This order will be published in the FEDERAL REGISTER and served upon each party of record in this investigation and upon the U.S. Department of Health, Education, and Welfare, the U.S. Department of Justice, the Federal Trade Commission, and the Secretary of the Treasury.

Issued: January 17, 1977.

By order of the Commission.

KENNETH R. MASON,
Secretary.

[FR Doc.77-2066 Filed 1-21-77;8:45 am]

[1] Commissioner Ablondi dissents from this determination and order except as to par. 2 of the determination.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

ADVISORY COMMITTEE EDUCATION PROGRAMS PANEL

Meeting

JANUARY 12, 1977

Pursuant to the provisions of the Federal Advisory Committee Act. (Pub. L. 92-463) notice is hereby given that a meeting of the Education Programs Panel will convene at 9:00 a.m. in Room 1023 at 806 Fifteenth Street, NW., Washington, D.C. on February 14, 1977.

The purpose of the meeting is to review Humanities Institutes applications submitted to the National Endowment for the Humanities for grants to educational instittuions ad nnon-profit organizations.

Because the proposed meeting will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated August 13, 1973, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 Fifteenth Street, NW., Washington, D.C. 20506, or call area code 202-382-2031.

JOHN W. JORDAN,
Advisory Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

SCIENCE EDUCATION DIRECTORATE

Program Review

Dr. Harvey Averch, Assistant Director for Science Education at NSF, will present the Science Education Directorate's Program Review at 2 p.m. on February 1, 1977, in Room 540 at 1800 G Street, N.W., Washington, D.C.

The Review discusses different strategies of Federal assistance used in science education over the last 17 years, and examines the performance of the present strategy in relation to expected conditions in the science education system. The Review concludes with an analysis of issues and options for science education.

The presentation is open to all interested parties, but due to space limitations, persons wishing to attend should call Myrna Wright, 282-7922, for a reservation.

HARVEY AVERCH,
Assistant Director, for Science Education.

JANUARY 14, 1977.

NUCLEAR REGULATORY COMMISSION

ARKANSAS POWER AND LIGHT CO., ET AL.

All Nuclear Power Reactors Having an Operating License Request for Action

Notice is hereby given that by petition dated January 3, 1977, Robert D. Pollard filed a request for action regarding all nuclear power reactors having an operating license. The requested action would affect:

ARKANSAS POWER & LIGHT CO.

Arkansas Unit 1 (License No. DPR-51), Pope County, Arkansas. PDR—Arkansas Polytechnic College, Russellville, Arkansas 72801.

BALTIMORE GAS & ELECTRIC CO.

Calvert Cliffs Units 1 and 2 (License Nos. DPR-53 and DPR-69), Calvert County, Maryland. PDR—Calvert County Library, Prince Frederick, Maryland 20678.

BOSTON EDISON CO.

Pilgrim 1 (License No. DPR-35), Plymouth County, Massachusetts. PDR—Plymouth Public Library, North Street, Plymouth, Massachusetts.

CAROLINA POWER & LIGHT CO.

Brunswick 1 and 2 (License Nos. DPR-71 and DPR-62), Brunswick County, North Carolina. PDR—Southport—Brunswick County Library, 109 W. Moore Street, Southport, North Carolina 28461.

H. B. Robinson (Licensed No. DPR-23), Darlington County, South Carolina. PDR—Hartsville Memorial Library, Home & Fifth Avenues, Hartsville, South Carolina 29550.

COMMONWEALTH EDISON CO.

Dresden 1, 2 and 3 (License Nos. DPR-2, DPR-19 and DPR-25), Grundy County, Illinois. PDR—Morris Public Library, 604 Liberty Street, Morris, Illinois 60451.

Quad-Cities 1 and 2 (License Nos. DPR-29 and DPR-30), Rock Island County, Illinois. PDR—Moline Public Library, 504—17th Street, Moline, Illinois 61265.

Zion Units 1 and 2 (License Nos. DPR-39 and DPR-48), Lake County, Illinois. PDR—Waukegan Public Library, 128 N. County Street, Waukegan, Illinois 60085.

CONNECTICUT YANKEE ATOMIC POWER CO.

Haddam Neck (License No. DPR-61), Middlesex County, Connecticut. PDR—Russell Library, 119 Broad Street, Middletown, Connecticut 06457.

CONSOLIDATED EDISON CO. OF NEW YORK

Indian Point Units 1, 2 and 3 (License Nos. DPR-5, DPR-26 and DPR-64), Westchester County, New York. PDR—Hendrick Hudson Free Library, 31 Albany Post Road, Montrose, New York 10548.

CONSUMERS POWER CO.

Big Rock Point (License No. DPR-6), Charlevoix County, Michigan. Charlevoix Public Library, 107 Clinton Street, Charlevoix, Michigan 49720.

Palisades (License No. DPR-20), Van Buren County, Michigan. PDR—Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Michigan 49006.

DAIRYLAND POWER COOPERATIVE

LaCrosse (License No. DPR-45), Monroe County, Wisconsin. PDR—LaCrosse Public Library, 800 Main Street, LaCrosse, Wisconsin 54601.

DUKE POWER CO.

Oconee Units 1, 2, and 3 (License Nos. DPR-38, DPR-47 and DPR-55), Oconee County, South Carolina. PDR—Oconee County Library, 201 S. Spring Street, Walhalla, South Carolina 29691.

DUQUESNE LIGHT CO.

Beaver Valley 1 (License No. DPR-66), Beaver County, Pennsylvania. PDR—Beaver Area Memorial Library, 100 College Avenue, Beaver, Pennsylvania 15009.

FLORIDA POWER CORP.

Crystal River 3 (License No. DPR-72), Citrus County, Florida. PDR—Crystal River Public Library, Crystal River, Florida 32629.

FLORIDA POWER & LIGHT CO.

St. Lucie 1 (License No. DPR-67), St. Lucie County, Florida. PDR—Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida 33450.

Turkey Point 3 and 4 (License Nos. DPR-31 and DPR-41), Dade County, Florida. PDR—Environmental & Urban Affairs Library, Florida International University, Miami, Florida 33199.

GEORGIA POWER CO.

Edwin I. Hatch 1 (License No. DPR-57), Appling County, Georgia. PDR—Appling County Public Library, Parker Street, Baxley, Georgia 31513.

INDIANA AND MICHIGAN ELECTRIC CO.

D. C. Cook 1 (License No. DPR-58), Berrien County, Michigan. PDR—Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

IOWA ELECTRIC LIGHT & POWER CO.

Duane Arnold (License No. DPR-49), Linn County, Iowa. PDR—Cedar Rapids Public Library, 426 Third Avenue, S.E., Cedar Rapids, Iowa 52401.

JERSEY CENTRAL POWER & LIGHT CO.

Oyster Creek 1 (License No. DPR-16), Ocean County, New Jersey. PDR—Ocean County Library, 15 Hooper Avenue, Toms River, New Jersey 08753.

MAINE YANKEE ATOMIC POWER CO.

Maine Yankee (License No. DPR-36), Lincoln County, Maine. PDR—Wiscasset Public Library Association, High Street, Wiscasset, Maine 04578.

METROPOLITAN EDISON CO.

Three Mile Island 1 (License No. DPR-50), Dauphin County, Pennsylvania. PDR—Government Publications Section, State Library of Pennsylvania, Box 1601 (Education Building), Harrisburg, Pennsylvania 17126.

NEBRASKA PUBLIC POWER DISTRICT

Cooper Station (License No. DPR-46), Nemaha County, Nebraska. PDR—Auburn Public Library, 118-15th Street, Auburn, Nebraska 68305.

NIAGARA MOHAWK POWER CORP.

Nine Mile Point 1 (License No. DPR-63), Oswego County, New York. PDR—Oswego City Library, 120 E. Second Street, Oswego, New York 13126.

NORTHEAST NUCLEAR ENERGY CO.

Millstone 1 and 2 (License Nos. DPR-21 and DPR-65), New London County, Connecticut. PDR—Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385.

NORTHERN STATES POWER CO.

Monticello (License No. DPR-22), Wright County, Minnesota. PDR—Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Prairie Island 1 and 2 (License Nos. DPR-42 and DPR-60), Goodhue County, Minnesota. PDR—Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

OMAHA PUBLIC POWER DISTRICT

Fort Calhoun (License No. DPR-40), Washington County, Nebraska. PDR—Blair Public Library, 1665 Lincoln Street, Blair, Nebraska 68008.

PACIFIC GAS & ELECTRIC CO.

Humboldt Bay (License No. DPR-7), Humboldt County, California. PDR—Humboldt County Library, 636 F Street, Eureka, California 95501.

PHILADELPHIA ELECTRIC CO.

Peach Bottom 2 and 3 (License Nos. DPR-44 and DPR-56), York County, Pennsylvania. PDR—Martin Memorial Library, 159 East Market Street, York, Pennsylvania 17401.

[Docket Nos. 50-329 and 50-330]

CONSUMERS POWER CO. MIDLAND PLANT, UNIT NOS. 1 AND 2

Availability of Draft Supplement to Final Environmental Statement for Midland Plant, Unit Nos. 1 and 2

Notice is hereby given that a Draft Supplement to the Final Environmental Statement prepared by the Commission's Office of Nuclear Reactor Regulation related to the continuance of construction of the Midland Plant, Unit Nos. 1 and 2, in Midland County, Michigan, by the Consumers Power Company, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C., and in the Grace Dow Memorial Library, 1710 West St. Andrews Road, Midland, Michigan. The draft supplemental statement is also being made available at the Office of Intergovernmental Relations, Department of Management and Budget, 2nd Floor, Lewis Cass Building, Lansing, Michigan 48909. Requests for copies of the Draft Supplement to the Final Environmental Statement should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Site Safety and Environmental Analysis.

In March 1972 the Atomic Energy Commission (now the Nuclear Regulatory Commission) issued a Final Environmental Statement for the Midland Plant, Unit Nos. 1 and 2 (37 FR 7012) (copies of the FES (NUREG-0149) may be purchased from the National Technical Information Service, Springfield, Virginia 22161, at a cost of $10.75 for printed copy or $3.00 for microfiche). The purpose of this supplement to the Final Environmental Statement is to respond to the July 21, 1976 rulings of the U.S. Court of Appeals for the District of Columbia remanding to the NRC for further proceedings the Commission's orders granting construction permits for the Midland Plant, Unit Nos. 1 and 2. This supplement to the FES was prepared to assess energy conservation as an alternative to plant construction, to reevaluate the need for power in light of any changed circumstances concerning Dow Chemical Company's need for process steam, and to restrike the cost/benefit balance in light of these matters and the incremental environmental effects of nuclear waste disposal and waste reprocessing attributable to Midland. In addition, the staff considered whether any unanticipated significant adverse effects have occurred to date as a result of construction activities thus far.

Interested persons may submit comments on the Draft Supplement to the Final Environmental Statement for the Commission's consideration. Federal and State agencies are being provided with copies of the draft supplemental statement (local agencies may obtain these documents upon request). Comments are due by March 7, 1977. Comments by Federal, State and local officials or other persons received by the Commission will be made available for public inspection at the Commission's Public Document Room in Washington, D.C., and the Grace Dow Memorial Library, Midland, Michigan. Upon consideration of comments submitted with respect to the draft supplemental statement, the Commission's staff will prepare a final supplemental statement, the availability of which will be published in the FEDERAL REGISTER.

Comments on the Draft Supplement to the Final Environmental Statement from interested persons or the public should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Site Safety and Environmental Analysis.

Dated at Rockville, Maryland this 13th day of January 1977.

For the Nuclear Regulatory Commission.

WM. H. REGAN, JR.,
Chief, Environmental Projects Branch 2, Division of Site Safety and Environmental Analysis.

[Docket No. 50-335]

FLORIDA POWER & LIGHT CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 11 to Facility Operating License No. DPR-67, issued to Florida Power & Light Company (the licensee), which revised the Technical Specifications for operation of the St. Lucie Plant Unit No. 1 (the facility) located in St. Lucie County, Florida. The amendment is effective as of its date of issuance.

The amendment revises the Control Element Assembly (CEA) Block Circuit surveillance requirements.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 9, 1976, (2) Amendment No. 11 to License No. DPR-67, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida 33450. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 10th day of January 1977.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[Docket Nos. 50-498A, 50-499A]

HOUSTON LIGHTING AND POWER CO. ET AL.

Order Regarding Oral Argument

JANUARY 13, 1977.

In the matter of Houston Lighting and Power Company, the City of San Antonio, the City of Austin, and Central Power and Light Company (South Texas Project, Unit Nos. 1 and 2).

Oral argument on the staff's appeal from the Licensing Board's September 9, 1976 order, as clarified in a November 15, 1976 order, is hereby calendared for 10 a.m. on Wednesday, February 2, 1977, in the Commission's Hearing Room, 5th floor, East-West Towers, 4350 East West Highway, Bethesda, Maryland. A total of one hour is allotted to each side for the presentation of argument. The Secretary to this Board is to be notified, by letter mailed no later than January 25, 1977, of the names of counsel intending to participate in the argument.

It is so ordered.

For the Atomic Safety and Licensing Appeal Board.

MARGARET E. DU FLO,
Secretary to the Appeal Board.

[Docket No. 50-247]

INDIAN POINT NUCLEAR GENERATING UNIT NO. 2

Availabilty of Supplemental Partial Initial Decision and Issuance of Amendment to Facility Operating License No. DPR-26

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's Regulations in 10 CFR Part 51, notice is hereby given that a Supplemental Partial Initial Decision dated December 27, 1976, has been issued by the Atomic Safety and Licensing Board in the above captioned proceeding authorizing issuance of a license amendment to the Consolidated Edison Company of New York, Inc., for operation of Indian Point Nuclear Generating Unit No. 2, located in Westchester County, New York.

The Supplemental Partial Initial Decision is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C., and in the Hendrick Hudson Free Library, 31 Albany Post Road, Montrose, New York 10548. The Supplemental Partial Initial Decision is also being made available at the New York State Division of the Budget, State Capital, Albany, New York 12224, and the Tri-State Regional Planning Commission, 1 World Trade Center, 56 South Street, New York, New York 10048.

Any decision or action taken by the Atomic Safety and Licensing Board in connection with the Supplemental Partial Initial Decision may be reviewed by the Atomic Safety and Licensing Appeal Board.

Pursuant to the above mentioned Supplemental Partial Initial Decision, the Nuclear Regulatory Commission (the Commission) has issued Amendment No. 27 to Facility Operating License DPR-26 to Consolidated Edison Company of New York, Inc., for operation of a pressurized water nuclear reactor known as the Indian Point Nuclear Generating Unit No. 2. The license is amended by a change which states that the final termination date of one-through cooling is May 1, 1980.

The Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations in 10 CFR Chapter 1, which are set forth in the license amendment. The application for the license amendment complies with the standards and requirements of the Act and the Commission's rules and regulations.

The license amendment is effective as of its date of issuance.

Copies of the (1) Supplemental Partial Initial Decision dated December 27, 1976 and (2) Amendment No. 27 to Facility Operating License DPR-26 are available for public inspection at the above designated locations in Washington, D.C., and New York. Single copies of both items may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Site Safety and Environmental Analysis.

Dated at Bethesda, Maryland, this 12th day of January 1977.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc.77-2020 Filed 1-21-77;8:45 am]

[Docket No. 50-315]

INDIANA AND MICHIGAN ELECTRIC CO. AND INDIANA AND MICHIGAN POWER CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 17 to Facility Operating License No. DPR-58, issued to Indiana and Michigan Electric Company and Indiana and Michigan Power Company (the licensees), which revised the Technical Specifications for operation of the Donald C. Cook Nuclear Plant Unit No. 1 (the facility), located in Berrien County, Michigan. The amendment is effective as of the date of its issuance.

The amendment changed the Appendix B Technical Specifications to substitute an annual Environmental Operating Report for the presently required semi-annual report and to eliminate certain beach erosion monitoring requirements at the D.C. Cook plant site.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate finding as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the August 2, 1976 letters of application for amendment, and (2) Amendment No. 17 to License No. DPR-58. Both of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Maude Preston Palinske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085. A single copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 6th day of January 1977.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[Docket Nos. STN 50-546, STN 50-547]

PUBLIC SERVICE COMPANY OF INDIANA, INC.

Notice of Evidentiary Hearing on Environmental Issues

In the matter of Public Service Company of Indiana, Inc. (Marble Hill Nuclear Generating Station, Units 1 and 2).

An evidentiary hearing on environmental issues will be held at the Madison-Jefferson County Public Library, 420 West Main Street, Madison, Indiana. The hearing will begin at 9:30 a.m. (local time) on February 15, 1977. It is anticipated that it will continue for two weeks.

The public is invited to attend. Limited appearance statements will be called for at the commencement of the proceeding. Oral statements will be limited to five (5) minutes each but a written statement without limitation on length may be submitted to the Board.

It is so ordered.

Dated at Bethesda, Maryland, this 12th day of January 1977.

For the Atomic Safety and Licensing Board.

ELIZABETH S. BOWERS,
Chairman.

[FR Doc.77-2024 Filed 1-21-77;8:45 am]

[Dockets Nos. 50-280 and 50-281]

VIRGINIA ELECTRIC & POWER CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments No. 27 to Facility Operating Licenses Nos. DPR-32 and DPR-37, issued to Virginia Electric & Power Company (the licensee), which revised Technical Specifications for operation of the Surry Power Station Units Nos. 1 and 2 (the facilities) located in Surry County, Virginia. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications to remove temporary restrictions, imposed by the Commission's Amendments No. 7 dated June 16, 1975, on power operation of certain valve motor operators in emergency core cooling system pipe lines.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated June 30, 1976, as supplemented October 28, 1976, (2) Amendments No. 27 to Licenses Nos. DPR-32 and DPR-37, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Swem Library, College of William & Mary, Williamsburg, Virginia.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 6th day of January 1977.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[Docket No. 50-576]

WESTINGHOUSE ELECTRIC CORP.

Application for and Consideration of Issuance of Facility Export License

Please take notice that Westinghouse Electric Corporation, Pittsburgh, Pennsylvania, has submitted to the Nuclear Regulatory Commission an application for a license to authorize the export of a pressurized water reactor with a thermal power level of 2,785 megawatts to Spain and that the issuance of such license is under consideration by the Nuclear Regulatory Commission.

No license authorizing the proposed reactor export will be issued until the Nuclear Regulatory Commission determines that such export is within the scope of and consistent with the terms of an applicable agreement for cooperation arranged pursuant to Section 123 of the Atomic Energy Act of 1954, as amended (Act), nor until the Nuclear Regulatory Commission has found that:

(a) The application compiles with the requirements of the Act, and the Commission's regulations set forth in 10 CFR, Chapter 1, and

(b) The reactor proposed to be exported is a utilization facility as defined in said Act and regulations.

In its review of applications solely to authorize the export of production or utilization facilities, the Nuclear Regulatory Commission does not evaluate the health and safety characteristics of the facility to be exported. Consequently, there are no safety analysis or Advisory Committee on Reactor Safeguards reports.

Unless on or before February 23, 1977, a request for a hearing is filed with the Nuclear Regulatory Commission by the applicant, or a petition for leave to intervene is filed by any person whose interest may be affected by the proceeding, the Director of the Office of International Programs may, upon the determinations and findings noted above, cause to be issued to Westinghouse Electric Corporation a facility export license and may cause to be published in the FEDERAL REGISTER a notice of issuance of the license. If a request for a hearing or a petition for leave to intervene is filed within the time prescribed in the notice, the Nuclear Regulatory Commission will issue a notice of hearing or an appropriate order.

A copy of the application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C.

Dated at Bethesda, Maryland, this 10th day of January 1977.

For the Nuclear Regulatory Commission.

MICHAEL A. GUHIN,
Assistant Director, Export/Import and International Safeguards, Office of International Programs.

[FR Doc.77-2019 Filed 1-21-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON REGULATORY ACTIVITIES

Meeting

In accordance with the purposes of Sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards Subcommittee on Regulatory Activities will hold a meeting on February 9, 1977 in Room 1046, 1717 H Street, N.W., Washington, D.C. 20555.

The agenda for the above meeting will be as follows:

Wednesday, February 9, 1977

(A) *8:45 a.m. until about 11:00 a.m.* (Open).

The Subcommittee will hear presentations from the NRC Staff and will hold discussions with this group pertinent to the following items:

(1) Regulatory Guide 1.118, "Periodic Testing of Electric Power and Protection Systems."

(2) Regulatory Guide 1.119, Revision 1, "Surveillance Program for New Fuel Assembly Designs."

(3) A Working Paper, Regulatory Guide 1.XX, "Site Investigations for Foundations of Nuclear Power Facilities."

(B) *11:00 a.m. until the close of business.* (Open).

The Subcommittee will hear presentations from the NRC Staff and will hold discussions with this group pertinent to activities which affect the current licensing process or reactor operations, including those relating to the following:

(1) Practices and Procedures for Correction of ECCS Errors for Operating Power Plants.

Other matters which may be of a predecisional nature relevant to reactor operation or licensing activities may be discussed during this session.

Portions of this session may be closed if required to discuss proprietary material related to the design, construction, or operation of specific equipment.

I have determined, in accordance with Subsection 10(d) of Public Law 92-463, that it may be necessary to close portions of the meeting as noted above to protect proprietary data under 5 U.S.C. 552(b)(4).

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public records. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(A) Persons wishing to submit written statements regarding Regulatory Guides 1.118 and 1.119 may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. Such comments shall be based upon documents on file and available for public inspection at the NRC Public Document Room, 1717 H St., N.W., Washington, DC 20555.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than February 2, 1977 to Mr. G. R. Quittschreiber, ACRS, NRC, Washington, DC 20555 will normally be received in time to be considered at this meeting.

(B) Those persons wishing to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements on topics relevant to the Committee's purview at an appropriate time chosen by the Chairman of the Subcommittee.

(C) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone 202/634-1374, Attn: Mr. G. R. Quittschreiber) between 8:15 a.m. and 5:00 p.m., EST.

(D) Questions may be propounded only by members of the Subcommittee and its consultants.

(E) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(F) Persons with agreements or orders permitting access to proprietary information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least three working days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of the agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to Mr. G. R. Quittschreiber of the ACRS Office, prior to the beginning of the meeting.

(G) A copy of the transcript of the open portion(s) of the meeting where factual information is presented and a copy of the minutes of the meeting will be available for inspection at the NRC Public Document Room, 1717 H St., NW., Washington, D.C. 20555 on or after February 16, 1977, and May 9, 1977, respectively.

Copies may be obtained upon payment of appropriate charges.

JOHN C. HOYLE,
Advisory Committee Management Officer.

JANUARY 19, 1977.

[FR Doc.77-2289 Filed 1-21-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON SEISMIC ACTIVITY

Meeting

In accordance with the purposes of Sections 29 and 182b of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the ACRS Subcommittee on Seismic Activities will meet on February 8 and 9, 1977 at the Ramada Inn, 8400 Wisconsin Avenue, Bethesda, Maryland 20014. The purpose of this meeting is to discuss recent seismic related developments, ground motion for seismic design, soil-structure interaction, and to review seismic related matters referred to the ACRS by the NRC.

The agenda for this meeting shall be as follows:

Tuesday, February 8, and Wednesday, February 9, 1977 from 8:30 a.m. until approximately 9:00 p.m. each day, or until conclusion of business on February 9. (Open)

The two-day meeting will include presentations by invited speakers. Topics will concern recent seismic related developments, ground motion for seismic design, and soil-structure interaction. In addition, the Subcommittee will review seismic related matters referred to the ACRS by the NRC.

The Subcommittee may caucus to determine whether matters have been adequately covered and whether they are ready for review by the full Committee. During the session Subcommittee members and consultants will discuss their opinions and recommendations on these matters.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than February 1, 1977 to Mr. Thomas G. McCreless, ACRS, NRC, Washington, DC 20555, will normally be received in time to be considered at this meeting.

(b) Persons desiring to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so

that appropriate arrangements can be made. The Subcommittee will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on February 7, 1977 to the Office of the Executive Director of the Committee (telephone 202/634-1374, Attn: Mr. Thomas G. McCreless) between 8:15 a.m. and 5:00 p.m., est.

(d) Questions may be propounded only by members of the Subcommittee and its consultants.

(e) The use of still, motion picture, and television cameras, the physical installation and presense of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) A copy of the transcript of the portion(s) of the meeting where factual information is presented and a copy of the minutes of the meeting will be available for inspection on or after February 15, and May 2, 1977, respectively, at the NRC Public Document Room, 1717 H St., N.W., Washington, DC 20555.

Copies may be obtained upon payment of appropriate charges.

JOHN C. HOYLE,
Advisory Committee Management Officer.

JANUARY 18, 1977.

POSTAL SERVICE

PREPARATION REQUIREMENTS FOR BULK RATE THIRD-CLASS MAIL

Erroneous Interpretation of Packaging Requirements; Delayed Compliance Date

In the Postal Bulletin of December 30, 1976, the Postal Service published a notice on preparation of bulk third-class mail, which stated, among other things, that in order to be eligible for acceptance, bulk third-class mail must be presorted by ZIP Codes in packages and sacks in accordance with 134.43, Postal Service Manual. The pieces in a bulk third-class mailing must be faced, correctly oriented for reading of the addresses, and secured in ZIP Coded packages in a manner which will preserve the facing and ZIP Coded sortation during handling.

Placing non-packageable items loose in sacks or other containers is not sufficient to meet prescribed bulk rate preparation requirements. Such mailings are properly chargeable with postage at the single third-class rate.

Managers of bulk mail acceptance units must give this matter close supervision to protect postal revenues.

The above Postal Bulletin notice merely served as a reminder to postal managers of the long-standing presorting, ZIP Coding, and packaging requirements of 134.43 of the Postal Service Manual, requirements that were put into effect on January 1, 1967, after a public rulemaking proceeding, see 30 FR 8477 (July 2, 1965). It appears now that some postal customers and post offices interpreted these requirements erroneously and accepted improperly prepared and packaged pieces at the bulk third-class rate for many years. In addition, we have now determined it is possible to prepare cylindrical packages and mailing tubes in accordance with § 134.43, Postal Service Manual, and if such items are correctly packaged they may be accepted at the bulk rates. Therefore, in view of these circumstances, and to mitigate the effect of an otherwise sudden insistence on following Postal Service packaging requirements, the Postal Service will permit mailers who have been operating under such erroneous interpretations to continue to do so until April 14, 1977, at which time all post offices will enforce all third-class bulk rate mail preparation requirements fully in accordance with 134.43 of the Postal Service Manual.

ROGER P. CRAIG,
Deputy General Counsel.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[FRA Waiver Petition No. HS-77-1]

SIERRA RAILROAD CO.

Petition for Exemption from Hours of Service Act

The Sierra Railroad Company has petitioned the Federal Railroad Administration pursuant to 45 U.S.C. 64a(e) for an exemption, with respect to certain employees, from the Hours of Service Act, as amended, 45 U.S.C. 61-64(b).

Interested persons are invited to participate in this proceeding by submitting written data, views, or comments. Communications should be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Attention: FRA Waiver Petition No. HS-77-1, Room 5101, 400 Seventh Street, S.W., Washington, D.C. 20590. Communications received before March 10, 1977, will be considered before final action is taken on this petition. All comments received will be available for examination by interested persons during business hours in Room 5101, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590.

Issued in Washington, D.C., on January 13, 1977.

DONALD W. BENNETT,
Chairman, Railroad Safety Board.

RNAV POLICY STATEMENT

Correction

In FR Doc. 77-841 appearing on page 2738 in the issue of Thursday, January 13, 1977 on page 2739, the first full paragraph should be corrected to read as follows:

To be responsive to current and near-term RNAV users, the FAA will determine RNAV user needs and take positive steps to facilitate RNAV use within the existing air traffic control environment. This will include:

Eliminating existing RNAV routes which do not respond to user requirements.
Establishing, on a case-by-case basis, RNAV routes with the accompanying RNAV transition segments, SIDs and STARs.
Promoting the establishment of RNAV approaches at noninstrumented airports.
Establishing a continuing program to educate pilots, air traffic controllers, flight service specialists and flight standards specialists about RNAV and its capabilities.
Developing a national waypoint system to facilitate pilot selection of direct routes.
Development and promulgation of RNAV avionics minimum performance standards.

DEPARTMENT OF THE TREASURY

Office of the Secretary

ADVISORY COMMITTEE ON PRIVATE PHILANTHROPY AND PUBLIC NEEDS

Appointment of Members

Secretary of the Treasury William E. Simon announced on January 6, 1977 the appointment of members of the Advisory Committee on Private Philanthropy and Public Needs. Appointments are subject to tax and security checks. Members will serve two-year terms without pay.

The Committee will advise the Treasury Department on tax aspects of private philanthropy, standards for philanthropic institutions, and needed information and data on private giving and philanthropic activities. Establishment of the Committee was announced in the FEDERAL REGISTER of November 29, 1976 (41 FR 52352).

C. Douglas Dillon, former Treasury Secretary and Chairman of the Metropolitan Museum of Art in New York is Chairman of the Committee. Committee Sponsor is Treasury Deputy Secretary George Dixon. Committee Coordinator is Gabriel Rudney of the Treasury Department.

The Committee is expected to meet quarterly. Meetings will be open to the public. Public notice of pending meetings will be published in the FEDERAL REGISTER.

Members of the Advisory Committee, in addition to Mr. Dillon, are:

William Aramony (National Executive, United Way, Washington, D.C.).
Robert Biendon (Vice President, Robert Wood Johnson Foundation, Princeton, New Jersey).
Kingman Brewster (President, Yale University, New Haven, Connecticut).
David Cohen (Executive Director, Common Cause, Washington, D.C.).
Leonard Conway (President, Youth Project, Washington, D.C.).
Bruce Dayton (Chairman, Executive Committee and Chief Financial Officer, Dayton Hudson Corporation, Minneapolis, Minnesota).
Pablo Eisenberg (President, Center for Community Change, Washington, D.C.).
John Filer (Chairman, Aetna Life and Casualty Company, Hartford, Connecticut).
Marion Fremont-Smith (Partner, Choate, Hall and Stewart, Boston, Massachusetts).
Mary Gardiner Jones (President, National Consumers League, Washington, D.C.).
James Joseph (President, Cummins Engine Foundation, Columbus, Indiana).
Vilma Martinez (President, Mexican-American Legal Defense and Education Fund, San Francisco, California).
Walter McNerney (President, Blue Cross Association, Chicago, Illinois).
John Nolan (Partner, Miller and Chevalier, Washington, D.C.).
Ernest Osborne (President, Sachem Fund, New Haven, Connecticut).
Alan Pifer (President, Carnegie Corporation, New York, New York).
George Romney (President, National Center for Voluntary Action, Washington, D.C.).
William Matson Roth, (President, San Francisco Museum of Art, San Francisco, California).
Eleanor Sheldon (President, Social Science Research Council, New York, New York).
Leonard Silverstein (Partner, Silverstein and Mullens, Washington, D.C.).
Thomas Troyer (Partner, Caplin and Drysdale, Washington, D.C.).
Wes Uhlman (Mayor, City of Seattle, Washington).
Paul Ylvisaker (Dean, Harvard Graduate School of Education, Boston, Massachusetts).
H. J. Zoffer (Dean, Graduate School of Business, University of Pittsburgh, Pittsburgh, Pennsylvania).

GEORGE H. DIXON,
Deputy Secretary of the Treasury.

U.S.A. AND ITALY TO NEGOTIATE REVISED INCOME TAX TREATY

Announcement

The Treasury Department today announced that representatives of the United States and Italy will meet in Rome during the week of February 14, 1977 to renegotiate the income tax treaty between the two countries.

The existing income tax treaty was signed in 1955 and has been in effect since 1956. During the past 20 years, many tax treaty concepts have been modified, particularly as a result of the work of the Fiscal Committee of the Organization for Economic Cooperation and Development (OECD). Consequently, the 1955 U.S.A.-Italy treaty is now outmoded in a number of respects. Moreover, the extensive changes in Italian income tax law, effective in January 1947, raised doubts about the continued applicability of the treaty, which has continued in effect under the terms of an interim agreement negotiated in December 1974 pending renegotiation of the treaty.

The new treaty will be based on the draft U.S.A. model income tax treaty published by the Treasury Department on May 18, 1976 it will also take into account the OECD Model Draft as well as other recent treaties concluded by the United States and Italy.

Interested persons are invited to submit comments in writing by February 11, 1977 to the Assistant Secretary for Tax Policy, U.S. Treasury Department, Room 3108, Washington, D.C. 20220.

CHARLES I. KINGSON,
Acting International Tax Counsel.

INTERSTATE COMMERCE COMMISSION

[Notice No. 309]

ASSIGNMENT OF HEARINGS

JANUARY 18, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 141663, Robert E. Moore, d b a Moore Trucking Company, now assigned February 15, 1977 at Greensboro, N.C., will be held in Court No. 1, 3rd Floor, U.S. Post Office & Courthouse Building.
MC 138627 (Sub-No. 11), Smithway Motor Xpress, Inc., now assigned February 1, 1977, at Kansas City, Mo. is canceled and application dismissed.
MC 142066 (Sub-No. 1), Theophane Lawrence Schlegal and Diana Gayle Schlegal d/b/a Central Pacific Freight Lines, now being assigned March 8, 1977 (1 day) at Port Orford, Oregon, in the City Hall Council Chambers 555 West 20th Street and continued to March 9, 1977 (2 days) at Brookings, Oregon, in the City Hall Council Chambers, 898 Elk Drive.
MC 142134, Donald J. Bryden, dba Bryden Trucking now being assigned March 8, 1977 (1 day) at Seattle, Washington in a hearing room to be later designated.
MC 124004 Sub 34, Richard Dahn, Inc., now being assigned March 15, 1977, at the Office of Interstate Commerce Commission, Washington, D.C.
MC 124896 Sub 15, Williamson Truck Lines, Inc., now being assigned March 16, 1977, at the Office of Interstate Commerce Commission, Washington, D.C.
MC 103066 Sub 46 Stone Trucking Company, now being assigned April 6, 1977, at the Office of Interstate Commerce Commission, Washington, D.C.
MC 140563 Sub 7, W. T. Myles Transportation Co., now being assigned March 8, 1977, at the Office of the Interstate Commerce Commission, Washington, D.C.
MC 115311 Sub 195, J & M Transportation Co., Inc., now being assigned February 22, 1977, at the Office of the Interstate Commerce Commission, Washington, D.C.
MC 124939 (Sub-No. 9), Food Haul, Inc., now being assigned for continued hearing on February 7, 1977, at the Offices of the Interstate Commerce Commission, Washington, D.C.
MC 544 (Sub-No. 1), Vancouver Portland Bus. Co., now assigned February 14, 1977, at Portland, Oreg., is canceled and application dismissed.
MC 74321 (Sub-No. 123), B. F. Walker, Inc., now assigned March 8, 1977, at Seattle, Washington, is canceled and application dismissed.
MC 115860 (Sub 10), Dalby Transfer and Storage, Inc. now being assigned April 25, 1977 (1 week) at Denver, Colorado in a hearing room to be later designated.
MC 113658 Sub 11, Scott Truck Line, Inc now being assigned April 20, 1977 (3 days) at Denver, Colorado in a hearing room to be later designated.
MC 142162, Bralen Trucking Co., Inc. now being assigned April 18, 1977 (2 days) at Denver, Colorado in a hearing room to be later designated.
No. 36451, Colorado Intrastate Freight Rates and Charges—1976, now being assigned April 12, 1977 (4 days) at Denver, Colorado in a hearing room to be later designated.

ROBERT L. OSWALD,
Secretary.

FOURTH SECTION APPLICATIONS FOR RELIEF

JANUARY 18, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed on or before February 8, 1977.

FSA No. 43304—*Beet or Cane Sugar from Points in Washington.* Filed by Trans-Continental Freight Bureau, Agent, (No. 514), for interested rail carriers. Rates on sugar, beet or cane, in carloads, as described in the application, from Scalley, Sugar Spur, and Toppenish, Washington, to points in Illinois, Indiana, Iowa, Kentucky, Missouri and Wisconsin. Grounds for relief—Returned shipments and rate relationship. Tariff—Supplement 44 to Trans-Continental Freight Bureau, Agent, tariff 2-N, I.C.C. No. 1935. Rates are published to become effective on February 15, 1977.

FSA No. 43305—*Soybeans and Related Articles to Snowflake, Arizona.* Filed by Trans-Continental Freight Bureau, Agent, (No. 515), for interested rail carriers. Rates on soybeans and soybean cake or meal, in bulk, in covered hopper cars, as described in the application, from points in Colorado, Kansas, Louisiana, Nebraska, Oklahoma and Texas, to Snowflake, Arizona. Grounds for relief—Motor carrier competition. Tariff—Supplement 238 to Trans-Continental Freight Bureau, Agent, tariff 45-N, I.C.C. No. 1850. Rates are published to become effective on February 17, 1977.

By the Commission.

ROBERT L. OSWALD,
Secretary.

PART II

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

■

PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

[42 CFR Part 101]

CONDITIONAL PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

Assumption of Review Responsibility

Notice is hereby given that the Assistant Secretary for Health of the Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, proposes to add a new Subpart D to Part 101 of Title 42, Code of Federal Regulations.

Sections 1152(a) and 1154 of the Social Security Act authorize the Secretary to designate qualified organizations as Professional Standards Review Organizations (PSROs) for a conditional period not to exceed two years. Section 1154(b) of the Act authorizes the Secretary to require a conditional PSRO to perform such duties and functions during the conditional period of that PSRO, as he determines the organization is capable of performing. The purpose of the proposed Subpart D is to implement section 1154(b) of the Act by requiring all conditional PSROs to assume review responsibility on a gradually increasing basis during the conditional period. Such review responsibility will include the authority to make review determinations which, with respect to the provision of health care services subject to PSRO review, will be conditions for the payment or denial of claims under Medicare and Medicaid, as specified in new Subpart E of Part 101. However, pursuant to section 1158(a) of the Act, PSRO determinations will be advisory for the purposes of payment for Title V Maternal and Child Health and Crippled Children's programs) funds.

Conditional PSROs will assume review responsibility only with regard to the issues of medical necessity, quality and level of care which are specified in clauses (A), (B) and (C) of section 1155(a)(1) of the Act and only in those health care institutions where they have assumed review responsibility in accord with a timetable for phasing-in review responsibility which will be approved by the Secretary. These regulations will apply to assumption of PSRO review in all such health care institutions. Each PSRO's formal plan and the comments of Medicare and Medicaid fiscal agents, as well as other relevant factors concerning the PSRO, will be evaluated by the Secretary to determine if the PSRO is capable of performing these functions prior to approving its assumption of such responsibilities.

The Secretary's decision to have conditional PSROs assume review responsibility is consistent with section 1154(b) of the Act and with the legislative history of the PSRO statute which states:

> Medicare and Medicaid claims paying agencies would be expected to abide by final decisions of the PSRO during this trial period. Placing reliance on the PSRO decision during the trial period is necessary to permit accurate appraisal of the effectiveness with which the conditionally approved PSRO could be expected to exercise the review function in the absence of concurrent review by others (Sen. Rpt. 92-1230, 92 Cong., 2d Sess., p. 261 (1972))

Sections 101.402 and 101.406 of the proposed Subpart D provide for a determination of capability by the Secretary at the time of conditional designation, approval of the PSRO's phase-in timetable, and certain notification requirements designed to inform health care institutions, appropriate administrative agencies and the public of the schedule for assumption of review responsibility by PSROs. The PSRO is to develop administrative procedures under section 101.405 necessary for coordinating PSRO activities with those of Medicaid and Title V State agencies, Medicare fiscal agents and health care institutions. Such administrative procedures may be incorporated in memoranda of understanding or agreements, at the option of the fiscal agents and institutions, within the time period specified in § 101.405. However, in the case of review functions which are to be delegated to health care institutions pursuant to section 1155(e) of the Social Security Act, the institution is required to enter into an agreement with the PSRO regarding the delegated review functions and procedures before the institution may begin review under the authority of the PSRO. If no agreement is reached in this case, the PSRO is required to begin review in accordance with applicable regulations of this Part. Regulations which set forth in detail the delegation of review process will be issued in proposed form in the near future.

The proposed regulations also provide for monitoring of PSRO activities (§ 101.409), and for reevaluation of the PSRO's capability to exercise review responsibility (§ 101.410). Medicare intermediaries will be routinely assisting the Secretary, at the request of the Secretary, by monitoring PSRO review and through the performance of other related functions. However, because of the strong financial interest which the States have in assuring that an effective review system exists because of the expenditure of State funds under Title XIX of the Social Security Act, provision is made under § 101.409 for a temporary suspension of PSRO authority by the Secretary, pending a full reevaluation of PSRO capability, where the State provides reasonable documentation that PSRO determinations, and not other factors, have had a detrimental impact either on State Medicaid expenditures or on the quality of care received by Medicaid patients. If such a temporary suspension of PSRO authority is in effect, the PSRO's determinations will be only advisory to Medicaid State agencies and Medicare fiscal agents for purposes of claims payment. However, in order to prevent the need for reestablishing utilization review committees, which would be an unnecessary and costly duplication of review during a period of only temporary suspension of PSRO authority, the provisions of Title XIX and Title XVIII relating to utilization review and control, physician certifications, and State agency surveys and certifications, will be deemed to be satisfied by such advisory review by the PSRO during the period of suspension.

Interested persons are invited to submit written comments, suggestions or objections concerning Subpart D to the Director, Bureau of Quality Assurance, Health Services Administration, Room 16A-55, 5600 Fishers Lane, Rockville, Maryland 20852, on or before March 25, 1977. All comments received in timely response to this Notice will be considered and will be available for public inspection in the above-named office during reguar business hours.

It is proposed to make Subpart D effective upon republication in the FEDERAL REGISTER.

The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: November 18, 1976.

THEODORE COOPER,
Assistant Secretary for Health.

Approved: January 11, 1977.

MARJORIE LYNCH,
Acting Secretary.

Subpart D—Assumption of Review Responsibility by Conditional PSROs

Sec.

101.401 Definitions.
101.402 Evaluation of capability.
101.403 Notification of determination of capability.
101.404 Assumption of review responsibility according to timetable.
101.405 Establishment of administrative procedures.
101.406 Notification prior to assumption of review responsibility.
101.407 Revision of phase-in timetable.
101.408 Public inspection of timetable.
101.409 Monitoring.
101.410 Reevaluation of capability.

AUTHORITY: Secs. 1152(a), 1154(b), 1155(a)(1), (2), 1164, 1165, Social Security Act, 86 Stat. 1430, 1432, 1433, 1442, 1443, (42 U.S.C. 1430c-1(a), 3(b), 4(a)(1), (2), 13, and 14); sec. 1102 of the Social Security Act, 49 Stat. 647 as amended (42 U.S.C. 1302)

Subpart D—Assumption of Review Responsibility by Conditional PSROs

§ 101.401 Definitions.

As used in this subpart: (a) "Act" means the Social Security Act, as amended (42 U.S.C. Chapter 7).

(b) "Conditional PSRO" means a Professional Standards Review Organization designated on a conditional basis pursuant to sections 1152(a) and 1154 of the Act.

(c) "Formal plan" means the plan submitted to the Secretary prior to designation of a conditional PSRO, detailing the tasks necessary for the orderly assumption and implementation of the responsibilities of such conditional PSRO, including a phase-in timetable.

(d) "Review responsibility" means (1) the responsibility of a PSRO to perform duties and functions prescribed under Title XI, Part B of the Act and the regulations of this part in accord with the phase-in timetable approved by the Secretary and (2) the authority of a PSRO to make determinations in specified health care institutions under sections 1155(a)(1) and (2) of the Act which, with respect to issues arising under sections 1155(a)(1) and (2) of the Act, are conclusive under the Act, pursuant to section 1158 of the Act and Subpart E of this Part.

(e) "Health care institution" means an organization involved in the delivery of health care services or items for which reimbursement may be made in whole or in part under the Act.

(f) "Medicaid State agency" means an agency which is established or designated under section 1902(a)(5) of the Act to administer a State plan to provide medical assistance under Title XIX of the Act.

(g) "Medicare fiscal agents" means intermediaries which are parties to agreements entered into by the Secretary pursuant to section 1816 of the Act and carriers which are parties to contracts entered into by the Secretary pursuant to section 1842 of the Act.

(h) "Phase-in timetable" means a schedule, contained in the PSRO's formal plan and updated as necessary, specifying the estimated times when a conditional PSRO will assume review responsibilities in particular health care institutions, whether such review is to be performed by the conditional PSRO or by a health care institution under delegation from the PSRO pursuant to section 1155(e) of the Act.

(i) "Secretary" means the Secretary of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated.

(j) "State survey agency" means an agency performing provider surveys under section 1864(a) of the Act.

(k) "Title V State agency" means an agency which is established or designated pursuant to section 505(a)(2) of the Act to administer the State plan under Title V of the Act.

§ 101.402 Evaluation of capability.

At that time that the Secretary reviews each formal plan to determine whether to designate an organization as a conditional PSRO, the Secretary will evaluate the capability of such organization to exercise review responsibility. Such evaluation will be based upon the following criteria:

(a) The formal plan submitted by the organization to the Secretary;

(b) Comments and recommendations submitted by the appropriate Medicaid and Title V State agencies and Medicare fiscal agents pursuant to the request of the Secretary which will be made at the time he receives a formal plan for conditional designation; and

(c) Other relevant factors, as determined by the Secretary.

§ 101.403 Notification of designation and capability.

Notification to an organization of the determination of the Secretary as to whether it is designated as a conditional PSRO will be made in writing and will include notification of the Secretary's determination of its capability to exercise review responsibility pursuant to its approved formal plan.

§ 101.404 Assumption of review responsibility according to timetable.

A conditional PSRO which has been found by the Secretary to be capable of exercising review responsibility and has been so notified pursuant to § 101.403, shall assume review responsibility in particular health care institutions in accordance with such notification (whether review is to be performed by the PSRO or under delegation from the PSRO by a review committee pursuant to section 1155(e)), in accordance with its approved phase-in timetable and the requirements of this subpart.

§ 101.405 Establishment of administrative procedures.

(a) *Procedures for State Medicaid and Title V State agencies and Medicare fiscal agents*—(1) *Development.* Each conditional PSRO, at least 90 days prior to the earliest date in the conditional PSRO's phase-in timetable for assumption of review functions in any health care institution, shall (i) develop proposed administrative procedures for correlation of PSRO activities with those of Medicaid and Title V State agencies and Medicare fiscal agents, and (ii) provide copies of such administrative procedures to the Secretary for review and comment and to the appropriate Medicaid and Title V State agencies, Medicare fiscal agents and State survey agency for review and comment.

(2) *Content.* The administrative procedures developed by a PSRO under paragraph (a)(1) of this section shall include:

(i) Procedures for informing such agencies and agents of PSRO approval or disapproval of health care services and items;

(ii) Other matters, consistent with Title XI, Part B of the Act, which the PSRO deems necessary for correlation of PSRO activities with those of such agencies and agents.

(3) *Procedures for comment and Memoranda of Understanding.* (i) A Medicaid or Title V State agency or Medicare fiscal agent may comment upon the administrative procedures developed by a conditional PSRO under paragraph (a)(1) of this section within 30 days after receipt of such procedures. The PSRO shall consider any such timely comments and make such modifications to its administrative procedures as the conditional PSRO deems appropriate and shall forward a copy of such revised procedures to the appropriate State agencies and fiscal agents.

(ii) If a Medicaid or Title V State agency or Medicare fiscal agent wishes to incorporate the PSRO's administrative procedures into the form of a written memorandum of understanding with the conditional PSRO, the agency or agent shall so notify the PSRO. In such case, the PSRO and the agency or agent shall negotiate in good faith in an effort to reach written agreement on the PSRO's administrative procedures.

(4) *Approval of Secretary.* Each conditional PSRO, at least 30 days prior to the date in its phase-in timetable for its first assumption of review functions shall submit copies of its administrative procedures (modified as appropriate) or a written memorandum of understanding to the Secretary for approval. The appropriate Medicaid and Title V State agencies and Medicare fiscal agents may submit comments on the administrative procedures to the Secretary for his consideration, not less than 10 days prior to the date scheduled for the first assumption of review functions. If the Secretary does not disapprove the administrative procedures or the memorandum of understanding prior to the date in such phase-in timetable for the first assumption of review functions, then the PSRO shall utilize such administrative procedures or memorandum of understanding. If the Secretary disapproves the administrative procedures or the memorandum of understanding either prior to or after such date, the Secretary shall so notify the PSRO, and the appropriate Medicaid and Title V State agencies and Medicare fiscal agents, stating the reasons therefor, and will require the conditional PSRO to revise its administrative procedures or modify its phase-in timetable or both in accordance with a timetable specified by the Secretary.

(5) *Modification.* The administrative procedures developed under paragraphs (a)(1) through (a)(4) of this section may be modified, with the approval of the Secretary, either: (i) By a revised memorandum of understanding between the conditional PSRO and the appropriate Medicaid or Title V State agencies or Medicare fiscal agents; or (ii) by the conditional PSRO after providing such agencies or agents the opportunity for comment.

(6) *Previously approved procedures.* Paragraphs (a)(1) through (a)(4) of this section shall not apply in the event that, prior to the adoption of this regulation, a conditional PSRO (i) has already assumed review responsibility in accordance with a phase-in timetable approved by the Secretary in a health care institution and (ii) is utilizing administrative procedures (including memoranda of understanding) between the conditional PSRO and the appropriate Medicaid and Title V State agencies and Medicare fiscal agents which have been approved by the Secretary. However, such previously adopted procedures may be revised by the PSRO at any time in accord with paragraphs (a)(1) through (a)(5) of this section.

(7) *Current procedures available.* A copy of each set of current administrative procedures (including memoranda of understanding) utilized by the conditional PSRO under this section shall be

maintained by the conditional PSRO on file and be available for public inspection in its principal business office.

(b) *Procedures for health care institutions.*—(1) *Development of procedures and other requirements prior to initiation of PSRO review.* Prior to the initiation of review in any health care institution, each PSRO shall, in accordance with applicable regulations of this part:

(i) Notify such institution in a timely manner of the procedures and requirements for delegation of review functions pursuant to section 1155(e) of the Act and the factors and process which the PSRO will utilize for evaluating the capability of the institutional review committee to perform review functions. An example of the notification letter, including the written evaluation factors, shall be submitted to the Secretary for his approval prior to use;

(ii) Evaluate the capability of a health care institution which seeks to obtain a delegation of PSRO review functions; and

(iii) Develop models of procedures for the coordination of PSRO and institutional administrative and review activities in (A) institutions to which all review functions have been delegated, (B) institutions in which review activities are apportioned between the PSRO and the institutions, and (C) institutions in which the PSRO performs all the review functions. Copies of the models of procedures shall be submitted to the Secretary for his approval at least 90 days prior to the earliest date in the PSRO's phase-in timetable for the first assumption of review functions. Each PSRO shall provide copies of its approved administrative and review procedures to all area health care institutions at least 60 days prior to the earliest date when the PSRO is to assume review activities in any institution under the approved phase-in timetable.

(2) *Consultation with nondelegated institutions.* At least 45 days before the conditional PSRO assumes review responsibility in any institution to which it does not propose to delegate any of its review functions, the conditional PSRO shall provide such institution an opportunity for consultation regarding the approved administrative and review procedures. After consideration of any comments made during consultation, the PSRO shall make such modifications in the administrative and review procedures as the PSRO deems appropriate for that institution, and may incorporate such procedures in a written agreement with the institution. However, such modifications or agreements shall not be inconsistent with the model approved by the Secretary pursuant to paragraph (b)(1) of this section and shall include provisions for administrative resolution of disputes and such other provisions as are required in the applicable regulations of this part.

(3) *Agreements with delegated institutions.* Where a conditional PSRO proposes to delegate all or part of its review functions to a health care institution, the PSRO and the institution, prior to such delegation, shall enter into an agreement incorporating procedures for coordination of conditional PSRO and institutional administrative and review activities which are not inconsistent with the procedures in the model approved by the Secretary. Such agreement shall include provisions for administrative resolution of disputes and such other provisions as are required in the applicable regulations of this Part. Where such agreement cannot be accomplished, the PSRO shall initiate review in the institution by the date for the assumption of review functions in the institution by the PSRO.

(4) *Modification.* The administrative procedures developed under paragraphs (b)(1) through (b)(3) of this section may be modified, with the approval of the Secretary, either by a revised agreement between the conditional PSRO and the institution, or by the PSRO after providing the institution with an opportunity for comment.

(5) *Previously approved procedures.* Paragraphs (b)(1) through (b)(4) of this section shall not apply to administrative and review procedures (including agreements) utilized by conditional PSROs in health care institutions which were approved by the Secretary prior to the effective date of this subpart. However, such previously adopted procedures may be revised by the PSRO at any time in accord with subparagraphs (b)(1) through (b)(4) of this section.

§ 101.406 Notification prior to assumption of review responsibility.

(a) *Notice to health care institutions and public of designation and timetable.* Each conditional PSRO which has been approved under § 101.403 shall, within 30 days of such notification, provide a copy of its approved phase-in timetable to each health care institution listed in its phase-in timetable and publish a notice in at least one local newspaper of general circulation in the PSRO area indicating (1) that the conditional PSRO has been found capable by the Secretary to exercise review responsibility, as defined in this subpart, in designated health care institutions in the PSRO area, (2) that the conditional PSRO will assume review responsibility according to a phase-in timetable approved by the Secretary, which is available for public inspection in the principal business office of the conditional PSRO, and (3) that the conditional PSRO will publish the exact dates upon which it will assume review responsibility in particular institutions pursuant to paragraph (c) of this section.

(b) *Fiscal and survey agency notices.* The Secretary will notify the appropriate Medicaid, State survey and Title V State agencies, and the Medicare fiscal agents of (1) the PSRO's approved phase-in timetable at the time of designation of such PSRO and (2) any revision in the approved timetable at the time the PSRO notifies the Secretary of such revisions in accordance with § 101.407.

(c) *Notices of exact date of assumption of resonsibility.* At least 30 days prior to assumption of review responsibility in any health care institution, whether such review is to be performed by the PSRO or by an institutional review committee, each conditional PSRO shall (1) publish a notice in at least one local newspaper of general circulation in the PSRO area of the date on which the conditional PSRO will assume review responsibility and (2) notify the health care institution and the Secretary of such date. The Secretary will in turn notify the appropriate Medicaid and Title V State agencies and Medicare fiscal agents when it receives notification from each PSRO pursuant to this paragraph.

(d) *Notice required for previously designated PSROs.* Conditional PSROs designated prior to the effective date of this subpart shall, to the extent they have not already complied with the requirements of paragraph (a) of this section, within 30 days after the effective date of this Subpart, notify health care institutions and the public in accordance with paragraph (a)(1) of this section that they have been found capable by the Secretary. Such notices shall also state that the conditional PSRO has assumed review responsibility in accordance with a phase-in timetable approved by the Secretary, which is available for public inspection in the principal business office of the PSRO.

(e) *Notice of delay in assumption of responsibility.* (1) If a conditional PSRO does not assure review responsibility in accord with the notice given in paragraph (c) of this section, it shall, prior to the date prescribed therein, notify the health care institution involved, the appropriate Medicaid and Title V State agencies and Medicare fiscal agents and the Secretary that it is unable to assume responsibility at such time and state the reasons for its inability to do so. The provisions of Titles XVIII and XIX of the Act specified in Subpart F of this part shall continue to be applicable with respect to such institution until such time as the PSRO assumes review responsibility in the institution.

(2) Where the Secretary has been notified pursuant to paragraph (e)(1) of this section, he will take such action as he deems necessary, which may include, but is not limited to, revision of the phase-in timetable pursuant to § 101.407, monitoring arrangements under § 101.409, or, reevaluation of the capability of the PSRO under § 101.410.

§ 101.407 Revision of phase-in timetable.

(a) Where a conditional PSRO anticipates a delay of more than 90 days in meeting the estimated date for the assumption of review responsibility in any health care institution, the conditional PSRO shall, prior to such estimated date, notify the Secretary of such anticipated delay and request a revision in the approved phase-in timetable for such conditional PSRO.

(b) The Secretary may, at any time after designation, revise the approved phase-in timetable of any conditional PSRO, in accordance with a request

under paragraph (a) of this section or on the basis of his reevaluation of the capability of the conditional PSRO in accordance with § 101.410.

§ 101.408 Public inspection of timetable.

Each conditional PSRO shall maintain its current approved phase-in timetable on file for public inspection at the principal business office of the conditional PSRO during regular business hours.

§ 101.409 Monitoring.

(a) The Secretary may arrange to have Medicare fiscal agents or Medicaid or Title V State agencies assist him in monitoring the activities of a conditional PSRO. Where such arrangements are made, the conditional PSRO shall take all necessary and appropriate actions to facilitate such monitoring activities.

(b) Where a Medicare fiscal agent or a Medicaid or Title V State agency finds, in the course of monitoring a conditional PSRO, that problems appear to exist in the effectiveness of conditional PSRO review, the fiscal agent or agency shall so notify the conditional PSRO and meet with the conditional PSRO to discuss methods for improving the effectiveness of conditional PSRO review. The Medicare fiscal agent or Medicaid or Title V State agency shall promptly notify the Secretary of any serious problems regarding the effectiveness of conditional PSRO review, and shall further notify the Secretary of the results of its meeting with the conditional PSRO to resolve such problems. The Secretary will consider such information in evaluating the need for a reevaluation of the conditional PSRO's capability pursuant to § 101.410, or other appropriate action.

(c) Where, pursuant to paragraph (b) of this section, a Medicaid State agency and conditional PSRO have not been successful in resolving any problems regarding the appropriateness of PSRO review, the State may file a written complaint with the Secretary requesting either corrective action by the Secretary or, where the State believes the problems have a serious impact upon the administration of the State Medicaid program, a temporary suspension of the conditional PSRO's authority to make determinations which are conclusive for purposes of payment under the Act. Pending a reevaluation of the conditional PSRO's capability pursuant to § 101.410, the Secretary will temporarily suspend such PSRO authority in full or in part as he deems appropriate when the Secretary determines that the State has provided reasonable documentation that the PSRO's review determinations, and not other factors, have caused either of the following:

(1) A detrimental impact on State Medicaid expenditures; or

(2) A detrimental impact on the quality of care received by Medicaid patients. Where a conditional PSRO's authority is temporarily suspended by the Secretary, the PSRO shall continue its review activities. During such period of suspension, the PSRO's determinations shall not be conclusive for purposes of payment under the Act but shall be only advisory to Medicaid State agencies and Medicare fiscal agents, and the provisions of Titles XVIII and XIX of the Act, relating to utilization review and control, physician certifications, and State agency surveys and certifications, shall be deemed to be satisfied.

§ 101.410 Reevaluation of capability.

(a) *Reevaluation factors.* The Secretary may at any time, pursuant to section 1154(b) of the Act, reevaluate the capability of a conditional PSRO to exercise review responsibility. Such reevaluation will be based upon:

(1) The progress of the PSRO in carrying out its formal plan;

(2) Any comments or recommendations submitted by Medicaid or Title V State agencies or Medicare fiscal agents; and

(3) Other relevant factors as determined by the Secretary.

(b) *Notice of tentative determination and intended action.* If, after such reevaluation, the Secretary has reason to believe that the conditional PSRO is not performing in a satisfactory manner the duties and functions which it was found capable of performing, then the Secretary shall notify the conditional PSRO of the grounds for such belief and of the action which the Secretary proposes to take regarding the conditional PSRO. Such action may include:

(1) Placing restrictions upon the exercise of review responsibility or the performance of certain duties and functions by the conditional PSRO, including revision of the conditional PSRO's phase-in timetable;

(2) Requiring the conditional PSRO to take corrective action, including the acceptance of technical assistance to improve its performance;

(3) Suspending the authority of the PSRO to make conclusive determinations pursuant to Subpart E of this part for a period of time. During such period of suspension, the PSRO shall continue its review activities, the PSRO's determinations shall not be conclusive for purposes of payament under the Act but shall be only advisory to Medicaid State agencies and Medicare fiscal agents, and the provisions of Titles XVIII and XIX of the Act, relating to utilization review and control, physician certifications and State agency surveys and certifications, shall be deemed to be satisfied.

(4) Terminating the agreement with the conditional PRSO upon 90 days notice to the PSRO, pursuant to section 1154(c) of the Act;

(5) Such other action as the Secretary may deem appropriate.

(c) *Notice to fiscal agencies.* The Secretary will, as soon as practicable, notify the appropriate Medicaid and Title V State agencies and Medicare fiscal agents, and affected health care institutions, of his belief under paragraph (b) of this section and any action he intends to take pursuant thereto, and solicit their comments on the action he proposes to take.

(d) *Informal meeting and decision.* The notice to the conditional PRSO under paragraph (b) of this section shall offer the conditional PSRO an opportunity to submit written material and to meet informally with an official designated by the Secretary to show cause why the action proposed by the Secretary should not be taken. If the conditional PSRO does not submit written material or request an informal meeting within 14 days after receipt of the Secretary's notice, the Secretary's tentative decision shall become final and he will so notify the PSRO, Medicaid and Title V agencies, and Medicare fiscal agent(s), and state the basis for his decision. If the conditional PSRO submits written material within 14 days, the Secretary will consider this material prior to making a final decision. If the conditional PSRO requests an informal meeting within 14 days after receipt of the Secretary's notice, such a meeting will be scheduled as soon as practicable. After such meeting, the official designated by the Secretary will render promptly a recommended decision to the Secretary. The Secretary will adopt, revise or set aside the recommended decision and will notify the PSRO, appropriate Medicaid and Title V agencies and Medicare fiscal agent(s) of such decision and the basis for such decision.

[42 CFR Part 101]

PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

Conclusive Effect of Determinations on Claims Payment

Notice is hereby given that the Assistant Secretary for Health of the Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, proposes to add a new Subpart E to Part 101 of Title 42, Code of Federal Regulations.

The proposed Subpart E would require Medicare fiscal agents and State Medicaid agencies, within their respective areas of responsibility, to accept as conclusive in institutions in which the PSRO has assumed review responsibility, disapprovals by a PSRO of health services as being medically unnecessary, of inadequate quality or provided at an inappropriate level of care. Those PSRO determinations, in accordance with sections 1155 and 1158 of the Social Security Act (42 U.S.C. 1320c–4 and 7) will, except as provided in section 1159 (42 U.S.C. 1320c–8), constitute the conclusive determination on those medical issues in connection with items or services for which payment of Federal funds may be made under the Act.

As a corollary, the claims for payment must be accompanied or supported by evidence of PSRO review and approval, routine certification, or other appropriate actions by the PSRO indicating that the services have not been disap-

proved and the payment agencies will accept the PSRO determinations on those medical issues. However, PSROs will not review services where the Secretary has made a determination under section 1862(d) of the Act to exclude services rendered by a provider or health care practitioner from coverage under Title XVIII of the Act or to terminate a provider's agreement.

The State Medicaid agencies are also bound by PSRO decisions under section 1164 of the Act, which makes the provisions of Title XI, Part B, directly applicable to the State Medicaid plans.

Subpart E thus represents a change in the general status of utilization review decisions under the Social Security Act, since unlike the findings of utilization review committees under both the present utilization review regulations of Titles XVIII and XIX (20 CFR 405.1035; 45 CFR 250.20) and the proposed utilization review regulations (41 FR 13452, 13457, March 30, 1976), the findings of the PSROs will always be conclusive upon Medicare fiscal agents and Medicaid State agencies.

Separate regulations implementing the provisions of section 1158(a) of the Act, which authorizes payment of Federal funds for services which have been disapproved by a PSRO when the Secretary has determined that the claimant is without fault, are under development and will be published for public comment in the FEDERAL REGISTER.

Interested persons are invited to submit written comments, suggestions or objections concerning Subpart E to the Director, Bureau of Quality Assurance, Health Services Administration, Room 16-A-55, 5600 Fishers Lane, Rockville, Maryland 20852, on or before March 25, 1977. All comments received in timely response to this Notice will be considered and will be available for public inspection in the above-named office during regular business hours.

It is proposed to make Subpart E effective upon republication in the FEDERAL REGISTER.

The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: November 18, 1976.

THEODORE COOPER,
Assistant Secretary for Health.

Approved: January 11, 1977.

MARJORIE LYNCH,
Acting Secretary.

Subpart E—Conclusive Effect of PSRO Determinations on Claims Payment

Sec.
101.501 Definitions.
101.502 PSRO action as condition of payment of claims.
101.503 Effect of PSRO disapproval of services.
101.504 Effect of affirmative PSRO determinations.
101.505 Coverage determinations.

AUTHORITY: Sec. 1154(b), 1155(a)(1), 1158, 1164, Social Security Act, 86 Stat. 1432, 1433, 1437, 1442; (42 U.S.C. 1320c 3(b), 4, 7, 13); sec. 1102, Social Security Act, 49 Stat. 647, as amended (42 U.S.C. 1302)

Subpart E—Conclusive Effect of PSRO Determinations on Claims Payment

§ 101.501 Definitions.

As used in this subpart:

(a) "Act" means the Social Security Act, as amended (42 U.S.C. Chapter 7).

(b) "Review responsibility" means (1) the responsibility of a PSRO to perform duties and functions prescribed under Title XI, Part B of the Act and the regulations of this part in accord with the phase-in timetable approved by the Secretary; and (2) the authority of a PSRO to make determinations in specified health care institutions under sections 1155(a) (1) and (2) of the Act which, with respect to issues arising under sections 1155(a) (1) and (2) of the Act, are conclusive under the Act, pursuant to section 1158 of the Act and this subpart.

(c) "Medicare fiscal agents" means intermediaries which are parties to agreements entered into by the Secretary pursuant to section 1816 of the Act and carriers which are parties to contracts entered into by the Secretary pursuant to section 1842 of the Act.

(d) "Medicaid State Agency" means an agency which is established or designated under section 1902(a)(5) of the Act to administer a State plan to provide medical asistance under Title XIX of the Act.

(e) "PSRO" means a Professional Standards Review Organization which is conditionally or unconditionally designated.

(f) "Title V State agency" means an agency which is established or designated pursuant to section 505(a)(2) of the Act to administer the State plan under Title V of the Act.

§ 101.502 PSRO action as condition of payment.

No Federal funds appropriated under Title XVIII or XIX of the Act shall be used (directly or indirectly) for the payment of any claim for services or items provided in a health care institution where a PSRO is exercising review responsibility for such institution unless (a) the claim for payment is accompanied or supported by evidence of PSRO review and approval, routine certification, or other appropriate action indicating that the services or items have not been disapproved; or (b) such services or items have been approved pursuant to section 1159 and the applicable regulations of this part.

§ 101.503 Effect of PSRO disapproval of services.

(a) Except as provided in section 1159 of the Act and the applicable regulations of this part, no Federal funds appropriated under Title XVIII or XIX of the Act for the provision of health care services or items shall be used (directly or indirectly) for the payment, under such titles or any program established pursuant thereto, of any claim for the provision of health care services or items (unless the Secretary, pursuant to applicable regulations of this part, determines that the claimant is without fault), if:

(1) The provision of such services or items is subject to review by a PSRO under Title XI, Part B of the Act;

(2) The PSRO has disapproved of the services or items giving rise to such claim; and

(3) The PSRO has notified the practitioner or provider who provided, or proposed to provide, such services or items, and the individual who received, or was proposed to receive, such services or items, of its disapproval of the provision of such services or items.

(b) Wherever any PSRO disapproves of any health care services or items, the PSRO shall, after giving the notifications required under paragraph (a) of this section, promptly notify the Medicaid or Title V State agency or Medicare fiscal agent having responsibility for acting upon claims for payment for or on account of such services or items in accordance with the regulations of this Part.

§ 101.504 Effect of affirmative PSRO determinations.

Where a PSRO is exercising review responsibility, no Medicare fiscal agent or Medicaid State agency shall deny the payment of Federal funds for a claim for the provision of health care services or items under Title XVIII or XIX of the Act which are subject to such review, on the grounds that such services were not medically necessary, or were not of a quality which meets professionally recognized standards of health care, or were provided inappropriately on an inpatient basis, or could have been provided more economically in an inpatient health care facility of a different type, unless such services or items have been disapproved by the PSRO or disapproved under section 1159 of the Act.

§ 101.505 Coverage determinations.

Nothing in this subpart shall be construed as precluding the Secretary, a Medicare fiscal agent, or a Medicaid State agency, in the proper exercise of its duties and functions, from reviewing claims for benefits under Titles XVIII and XIX of the Act, or from determining whether they meet the coverage requirements of such Titles XVIII and XIX, in accordance with the implementing regulations of Titles XVIII and XIX and the applicable regulations of this Part providing for the correlation of these functions with those functions of the PSRO under Title XI, Part B of the Act.

[42 CFR Part 101]

PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

Correlation of Functions Under Title XI, Part B of the Social Security Act With Other Provisions of the Act

Notice is given that the Assistant Secretary for Health of the Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, proposes to add a new Subpart F, entitled "Correlation of Functions Under Title XI, Part B of the Social Security Act with Other Provisions of the Act."

The purpose of the present proposal is to correlate, under section 1165 of the Social Security Act (the Act), the various activities of professional Standards Review Organizations (PSROs) with those of the Medicare, Medicaid and Title V agencies and other organizations having review-related functions. In some cases this correlation will require that the PSRO's activities replace those of other agencies. For example, since section 1155(a)(1) of the Act provides that each PSRO will assume exclusive "responsibility" in its area for the review of the medical necessity, quality and appropriate level of care of health services and items which may be paid for under the Act "notwithstanding any other provisions of law," the PSRO's review activities will replace the present utilization review activities of Title XVIII and XIX agencies in those institutions for which a PSRO has assumed responsibility.

On the other hand, in accord with section 1158 of the Act, PSRO activities will replace the present claims payment functions of Medicare and Medicaid agencies only insofar as a PSRO's determinations of medical necessity, quality and level of care will be conclusive with regard to these issues. Pertinent coverage regulations and guidelines, such as relate to the number of hospital days covered or the reasonableness of charges, will continue to apply to payment determinations, and claims payment agencies will not be precluded from rendering coverage and reimbursement determinations with regard to issues which are not the subject of the PSRO determinations.

Similarly, physician certifications required under Title XI will be performed in lieu of similar requirements under Titles XVIII and XIX of the Act, but pertinent coverage regulations and guidelines authorized under those provisions of the Act will continue to apply to payment determinations.

Regulations are under development regarding the relationship of PSRO review and physician certifications to physician certifications made pursuant to section 1814(h) of the Act (relating to "presumed coverage" of a Medicare beneficiary in a skilled nursing facility). In the interim, Subpart F clarifies that, as is the case with an adverse finding by a skilled nursing facility's utilization review committee when the care is not subject to PRSO review, the beneficiary is not eligible for a period of "presumed coverage" in a skilled nursing facility when a PSRO determines that the skilled nursing care to which the physician certifies is not medically necessary.

Survey and monitoring responsibilities of State survey agencies and claims payment agencies, to assure that utilization review functions are being conducted in health care institutions in accordance with section 1861(k) of the Act will no longer be applicable under the law where PSROs are exercising review responsibilities in such institutions.

Finally, since section 1159(c) of the Act provides for an exclusive hearing procedure on PSRO issues, other hearing procedures provided under the Act on the issues of medical necessity, quality and appropriate level of care will be superseded by the procedures of section 1159 of the Act.

It should be noted that, since section 1158 of the Act makes clear that PSRO determinations are to be advisory for purposes of services provided under Title V of the Act, none of the provisions of Title V will be superseded in health care institutions where PSROs perform review and both the PSRO and Title V review systems may operate simultaneously.

It should also be noted that the correlation of PSRO activities with activities of other agencies with respect to particular institutions will only take place at the time PSROs assume review responsibility with regard to those institutions. With respect to institutions where PSROs have not yet begun to function, the Medicare and Medicaid claims payment agencies will continue to exercise all those functions required of them under the Act.

Interested persons are invited to submit written comments, suggestions or objections concerning Subpart F to the Director, Bureau of Quality Assurance, Health Services Administration, Room 16A55, 5600 Fishers Lane, Rockville, Maryland 20852, on or before March 25, 1977. All comments received in timely response will be considered and will be available for public inspection in the above-named office during regular business hours.

It is proposed to make Subpart F effective upon republication in the FEDERAL REGISTER.

The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: November 18, 1976.

THEODORE COOPER,
Assistant Secretary for Health.

Approved: January 11, 1977.

MARJORIE LYNCH,
Acting Secretary.

Subpart F—Correlation of Functions Under Title XI, Part B of the Social Security Act With Other Provisions of the Act

Sec.
101.601 Definitions.
101.602 Applicability.
101.603 Correlation of Title XI functions with Title XVIII functions.
101.604 Correlation of Title XI functions with Title XIX functions.
101.605 Continuation of functions not assumed by PSROs.

AUTHORITY: Sections 1154(b), 1155(a)(1), 1158, 1164 and 1165 of the Social Security Act, 86 Stat. 1432, 1433, 1437, 1442, and 1443, (42 U.S.C. 1320c-3(b), 4, 7, 13, 14); Section 1102 of the Social Security Act, 49 Stat. 647, as amended (42 U.S.C. 1302).

Subpart F—Correlation of Functions Under Title XI, Part B of the Social Security Act With Other Provisions of the Act

§ 101.601 Definitions.

As used in this subpart:

(a) "Act" means the Social Security Act, as amended (42 U.S.C. Chapter 7).

(b) "PSRO" means a Professional Standards Review Organization which is conditionally or unconditionally designated.

(c) "Review responsibility" means (1) the responsibility of a PSRO to perform duties and functions prescribed under Title XI, Part B of the Act and the regulations of this Part in accord with the phase-in timetable approved by the Secretary and (2) the authority of a PSRO to make determinations in specified health care institutions under sections 1155(a) (1) and (2) of the Act which, with respect to issues arising under sections 1155(a) (1) and (2) of the Act, are conclusive under the Act, pursuant to section 1158 of the Act and Subpart E of this Part.

(d) "Health care institution" means an organization involved in the delivery of health care services or items for which reimbursement may be made in whole or in part under the Act.

§ 101.602 Applicability.

The provisions of this Subpart shall be applicable only to health care services and items provided by or in those health care institutions in which a PSRO has assumed review responsibility in accordance with the applicable provisions of this Part.

§ 101.603 Correlation of Title XI functions with Title XVIII functions.

(a) *Utilization review activities.* The review activities of PSROs under section 1155(a) of the Act shall be in lieu of the utilization review and evaluation activities required of health care institutions under sections 1861(e)(6), 1861(j)(8), 1861(j)(12), 1861(k) and 1865 of the Act.

(b) *Certifications.* (1) The certifications made by attending physicians under section 1156(d) of the Act with regard to the issue of medical necessity of health care services, shall be in lieu of the physician certifications required under sections 1814(a)(2)(A), (B), (C), and (E), 1814(a)(3), and 1835(a)(2)(B) of the Act. However, pertinent coverage regulations and guidelines authorized and established pursuant to the provisions of title XVIII of the Act cited above shall continue to apply to payment determinations.

(2) A Medicare beneficiary is not eligible for a period of presumed coverage under section 1814(h) of the Act when a PSRO determines that the care specified in section 1814(a)(2)(C) of the Act is not medically necessary or appropriate.

(c) *Payment determinations by Medicare intermediaries and carriers.* Determinations of PSROs under section 1155 (a) of the Act with regard to the medical necessity, quality and appropriate level of care of health care services, shall be conclusive with regard to these issues on decisions of Medicare intermediaries and carriers under sections 1814(a)(4), 1814(a)(5), 1814(a)(6), 1862(a)(1) and 1862(a)(9) of the Act. However, pertinent coverage regulations and guidelines authorized and established pursuant to the provisions of title XVIII of the Act cited above shall continue to apply to payment determinations, and claims payment agencies shall not be precluded from rendering coverage and reimbursement determinations with regard to issues which are not the subject of such PSRO determinations.

(d) *Survey, compliance and assistance activities.* The activities of PSROs in performing review directly in health care institutions under section 1155(a) of the Act and the monitoring activities of PSROs in assuring compliance with requirements of Title XI, Part B of the Act in health care institutions which are delegated review responsibilities under section 1155(e)(1) of the Act shall be in lieu of the survey, compliance and assistance activities required of State survey agencies under section 1864(a) with respect to sections 1861(e)(6), 1861(j)(8), 1861(j)(12), and 1861(k) of the Act, and intermediaries and carriers under sections 1816(b)(1)(B), and 1842(a)(2)(A) and (B) of the Act. The Secretary will notify appropriate State survey agencies, intermediaries, and carriers of all health care institutions for which a PSRO has assumed review responsibility.

(e) *Review and appeals activities.* Pursuant to section 1159(c) of the Act, any reviews or appeals of PSRO determinations provided under section 1159 (a) and (b) of the Act shall be in lieu of appeals provided under sections 1842 (b)(3)(C) and 1869(b) of the Act with respect to the issues of medical necessity, quality and level of care of health care services as determined by such PSRO.

§ 101.604 Correlation of Title XI functions with Title XIX functions.

(a) *Review activities.* The review activities of PSROs under section 1155(a) of the Act shall be in lieu of the medical, utilization and independent professional review activities required under sections 1902(a)(26), 1902(a)(30), 1902(a)(31), 1903(g)(1) and 1903(i)(4) of the Act.

(b) *Certifications.* Certifications made by attending physicians under section 1156(d) of the Act shall be in lieu of physician certifications required under section 1903(g)(1)(A) of the Act.

(c) *Payment determinations.* Determinations of PSROs under section 1155 (a) of the Act, with regard to the medical necessity, quality and appropriate level of care of health care services, shall be conclusive with regard to these issues on decisions of State Medicaid agencies under section 1903(g) and 1903(i)(4) of the Act. However, such PSRO determinations shall not preclude appropriate coverage determinations under the provisions of Title XIX of the Act with regard to issues which are not the subject of such PSRO determinations.

(d) *Survey and compliance activities.* The activities of PSROs in performing review directly in health care institutions under section 1155(a) of the Act, and the monitoring activities of PSROs in assuring compliance with the requirements of Title XI, Part B of the Act in health care institutions which are delegated review responsibilities under section 1155(e)(1) of the Act, shall be in lieu of the validation procedures performed by the Secretary under section 1903(g)(2) of the Act and the survey procedures required of State survey agencies under section 1902(a)(33) of the Act.

(e) *Review and appeals activities.* Pursuant to section 1159(c) of the Act, any reviews or appeals of PSRO determinations provided under sections 1159 (a) and (b) of the Act shall be in lieu of fair hearings before State agencies provided under section 1902(a)(3) of the Act with respect to the issues of medical necessity, quality and level of care of health care services as determined by such PSRO.

§ 101.605 Continuation of functions not assumed by PSROs.

Any of the duties and functions of a PSRO under Title XI, Part B of the Act for which responsibility has not been assumed by a PSRO shall be performed in the manner and to the extent otherwise provided for under the law.

PART 1914—COMMUNITIES ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

• *Purpose.* The purpose of this notice is to list those communities wherein the sale of flood insurance is authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128). •

Insurance policies can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the state (addresses are published at § 1912.5, 24 CFR Part 1912).

The Flood Disaster Protection Act of 1973 (Pub. L. 93–234) requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified for at least one year by the Secretary of Housing and Urban Development. The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction except as authorized by section 202(b) of the Act, as amended, unless the community has entered the program. Accordingly, for communities listed under this Part no such restriction exists, although insurance, if required, must be purchased.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Section 1914.6 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence new entries to the table. In each entry, a complete chronology of effective dates appears for each listed community. The date that appears in the fourth column of the table is provided in order to designate the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. These dates serve notice only for the purposes of granting relief, and not for the application of sanctions, within the meaning of 5 U.S.C. 551. The entry reads as follows:

§ 1914.6 List of eligible communities.

State	County	Location	Effective date of authorization of sale of flood insurance for area	Hazard area identified	Community No.
•	•	•	•	•	•
Georgia	Cherokee and Pickens	Nelson, city of	Jan. 1, 1977, emergency	Apr. 11, 1975	130296

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for Borough of Highlands, New Jersey

On August 4, 1976, at 41 FR 32585, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in the Borough of Highlands, New Jersey. Since that date, ninety days have elapsed; and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of June 30, 1976 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to section 206 of the Flood Disaster Protection

Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 345297A and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the final flood elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Highlands Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Highlands map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: January 4, 1977.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

[Docket No. FI-2134]

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for City of Winston-Salem, North Carolina

On August 4, 1976, at 41 FR 32585, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in the City of Winston-Salem, North Carolina. Since that date, ninety days have elapsed; and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of June 30, 1976 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 375360D and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the final flood elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Winston-Salem Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Winston-Salem map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: January 4, 1977.

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for the City of Tulsa, Oklahoma

On August 4, 1976, at 41 FR 32585, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in the City of Tulsa, Oklahoma. Since that date, ninety days have elapsed; and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of July 30, 1976 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 405381C and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the final flood elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Tulsa Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Tulsa map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: January 7, 1977.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Correction of Final Flood Elevation for the Township of Lower Macungie, Lehigh County, Pennsylvania

The final notice published on August 12, 1976, at 41 FR 34023 in the FEDERAL REGISTER, showing a Base Flood Elevation of 311 feet at Weidas Mill Bridge, 319 feet at Riverdale Farm Bridge and 333 feet at the Pennsylvania Turnpike (extended), should have been 310 feet, 318 feet and 332 feet respectively. The width of the 100-year flood boundary remains unchanged.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: January 4, 1977.

[Docket No. FI-2296]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for City of Livermore, California

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§1917.10)), hereby gives notice of the final determinations of flood elevations for the City of Livermore, California under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to §1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with §1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, 2550 First Street, Livermore, California 94550.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Arroyo Mocho	Southern Pacific RR	450	40	40
	South edge of Stanley Blvd	452	1,670	50
	West edge of Holmes St.	472	60	0
Arroyo Las Positas	West side of Airway Blvd	381	50	800
	West edge of Bluebell Dr.	501	20	35
	West edge of Heather Lane	512	150	30
	Along north edge of Frontage Rd.	535	70	580
Altamont Creek	Along north edge of Bluebell Dr.	500	880	150
	West edge of Vasco Rd.	536	910	40
Arroyo Seco	South side Highway 50	506	90	90
	Lucille St.	551	0	0

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: December 16, 1976.

HOWARD B. CLARK,
Acting Federal
Insurance Administrator.

[Docket No. FI-2322]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for City of Fullerton, California

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§1917.10)), hereby gives notice of the final determinations of flood elevations for the City of Fullerton, California under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to §1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with §1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, 303 West Commonwealth, Fullerton, California 92632.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Depth in feet above mean sea level
Sheet flooding	Numerous small areas throughout the city.	Up to 3 ft.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: December 16, 1976.

HOWARD B. CLARK,
Acting Federal
Insurance Administrator.

[Docket No. FI-2296]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for City of Eureka, Missouri

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of the final determinations of flood elevations for the City of Eureka, Missouri under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, 108 South Central Avenue, Eureka, Missouri 63025.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Cliffe Creek	Forby Rd. M 1.862 (extended)	473	120	60
	State Route 109	442	250	(1)
Meramec River	North Pacific RR. bridge (downstream side).	444	(1)	2,180
Flat Creek	Stonebridge Dr. (extended across South Pacific RR. tracks).	452	(1)	750
	Bald Hill Rd.	452	1,450	800

[1] Outside corporate limits.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: December 21, 1976.

HOWARD B. CLARK,
Acting Federal
Insurance Administrator.

[Docket No. FI-2301]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for County of Waupaca, Wisconsin

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of the final determinations of flood elevations for Waupaca County, Wisconsin under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the County must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at Waupaca County, 109 South Main Street, Waupaca, Wisconsin 54981.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Little Wolf River	CTH P	1,058	500	50
	Culvert Bridge	923	150	150
	CTH C	867	50	200
	Kretchmer Rd.	855	200	100
	STH 22	830	25	50
	STH 54	782	50	100
	Ostrander Rd.	771	20	50
South Branch Little Wolf River.	CTH Q	906	50	100
	STH 49	899	200	80
Crystal River	STH 22 Bridge	973	20	10
	Sanders Rd.	860	50	10
	Rural Rd.	856	50	10
	Parfreyville Rd.	851	100	50
	Shadow Rd.	835	100	50
Waupaca River	Weyauwega corporate limits (downstream).	759	50	20
Wolf River	500 line railroad bridge	757	6,200	10,300
Pigeon River	A centerline extended west from Stenbrook Rd.	812	100	600
	Section line between land secs. 21 and 22	809	50	50

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: December 21, 1976.

HOWARD B. CLARK,
Acting Federal
Insurance Administrator.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-2656]

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for the City of Ferguson, Missouri

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.4(a)), hereby gives notice of his proposed determinations of flood elevations for the City of Ferguson, Missouri.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City of Ferguson must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, 110 Church Street, Ferguson, Missouri 63135.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Charles H. Grimm, 110 Church Street, Ferguson, Missouri 63135. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Maline Creek	Glen Owen Ave.	462
	West Florissant Rd.	469
	Wabash R.R.	477
	Bermuda Dr.	485
	Wabash R.R.	486
	Florissant Rd.	489
Ferguson Park Branch.	Highmont Dr.	480
	Forestwood Dr.	484
	Chambers Rd.	511
	Averill Rd.	512
	Roberts Rd.	526
Ball Creek	Elkan Dr.	493
	Woodstock Rd.	497
Ferguson Branch	Paul St.	489
	Adams St.	491
	Wabash R.R.	500
	Church St.	503
	Darst Rd.	511
	Chambers Rd.	517
	Royal Rd.	520
	Thoroughman Rd.	521
	Robert Dr.	528
	Scott Dr.	537

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: November 1, 1976.

J. ROBERT HUNTER,
Acting Federal
Insurance Administrator.

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for Village of Itasca, Du Page County, Illinois

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.4(a)) hereby gives notice of his proposed determinations of flood elevations for the Village of Itasca, Du Page County, Illinois.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the Village must adopt flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at the Village Hall, 100 North Walnut Street, Itasca.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. William F. Everham, President of the Board of Trustees, 100 North Walnut Street, Itasca. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Spring Brook	Rohlwing Rd.	699
	Valley Rd.	699
	Walnut Ave.	699
	Prospect Ave.	681
Salt Creek	Thorndale Ave.	682
	Industrial Rd. (extended).	681
Meacham Creek	Medinah Rd.	716
	Corporate limits	716
Devon Ave. tributary.	North corporate limit (Devon Ave.)	686
	Pierce Rd.	687

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: January 4, 1977.

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for Town of Gorham, Ontario County, New York

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), (42 U.S.C. 4001–4128), and 24 CFR Part 1917 (§ 1917.4(a)) hereby gives notice of his proposed determinations of flood elevations for the Town of Gorham, Ontario County, New York.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the Town must adopt flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information show-

ing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at the entrance to Town Hall on the bulletin board, South Street, Gorham, New York.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. Robert Watkins, Town Supervisor of Gorham, R.D. 1, P.O. Box 108, D. Stanley, New York 14561. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Flint Creek	Tile Yard Rd.	861
	Lake to Lake Rd.	867
	Con Rail	872
	East Swamp Rd.	879
Canandaigua Lake.	Fisher Gully	867

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for Borough of Scottdale, Westmoreland County, Pennsylvania

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.4(a)) hereby gives notice of his proposed determinations of flood elevations for the Borough of Scottdale, Westmoreland County, Pennsylvania.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at the Borough Hall, 10 Mount Pleasant Road, Scottdale.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Frederick L. Eberharter, PO Box 67, Scottdale, Pennsylvania 15683. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Jacobs Creek	Upstream corporate limits (upper reach).	1,050
	Downstream corporate limits (uuper reach).	1,050
	U.S. Highway 119	1,043
	Downstream corporate limits (lower reach).	1,041
Stauffer Run	Upstream corporate limits.	1,052
	Stauffer Ave./ Orchard Ave.	1,052
	Scottdale Ave	1,051

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: January 4, 1977.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for Borough of New Britain, Bucks County, Pennsylvania

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.4(a)) hereby gives notice of his proposed determinations of flood elevations for the Borough of New Britain, Bucks County, Pennsylvania.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at the Borough Hall, 76 Keeley Avenue, New Britain.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor John A. Mueller, 76 Keeley Avenue, New Britain, Pennsylvania 18901. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Neshaminy Creek.	Downstream corporate limits.	232
	South Landis Mill Rd. (extended).	232
	Upstream corporate limits.	233
Cooks Run	Confluence with Neshaminy Creek.	232
	Tamenend Ave. and corporate limits.	244
	Corporate limits and Con Rail.	249
	Wooden Bridge	259
	Stone Bridge	265
	U.S. Route 202 Bridge.	270
	Corporate limits	277

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974)

Issued: January 4, 1977.

Proposed Flood Elevation Determinations for Town of Berkley, Massachusetts

The Federal Insurance Administrator in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4(a)), hereby gives notice of his proposed determinations of flood elevations for the Town of Berkley, Massachusetts.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the Town of Berkley must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Map and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at Town Hall, Rural Route 1, Berkley, Massachusetts 02780.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. George Moitoza, Chair-

man, Board of Selectmen, Town Hall, Rural Route 1, Berkley, Massachusetts 02780. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Taunton River	Berkley Bridge	15
Assonet River	Corporate limits	15

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974)

Issued: December 17, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for Town of Abington, Massachusetts

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.4 (a)), hereby gives notice of his proposed determinations of flood elevations for the Town of Abington, Massachusetts.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the Town of Abington must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Map and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at Town Hall, 10 Railroad Street, Abington, Massachusetts 02351.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. Francis J. Giniewicc, Chairman, Board of Selectmen, Town Hall, 10 Railroad Street, Abington, Massachusetts 02351. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Shumatuscacant River.	Summer St.	81
	Center St.	88
	Central Ave.	89
	Adams St.	104
	Wales St.	117
	Washington St.	108
	Lincoln St.	123
	Randolph St.	124
	Summit St.	150

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: December 21, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for County of Carver, Minnesota

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.4 (a)), hereby gives notice of his proposed determinations of flood elevations for the County of Carver, Minnesota.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the County of Carver must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Map and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at Carver County Courthouse, 600 East 4th Street, Chaska, Minnesota 55318.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. William J. Snyder, County Auditor, 600 East 4th Street, Chaska, Minnesota 55318. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
South Fork Crown River.	Watertown downstream city limit.	936
	Minnesota Highway 25 downstream.	942
	Minnesota Highway 25 upstream.	944
	U.S. Highway 7 downstream.	948
	U.S. Highway 7 upstream.	949
	Minnesota Highway 25 upstream.	951
	County State Aid Highway 30 downstream.	952

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: December 21, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for City of South Boston, Independent City, Virginia

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.4(a)) hereby gives notice of his proposed determinations of flood elevations for the City of South Boston, Independent City, Virginia.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at the Municipal Building, South Boston, Virginia.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. J. A. Houghton, City Manager, P.O. Box 417, South Boston, Virginia 24592. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Dan River	Upstream corporate limits.	338
	U.S. Highway 501 (Watkins Bridge).	335
	State Highway 304 (John Randolph Bridge).	333
	Downstream corporate limits.	332
Poplar Creek	Upstream corporate limits.	361
	Poplar Creek St	340
	Summit Dr	340
Balmoral Creek	Cavalier Blvd	356
	Beechmont Rd	362
	Sutpain Rd	350
Reedy Creek	Ridge St	370
	College St	364
	State Highway 304	341
	Downstream corporate limits.	332
Rocky Branch	State Highway 304 west.	371
	State Highway 304 east.	360
	Eastover Rd	342
	Downstream corporate limits.	342

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: December 21, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for City of Ashland, Wisconsin

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.4(a)), hereby gives notice of his proposed determinations of flood elevations for the City of Ashland, Wisconsin.

Under these Acts, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City of Ashland must adopt sound flood plain management

measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Map and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, Courthouse, Ashland, Wisconsin 54806.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Bruce Hendrickson, City Hall, Courthouse, Ashland, Wisconsin 54806. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Bay City Creek	U.S. Highway 13	676
	Foot bridge near 5th Ave.	660
	C. & N.W. R.R.	635
	Soo Line R.R.	622
	2d St.	616
	U.S. Highway 2	614
	C. & N.W. R.R.	605
Unnamed tributary No. 1.	6th St.	645
	U.S. Highway 2	623
Unnamed tributary No. 2.	Toll road	638
	U.S. Highway 2	622
	Lakeshore Rd.	613

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: December 21, 1976.

[Docket No. FI-2581]

APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Proposed Flood Elevation Determinations for City of Berlin, Wisconsin

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (§ 1917.4(a)), hereby gives notice of his proposed determinations of flood elevations for the City of Berlin, Wisconsin.

Under these Act, the Administrator, to whom the Secretary has delegated the statutory authority, must develop criteria for flood plain management in identified flood hazard areas. In order to participate in the National Flood Insurance Program, the City of Berlin must adopt sound flood plain management measures that are consistent with the flood elevations determined by the Secretary.

Proposed flood elevations (100-year flood) are listed below for selected locations. Map and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at City Hall, 108 North Capron Street, Berlin, Wisconsin, 54923.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Gordon Jodarski, City Hall, 108 North Capron Street, Berlin, Wisconsin 54923. The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet above mean sea level
Fox River	Wisconsin St.	756
	Huron Ave.	759
Barnes Creek	Washington St. (downstream side).	758
	Hunter St. (downstream side).	762
Winchell Springs Creek.	SR 49 (downstream side).	760
	Ripon Rd.	761

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: December 21, 1976.

PART IV

COMMODITY FUTURES TRADING COMMISSION

■

CONTRACT MARKETS

Revised Statement of Policy on Indemnification of Officers, Directors and Other Officials

COMMODITY FUTURES TRADING COMMISSION

CONTRACT MARKETS

Revised Statement of Policy Regarding Indemnification

The Commodity Futures Trading Commission today modified its policy statement regarding indemnification of officers, directors and other officials of contract markets.

On July 16, 1976, the Commission published in the FEDERAL REGISTER a statement of policy regarding indemnification of officers, directors and other officials of contract markets and futures commission merchants. See 41 FR 29474 (July 16, 1976). In that statement, the Commission expressed the view that it would be against public policy, as expressed in the Commodity Exchange Act, as amended ("Act"), 7 U.S.C. 1–22 (Supp. V, 1975), for a contract market or futures commission merchant directly or indirectly to indemnify its officials for certain civil penalties imposed by the Commission under section 6b of the Act. The Commission also stated that it would be the Commission's policy to consider all the facts and circumstances surrounding the participation of individual officials in alleged violations of the Act before taking enforcement action against individual officials, and to impose civil penalties on individual officials only in those cases involving "culpable conduct." The Commission took no position with respect to indemnification of officials for other expenses, such as liabilities arising out of civil proceedings instituted by private parties or legal fees incurred defending various types of legal proceedings.

On August 9, 1976, the Commission published in the FEDERAL REGISTER a request for public comment on its policy regarding indemnification and on certain related subjects, such as: (1) Whether it would be appropriate to adopt rules concerning indemnification in circumstances having regulatory implications; (2) whether it would be against public policy to allow indemnification of exchange officials for liabilities arising out of civil proceedings instituted by private parties; (3) whether it would be against public policy to allow indemnification of exchange officials for legal fees incurred in the unsuccessful defense of an action brought by the Commission pursuant to section 6b of the Act; and (4) whether it would be appropriate to hold a public hearing on the issue of indemnification. In that notice the Commission stated that its policy regarding indemnification would remain in effect, notwithstanding its request for comments. See 41 FR 33321 (August 9, 1976).

This release supplements the Commission's prior announcements by notifying the public that the Commission has determined to modify its policy regarding indemnification in light of the comments which it has received. Since what constitutes "culpable conduct" cannot be determined in the abstract, the Commission has decided that it will separately determine, in each case in which a civil penalty is imposed on an individual official, whether or not indemnification in that case would violate public policy. Otherwise, the Commission has not changed its original policy regarding indemnification. That is, the Commission takes no official position at this time with respect to indemnification for other expenses, such as liabilities arising out of civil proceedings instituted by private parties; however, the Commission wishes to make clear that it does not believe that indemnification for legal fees would be against public policy, even when the fees are incurred in the unsuccesful defense of an action brought by the Commission.

Set forth below is a discussion regarding the comments received by the Commission in response to its policy statement and the changes which have been made in the policy statement as a result of those comments and further consideration by the Commission.

I. SUMMARY OF COMMENTS ON AND CHANGES IN THE COMMISSION'S POLICY STATEMENT

Eight commodity exchanges and three futures commission merchants submitted written comments. These commentators unanimously opposed the Commission's policy on indemnification and proffered a number of legal and policy-oriented arguments against it.

A. COMMENTS ON POLICY REGARDING INDEMNIFICATION FOR CIVIL PENALTIES IMPOSED BY THE COMMISSION

There were basically three criticisms of the Commission's policy regarding indemnification of exchange officials for certain civil penalties imposed pursuant to section 6b of the Act. These comments may be summarized briefly as follows:

1. A PROHIBITION OF INDEMNIFICATION IS MORE LIKELY TO DISCOURAGE INDIVIDUALS FROM SERVING AS EXCHANGE OFFICIALS THAN IT IS TO STIMULATE DILIGENCE ON THE PART OF EXCHANGE OFFICIALS

Most commentators maintained that the Commission's policy probably would discourage individuals from serving as exchange officials and would make those who do serve overly cautious. They also disagreed with the Commission's conclusion that indemnification for civil penalties would undermine the prophylactic and deterrent effect of the civil penalty authorized by section 6b of the Act. A variety of arguments were made in this connection, but the thrust of most of the comments was that there is no need to use the threat of a civil penalty to stimulate diligence because (1) the officials of contract markets have sufficient dedication to discharge their responsibilities without a threat of penalty and (2) those officials who do not discharge their responsibilities can be removed from office or denied indemnification under standards contained in state laws governing indemnification of corporate officials.

2. THERE IS LITTLE LEGAL AUTHORITY TO SUPPORT THE COMMISSION'S POSITION REGARDING INDEMNIFICATION FOR CIVIL PENALTIES

A number of commentators expressed their view that nothing in the Act or its legislative history indicates Congress intended the Commission to have any authority with respect to indemnification of exchange officials and that the subject seems to be outside the scope of the general rule-making authority granted to the Commission by section 8a(5) of the Act. They also observed that the Commission's policy regarding indemnification is broader than that adopted by the Securities and Exchange Commission or any other government agency and that it conflicts with more liberal state law provisions governing indemnification of corporate officials.

3. THE COMMISSION'S STATEMENT THAT IT WOULD NOT IMPOSE CIVIL PENALTIES ON EXCHANGE OFFICIALS UNLESS "CULPABLE CONDUCT" IS INVOLVED, DOES NOT AMELIORATE THE PROBLEMS CREATED BY ITS POLICY STATEMENT ON INDEMNIFICATION

The principal concern of commentators apparently was that the Commission might impose a civil penalty on an official for "unintentional," technical-type violations of a regulation. The commentators were not assuaged by the Commission's statement that it would impose civil penalties on individual officials only in those cases involving culpable conduct, primarily because the term "culpable conduct" was not defined. These commentators also expressed concern that the mere existence of the statement would have an in terrorem effect and discourage (1) high caliber management from serving as exchange officials and (2) insurance underwriters from providing so-called Directors and Officers liability (D&O) insurance, even for civil penalties that might be imposed where there is no evidence of culpable conduct.

4. THE COMMISSION SHOULD RETRACT OR MODIFY ITS POLICY REGARDING INDEMNIFICATION

Most commentators suggested that, in view of the criticisms outlined above, the Commission should retract its policy statement. Other commentators suggested modifications that would, in their view, make the policy more consistent with the practical needs of the commodities industry. For example, several commentators suggested that the Commission adopt certain state law standards governing the propriety of indemnification so that officials could be indemnified for civil penalties if they acted in good faith, in a manner reasonably believed by them to be in or not opposed to the best interest of their employer. Other commentators suggested that the Commission define the term "culpable conduct" and proffered a variety of definitions. In this connection, one commentator suggested that the Commission adopt the following approach:

(a) Do *not* oppose indemnification in every instance of civil penalties. Rather the Commission should limit its opposition to those instances of civil penalties where the Commission makes a formal finding that the official has engaged in conduct so detrimental as to not permit indemnification.

(b) Either eliminate the phrase "culpable conduct" which has no established legal meaning, and replace it with language such as "derelection of duty or gross negligence or willful misconduct in the performance of his duties;" or alternatively, define the phrase "culpable conduct" as being generally the same as dereliction of duty or guilty of willful misconduct or gross negligence.

B. CHANGES IN POLICY REGARDING INDEMNIFICATION FOR CIVIL PENALTIES IMPOSED BY THE COMMISSION

The Commission was not persuaded that it should retract its policy statement regarding indemnification for civil penalties.

(1) To begin with, the Commission is satisfied, as a legal matter, that it has statutory authority to prohibit indemnification for civil penalties imposed on exchange officials by the Commission. For example, section 8a(5) of the Act authorizes the Commission "* * * to make and promulgate such rules and regulations as, in the judgment of the Commission, are reasonably necessary to effectuate any of the provisions or to accomplish any of the purposes of [the Act] * * *."[1] And, section 6b of the Act provides that:

> * * * if any contract market, or any director, officer, agent or employee of any contract market * * * is violating or has violated any of the provisions of this Act or any of the rules, regulations, or orders of the Commission thereunder, the Commission may, upon notice and hearing and subject to appeal * * * assess a civil penalty of not more than $100,000 for each violation * * *. In determining the amount of the money penalty assessed under this section, the Commission shall consider the appropriateness of such penalty to the net worth of the offending person and the gravity of the offense, and in the case of a contract market shall further consider whether the amount of the penalty will materially impair the contract market's ability to carry on its operations and duties.[2]

The Commission believes, that, in certain situations, a prohibition of indemnification will be necessary to effectuate the provisions of, and to accomplish the purposes of, section 6b of the Act.

(A) The Commission's ability to impose a civil penalty on an individual official would be eliminated, as a practical matter, if contract markets were free to indemnify any official for the amount of any civil penalty that might be imposed by the Commission. That would, in effect, render a nullity that part of section 6b which authorizes the Commission to impose a civil penalty on either a contract market *or* any director, officer, agent or employee of a contract market, a result which Congress could not have intended. And, since the Commission would be unable to determine whether an exchange official or the exchange would pay a particular civil penalty imposed on an exchange official, there would be a risk that the amount of the penalty would not be "appropriate," as required by section 6b. There is, moreover, nothing in the Act or its legislative history that suggests that Congress intended to give exchanges the authority, through indemnification, to undermine a Commission determination that a particular exchange official should pay a civil penalty.

(B) In the Commission's view, the primary purpose of section 6b civil penalties is to deter violations of the Act. While most exchange officials may in fact be sufficiently dedicated to discharge their responsibilities under the Act without the threat of a civil penalty, the Commission is convinced that the possibility of imposition of a civil penalty for violations of the Act is an important factor in assuring compliance in some cases and that if exchange officials know they need not pay a civil penalty imposed by the Commission, the prophylactic and deterrent effect of section 6b would be undermined.

(2) Secondly, the Commission is satisfied that its position on indemnification for certain civil penalties imposed under section 6b is basically sound as a matter of regulatory policy. The Commission was surprised by comments suggesting that it abandon its policy because prohibiting indemnification of exchange officials for civil penalties would discourage individuals from serving as exchange officials. The point that commentators apparently overlooked or misunderstood is the applicability of the policy statement only to a limited type of situation; that is, when the Commission finds after notice and opportunity for hearing, that a particular exchange official is violating or has violated the Act or the regulations thereunder and that his conduct was "culpable" in the sense that such conduct is of the type included within the phrases, "gross negligence, willful misconduct or dereliction of duty,"[3] and the Commission then determines to impose a civil penalty on that particular official, after considering the appropriateness of the penalty in light of his net worth and the gravity of the offense. The Commission took no position with respect to indemnification of exchange officials for other expenses, such as liabilities arising out of civil proceedings instituted by private parties or legal fees incurred defending various types of legal proceedings.[4] It seems unlikely that prohibiting indemnification for civil penalties imposed by the Commission in the situation described above would discourage high caliber management from serving as exchange officials. Accordingly, the Commission is not persuaded that it should retract its policy statement. The Commission is concerned, however, that its policy regarding indemnification may be misunderstood. For that reason, the Commission has decided to modify its statement of policy regarding indemnification.

The Commission was persuaded by commentators that it should clarify the situations in which it would consider indemnification for a civil penalty to be against public policy. Since the term "culpable conduct" is not susceptible of precise definition,[5] the Commission has decided that it will determine, in each case in which a civil penalty is imposed on an individual official, whether or not indemnification would violate public policy. Thus, if the Commission determines that a particular official is guilty of gross negligence, willful misconduct or dereliction of duty, the Commission would consider indemnification for a civil penalty imposed on that official to be against public policy. The Commission will make an independent determination—in the administrative proceeding in which the civil penalty is imposed—whether indemnification for the civil penalty would violate public policy under the particular circumstances, and if indemnification would violate public policy, the Commission will include a statement to that effect in its order imposing the penalty. If the Commission finds, on the other hand, that indemnification would not violate public policy

---

[1] 7 U.S.C. 12a(5) (Supp. V, 1975).

[2] 7 U.S.C. 13a (Supp. V, 1975) (emphasis added).

[3] The phrases "gross negligence, willful misconduct or dereliction of duty" are meant to convey their broadest legal construction, not the interpretation of those specific phrases by any contract market or the application thereof by any rule of such contract market.

[4] As discussed below, the Commission did not intend, by requesting public comment on indemnification for certain legal fees, to suggest that it might prohibit contract markets or futures commission merchants from reimbursing officials for legal fees incurred in the unsuccessful defense of an action brought by the Commission. To make this clear, the Commission has stated below its view that indemnification for legal fees would not violate public policy.

[5] As noted above, several commentators suggested that the Commission adopt certain state law standards governing the propriety of indemnification so that officials could be indemnified for civil penalties if they "acted in good faith, in a manner reasonably believed by them to be in or not opposed to the best interests of the corporation." The Commission disagrees. The good faith of an official or the best interests of the corporation may be relevant in considering the propriety of indemnification for certain liabilities, but the Commission believes that a different standard should be used in deciding whether an official is to be indemnified for a civil penalty imposed by the Commission for a violation of the Act. It is possible, for example, that the "best interests of the corporation" might be found by a sympathetic board of governors to dictate a course of action by an official that is at variance with the requirements of the Act. The Commission believes that to be consistent with the purpose of section 6b—to stimulate diligence on the part of exchange officials—the propriety of indemnification must depend upon the efforts of the official to discharge his responsibilities under the Act, whether or not that seems to be in the best interest of the corporation.

This is not to say that the Commission intends to hold exchange officials to unrealistically high standards of conduct in determining whether or not indemnification for a civil penalty would violate public policy. Nor does the Commission intend to intervene in exchange determinations to indemnify officials in situations having no impact on the Commission's regulatory responsibilities. However, the Commission believes that exchange officials have certain responsibilities to the public and will not favor indemnification for civil penalties in situations where an official's conduct evidences gross negligence or willful misconduct or dereliction of duty in discharging responsibilities under the Act.

in a particular case, it will not oppose indemnification if the contract market or futures commission merchant wishes to reimburse the official for the amount of the civil penalty in that case.

The Commission believes that this case-by-case approach will clarify those circumstances in which it considers indemnification to be against public policy. In this way, the Commission hopes to ameliorate the two major problems which commentators said might be created by the Commission's policy: (1) that it would discourage individuals from serving as exchange officials; and (2) that it would discourage commercial insurers from underwriting D&O policies routine civil penalties.

The Commission agrees with all the commentators who said that its policy on indemnification should not be codified into regulations at this time.

II. Summary of Comments Regarding Indemnification for Other Legal Expenses

A. Comments on Policy Regarding Indemnification for Other Legal Expenses

Most of the commentators also responded to the Commission's request in the August 9, 1976 FEDERAL REGISTER notice for comments on, among other things: (1) whether it would be against public policy to allow indemnification of exchange officials for liabilities arising out of civil proceedings instituted by private parties; and (2) whether it would be against public policy to allow indemnification of exchange officials for legal fees incurred in the unsuccessful defense of an action brought by the Commission pursuant to section 6b of the Act.[6] These comments may be summarized briefly as follows:

1. The Commission Should Not Prohibit Indemnification of Officials for Liabilities Arising Out of Civil Proceedings Instituted by Private Parties

Most of the commentators said it would be a mistake to prohibit indemnification of officials for liabilities arising out of civil proceedings instituted by private parties. A variety of reasons were suggested, but most commentators said that these expenses should not be treated as penalties because the amount of the expense generally would not depend upon the gravity of the violation or the culpability of the official and because individuals would be reluctant to serve as exchange officials if there was a risk that they might be held personally liable for potentially large sums of money required to compensate injured traders.

2. Legal Fees Should Be Subject to Indemnification in All Cases

Most commentators said that the public interest would be better served by allowing indemnification for legal fees, even when they are incurred in the unsuccessful defense of an action brought against individual exchange officials by the Commission, for the reasons, among others, that (1) the amount of legal fees depends upon the quality and complexity of the legal representation, not the gravity of the violation or the culpability of the defendant, and (2) that indemnification would encourage a vigorous defense against possibly frivolous claims.

B. No Changes Were Made in Policy Regarding Indemnification for Other Legal Expenses

The Commission has not changed its original policy regarding indemnification for liabilities other than section 6b civil penalties. In other words, the Commission takes no position at this time with respect to indemnification for other expenses, such as liabilities arising out of civil proceedings instituted by private parties or legal fees incurred defending various types of legal proceedings.

The Commission believes the propriety of indemnification for liabilities incurred in private civil actions—such as suits under the Commodity Exchange Act for damages sustained by injured traders as a result of an action taken by an exchange official—can only be viewed in the context of the actual cases as they arise. Consequently, the Commission does not believe the propriety of indemnification in these circumstances is susceptible to treatment by a regulation or policy statement of general applicability and is willing generally to leave such matters to the determination of the exchanges themselves.[7]

However, the Commission has proposed a rule that would, if adopted, require contract markets to notify the Commission if an official of a contract market is to be indemnified for liabilities arising from private civil actions. See 41 Fed. Reg. 37597 (September 7, 1976). In this way, the Commission will be able to review the propriety of indemnification for these expenses on a case-by-case basis. And, if the Commission strongly believes, because of the nature of the particular case, that there should be no indemnification in that case, it may institute separate administrative proceedings against the official or it may seek to participate as *amicus curiae*, or to intervene, in the proceedings.[8]

The Commission also wishes to make clear that, by requesting public comment on indemnification for certain legal fees, it did not intend to suggest that it might prohibit contract markets or futures commission merchants from reimbursing officials for legal fees incurred in the unsuccessful defense of an action brought by the Commission. In general, the Commission shares the view of the commentators that legal fees should not be treated as a penalty, since the amount of the fees usually depends upon the quality and complexity of the legal representation, not the gravity of the violation or the culpability of the defendant. The Commission therefore does not believe it would be against public policy, as expressed in the Act, for a contract market or futures commission merchant to indemnify an official for legal fees, including fees incurred in the unsuccessful defense of an action brought by the Commission.

As noted above, the Commission is satisfied that no public interest would be served by holding further hearings on the subject of indemnification. However, interested persons may submit written comments on the Commission's revised policy regarding indemnification. All comments should be addressed to Commodity Futures Trading Commission, 2033 "K" Street, N.W., Washington, D.C. 20581, ATTN: Secretariat. Copies of all comments received will be available for public inspection at the Commission's office in Washington, D.C.

Issued in Washington on January 18, 1977.

WILLIAM T. BAGLEY,
Chairman.

[FR Doc.77-2045 Filed 1-21-77;8:45 am]

[6] The Commission also specifically requested comment on whether it would be appropriate to hold a public hearing on the issue of indemnification. All the commentators said that the Commission should hold a hearing on indemnification. In this way, they suggested, the Commission could gather empirical evidence about the number of exchange officials who might be expected to resign in the face of the Commission's policy on indemnification. The Commission is satisfied, however, that no public interest would be served by holding further hearings on the subject of indemnification since the written comments covered the subject exhaustively.

[7] Unlike civil penalties imposed under section 6b, amounts paid as a settlement or judgment in a particular private action may be based in part on the need to compensate injured traders and in part on the need to deter conduct violative of the Act. The mixed character of these awards is one of the principal obstacles to treating indemnification in these circumstances under a regulation or policy statement of general applicability.

[8] In reviewing the propriety of indemnification in any case, the Commission will be primarily concerned with the impact of indemnification on the Commission's regulatory responsibilities. For example, the Commission might oppose indemnification of an exchange official for amounts paid as a settlement or judgment in a private civil action based on a violation of the Act if it appears that the official's conduct amounts to gross negligence, willful misconduct or dereliction of duty in discharging his responsibilities under the Act. The Commission does not intend to intervene in exchange determinations to indemnify officials in situations having no impact on the Commission's regulatory responsibilities.

PART V

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

NONDISCRIMINATION IN FEDERALLY ASSISTED RAILROAD PROGRAMS

Implementation of Railroad Revitalization and Regulatory Reform Act of 1976

Title 49—Transportation

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

PART 265—NONDISCRIMINATION IN FEDERALLY ASSISTED RAILROAD PROGRAMS

Implementation of Railroad Revitalization and Regulatory Reform Act of 1976

This Part 265 implements section 905 of the Railroad Revitalization and Regulatory Reform Act of 1976 ("Act") to ensure that no person in the United States shall, on the grounds of race, color, national origin, or sex be excluded from participation in, or denied the benefits of, or be subjected to discrimination under, any project, program or activity funded in whole or in part through financial assistance under the Act, or any provision of law amended by the Act, and to require recipients of such financial assistance and certain of their contractors and subcontractors to take affirmative action to ensure that minority persons and minority businesses have a fair opportunity to participate in employment and contractual opportunities which may result from projects, programs and activities funded by such assistance.

Proposed regulations implementing section 905 of the Act were published in the FEDERAL REGISTER on October 22, 1976 (41 FR 46612). Interested persons were invited to submit on or before November 26, 1976, their written comments on the proposed regulations and comments were received. As a result of consideration of these comments by the Federal Railroad Administration ("FRA"), several changes have been made in the regulations, each of which will be noted in succeeding paragraphs.

In addition to numerous technical comments, the substantive public comments related to the following general areas: (A) duplicative and possibly conflicting equal opportunity requirements of the proposed regulations in light of the Civil Rights Act of 1964, and Executive Order 11246; (B) potential conflict of the requirements of the proposed regulations with provisions of existing collective bargaining agreements; and (C) authority to impose affirmative action requirements. In addition, the National Railroad Passenger Corporation ("Amtrak") denies that section 905 of the Act, and any regulations issued thereunder, reach section 601 of the Rail Passenger Service Act, which is the prime source of federal financial assistance to Amtrak.

A. DUPLICATIVE EQUAL OPPORTUNITY REQUIREMENTS

Many commenters noted the provisions of the Civil Rights Act of 1964, Executive Order 11264, and regulations issued pursuant thereto, and complained of the necessity of complying with more than one set of regulations dealing with the same area. Potential conflicts in enforcement were cited along with the possibility that two agencies implementing similar bodies of law, may have differing interpretations or policies which would unduly complicate or confuse the responsibilities of those covered by the regulations. It was urged that compliance with the affirmative action requirements of E.O. 11246 be deemed to satisfy the requirements of the proposed regulations. It was also urged that the handling of all Federal equal opportunity programs be consolidated in one agency, especially in the areas of alleged discrimination in employment.

The scope of section 905 of the Act is broader than Titles VI and VII of the Civil Rights Act of 1964, and E.O. 11246. Section 905 applies to sex discrimination and to loan guarantees, while Title VI does not. As is discussed later, the proposed regulations under section 905 require affirmative action in areas of minority employment and minority business while E.O. 11246 and regulations issued thereunder only apply to employment. In addition, E.O. 11264 and its implementing regulations apply only to government contracts, or programs involving federally assisted construction projects, whereas section 905 applies to any type of Federal financial assistance provided under the particular programs covered by section 905. Consequently, there is a need for a body of regulations implementing section 905 because existing regulations in this area do not cover all situations to which section 905 applies. FRA, by delegation from the Secretary, has the congressionally imposed responsibility to ensure that the provisions of section 905 are applied to covered financial assistance programs. While FRA should make every effort consistent with its responsibility to coordinate its requirements with those of other agencies, it must retain the final responsibility for actions taken under section 905.

In an effort to avoid duplication, or conflicting requirements, and to consolidate equal opportunity programs to the maximum extent possible, FRA has coordinated its proposed regulations dealing with employment with the General Services Administration which is the compliance agency for railroads under E.O. 11246. As a consequence, all affirmative action plans for employment will be developed in accordance with the regulations of the Department of Labor at 41 CFR 60–2. In addition, railroad applicants will be required to develop their analysis by establishment and by job classification in accordance with the requirements of the Joint Reporting Committee of the Equal Employment Opportunity Commission and the Department of Labor.

Applicants for financial assistance and their contractors which have previously furnished another agency with a written affirmative action program, may, of course, use such a written program (updated if necessary) as a basis for compliance with this part. If the previously furnished program meets all of the requirements of this part it will be accepted by the Administrator. Because FRA has final responsibility as noted above, acceptance by another agency under a separate authority cannot be deemed or presumed to indicate acceptance by the Administrator.

B. POTENTIAL CONFLICT OF PROPOSED REGULATIONS WITH EXISTING COLLECTIVE BARGAINING AGREEMENTS

Many commenters were concerned with the stated policy of FRA that conflicting provisions of existing collective bargaining agreements will not be an excuse for a recipient's failure to live up to affirmative action requirements (see § 265.7(a)(2)(iv) of proposed regulations). Some see irreconcilable conflicts which may require an applicant to forego federal financial assistance, while others view this policy as requiring carriers to alter unilaterally collective bargaining agreements in contravention of the Railway Labor Act.

FRA believes that commenters in this regard have misunderstod the impact of the proposed regulations. At the outset it should be noted that private contractual arrangements cannot be used to thwart public policy. *Contractors Ass'n of Eastern Pa. v. Secretary of Labor*, 442 F. 2d 159 (3d Cir. 1971). The potential conflict as perceived by FRA would come about when, based on a review and analysis of utilization of minority employees, underutilization is established, and goals and timetables to overcome the underutilization are imposed by the Administrator as a condition to the receipt of federal financial assistance. The establishment of such goals and time tables with respect to utilization of minority employees may conflict with existing collective bargaining agreements to the extent that such agreements would require the applicant to hire or rehire furloughed employees before any person is newly hired. FRA does not perceive this conflict as irreconcilable, nor have the comments from labor organizations stated that any such conflict is irreconcilable. FRA believes that as a result of good faith negotiations among the applicant, the Administrator, and any affected labor organizations, accommodations can be reached where the interests of each party can be substantially achieved.

Insofar as the Railway Labor Act is concerned, the regulations in no way abrogate the provisions of that Act. Any amendments to existing collective bargaining agreements made to accommodate the requirements of the Administrator would, of course, be made pursuant to that Act.

C. AUTHORITY TO REQUIRE AFFIRMATIVE ACTION

Certain commenters questioned the authority of FRA to require affirmative action pursuant to section 905 of the Act. Noting the similarity of section 905(a) to Title VI of the Civil Rights Act of 1964, and suggesting that under Title VI an agency does not have the authority to establish appropriate affirmative action requirements, it is argued that no such authority exists under section 905. FRA disagrees. Title VI does not so limit an agency administering a Federal financial assistance program. *Contractors Ass'n of Eastern Pa. v. Secretary of Labor, supra.* Further, section 905 differs from Title VI in that section 905(d) authorizes the Secretary of Transportation to "* * * prescribe such regulations and take such actions as are necessary to monitor, enforce, and *affirmatively* carry out the purposes of this section [905]" (italics added). In FRA's view such a grant of authority clearly authorizes, indeed mandates, the requirements contained in these regulations for affirmative action programs.

Again noting the similarity between section 905(a) of the Act and Title VI, it was argued that FRA has no authority to require affirmative action with respect to minority business enterprises, since Title VI has not been interpreted as authorizing or requiring the promulgation of requirements with respect to minority businesses. While FRA is not aware of any judicial determination of Title VI in this regard, it does not interpret section 905 as being limited to equal opportunity in employment. Rather section 905 is intended to reach all manifestations of discrimination and assure that no person is denied the benefits of the programs covered by section 905. The affirmative action requirements with respect to minority business are consistent with the intent of Congress, especially in light of section 906 of the Act which established the Minority Business Resource Center. However, it should be made clear that affirmative action requirements for minority businesses are established pursuant to section 905 of the Act, and not section 906 as some commenters apparently believed.

APPLICABILITY OF SECTION 905 OF THE ACT TO SECTION 601 OF THE RAIL PASSENGER ACT

Amtrak argues that section 601 of the Rail Passenger Service Act ("RPSA") was not amended by the Act, and consequently section 905 and regulations promulgated thereunder do not apply to section 601 of the RPSA. FRA disagrees. Section 905(b) of the Act provides that financial assistance provided by the Act, *or provisions of law amended by the Act*, is subject to the basic nondiscrimination provision set forth in section 905(a) (italics added). Section 704(b) of the Act provides:

> No funds appropriated under this section or pursuant to section 601 of the Rail Passenger Service Act may be used to subsidize any operating losses of commuter rail or rail freight services.

In FRA's view, this provision substantively amended section 601 by placing the limitation on the use of section 601 grant funds. Such an amendment is clearly within the scope of section 905 coverage, particularly considering its remedial purpose warranting a liberal construction of its language.

OTHER SUBSTANTIVE COMMENTS

Commenters expressed concern with the cost of preparing and complying with affirmative action programs, and delays in procuring goods and services caused by applying such programs to contractors and subcontractors of a recipient. Considering the administrative burden such requirements would impose on recipients and the government, section 265.11 will be amended to require contractors to develop and implement affirmative action plans in accordance with this part over a period of time. It will not be required that such plans receive the prior approval of the Administrator before contracts may be awarded.

One commenter suggested adding a provision providing for labor organization participation in compliance proceedings where the matter could affect persons who are covered by collective bargaining agreements. The adopted regulations will be revised to make clear that labor organizations may present their views in such matters where their interests may be affected.

Several commenters suggested that procurement information required by the proposed regulations or requested by the Minority Business Resource Center be treated confidentially upon request of applicant where necessary to protect trade secrets or competitive position. An appropriate provision will be added to the adopted regulations to afford such protection to the extent permitted by the Freedom of Information Act (5 U.S.C. 552) and applicable case law.

Several commenters suggested that affirmative action programs be developed and maintained after the award of financial assistance, or that any conflict between the requirements of the Administrator and the provisions of collective bargaining agreements be resolved after such award. To ensure that section 905 of the Act, and these regulations are fully implemented, and in recognition of the very little time available for such action once an award has been made, FRA deems it appropriate that such actions be taken before financial assistance is awarded.

Objection was made to the requirement that recipients monitor the equal opportunity requirements of their contractors. FRA believes that recipients of federal financial assistance have the responsibility to monitor the activities of contractors which are paid from such assistance since the recipients, not FRA, are in privity with the contractors. However, it should be understood that the term "monitor" does not include enforcement actions but rather is limited to actions necessary to determine from time to time whether the contractor is in compliance and if not to report the appropriate facts to the Administrator.

Several commenters urged that in reviewing utilization of minority employees, the classification by "job categories" be eliminated, or be related to the classifications established by the Department of Labor pursuant to E.O. 11246. Any classification of job categories which fully reflects the organizational structure of the applicant, recipient, or contractor and in the aggregate includes all of its employees may be used by an applicant, recipient or contractor. However, as previously discussed, railroads will be required to undertake their review by establishment and by job categories as required by the Joint Reporting Committee.

The propriety of forbidding a recipient from entering into a contract with a "debarred" contractor was questioned where such contractor will not be performing a contract which is part of a project, program or activity receiving federal financial assistance. The regulations are modified to limit this prohibition to the project, program, or activity which is receiving Federal financial assistance.

Several commenters objected to the notice posting requirements which would advise employees and applicants for employment of the equal opportunity requirements of recipients established by the proposed regulations, since they are required, in many cases, to post similar notices pursuant to E.O. 11246. FRA will in establishing the content of such notice, make every effort to eliminate any duplication of material contained in other required notices. Nevertheless, since the requirements of section 905 of the Act and these regulations differ in several significant ways from other affirmative action requirements, the additional notice will be necessary.

Several concerns were expressed in regard to affirmative action in utilization of minority business enterprises. Concern was expressed that the affirmative action requirements would compel a recipient to purchase goods and services on less than a sound business basis. A railroad company observed that very few minority businesses offered goods and services of the type it sought. Nothing in the required affirmative action program will compel a recipient to contract with a business that cannot deliver the type of goods or services sought. What the affirmative action program does, however, is to require recipients and contractors to develop an awareness of the need to assist minority businesses in getting into the mainstream of commerce, take positive steps to utilize minority businesses, tailor its requirements to meet the particular problems generally associated with minority businesses (e.g. smallness), and expand the scope of traditional thinking by considering the utilization of minority businesses in such fields as legal, financial, insurance and economic services, engineering, real estate, banking and the like. Such an expanded approach will go far in implementing section 905 of the Act.

CHANGES IN PROPOSED REGULATIONS

Based on the public comment to the proposed regulations and further analysis by FRA, the following changes have been made to the proposed rules:

(1) The definition of "Minority Business" in section 265.5(j) has been changed to mean a business which has at least 50% of its equity owned by a minority group person or persons, or if less than 50%, controlled by such a person or

persons, and such other organizations which the Administrator determines to be bona-fide minority businesses;

(2) Section 265.7(a) has been amended to make clear that existing financing agreements are to be amended to include the nondiscrimination clauses;

(3) Section 265.7(a)(11) and 265.13(c)(1) are amended to allow certain procurement information furnished by applicants to be treated confidentially upon request and to the extent permitted by law;

(4) New nondiscrimination clauses (14) and (15) are added to § 265.7 to exact an agreement from the recipient to (a) comply with the written affirmative action program as approved by the Administrator; and (b) notify the Administrator of any discrimination complaints filed against recipient;

(5) Section 265.11 is amended (a) to require the submission of two copies of written affirmative action programs; (b) to eliminate the requirement that contractors and subcontractors submit their affirmative action programs to the Administrator for approval, although such programs are to be developed and maintained; and (c) in cases of contractors and subcontractors which have less than fifty employees, to require the development only of affirmative action plans for minority businesses;

(6) Section 265.13(b) is amended (a) to require applicants or recipients to indicate in their written affirmative action programs the number of jobs which will be established or filled during the program period as a result of the project, program or activity receiving financial assistance; (b) to show the source of employee comparison data; and (c) to require adherence to 41 CFR 60-2 in developing written affirmative action plans for employment.

(7) Section 265.13(c)(1) is amended to highlight the need to furnish data on potential contracts for professional and financial services.

(8) Section 265.23 is amended to allow participation by affected labor organizations in compliance proceedings, and to allow the Administrator to suspend financial assistance during such proceedings in instances other than when hearings are accorded.

(9) A new § 265.23 has been added to elicit information necessary to assess the impact of the project, program or activity for which financial assistance is sought, to the extent such information is not contained in the application.

Since this part is a matter relating to loans, grants, benefits and contracts, this part is effective January 17, 1977.

In consideration of the foregoing, Chapter II of Title 49 of the Code of Federal Regulations is amended by adding a new part 265 reading as follows:

Subpart A—General

Sec.
265.1 Purpose.
265.3 Applicability.
265.5 Definitions.

Subpart B—Requirements

265.7 Nondiscrimination clauses.
265.9 Affirmative action program—general.
265.11 Submission of affirmative action program.
265.13 Contents of affirmative action program.
265.15 Implementation and maintenance of affirmative action program.
265.17 Review of affirmative action program.

Subpart C—Compliance

265.19 Compliance information.
265.21 Conduct of investigations.
265.23 Procedure for effecting compliance.
265.25 Other information.

AUTHORITY: Sec. 905 of the Railroad Revitalization and Regulatory Reform Act of 1976, Pub. L. No. 94-210 (90 Stat. 31); Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(u).

Subpart A—General

§ 265.1 Purpose.

The purpose of this part is to effectuate the provisions of section 905 of the Railroad Revitalization and Regulatory Reform Act of 1976 (hereinafter referred to as the "Act") to ensure that no person in the United States shall, on the grounds of race, color, national origin, or sex be excluded from participation in, or denied the benefits of, or be subjected to discrimination under, any project, program or activity funded in whole or in part through financial assistance under the Act, or any provision of law amended by the Act. Nothing contained in these regulations is intended to diminish or supersede the obligations made applicable by either Title VI of the Civil Rights Act of 1964, (42 U.S.C. 2000d), or Executive Order No. 11246, (42 USCA 2000e (note)). Subsection (d) of section 905 of the Act authorizes the Secretary to prescribe such regulations and take such actions as are necessary to monitor, enforce, and affirmatively carry out the purposes of that section. This authority, coupled with the provisions of section 906 of the Act, which requires the establishment of a Minority Resource Center, which is authorized to encourage, promote and assist in the participation by minority business enterprises in the restructuring, improvement, revitalization and maintenance of our Nation's railroads, provides the basis for requirements for the development of affirmative action programs by recipients of Federal financial assistance and certain of their contractors to insure that minorities and minority businesses are afforded ample consideration with respect to employment and contractual opportunities produced as a result of the implementation of the Act and other provisions of law amended by the Act.

§ 265.3 Applicability.

This part applies to any project, program, or activity funded in whole or in part through financial assistance provided under the Act, and to any activity funded under any provision of the Regional Rail Reorganization Act of 1973, as amended (45 U.S.C. 701 et seq.) or the Rail Passenger Service Act, as amended (45 U.S.C. 501 et seq.) amended by the Act including the financial assistance programs listed in Appendix A. It applies to contracts awarded to implement the Northeast Corridor Project and to financial assistance programs administered by the United States Railway Association.

§ 265.5 Definitions.

As used in this part, unless the context indicates otherwise:

(a) "Act" means the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. No. 94-210).

(b) "Administrator" means the Federal Railroad Administrator or his delegate.

(c) "Affirmative action program" means the program described in § 265.9 through § 265.15 of this part.

(d) "Agency" means the Federal Railroad Administration.

(e) "Applicant" means persons applying for financial assistance under any of the Rail Acts.

(f) "Contractor" means a prime contractor or a subcontractor who will be paid in whole or in part directly or indirectly from financial assistance provided under the Rail Acts.

(h) "Includes" means includes but not limited to.

(i) "Minority" means women, Blacks, Hispanic Americans, American Indians, American Eskimos, American Orientals and American Aleuts.

(j) "Minority Business" means a business organization having at least 50 percent of its equity (exclusive of any equity interest held by any governmental agency) owned by minority group persons, or where less than 50 percent, the organization is controlled by such persons, or such other organizations as the Administrator determines to be a bona-fide minority business organization.

(k) "Minority Business Resource Center" means the Minority Resource Center established in the Department of Transportation pursuant to section 906 of the Act.

(l) "Rail Acts" means the Railroad Revitalization and Regulatory Reform Act of 1976, the Regional Rail Reorganization Act of 1973, as amended (45 U.S.C. 701 et seq.) and the Rail Passenger Service Act, as amended (45 U.S.C. 501 et seq.).

(m) "Recipient" means a person who receives financial assistance under any of the Rail Acts except under section 602 of the Rail Passenger Service Act, as amended (45 U.S.C. 501 et seq.).

(n) "Underutilization" means the condition of having fewer minority employees in a particular job group or fewer awards of contracts to minority businesses than would reasonably be expected by their availability for such jobs or awards.

SUBPART B—REQUIREMENTS

§ 265.7 Nondiscrimination clauses.

(a) Each agreement for financial assistance made under any provision of the Rail Acts shall include, or, in the case of agreements made prior to the effective date of this part, shall be amended to include, the following clauses:

(1) As a condition to receiving Federal financial assistance under the Railroad Revitalization and Regulatory Reform Act of 1976 ("Act"), or the provisions of the Regional Rail Reorganization Act of 1973, as amended (45 U.S.C. 701 et seq.), or the Rail Passenger Service Act or 1970, as amended (45 U.S.C. 501 et seq.) amended by the Act (collectively called, together with the Act, the "Rail Acts"), the recipient hereby agrees to observe and comply with the following:

(i) No person in the United States shall on the ground of race, color, national origin or sex be excluded from participation in, or denied the benefits of, or be subjected to discrimination under, any project, program, or activity funded in whole or in part through such assistance.

(2) The following specific discriminatory actions are prohibited:

(i) A recipient under any project, program or activity to which these clauses apply shall not, directly or through contractual or other arrangements, on the ground of race, color, national origin, or sex:

(A) Deny a person any service, financial aid, or other benefit provided under such project, program or activity;

(B) Provide any service, financial aid, or other benefit to a person which is different, or is provided in a different manner, from that provided to others under such project, program or activity;

(C) Subject a person to segregation or separate treatment in any matter related to his receipt of any service, financial aid or other benefit under such project, program or activity;

(D) Restrict a person in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service, financial aid or other benefit under such project, program or activity; or

(E) Deny a person an opportunity to participate in such project, program or activity through the provision of services or otherwise or afford him an opportunity to do so which is different from that afforded others under such project, program or activity.

(ii) A recipient, in determining the types of services, financial aid, or other benefits, or facilities which will be provided under any such project, program or activity or the class of persons to whom, or the situations in which such services, financial aid, other benefits, or facilities will be provided under any such project, program or activity, or the class of persons to be afforded an opportunity to participate in any such project, program or activity shall not, directly or through contractual or other arrangements, utilize criteria or methods of administration which have the effect of subjecting persons to discrimination because of their race, color, national origin, or sex, or have the effect of defeating or substantially impairing accomplishment of the objectives of the project, program or activity, with respect to individuals of a particular race, color, national origin or sex.

(iii) In determining the site or location of facilities, a recipient shall not make selections with the purpose or effect of excluding persons from, denying them the benefits of, or subjecting them to discrimination under any project, program or activity to which these clauses apply on the grounds of race, color, national origin or sex, or with the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of these clauses.

(iv) The recipient shall not discriminate against any employee or applicant for employment because of race, color, national origin or sex. Except as otherwise required by the regulations or orders of the Administrator, the recipient shall take affirmative action to insure that applicants for employment are employed, and that employees are treated during employment, without regard to their race, color, national origin or sex. Such action shall include, but not be limited to the following: employment, promotion, demotion, transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship. The recipient agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the agency's representative setting forth the provisions of these nondiscrimination clauses. The recipient understands and agrees that it shall not be an excuse for the recipient's failure to provide affirmative action that the labor organizations with which the recipient has a collective bargaining agreement failed or refused to admit or qualify minorities for admission to the union, or that the provisions of such agreements otherwise prevent recipient from implementing its affirmative action program.

(v) The recipient shall not discriminate against any business organization in the award of any contract because of race, color, national origin or sex of its employees, managers or owners. Except as otherwise required by the regulations or orders of the Administrator, the recipient shall take affirmative action to insure that business organizations are permitted to compete and are considered for awards of contracts without regard to race, color, national origin or sex.

(3) As used in these clauses, the services, financial aid, or other benefits provided under a project, program, or activity receiving financial assistance under the Rail Acts include any service, financial aid, or other benefit provided in or through a facility funded through financial assistance provided under the Rail Acts.

(4) The enumeration of specific forms of prohibited discrimination does not limit the generality of the prohibition in paragraph (a)(1)(i) of this section.

(5) These clauses do not prohibit the consideration of race, color, national origin or sex if the purpose and effect are to remove or overcome the consequences of practices or impediments which have restricted the availability of, or participation in, recipient's operations or activities on the grounds of race, color, national origin or sex. Where prior discriminatory or other practice or usage tends, on the grounds of race, color, national origin or sex, to exclude individuals or businesses from participation in, to deny them the benefits of, or to subject them to discrimination under any project, program or activity to which these clauses apply, the recipient must take affirmative action to remove or overcome the effects of the prior discriminatory practice or usage. Even in the absence of prior discriminatory practice or usage to which this part applies, the recipient is expected to take affirmative action to insure that no person is excluded from participation in or denied the benefits of the project, program or activity on the grounds of race, color, national origin or sex, and that minorities and minority businesses are afforded a reasonable opportunity to participate in employment and procurement opportunities that will result from financial assistance provided under the Rail Acts.

(6) The recipient agrees to take such actions as are necessary to monitor its activities and those of its contractors who will be paid in whole or in part with funds provided by the Rail Acts, or from obligations guaranteed by the Administrator pursuant to the Rail Acts, except obligations guaranteed under section 602 of the Rail Passenger Service Act, in order to carry out affirmatively the purposes of paragraph (1) above, and to implement the affirmative action program developed and implemented pursuant to 49 CFR 265.

(7) The recipient shall, in all advertisements for employees, or solicitations for services or materials from business organizations placed by or on behalf of the recipient, in connection with any project, program or activity funded in whole or in part with financial assistance under the Rail Acts, state that all applicants for employment will receive consideration for employment, and all business organizations will receive consideration for an award of a contract, without regard to race, color, national origin or sex.

(8) The recipient shall send to each labor organization or representative of workers with which it has a collective bargaining agreement or other contract or understanding a notice to be provided by the agency's representative, advising the labor organization or workers' representative of the recipient's commitments under section 905 of the Act, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(9) The recipient shall comply with all provisions of section 905 of the Act, the Civil Rights Act of 1964, any other Federal civil rights act, and with the rules, regulations, and orders issued under such acts.

(10) The recipient shall furnish all information and reports required by the rules, regulations, and orders of the Administrator, and will permit access to its books, records, and accounts by the Administrator for purposes of investigation to ascertain compliance with rules, regulations, and orders referred to in paragraph (9) hereof.

(11) Recipient shall furnish such relevant procurement information, not in-

cluded in its affirmative action program, as may be requested by the Minority Business Resource Center. Upon the request of the recipient, the Center shall keep such information confidential to the extent necessary to protect commercial or financial information or trade secrets to the extent permitted by law.

(12) In the event of the recipient's noncompliance with the nondiscrimination clauses of this agreement, or with the provisions of section 905 of the Act, the Civil Rights Act of 1964, or with any other Federal civil rights act, or with any rules, regulations, or orders issued under such acts, this contract will, after notice of such noncompliance, and after affording a reasonable opportunity for compliance, be canceled, terminated, or suspended in whole or in part and the recipient may be declared ineligible for further Federal financial assistance in accordance with procedures authorized in section 905 of the Act, or as otherwise provided by law.

(13) The recipient shall not enter into any contract or contract modification whether for the furnishing of supplies or services or for the use of real or personal property, including lease arrangements, or for construction, in connection with a project, program or activity which receives financial assistance under the Rail Acts with a contractor debarred from or who has not demonstrated eligibility for Federal or federally assisted contracts, and will carry out such sanctions and penalties for violation of this part as may be imposed upon contractors and subcontractors by the Administrator or any other authorized Federal official. The recipient shall insure that the clauses required by 41 CFR § 60–1.46 implementing executive Order No. 11246 will be placed in each non-exempt federally assisted construction contract.

(14) The recipient agrees to comply with and implement the written affirmative action program as approved by the Administrator pursuant to section 265.17 of Title 49 CFR.

(15) The recipient agrees to notify the Administrator promptly of any law suit or complaint filed against the recipient alleging discrimination on the basis of race, color, national origin or sex.

(16) The recipient shall include the preceding provisions of paragraphs (1) through (15) in every contract or purchase order, whether for the furnishing of supplies or services or for the use of real or personal property, including lease arrangements, or for construction relating to projects, programs or activities financed in whole or in part under the Rail Acts. The recipient shall cause each such contractor or vendor to include the provisions of paragraphs (1) through (15) in every subcontract. The recipient will take such action with respect to any such contract or purchase order as the Administrator may direct as a means of enforcing such provisions including sanctions for noncompliance; provided, however, that in the event the recipient becomes involved in, or is threatened with, litigation with a contractor or vendor as a result of such direction by the Administrator, the recipient may request the United States to enter into such litigation.

§ 265.9 Affirmative action program—General.

Recipients of financial assistance under the Rail Acts and their contractors, as specified herein, shall develop and maintain an affirmative action program to insure that persons and businesses are not discriminated against because of race, color, national origin or sex in programs, projects and activities financed in whole or in part through financial assistance provided under the Rail Acts, and that minorities and minority businesses receive a fair proportion of employment and contractual opportunities which will result from such programs, projects and activities.

§ 265.11 Submission of affirmative action program.

(a) Each application for financial assistance under any of the Rail Acts shall, as a condition to its approval and the extension of any financial assistance pursuant to the application, contain or be accompanied by two copies of a written affirmative action program for review by and approval of the Administrator. Recipients that have already entered into an agreement or other arrangement providing for such assistance shall, within 60 days after the effective date of this part, develop and submit to the Administrator two copies of a written affirmative action program for review by and approval of the Administrator and thereafter maintain such program.

(b) (1) Beginning 30 days after the effective date of this part, and until 120 days after such date, each recipient shall require any contractor, as a condition to an award of a contract for $50,000 or more for services or products on a project receiving federal financial assistance under a program covered by section 905 of the Act:

(i) To furnish to the recipient a written assurance that it will, within 90 days after the date of the award, develop and maintain a written affirmative action program meeting the requirements of this part for the project, program or activity covered by the contract,

(ii) To require each of its subcontractors receiving an award of a subcontract for $50,000 or more within 120 days after the effective date of this part, to furnish to the contractor as a condition to such an award the written assurance described in clause (i) of this paragraph.

(2) Beginning 120 days after the effective date of this part, each recipient shall require as a condition to the award of a contract or subcontract of $50,000 or more that the contractor or subcontractor furnish a certificate to the recipient or contractor as appropriate that a written affirmative action program meeting the requirements of this part has been developed and is being maintained.

(3) Notwithstanding paragraphs (1) and (2) of this subsection, each contractor or subcontractor having a contract of $50,000 or more but less than 50 employees shall be required to develop and maintain a written affirmative action program only for contracts in accordance with § 265.13(c) of this part.

(4) A recipient or contractor shall not procure supplies or services in less than usual quantities or in a manner which is intended to have the effect of avoiding the applicability of this paragraph.

§ 265.13 Contents of affirmative action program.

(a) *General.* A prerequisite to the development of a satisfactory affirmative action program is the identification and analysis of problem areas inherent in minority employment and utilization of minority businesses, and an evaluation of opportunities for utilization of minority group personnel and minority businesses. Therefore, an affirmative action program to guarantee employment and contractual opportunities shall provide for specific actions keyed to the problems and needs of minority persons and minority businesses including, where there are deficiencies based on past practices, and with respect to future plans for hiring and promoting employees or awarding contracts, the development of specific goals and timetables for the prompt achievement and maintenance of full opportunities for minority persons and minority businesses with respect to programs, projects and activities subject to this part.

(b) *Employment practices.* (1) The affirmative action program for employment showing the level of utilization of minority employees, and establishing a plan to insure representative opportunities for employment for minority persons shall be developed in accordance with the regulations of the Department of Labor at 41 CFR 60–2.

(2) Railroad applicants or recipients shall develop their program for each establishment in their organization and by job categories in accordance with the requirements of the Joint Reporting Committee of the Equal Employment Opportunity Commission and the Department of Labor. Other applicants, recipients or contractors may use any program format or organization which has been approved for use by other Federal agencies enforcing equal opportunity laws.

(3) The affirmative action program shall show the source of statistical data used.

(4) The affirmative action program shall include a listing by job category of all jobs which may be established or filled by the applicant, recipient or contractor as a result of the project, program or activity funded by federal financial assistance under the Rail Acts for the first five years of such project, program or activity or the period during which such project, program or activity will be undertaken, whichever is the lesser ("program period").

(5) The affirmative action program shall set forth in detail a plan to insure that with respect to the project, program or activity financed in whole or in part through financial assistance under the Rail Acts, minority persons have an opportunity to participate in employment in proportion to the percentage of the minority work force in the area where the applicant's, recipient's or contractor's operations are located as compared to the total work force, and that such minority persons have an equal opportunity for promotion or upgrading. Where appropriate because of prior underutilization of minority employees, the program shall establish specific goals and timetables to utilize minority employees in such projects, programs or activities in the above-mentioned proportion.

(c) *Contracts.* (1) The affirmative action program shall include details of proposed contracts in excess of $10,000 to be awarded in connection with projects, programs and activities funded in whole or in part through financial assistance under the Rail Acts, including contracts for professional and financial services, for the program period. The details shall include a description of the services or products which will be sought including estimated quantities, the location where the services are to be provided, the manner in which proposals will be solicited (e.g., cost plus fixed fee, fixed price), the manner in which contracts will be awarded (e.g., competitive or sole source). The plan shall also give details as to bidding procedures, and information as to other qualifications for doing business with the applicant, recipient or contractor. Upon request by the applicant, recipient or contractor, any information submitted to the Administrator shall be kept confidential to the extent permitted by law.

(2) The affirmative action program shall review the procurement practices of the applicant, recipient or contractor for the full year preceding the date of the submission of the affirmative action program and evaluate the utilization of minority business in its procurement activities. Such evaluation of utilization of minority businesses shall include the following:

(i) An analysis of awards of contracts to minority businesses during such year describing the nature of goods and services purchased and the dollar amount involved; and

(ii) A comparison of the percentage of awards of contracts to minority businesses (by number of contracts and by total dollar amount involved) to the total procurement activity of the applicant, recipient or contractor for said year.

(3) The affirmative action program shall set forth in detail applicant's, recipient's or contractor's plan to insure that minority businesses are afforded a fair and representative opportunity to do business with applicant, recipient or contractor (both in terms of number of contracts and dollar amount involved) for the program period. Such plan shall identify specific actions to be taken to:

(i) Designate a liaison officer who will administer the minority business program;

(ii) Provide for adequate and timely consideration of the availability and potential of minority businesses in all procurement decisions;

(iii) Assure that minority businesses will have an equitable opportunity to compete for contracts, by arranging solicitation time for the preparation of bids, quantities, specifications, and delivery schedules so as to facilitate the participation of minority businesses and by assisting minority businesses who are potential contractors in preparing bid materials and in obtaining and maintaining suitable bonding coverage in those instances where bonds are required;

(iv) Maintain records showing that the policies set forth in this part are being complied with;

(v) Submit quarterly reports of the records referred to in subparagraph (iv) above in such form and manner as the Administrator may prescribe; and

(vi) Where appropriate because of prior underutilization of minority businesses, establish specific goals and timetables to utilize minority businesses in the performance of contracts awarded.

(d) *Successor organizations.* Where applicant, recipient or contractor is a successor organization, its affirmative action program shall review the hiring and procurement practices of its predecessor organization or organizations.

§ 265.15 Implementation and maintenance of affirmative action program.

The affirmative action program with respect to employment and procurement practices shall set forth in detail applicant's, recipient's or contractor's program to implement and maintain its recommended action program to insure that persons and businesses are not discriminated against because of race, color, national origin or sex, and that minorities and minority businesses have equal employment and contractual opportunities with applicant, recipient or contractor. In developing its maintenance program for employment, applicants, recipients and contractors shall follow the applicable regulations of the Department of Labor implementing Executive Order 11246 at 41 CFR 60–2, Subpart C, which provisions may also be helpful in implementing and maintaining applicant's, recipient's or contractor's procurement program.

§ 265.17 Review of affirmative action program.

(a) Except as provided for contractors and subcontractors in § 265.11(b), each affirmative action program to be acceptable must have the written approval of the Administrator.

(b) The Administrator recognizes that there may be some exceptional situations where the requirements of § 265.13 through § 265.15 may not fulfill the affirmative action objectives sought or that those objectives may be better achieved through modified or different requirements. Accordingly, the applicant, recipient or contractor may request approval for modified or different requirements that embody the objectives of § 265.13 through § 265.15. Such a request must include detailed showings that the particular situation is exceptional and that the modified or different proposals substantially comply with the objectives of this part. If the Administrator determines that the requirements for a detailed justification have been met, he may waive or modify these requirements or impose different requirements as he deems necessary to further the objectives sought herein.

Subpart C—Compliance

§ 265.19 Compliance information.

(a) Each recipient and contractor shall keep such records and submit to the Administrator complete and accurate reports, at such times, and in such form, and containing such information as the Administrator may determine to be necessary to enable him to ascertain whether the recipient or contractor has complied or is complying with this part. These records shall show in connection with the project, program or activity funded in whole or in part through financial assistance under the Rail Acts:

(1) Procedures which have been adopted to comply with the policies set forth in this part, including the establishment of a source list of minority businesses;

(2) Specific efforts to identify and award contracts to minority businesses; and

(3) Awards to minority businesses on the source list required in paragraph (1) of this subsection.

(b) Each recipient and contractor shall permit access by the Administrator during normal business hours to such of its books, records, accounts and other sources of information and its facilities as may in the opinion of the Administrator be necessary to ascertain compliance with this part.

(c) Each recipient and contractor shall make available to participants, beneficiaries and other interested persons, such information regarding the provisions of this part and the applicability to the program, project or activity under which the recipient received financial assistance from the Rail Acts or under which the contractor is awarded a contract and make such information available to them in such manner as the Administrator finds necessary to apprise such persons of the protections against discrimination assured them by the Act and this part.

§ 265.21 Conduct of investigations.

(a) The Administrator shall from time to time review the practices of recipients and contractors to determine whether they are complying with this part. The Administrator shall to the fullest extent practicable seek the cooperation of recipients and contractors in obtaining compliance with this part and shall provide assistance and guidance to recipients and contractors to help them comply voluntarily with this part. As required by § 265.7(a)(6) of this part recipients and contractors shall from time to time review the practices of their contractors

and subcontractors to determine whether they are complying with this part.

(b) Any person who believes himself or herself or any other person to be subjected to discrimination prohibited by this part, may file with the Administrator a written complaint. A complaint must be filed not later than sixty (60) days after the date complainant discovers the alleged discrimination, unless the time for filing is extended by the Administrator.

(c) The Administrator will make a prompt investigation in cases where a compliance review, report, complaint or other information indicates a possible failure to comply with this part.

(d) (1) If an investigation pursuant to paragraph (c) of this section indicates a failure to comply with this part, the Administrator shall within ten (10) days after such determination so inform the recipient or contractor in writing of the specific grounds for alleging noncompliance and the matter shall be resolved by informal means whenever possible. The notice shall provide that, if it has been determined that the matter is not resolved by informal means within thirty (30) days after the delivery of the notice, action will be taken as provided for in § 265.23.

(2) If an investigation does not warrant action pursuant to subparagraph (1) of this paragraph, the Administrator shall within ten (10) days after such determination so inform the recipient, or contractor and the complainant, if any, in writing.

(e) No recipient, contractor or other person shall intimidate, threaten, coerce or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 905 of the Act or this part, or because he or she made a complaint, testified, assisted or participated in any manner in an investigation, proceeding or hearing under this part. The identity of complainants shall be kept confidential at their election during the conduct of any investigation, proceeding or hearing under this part. But when such confidentiality is likely to hinder the investigation the complainant will be advised for the purpose of waiving the privilege.

§ 265.23 Procedures for effecting compliance.

(a) Whenever the Administrator determines that any recipient, or contractor has failed to comply with the provisions of this part, or with any Federal civil rights statute, or with any order or regulation issued under such a statute, and such failure has not been resolved by informal means pursuant to § 265.21 of this part, the Administrator shall within ten (10) days after such determination notify such recipient or contractor, and the appropriate labor organization if the matter may appear to affect a person who is covered by a collective bargaining agreement, in writing of the specific grounds for alleging noncompliance, and the right of such persons to respond to such determination in writing or to request an informal hearing. Where the Administrator determines that substantial noncompliance exists and it is unlikely that compliance will be obtained, or that lack of good faith exists, or that other good cause exists, he may order that further financial assistance be suspended in whole or in part pending a final decision in the matter. Subject to the provisions of paragraphs (b) through (e) of this section, the recipient or contractor shall have sixty (60) days from the date of delivery of the notice within which to comply. The recipient or contractor may be entitled to additional time if it is demonstrated that compliance is not possible within the sixty day period and that the necessary initial curative actions were undertaken promptly and have been diligently prosecuted toward completion. The Administrator shall specify the last day upon which curative action must be completed to his satisfaction. Unless the Administrator determines that compliance cannot be reasonably attained, failure to take curative action shall be grounds for the Administrator to:

(1) Direct that no further Federal financial assistance be provided to the recipient;

(2) Refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted;

(3) Exercise the powers and functions provided by Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d *et seq.*); or

(4) Take such other actions as may be provided by law or this part.

(b) Persons receiving notification and a directive pursuant to paragraph (a) of this section may within thirty (30) days after receipt respond to the notice in writing in lieu of requesting an informal hearing as specified in subsection (c). The Administrator will make a determination as to compliance within thirty (30) days after receipt of such written response, and advise the person in writing of his determination. If the Administrator determines that compliance is reasonably attainable and that such person has failed to comply with the provisions of this part or with his determination within 30 days after receipt of his determination, the Administrator shall pursue the remedies set forth in the last sentence of subsection (a) of this section.

(c) Persons receiving notification and a directive pursuant to subsection (a) of this section may within ten (10) days after receipt request an informal hearing in lieu of filing a written response as specified in subsection (b). The Administrator may, in his discretion, grant a request for an informal hearing for the purpose of inquiring into the status of compliance of such person. The Administrator will advise persons subject to his directive in writing as to the time and place of the informal hearings and may direct such persons to bring specific documents and records, or furnish other relevant information concerning their compliance status. When so requested, such person shall attend and bring the requested information. The time and place so fixed shall be reasonable and shall be subject to change for cause. The complainant, if any, shall be advised of the time and place of the hearing. The failure of such person to request a hearing or to appear at a hearing for which a date has been set shall be deemed to be a consent to the applicability of the procedures set forth in subsection (a) of this section.

(d) The hearing shall be conducted by a hearing officer appointed by the Administrator. Such hearings shall commence within twenty (20) days from the date the hearing is granted and shall be concluded no later than thirty (30) days from the commencement date. Parties to informal hearings may be represented by counsel or other authorized representative and shall have a fair opportunity to present any relevant material. Formal rules of evidence will not apply to such proceedings.

(e) *Decisions and notices.* (1) Within ten (10) days after the conclusion of such hearings, the hearing officer will advise the Administrator, in writing, of his views and recommendations as to compliance with this part and a copy of such decision shall be sent by registered mail, return receipt requested, to the recipient or contractor and participating labor organization. If the hearing officer in his decision determines that the recipient or contractor is in noncompliance with this part, he may, if he determines that it is unlikely that compliance will be obtained, or that a lack of good faith exists, or for other good cause, order that further financial assistance, be suspended in whole or in part, pending a decision by the Administrator in the matter.

(2) The recipient, contractor or labor organization may file exceptions to the hearing officer's decision, with his reasons therefor, with the Administrator within thirty (30) days of receipt of the initial decision. Within twenty (20) days, after the time for filing exceptions, the Administrator shall determine, in writing, whether or not the parties involved are in compliance with this part. A copy of the Administrator's decision will be given to the recipient, contractor, labor organization, if appropriate, and to the complainant, if any.

(3) If the Administrator determines that compliance can reasonably be attained, his decision shall provide that if such person fails or refuses to comply with the decision of the Administrator within thirty (30) days after receipt of the decision, the Administrator shall:

(i) Direct that no further Federal assistance be provided to such a person;

(ii) Refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted;

(iii) Exercise the powers and functions provided by Title VI of the Civil Rights Act of 1964; and/or

(iv) Take such other actions as may be provided by law or this part.

(4) A recipient or contractor adversely affected by a decision of the Administrator issued under paragraph (a) or (b) of this section shall be restored to full eligibility to receive Federal assistance

or award of a federally assisted contract if the recipient or contractor takes complete curative action to eliminate the noncompliance with this part and if the recipient or contractor provides reasonable assurance that the recipient or contractor will fully comply with this part.

§ 265.25 Other information.

(a) Each person required to submit a written affirmative action program pursuant to this part shall include as an appendix thereto, the following information except to the extent such information is already provided as part of the application for financial assistance;

(1) A brief description of other pending applications to other federal agencies for financial assistance, and of federal assistance being provided at the time of submission of the affirmative action program;

(2) A statement of any civil rights compliance reviews regarding applicant or recipient conducted in the two year period before the application, or affirmative action program; the name of the agency or organization performing the review, and the findings of the review;

(3) Where the project, program or activity receiving financial assistance will require the relocation of persons and businesses, a description of the requirements and steps used or proposed to guard against unnecessary impact on persons on the basis of race, color, or national origin;

(4) Where the project, program or activity receiving financial assistance will result in the construction of new facilities or expansion of existing facilities, a description of the requirements and steps used or proposed to guard against unnecessary impact on persons on the basis of race, color or national origin.

(5) Where (3) and (4) above are applicable, additional data such as demographic maps, racial composition of affected neighborhoods, or census data should be provided where necessary or appropriate to evaluate the impact of projects, programs and activities referred to in (3) and (4) above.

Dated: January 17, 1977.

ASAPH H. HALL,
Administrator,
Federal Railroad Administration.

APPENDIX A

The following are the financial assistance programs to which this part applies:

(a) *Railroad Revitalization and Regulatory Reform Act of 1976,* (1) purchase of redeemable preference shares or trustee certificates pursuant to section 505;

(2) guarantee of obligations, the proceeds of which will be used to acquire, or rehabilitate or improve rail facilities, or equipment, pursuant to section 511; and

(3) grants and contracts made to implement the Northeast Corridor project under section 704.

(b) *Regional Rail Reorganization Act of 1973, as amended,* (1) loans made by the United States Railway Association (USRA) pursuant to section 211;

(2) purchase of securities of the Consolidated Rail Corporation pursuant to section 216; and

(3) grants to States, or local or regional authorities for rail continuation assistance under section 402.

(c) *Department of Transportation Act,* (1) grants to States for rail freight assistance programs under section 5 (sec. 803 of the Railroad Revitalization and Regulatory Reform Act of 1976); and

(2) grants under section 4(1) for the planning, preservation and conversion of rail passenger terminals of historical or architectural significance.

(d) *Rail Passenger Service Act,* (1) grants to Amtrak under section 601.

PART VI

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

■

Site and Neighborhood Standards for Subsidized Newly-Constructed or Substantially-Rehabilitated Housing

Section 8 Housing Assistance Payment Program—New Construction and Substantial Rehabilitation

Notice of Proposed Rulemaking

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[24 CFR Part 200]

[Docket No. R–77–432]

SITE AND NEIGHBORHOOD STANDARDS FOR SUBSIDIZED NEWLY-CONSTRUCTED OR SUBSTANTIALLY-REHABILITATED HOUSING

Notice of Proposed Rule Making

The Department of Housing and Urban Development is proposing to establish uniform site and neighborhood standards for housing that is newly constructed, substantially rehabilitated, or purchased for use as low rent public housing, and for which HUD assistance is provided in the form of annual contributions, interest reduction payments, rent supplements, below market interest rate insured mortgages or loans, or housfng assistance payments.

The standards would replace 24 CFR Part 200. References are made to these standards in other regulations of the Department. See, *e.g.*, 24 CFR 886.203(a)(2). No change in the regulations governing the Section 202 program for elderly housing (Sec. 202 of the Housing Act of 1959, 12 U.S.C. 1701q) is required because those regulations require compliance with either 24 CFR 880.112 or 881.112. See 24 CFR 885.3.

The proposed regulations would provide uniform criteria for evaluating proposed locations for assisted housing with the aim of ensuring that housing opportunities for lower income and minority households are available in a wide range of locations. The Department has concluded that the best approach to this complex issue of site selection is to allow full and open public discussion by those affected by the proposed regulations before these standards are finalized. Accordingly, the Department presents these regulations not as the Department's conclusion as to the final form the standards should take, but as an option whose specificity will give form and substance to a discussion of the issues involved.

In order to assist the public in commenting on these regulations, this preamble will present a history of the site selection issue and a summary of the provisions of the proposed regulations so that public comments can respond to how these regulations may impact on individual projects or communities.

I. Background

One of the statutory responsibilities of the Department in administering its housing and community development programs is the furthering of fair housing goals (Sec. 808(d)(5) of Title VIII of the Civil Rights Act of 1968, 42 U.S.C. 3608(d)(5)), and the "reduction of the isolation of income groups within communities and geographical areas and the promotion of an increase in the diversity and vitality of neighborhoods through the spatial deconcentration of housing opportunities for persons of lower income." Sec. 101(c)(6), Housing and Community Development Act of 1974 (42 U.S.C. 5301(c)(6)).

Although federally assisted housing constitutes a relatively small portion of the nation's housing stock, it is an important source of housing opportunities for lower income and minority families. Thus, promoting the provision of assisted housing in a wide variety of locations is an essential element in the fair housing goal which finds expression throughout the Department's programmatic responsibilities, and which goes beyond assisted housing to include, for example, the enforcement of Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3604–3619); the Community Development Block Grant Program and the related review of local Housing Assistance Plans; and HUD's recently implemented program to provide supplemental allocations of housing assistance, comprehensive planning, and community development funds to areas which have developed housing allocation plans to increase the geographic choice of housing opportunities for lower income families throughout a metropolitan area. See 24 CFR Part 891.

The Department's experience has indicated the need for uniform site and neighborhood standards which clearly articulate the Department's policy of promoting fair housing through the development of assisted housing at locations which broaden the housing opportunities available to lower-income families. The lack of a simple set of uniform criteria applicable to all federally assisted housing programs, and the ambiguity of present requirements have resulted in inconsistent and uneven application of the current standards.

The development of such site and neighborhood standards for federally assisted housing is a difficult and complex task because of the need to balance a number of significant and competing social goals. The goal of dispersing assisted housing must be measured against the need to provide resources to rehabilitate the housing and to improve the quality and viability of the neighborhoods in which lower income families already live. In addition, federal intervention in locally determined land use or in locally devised community development strategies, through the imposition of site and neighborhood standards, may conflict with other statutory or Departmental policies which encourage increased discretion for local governmental officials. Finally, the location of assisted housing should be considered in relation to such concerns as racial imbalances in the public schools, neighborhood transition, and the availability of transportation and social services. These proposed regulations are being published for comment in order to focus discussion on such specific issues so that the Department may make a fully informed decision on a uniform set of standards.

II. History

Since the inception of Low Rent Public Housing in 1937, the earliest of the federally-assisted housing programs, standards of one type or another have been applied by HUD and its predecessor agency, the Public Housing Administration, to the selection of sites. However, those early standards did not reflect a concern for the impact of site selection on housing opportunities for minority families. By the mid-1960's, it became evident that much of the public housing available to minorities was being constructed in areas of minority concentration. Responding to this pattern, pursuant to authority conferred by Executive Order 11063 of 1962 (42 U.S.C. 1982 note), and the Civil Rights Act of 1964 (see particularly 42 U.S.C. 2000d), the Department added a site standard in 1967 which addressed the responsibility of local housing authorities to provide for a balanced distribution of public housing projects within the locality, in order to promote housing opportunities for minorities outside as well as inside "areas of racial concentration." Criterion 2g of Par. 205.1 of the Low-Rent Public Housing Manual.

In 1970, the Department undertook to modify its site selection system to reflect the requirements of Section 808 of Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3608) that the Secretary administer HUD programs "in a manner affirmatively to further the policies of this Title."

The development of these new site selection standards was hastened by the United States Court of Appeals decision in *Shannon* v. *HUD*, 436 F. 2d 809 (C.A. 3, 1970), which held that the Department "must utilize some institutionalized method whereby, in considering site selection or type selection, it has before it the relevant racial and socio-economic information necessary for compliance with its duties under the 1964 and 1968 Civil Rights Act." Observing that desegregation is not the only goal of the national housing policy, the Court left room for HUD to approve proposals which might add to racial concentration in "instances where a pressing case may be made for the rebuilding of a racial ghetto," so long as HUD carefully weighed the alternatives and made an informed judgment that "the need for physical rehabilitation or additional minority housing at the site in question clearly outweights the disadvantages of increasing or perpetuating racial concentration."

In January 1972, HUD published its revised Project Selection Criteria (24 CFR Part 200, Subpart N) which established a formal system for evaluating proposed sites for assisted housing. These new guidelines provided criteria for assessing sites for both public housing and FHA-insured assisted housing, primarily Section 236 (see 12 U.S.C. 1715z–1). Factors included not only the question of minority concentration, but also the overall need for the proposed housing project, the availability of community services, the undue concentration of subsidized units without regard to racial concentration, the environmental impact of the project, the availability of minority job opportunities, the capacity of the

sponsor and quality of the prospective management of the project.

The Project Selection Criteria were intended: (a) to expand existing site selection criteria to reflect the requirements of Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3604–3619), and to implement the President's related directive that "the administrator of a housing program should include, among the various criteria by which applications for assistance are judged the extent to which a proposed project, or the overall development plan of which it is a part, would, in fact, open up new housing opportunities that would contribute to decreasing the effects of past housing discrimination (June 11, 1971 statement of the President on Federal policies relating to equal housing opportunity, p. 12); (b) to give priority to projects which provided geographic dispersal, small size and low density, a special mix and good design and management; (c) to assist in the selection of public housing applications which best met this objective; (d) to enable HUD Field Offices to eliminate clearly unacceptable proposals prior to performing the detailed processing required by each program; and (e) to assure that those proposals which met the broad-based criteria reflecting the basic concerns of the Department were given a priority for funding.

The criteria prohibited locating a project in an area of minority concentration unless the project was necessary to meet an "over-riding need" for housing in the area, or "sufficient and comparable" opportunities for assisted housing existed outside the areas of minority concentration.

The 1972 Project Selection Criteria were not applicable to rehabilitation projects, Indian Reservation housing, Section 235 existing housing, public housing acquisition or leasing of fewer than 25 units, and new construction projects of fewer than five dwelling units.

Section 201(a) of the Housing and Community Development Act of 1974 (88 Stat. 653) created the Section 8 (Rental Subsidy) Housing Assistance Payments Program (see 42 U.S.C. 1437f), which is now the Department's primary housing assistance program. The 1974 Act states as statutory purposes the "reduction of the isolation of income groups within communities and geographical areas" and the "spatial deconcentration of housing opportunities for persons of lower incomes." Section 101(c)(6), (42 U.S.C. 5301(c)(6)). It also requires that a community, as a condition to receiving its Community Development Block Grant, prepare a housing assistance plan (HAP) which must identify the general locations of proposed housing for lower-income persons, with the objective of "promoting greater choice of housing opportunities and avoiding undue concentrations of assisted persons in areas containing a high proportion of low income persons". Section 104(a)(4)(C), 42 U.S.C. 5304(a)(4)(C).

The site and neighborhood standards established for the Section 8 New Construction and Substantial Rehabilitation programs (see 24 CFR 880.112 and 881.112 respectively) closely paralleled the standards established in 1972 for the public housing programs, including the 1974 revised standards for the Section 23 program, which was the predecessor to Section 8. The present Section 8 site selection regulations state:

> The site shall promote greater choice of housing opportunities and avoid undue concentration of assisted persons in areas containing a high proportion of low-income persons. 24 CFR 880.112(c) and 881.112(c).

This Section 8 standard repeats the statutory language (Sec. 104(a)(4)(C)(ii) of the HCD Act of 1974, 42 U.S.C. 5304(a)(4)(C)(ii) with respect to the objectives of the "general locations" requirement of the local Housing Assistance Plans. A related regulatory requirement imposed pursuant to the HCD Act (24 CFR 880.112(f) and 881.112(e)) requires that "the site * * * comply with any applicable conditions in the Local Housing Assistance Plan, approved by HUD."

The standard contained in the earlier Project Selection Criteria concerning areas of racial concentration was rephrased in the regulations for Section 8 New Construction to require that the site shall not be located in areas of minority concentration unless there are "sufficient, comparable opportunities existing for housing for minority families, * * * outside areas of minority concentration, or * * * the project is necessary to meet overriding housing needs." 24 CFR 880.112(c)(1). The Section 8 Substantial Rehabilitation regulations require only that the site be "suitable from the standpoint of facilitating and furthering compliance with * * * applicable" fair housing requirements. 24 CFR 881.112(b).

The regulations for the "Section 8 Housing Assistance Payments Program—Additional Assistance Program for Projects Insured or Formerly Insured by HUD", 24 CFR Part 886, published in the FEDERAL REGISTER on August 4, 1976 (41 FR 32686), incorporated only those site and neighborhood standards in § 881.112 which require assisted units to qualify as decent safe and sanitary housing, but not the provisions concerning minority concentrations. The same standard was applied to the program developed for "PHA Acquisition of HUD-Owned Properties and Properties with HUD-Insured and HUD-Held Mortgages" (24 CFR Part 845) published in the FEDERAL REGISTER as an Interim Rule on June 9, 1976. (41 FR 23292). The minority concentration criteria were not applied to these programs because they only provide additional assistance to existing lower income HUD-insured or HUD-subsidized projects.

Section 8 existing housing (24 CFR Part 882) is not subject to the present or proposed site-selection standards because that program is based on a shopping or "finders-keepers" principle under which families select the location of their own housing. Departmental regulations for the Traditional Public Housing Program (proposed Part 841 of 24 CFR) which were published for comment on November 18, 1976 at 41 FR 50947 provide that the 1972 Project Selection Criteria will continue to apply pending the establishment of new site and neighborhood standards.

III. Major Issues Posed by the Proposed Site and Neighborhood Standards

A. *Minority Concentrations.* One of the difficult issues which these proposed site-selection standards address is that of under what circumstances subsidized housing may be located in areas with substantial concentrations of racial minorities. The policy which these proposed standards are intended to serve is to ensure that people of all races have a variety of housing opportunities available to them. If comparable housing is available to minorities inside and outside an area of racial concentration, so that minority families have the option of living in either environment, then such a policy is satisfied. See § 200.704(d)(1)(ii). If the policy to be served were to mandate the broad geographic dispersal of minority families, as opposed to housing opportunities, more restrictive stndards would be necessary.

An "area of minority concentration" has been defined in the proposed regulations as an area in which more than 40 percent of the residents are minority citizens or one in which minorities make up a significantly greater proportion of the residents than is true of the locality as a whole. This provision prevents the location of additional assisted housing in an area which already houses a disproportionate share of the locality's minority residents even though the proportion of minority residents in the area does not exceed 40 percent. See § 200.704(a)(1).

The proposed regulation also contains an exception which will avoid imposing an unfair penalty on those localities which presently have a large percentage of minority residents. For example, § 200.704(d)(2) allows approval of a proposed site in an area of minority concentration if sites outside such areas cannot feasibly be made available for assisted housing. This provision, which may be criticized by some as a loophole, avoids the anomaly of barring any assisted housing in a community in which all available sites are in areas with greater than 40 percent minority populations.

Under the proposed regulations, a site is to be considered available if assisted housing would be an incompatible land use, or would frustrate other legitimate land-use or growth-management policies. § 200.704(d)(2). Thus, for example, a site would be unavailable if it were in the midst of a high traffic industrial area or where the physical infrastructure and public services in undeveloped open space or a single-family neighborhood could not accommodate high-density lower-income housing, without an unconscionably high public investment. The proposed regulation specifically provides that sites shall not be considered unavailable for low-income housing if their unavailability is the result of dis-

criminatory zoning or other discriminatory practices. § 200.704(d)(2). The question of what constitutes discriminatory zoning is an unsettled area of case law. The Department specifically requests comments on the types of justifications that could be adopted to assist in determining whether sites are unavailable for the purpose of this provision.

Moreover, areas of minority concentration may be particularly susceptible to neighborhood preservation or renewal programs of which assisted housing is an integral part. Accordingly, sites which are otherwise unacceptable may be approved under the specific conditions described in § 200.704(d)(3), if they are in an area which is the target of concentrated local neighborhood preservation or revitalization efforts. This exception would be invoked only where the community has sites available outside areas of minority concentration and its annual allocation of assisted housing for the relevant year is too small to provide the assisted housing needed to implement the preservation plan to be balanced by comparable housing outside areas of minority concentration. The relevant local government must fully support such an exemption and demonstrate its continuing commitment to the revitalization of the area.

Regardless of whether housing is subject to this preservation area exception, whenever it is to be constructed in an area of minority concentration, a positive finding must be made by HUD that the project will improve rather than impair the physical and social quality of the neighborhood. § 200.704(e).

B. *Racially Mixed Areas.* Racially mixed areas present an issue of particular sensitivity. Because the racial balance in a neighborhood is often very delicate, under these proposed regulations a project site should not be approved in such an area when it would cause a rapid and massive turnover of the residents in the surrounding neighborhood, with the physical decline and disinvestment that may attend such transitions. § 200.704(b). On the other hand, a rapid increase in the number of minority residents in an area is not per se to be avoided. There is no reason to avoid the proportion of minorities in a neighborhood quintupling from 3 to 15 percent, for example. Nor is an increase in the number of minorities in a neighborhood from 25 to 35 percent, because of the racial makeup of a project, necessarily to be avoided, if the project does not significantly and adversely affect the stability of the racially-integrated surrounding neighborhood.

Section 200.704(b) is intended only to reach the situation where the proposed project's likely effect on the surrounding neighborhood will be to cause precipitious racial transition that results in the neighborhood becoming an area of undue minority concentration. Thus, the regulation focuses only on those neighborhoods which, while not yet having a 40 percent minority population, do have, for example, a 30 percent minority population, or a trend of racial transition which will soon result in the neighborhood becoming an area of minority concentration.

A related provision, § 200.704(c), provides that a site in a racially-mixed area should not be approved where it would cause a significant and disproportionate share of the locality's minority students to be concentrated in one or more public schools serving the site. Because patterns of residential segregation and *de facto* school segregation are integrally related, the location of assisted housing should avoid exacerbating racial imbalances in public schools.

Again, however, this provision should not be misused to bar assisted housing and minority families from predominately non-minority neighborhoods. Its purpose is to avoid the location of assisted housing recreating a pattern of *de facto* school segregation, which a court or community has tried to remedy.

C. *Areas with a Concentration of Assisted Housing.* Site-selectiton criteria also must deal with the problem of areas with a significant concentration of lower-income families in federally assisted housing. The proposed standards seek to avoid concentrations of assisted housing which congregate large number of low-income families in particular neighborhoods, since such concentrations may lead to serious management problems in the assisted housing stock. Proposed project sites are to be approved in areas of concentrations of assisted housing only when a positive finding can be made that the project will improve, rather than impair the physical and social quality of the neighborhood. § 200.704(e).

Because of its unique characteristics and the needs of its occupants, however, elderly housing is exempted from the provision designed to avoid concentrations of assisted housing. § 200.704(a)(3)(ii). While concentrating large numbers of assisted low-income families can have serious social and economic repercussions, these problems have not arisen with regard to housing for the elderly. Elderly housing may presently be located in a single section of a city that is ideal for such housing and the presence of additional elderly housing may result in even better services and facilities being provided. Requiring a new elderly project to be located in another section of the locality, where there is not a concentration of elderly housing, could result in a significantly less satisfactory living environment.

D. *Standards for Rehabilitation.* Another basic question concerns whether to exempt or impose a different—presumably lesser—standard for substantial rehabilitation projects, as compared to new construction. The goals of rehabilitating blighted, abandoned or substandard dwellings in central city areas where low-income families live must be weighed against the goal of expanding housing opportunities outside of areas of minority or assisted-housing concentration. In these proposed regulations, the tension between balanced housing opportunities and neighborhood preservation is struck not through a distinction between rehabilitating or building a similar structure on the same site, but rather by the aforementioned local neighborhood preservation exemption to both minority concentration and assisted housing concentration requirements. § 200.704(d)(3).

E. *A healthy living environment.* Sites in areas both of minority concentration and with undue concentrations of assisted housing are not to be approved unless a determination is made that approval of the site will be likely to improve, rather than impair, the physical and social quality of the area. § 200.704(e). Thus, sites for assisted housing must be accessible to employment opportunities. § 200.710. The chance for gainful employment is as important to a lower-income family as is subsidized housing. The requirement that the proposed site be convenient to places of employment is to be applied less rigorously to elderly housing. Although employment opportunities may not be an important to the elderly, sites for elderly housing must be convenient to other supporting social services, such as basic comercial and medical facilities, because the elderly often do not have access to private automobile transportation and may even find dependence on public transportation for these necessities of life unduly burdensome.

F. *Federal and Local Government Roles.* The final tension inherent in the site selection issue is the role of Federal and local governments in balancing competing interests, and determining sites for assisted housing. While the Federal Government has an historic role in assuring the rights of minority and lower income families, local governments have been given an increasing role in determining the use of Federal funds within their jurisdictions. Local officials have the greatest capacity for assessing local needs, coordinating the impact of differing Federal programs on those needs, leveraging public and private resources, and responding to public concerns.

The regulations emphasize the critical role of local government in the decision-making process. Section 200.716 provides that a site must comply with any applicable conditions in the HUD-approved Local Housing Assistance Plan. Section 200.718 also requires that the views and recommendations of the Chief Executive Officer of the unit of general local government reviewing the site pursuant to Section 213 of the Housing and Community Development Act of 1974 (42 U.S.C. 1439) and 24 CFR Part 891 must be carefully considered in approving a site. The matters on which comments are requested from local Chief Executive Officers go considerably beyond the question of consistency with the HAP and include comments with respect to the standards proposed by these regulations. The proposed regulations also require that sites must be consistent with any applicable areawide housing opportunity plan or development plan for a new community.

G. *Miscellaneous Provisions.* Other new provisions in these regulations clarify that approval of a site as meeting these standards does not substitute for or imply HUD review and approval of the site as meeting HUD requirements with respect to the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347), other related statutes or Executive Orders, or the standards (e.g., those relating to marketability) applicable to the particular housing program.

Interested persons are invited to comment on the proposed revised site and neighborhood standards by submitting written data, views and arguments. Comunications should be identified by the above docket number and title and should be filed with the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410. All relevant material received on or before March 2, 1977 will be considered before adoption of the final rule. Copies of comments submitted will be available for public inspection during normal business hours at the above address.

A Finding of Inapplicability of the National Environmental Policy Act has been made. A copy of the Finding is available for public inspection in the Office of the Rules Docket Clerk during regular business hours at the address set forth above.

In addition, a Finding of Inapplicability of Inflation Impact Statement requirements has been made in accordance with relevant procedures. A copy of this Finding is available for inspection in the Office of the Rules Docket Clerk during regular business hours at the address set forth above.

Accordingly, it is proposed that Chapter II of 24 CFR be amended as follows:

1. Subpart N is revised to read:

Subpart N—Site and Neighborhood Standards for Subsidized Housing

Sec.

200.700 Site and neighborhood standards.
200.702 Requirements as to size, terrain and utilities.
200.704 Equal housing opportunity requirements.
200.706 Environmental requirements.
200.708 Accessibility to community facilities.
200.710 Accessibility to employment opportunities.
200.712 Compliance with relocation requirements.
200.714 Sites in flood zones.
200.716 Consistency with plans.
200.718 Local government comment.
200.720 Other site related reviews.

Subpart N—Site and Neighborhood Standards for Subsidized Housing

AUTHORITY: Sec. 7(d), Department of HUD Act (42 U.S.C. 3535(d)); sec. 5(b) and 8 U.S. Housing Act of 1937 (42 U.S.C. 1437c(b) and 1437f).

§ 200.700 Site and neighborhood standards.

Proposed sites for new construction and substantial rehabilitation projects, and projects acquired for use as low rent public housing without rehabilitation, must be approved by HUD as meeting the standards set forth in this Subpart.

§ 200.702 Requirements as to size, terrain and utilities.

(a) The site must be adequate in size, exposure and contour to accommodate the number and type of units proposed; and adequate utilities (water, sewer, gas and electricity) and adequate paved streets shall be available to service the site.

§ 200.704 Equal housing opportunity requirements.

The site and neighborhood must be suitable from the standpoint of facilitating and furthering full compliance with the applicable provisions of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d *et. seq.*), Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3604–3619), Executive Order 11063 (42 U.S.C. 1982 note), the Housing and Community Development Act of 1974 (see particularly 42 U.S.C. 5301–5320), and HUD regulations issued pursuant thereto.

(a) *Determination of minority concentration or racial mixture.* In furtherance of the objectives of the statutes and the Executive Order enumerated in this section, HUD shall determine:

(1) *Whether the site is in an area of minority concentration.* In making such determination, the area to be considered shall be the census tract in which the site is located or such other area for which reliable data as to racial composition is available and which HUD determines, on the basis of functional considerations (i.e., location of neighborhood facilities such as schools, shopping centers, churches, etc.) to be more appropriate. An area shall be determined to be an area of minority concentration if minority residents constitute (i) more than 40 percent of the residents of the area or (ii) a significantly greater proportion of the residents of the area than the proportion of minority residents of the locality as a whole.

(2) *Whether the site is in a racially mixed area.* An area, as determined pursuant to paragraph (a)(1) of this section shall be determined to be a racially mixed area if it contains both minority and non-minority residents and minority residents constitute a significant percent but less than 40 percent of the total residents of the area.

(3) *Whether a site is in an area of undue concentration of federally-assisted housing.* The area, as determined pursuant to paragraph (a)(1), of this section shall be determined to be an area of undue concentration of federally-assisted housing if a substantial number of the housing units in the area (generally over 40 percent) consist of housing (i) constructed, rehabilitated or purchased, leased (exclusive of units leased under the Section 8 Existing Housing Program (24 CFR Part 882) under the U.S. Housing Act of 1937 (42 U.S.C. 1437f)), Sections 221(d)(3) BMIR, 235, or 236 of the National Housing Act (12 U.S.C. 1715L(d)(3), 1715z and 1715z–1), Section 101 of the Housing and Urban Development Act of 1965, (12 U.S.C. 1701s), or Section 515 of the Housing Act of 1949 (42 U.S.C. 1485) and (ii) intended for occupancy by other than elderly households.

(b) *Unacceptability if ratio of minority residents would be increased significantly.* A site in a racially mixed area shall not be approved if the proposed project would result in a significant and rapid increase in the proportion of minority to non-minority residents in the area causing it to become an area of minority concentration in which minority residents would constitute more than 40 percent of the residents of the area.

(c) *Unacceptability due to disproportionate concentration of minority students in public schools.* A site in a racially mixed area or area of minority concentration shall not be approved if the proposed project would distort a voluntary or court-imposed plan adopted by the school system or locality to assure equality of educational opportunity in its public schools, by causing a significant and disproportionate concentration of the locality's minority students in one or more of the public schools serving the site.

(d) *Approval of site in an area of minority concentration.* A site located in an area of minority concentration may be approved if one of the following determinations is made:

(1) *Sufficient and comparable opportunities for assisted housing are available outside areas of minority concentration.*

(i) Housing in the jurisdiction of the unit of general local government (or such wider area as may be covered by an areawide housing opportunity plan) constructed or rehabilitated under one or more of the statutory provisions cited in paragraph (a)(3) of this section is located in areas which are not areas of minority concentration. Such housing must be comparable in tenure (owner, renter), size (bedroom distribution), and number of assisted units to the tenure, size and number of assisted units located in areas of minority concentration; and must have units presently available or scheduled to be available within a waiting period of not more than twelve months in a number and type approximating the number and types of units proposed to be constructed or rehabilitated at the site in question;

(ii) Housing to be constructed or rehabilitated under the statutory provisions cited in paragraph (a)(3) of this section has been approved for development (e.g., fund reservation) within the jurisdiction of the unit of general local government (or such wider area as may be covered by an areawide housing opportunity plan) in areas which are not areas of minority concentration. The proposed tenure, size and number of such units must approximate the proposed tenure, size and number of units to be constructed or rehabilitated at the site in question and must be scheduled to be available for occupancy within twelve months of the anticipated completion of the proposed project; or

(2) *There are no sites which are available or which feasibly can be made available for housing constructed or rehabili-*

tated under the statutory provisions cited in Par. (a)(3) *within the jurisdiction of the unit of general local government in areas which are not areas of minority concentration.* Zoning and other land use controls intended to avoid incompatible land uses or to prevent unwarranted development of land before supporting facilities are available or to implement similar legitimate land-use policies are acceptable reasons for the unavailability of sites. However, sites shall not be considered unavailable if their unavailability is the result of discriminatory zoning or other discriminatory practices.

(3) *The site is an integral part of an overall local strategy for the preservation or revitalization of the immediate neighborhood.* This exception is applicable only when the overall level of housing assistance available to the locality makes impractical satisfaction in the same fiscal year of both the requirements of paragraph (d)(1)(ii) of this section and the local government's preservation program. In seeking this exemption, a unit of general local government must explain its overall preservation strategy; describe the concentrated efforts and expenditure of funds being undertaken to improve the neighborhood; demonstrate its continuing commitment to the renewal, revitalization or preservation of the area through such activities as urban renewal, the federal urban homesteading demonstration program, concentrated expenditures of community development block grant funds, or similarly focused neighborhood improvement programs; and indicate how its program is likely to achieve long-term economic viability and increased racial or economic integration for the neighborhood in which the site is located.

(e) *Approval of site likely to improve quality of area.* A site in an area of minority concentration or in an area of undue concentration of housing constructed or rehabilitated under the statutory provisions cited in paragraph (a)(3) of this section shal not be approved unless HUD determines that the approval of the site will be likely to improve rather than impair the physical and social quality of the area in which the site is located.

§ 200.706 Environmental requirements.

The site must be free from adverse environmental conditions, natural or manmade, such as instability, septic tank failures, sewage hazards, earthquake faults, mudslides, harmful air pollution, smoke or dust, excessive noise or vibration, heavy vehicular or aircraft traffic, rodent or vermin infestation, or fire or explosion hazards, or such conditions must be eliminated, substantially mitigated or corrected by the completion date of the project. The neighborhood must not be one which is seriously detrimental to the health or well being of the project residents or in which other undesirable elements predominate, such as dangerously high crime rate, unless there is actively in progress a concerted program to remedy these problems.

§ 200.708 Accessibility to community facilities.

The housing must be accessible to social, recreational, educational, commercial and health facilities and services that are at least equivalent to those typically found in neighborhoods consisting largely of unsubsidized standard housing of similar market rents. Housing for the elderly must be accessible to public or similar transportation facilities, other than dependence on the private automobile ownership of project residents, and also must be reasonably accessible to basic commercial and medical services.

§ 200.710 Accessibility to employment opportunities.

Travel time and cost via public transportation or private automobile, from the neighborhood to places of employment providing a range of jobs for lower-income workers, must not be excessive. While elderly housing should not be isolated from employment opportunities, application of this standard to a proposed site or project intended for occupancy by elderly persons shall take into account the more limited employment opportunity needs of elderly persons.

§ 200.712 Compliance with relocation requirements.

The project may not be built or rehabilitated on a site which has occupants unless applicable relocation requirements are met.

§ 200.714 Sites in flood zones.

The project may not be built or rehabilitated in an area that has been identified by HUD as having special flood hazards and in which the sale of flood insurance has been made available under the National Flood Insurance Act of 1968 (42 U.S.C. 4001–4027) unless the project is covered by flood insurance as required by the Flood Disaster Protection Act of 1973 (42 U.S.C. 4101–4128), and it meets any relevant HUD standards and local requirements.

§ 200.716 Consistency with plans.

The site shall comply with any applicable conditions in the Local Housing Assistance Plan approved by HUD, any applicable areawide housing allocation plan and/or any applicable Development Plan for a new community approved under Title VII of the HUD Act of 1970 (42 U.S.C. 4501–4532) or Title IV of the HUD Act of 1968 (42 U.S.C. 3901–3914). Where the unit of general local government is a participating jurisdiction in an areawide housing opportunity plan pursuant to 24 CFR 886.301, the site shall be consistent with the plan.

§ 200.718 Local government comment.

Approval of a site as meeting the requirements of this Subpart shall take into account the views of the Chief Executive Officer of the unit of general local government in connection with its review of the project pursuant to Section 213 of the Housing and Community Development Act of 1974 (42 U.S.C. 1439) and 24 CFR Part 891. The views and recommendations of the Chief Executive Officer of the unit of general local government in whose jurisdiction the site is located, together with any factual evidence he submits in support of his recommendations, shall be carefully considered in making the determinations required under §§ 200.704 and 200.716.

§ 200.720 Other site related reviews.

Approval by HUD of a site as meeting the standards set forth in this Subpart shall not substitute for or imply HUD review and approval of the site as meeting HUD requirements with respect to the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347), The National Historic Preservation Act of 1966 (16 U.S.C. 470–470n), other related statutes or Executive Orders, or the applicable housing program under which the proposed project is to be constructed or rehabilitated.

Issued at Washington, D.C. January 12. 1977.

CARLA A. HILLS,
Secretary of Housing and Urban Development.

[24 CFR Parts 880 and 881]

[Docket No. R-77-437]

SECTION 8 HOUSING ASSISTANCE PAYMENT PROGRAM

New Construction and Substantial Rehabilitation

PROPOSED RULE MAKING

Concurrently with the publication of this Notice of Proposed Rulemaking, the Department is proposing to amend Chapter II Part 200 Subpart N of this Title by revising Site and Neighborhood Standards for subsidized housing. As explained in the preamble to that proposed revision the new Site and Neighborhood Standards are intended to provide uniform criteria for evaluating proposed assisted housing locations with the aim of insuring that housing opportunities for lower income and minority house holders are available in a wide range of locations. These proposed amendments of Parts 880 and 881 are intended to accomplish the same uniformity of standards for the Section 8 New Construction and Substantial Rehabilitation Programs as is contemplated for subsidized housing under the proposed revision of Part 200.

The major issues posed by Site and Neighborhood Standards, e.g., minority concentrations, racially mixed areas, areas with a concentration of assisted housing, standards for rehabilitation, healthy living environment, and roles of Federal and local government are each discussed extensively in the preamble to the proposed amendment to Part 200.

Interested persons are invited to comment on these proposed revised Site and Neighborhood Standards by submitting written data, views and arguments. Communications should be identified by the above docket number and title and should be filed with the Rules Docket Clerk, Office of the Secretary, Room 10141, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410. All relevant material received on or before March 2, 1977, will be considered before adoption of the final rule. Copies of comments submitted will be available for public inspection during normal business hours at the above address.

Accordingly, it is proposed: 1. to amend Part 880 by substituting the following table of contents and by revising the Part to read as set forth hereinafter:

Sec.

880.112 Site and neighborhood standards.
880.112a Requirements as to size, terrain and utilities.
880.112b Equal housing opportunity requirements.
880.112c Environmental requirements.
880.112d Accessibility to community facilities.
880.112e Accessibility to employment opportunities.
880.112f Compliance with relocation requirements.
880.112g Sites in flood zones.
880.112h Consistency with plans.
880.112i Local government comment.
880.112j Other site related reviews.

AUTHORITY: Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

§ 880.112 Site and neighborhood standards.

Sites proposed for use for housing pursuant to this Part must be approved by HUD as meeting the standards set forth in §§ 880.112 through 880.112j. Reference in any other Part to § 880.112 of this Part shall include reference to §§ 880.112 through 880.112j of this Part.

§ 880.112a Requirements as to size, terrain and utilities.

The site must be adequate in size, exposure and contour to accommodate the number and type of units proposed; and adequate utilities (water, sewer, gas, and electricity) and adequate paved streets shall be available to service the site.

§ 880.112b Equal housing opportunity requirements.

The site and neighborhood must be suitable from the standpoint of facilitating and furthering full compliance with the applicable provisions of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.), Title VIII of the Civil Rights Acts of 1968 (42 U.S.C. 3604–3619), Executive Order 11063 (42 U.S.C. 1982 note). The Housing and Community Development Act of 1974 (see particularly 42 U.S.C. 5301–5309), and HUD regulations issued pursuant thereto.

(a) *Determination of minority concentration or racial mixture.* In furtherance of the objectives of the foregoing statutes and Executive Order HUD shall determine:

(1) *Whether the site is in an area of minority concentration.* In making such determination, the area to be considered shall be the census tract in which the site is located or such other area for which reliable data as to racial composition is available and which HUD determines, on the basis of functional considerations (i.e., location of neighborhood facilities such as schools, shopping centers, churches, etc.) to be more appropriate. An area shall be determined to be an area of minority concentration if minority residents constitute (i) more than 40 percent of the residents of the area or (ii) a significantly greater proportion of the residents of the area than the proportion of minority residents of the locality as a whole.

(2) *Whether the site is in a racially mixed area.* An area, as determined pursuant to paragraph (a)(1) of this section, shall be determined to be a racially mixed area if it contains both minority and non-minority residents and minority residents constitute a significant percent but less than 40 percent of the total residents of the area.

(3) *Whether the site is in an area of undue concentration of federally-assisted housing.* The area, as determined pursuant to paragraph (a)(1) of this section, shall be determined to be an area of undue concentration of federally-assisted housing if a substantial number of the housing units in the area (generally over 40 percent) consist of housing (i) constructed, rehabilitated, purchased or leased (inclusive of units leased under the Section 8 Existing Housing Program (24 CFR Part 882)) under the U.S. Housing Act of 1937 (42 U.S.C. 1437f), Sections 221(d)(3) BMIR, 235 or 236 of the National Housing Act (12 U.S.C. 1715L (d)(3), 1715z and 1715z-1), Section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s), or Section 515 of the Housing Act of 1949 (42 U.S.C. 1485) and (ii) intended for occupancy by other than elderly households.

(b) *Unacceptability if ratio of minority residents would be increased significantly.* A site in a racially mixed area shall not be approved if the proposed project would result in a significant and rapid increase in the proportion of minority to non-minority residents in the area causing it to become an area of minority concentration in which minority residents would constitute more than 40 percent of the residents of the area.

(c) *Unacceptability due to disproportionate concentration of minority students in public schools.* A site in a racially mixed area or area of minority concentration shall not be approved if the proposed project would distort a voluntary or court-imposed plan adopted by the school system or locality to assure equality of educational opportunity in its public schools, by causing a significant and disproportionate concentration of the locality's minority students in one or more of the public schools serving the site.

(d) *Approval of site in an area of minority concentration.* A site located in an area of minority concentration may be approved if one of the following determinations is made.

(1) *Sufficient and comparable opportunities for assisted housing are available outside areas of minority concentration.*

(i) Housing in the jurisdiction of the unit of general local government (or such wider area as may be covered by an areawide housing opportunity plan) constructed under one or more of the statutory authorities cited in paragraph (a)(3) of this section, is located in areas which are not areas of minority concentration. Such housing must be comparable in tenure (owner, renter), size (bedroom distribution), and number of assisted units to the tenure, size and number of assisted units located in areas of minority concentration; and must have units presently available or scheduled to be available within a waiting period of not more than twelve months in a number and type approximating the number and type of units proposed to be constructed at the site in question:

(ii) Housing to be constructed or rehabilitated under any of the statutory provisions cited in paragraph (a)(3) of this section has been approved for development (e.g., fund reservation) within the jurisdiction of the unit of general local government (or such wider area as may be covered by an areawide housing opportunity plan) in areas which are not areas of minority concentration. The proposed tenure, size and number of such units must approximate the proposed tenure, size and number of units to be constructed at the site in question and must be scheduled to be available for occupancy within twelve months of the anticipated completion of the proposed project; or

(2) *There are no sites which are available or which feasibly can be made available for housing constructed pursuant to this Part within the jurisdiction of the unit of general local government in areas which are not areas of minority concentration.* Zoning and other land use controls intended to avoid incompatible land uses to prevent unwarranted development of land before supporting facilities are available or to implement similar legitimate land-use policies are acceptable reasons for the unavailability of sites. However, sites shall not be considered unavailable if their unavailability is the result of discriminatory zoning or other discriminatory practices; or

(3) *The site is an integral part of an overall local strategy for the preservation or revitalization of the immediate neighborhood.* This exception is applicable only when the overall level of housing assistance available to the locality makes impractical satisfaction of the requirements of paragraph (d)(1)(ii) of this section and the local government's preservation program. In seeking this exemption, a unit of general local government must explain its overall preservation strategy; describe the concentrated efforts and expenditure of funds being undertaken to improve the neighborhood; demonstrate its continuing commitment to the renewal, revitalization or preservation of the area through such activities as urban renewal, the federal urban homesteading program, con-

centrated expenditures of community development block grant funds, or similarly focused neighborhood improvement programs; and indicate how its program is likely to achieve long-term economic viability and increased racial or economic integration for the neighborhood in which the site is located.

(e) *Approval of site is likely to improve quality of area.* A site in an area of minority concentration or in an area of undue concentration of housing constructed or rehabilitated under the statutory provisions cited in paragraph (a)(3) of this section shall not be approved unless HUD determines that the approval of the site will be likely to improve rather than impair the physical and social quality of the area in which the site is located.

§ 880.112c Environmental requirements.

The site must be free from adverse environmental conditions, natural or man-made, such as instability, septic tank failures, sewage hazards, earthquake faults, mudslides, harmful air pollution, smoke or dust, excessive noise or vibration, heavy vehicular or aircraft traffic, rodent or vermin infestation, or fire or explosion hazards, or such conditions must be eliminated, substantially mitigated or corrected by the completion date of the project. The neighborhood must not be one which is seriously detrimental to the health or well being of the project residents or in which other undesirable elements predominate, such as a dangerously high crime rate, unless there is actively in progress a concerted program to remedy these poblems.

§ 880.112d Accessibility to community facilities.

The housing must be accessible to social, recreational, educational, commercial and health facilities and service that are at least equivalent to those typically found in neighborhoods consisting largely of unsubsidized standard housing or similar market rents. Housing for the elderly must be accessible to public or similar transportation facilities, other than dependence on the private automobile ownership of project residents, and also must be reasonably accessible to basic commercial and medical services.

§ 880.112e Accessibility to employment opportunities.

Travel time and cost via public transportation or private automobile, from the neighborhood to places of employment providing a range of jobs for lower-income workers, must not be excessive. While elderly housing should not be isolated from employment opportunities, application of this standard to a proposed site for elderly persons shall take into acount the more limited employment opportunity needs of elderly persons.

§ 880.112f Compliance with relocation requirements.

The project may not be built on a site which has occupants unless applicable relocation requirements are met.

§ 880.112g Sites in flood zones.

The project may not be built in an area that has been identified by HUD as having special flood hazards and in which the sale of flood insurance has been made available under the National Flood Insurance Act of 1968 (42 U.S.C. 4001–4027) unless the project is covered by flood insurance as required by the Flood Disaster Protection Act of 1973 (42 U.S.C. 4101–4128) and it meets any relevant HUD standards and local requirements.

§ 880.112h Consistency with plans.

The site shall comply with any applicable conditions in the Local Housing Assistance Plan approved by HUD, any applicable areawide housing allocation plan and/or any applicable Development Plan for a new community approved under Title VII of the Housing and Urban Development Act of 1970 (42 U.S.C. 4501–4532), or Title IV of the Housing and Urban Development Act of 1968 (42 U.S.C. 3901–3914). Where the unit of general local government is a participating jurisdiction in an areawide housing opportunity plan pursuant to 24 CFR 886.301, the site shall be consistent with the plan.

§ 880.112i Local government comment.

Approval of a site as meeting the requirements of §§ 880.112 through 880.112j shall take into account the views of the Chief Executive Officer of the unit of general local government in connection with its review of the project pursuant to section 213 of the Housing and Community Development Act of 1974 (42 U.S.C. 1439) and 24 CFR Part 891. The views and recommendations of the Chief Executive Officer of the unit of general local government in whose jurisdiction the site is located, together with any factual evidence he submits in support of his recommendations, shall be carefully considered in making the determination required under §§ 880.112b and 880.112h.

§ 880.112j Other site related reviews.

Approval by HUD of a site as meeting the standards set forth in §§ 880.112 through 880.112i shall not substitute for or imply HUD review and approval of the site as meeting requirements with respect to the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347), the National Historic Preservation Act of 1966 (16 U.S.C. 470–470n), or other related statutes or Executive Orders, or other requirements of this Part.

2. To amend Part 881 by substituting the following table of contents and by revising the Part to read as set forth hereinafter:

Sec.
881.112 Site and neighborhood standards.
881.112a Requirements as to size, terrain and utilities.
881.112b Equal housing opportunity requirements.
881.112c Environmental requirements.
881.112d Accessibility to community facilities.
881.112e Accessibility to employment opportunities.
881.112f Compliance with relocation requirements.
881.112g Sites in flood zones.
881.112h Consistency with plans.
881.112i Local government comment.
881.112j Other site related reviews.

AUTHORITY: (Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d)).

§ 881.112 Site and neighborhood standards.

Sites proposed for use for housing pursuant to this Part must be approved by HUD as meeting the standards set forth in any other Part to § 881.112 of this Part shall include reference to §§ 880.112 through 880.112j of this chapter.

§ 881.112a Requirements as to size, terrain and utilities.

The site must be adequate in size, exposure and contour to accommodate the number and type of units proposed; and adequate utilities (water, sewer, gas, and electricity) and adequate paved streets shall be available to service the site.

§ 881.112b Equal housing opportunity requirements.

The site and neighborhood must be suitable from the standpoint of facilitating and furthering full compliance with the applicable provisions of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d *et seq.*), Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3604–3619), Executive Order 11063 (42 U.S.C. 1982 note), The Housing and Community Development Act of 1974 (see particularly 42 U.S.C. 5301–5309), and HUD regulations issued pursuant thereto.

(a) *Determination of minority concentration.* In furtherance of the objectives of the foregoing statutes and Executive Order HUD shall determine:

(1) *Whether the site is in an area of minority concentration.* In making such determination, the area to be considered shall be the census tract in which the site is located or such other area for which reliable data as to racial composition is available and which HUD determines, on the basis of functional considerations (i.e., location of neighborhood facilities such as schools, shopping centers, churches, etc.) to be more appropriate. An area shall be determined to be an area of minority concentration if minority residents constitute (i) more than 40 percent of the residents of the area or (ii) a significantly greater proportion of the residents of the area than the proportion of minority residents of the locality as a whole.

(2) *Whether the site is in a racially mixed area.* An area, as determined pursuant to paragraph (a)(1) of this section, shall be determined to be a racially mixed area if it contains both minority and non-minority residents and minority residents constitute a significant percent but less than 40 percent of the total residents of the area.

(3) *Whether the site is in an area of undue concentration of federally-assisted housing.* The area, as determined pursuant to paragraph (a)(1) of this section, shall be determined to be an area of undue concentration of federally-assisted housing if a substantial number of the housing units in the area (generally over 40 percent) consist of housing (i) constructed, rehabilitated, purchased, or leased (inclusive of units leased under the Section 8 Existing Housing Program (24 CFR Part 882)) under the U.S. Housing Act of 1937 (42 U.S.C. 1437f), Sections 221(d)(3) BMIR, 235 or 236 of the National Housing Act (12 U.S.C. 1715L(d)(3), 1715z and 1715z–1), Section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s), or section 515 of the Housing Act of 1949 (42 U.S.C. 1485) and (ii) intended for occupancy by other than elderly households.

(b) *Unacceptability if ratio of minority residents would be increased significantly.* A site in a racially mixed area shall not be approved if the proposed project would result in a significant and rapid increase in the proportion of minority to non-minority residents in the area causing it to become an area of minority concentration in which minority residents would constitute more than 40 percent of the residents of the area.

(c) *Unacceptability due to disproportionate concentration of minority students in public schools.* A site in a racially mixed area or area of minority concentration shall not be approved if the proposed project would distort a voluntary or court-imposed plan adopted by the school system or locality to assure equality of educational opportunity in the public schools, by causing a significant and disproportionate concentration of the locality's minority students in one or more of the public schools serving the site.

(d) *Approval of site in an area of minority concentration.* A site located in an area of minority concentration shall not be approved unless one of the following determinations is made.

(1) *Sufficient and comparable opportunities for assisted housing are available outside area of minority concentration.* (i) Housing in the jurisdiction of the unit of general local government (or such wider area as may be covered by an areawide housing opportunity plan), or rehabilitated under one or more of the statutory authorities cited in paragraph (a)(3) of this section, is located in areas which are not areas of minority concentration. Such housing must be comparable to tenure (owner, renter), size (bedroom distribution), and number of assisted units to the tenure, size and number of assisted units located in areas of minority concentration; and must have units presently available or scheduled to be available within a waiting period of not more than twelve months in a number and type approximating the number and type of units proposed to be rehabilitated at the site in question.

(ii) Housing to be constructed or rehabilitated under any of the statutory provisions cited in paragraph (a)(3) of this section has been approved for development (e.g., fund reservation) within the jurisdiction of the unit of general local government (or such wider area as may be covered by an areawide housing opportunity plan) in areas which are not areas of minority concentration. The proposed tenure, size and number of such units must approximate the proposed tenure, size and number of units to be rehabilitated at the site in question and must be scheduled to be available for occupancy within twelve months of the anticipated completion of the proposed project; or

(2) *There are no sites which are available or which feasibly can be made available for housing rehabilitated pursuant to this Part within the jurisdiction of the unit of general local government in areas which are not areas of minority concentration.* Zoning and other land use controls intended to avoid incompatible land uses or to prevent unwarranted development of the land before supporting facilities are available or to implement similar legitimate land-use policies are acceptable reasons for the unavailability of sites. However, sites shall not be considered unavailable if their unavailability is the result of discriminatory zoning or other discriminatory practices; or

(3) *The site is an integral part of an overall local strategy for the preservation of revitalization of the immediate neighborhood.* This exception is applicably only when the overall level of housing assistance available to the locality makes impractical satisfaction of the requirements of paragraph (d)(1)(ii) of this section and the local government's preservation program. In seeking this exemption, a unit of general local government must explain its overall preservation strategy; describe the concentrated efforts and expenditure of funds being undertaken to improve the neighborhood; demonstrate its continuing commitment to the renewal, revitalization or preservation of the area through such activities as urban renewal, the federal urban homesteading program, concentrated expenditures of community development block grant funds, or similarly focused neighborhood improvement programs; and indicate how its program is likely to achieve long-term economic viability and increased racial or economic integration for the neighborhood in which the site is located.

(e) *Approval of site is likely to improve quality of area.* A site in an area of minority concentration or in an area of undue concentration of housing constructed or rehabilitated under the statutory provisions cited in Par. (a)(3) shall not be approved unless HUD determines that the approval of the site will be likely to improve rather than impair the physical and social quality of the area in which the site is located.

§ 881.112c Environmental requirements.

The site must be free from adverse environmental conditions, natural or man-made, such as instability, septic tank failures, sewage hazards, earthquake faults, mudslides, harmful air pollution, smoke or dust, excessive noise or vibration, heavy vehicular or aircraft traffic, rodent or vermin infestation, or fire or explosion hazards, or such conditions must be eliminated, substantially mitigated or corrected by the completion date of the project. The neighborhood must not be one which is seriously detrimental to the health or well being of the project residents or in which other undesirable elements predominate, such as a dangerously high crime rate, unless there is actively in progress a concerted program to remedy these problems.

§ 881.112d Accessibility to community facilities.

The housing must be accessible to social recreational educational, commercial and health facilities and services that are at least equivalent to those typically found in neighborhoods consisting largely of unsubsidized standard housing or similar market rents. Housing for the elderly must be accessible to public or similar transportation facilities, other than dependence on the private automobile ownership of project residents, and also must be reasonably accessible to basic commercial and medical services.

§ 881.112e Accessibility to employment opportunities.

Travel time and cost via public transportation or private automobile, from the neighborhood to places of employment providing a range of jobs for lower-income workers, must not be excessive. While elderly housing should not be isolated from employment opportunities, application of this standard to a proposed site for elderly persons shall take into account the more limited employment opportunity needs of elderly persons.

§ 881.112f Compliance with relocation requirements.

The project may not be rehabilitated on a site which has occupants unless applicable relocation requirements are met.

§ 881.112g Sites in flood zones.

The project to be rehabilitated may not be located in an area that has been identified by HUD as having special flood hazards and in which the sale of flood insurance has been made available under the National Flood Insurance Act of 1968 (42 U.S.C. 4001–4027) unless the project is covered by flood insurance as required by the Flood Disaster Protection Act of 1973 (42 U.S.C. 4101–4128) and it meets any relevant HUD standards and local requirements.

§ 881.112h Consistency with plans.

The site shall comply with any applicable conditions in the Local Housing Assistance Plan approved by HUD, any applicable areawide housing allocation plan and/or any applicable Development Plan for a new community approved under Title VII of the Housing and Urban Development Act of 1970 (42 U.S.C. 4501–4532), or Title IV of the Housing and Urban Development Act of 1968 (42 U.S.C. 3901–3914). Where the unit of general local government is a participating jurisdiction in an areawide housing oppor-

tunity plan, pursuant to 24 CFR 886.301, the site shall be consistent with the plan.

§ 881.112i Local government comment.

Approval of a site as meeting the requirements of §§ 880.112 through 880.112j shall take into account the views of the Chief Executive Officer of the unit of general local government in connection with its review of the project pursuant to Section 213 of the Housing and Community Development Act of 1974 (42 U.S.C. 1439) and 24 CFR Part 891. The views and recommendations of the Chief Executive Officer of the unit of general local government in whose jurisdiction the site is located, together with any factual evidence he submits in support of his recommendations, shall be carefully considered in making the determinations required under §§ 880.112b and 880.112h.

§ 881.112j Other site related reviews.

Approval by HUD of a site as meeting the standards set forth in §§ 880.112 through 880.112i shall not substitute for or imply HUD review and approval of the site as meeting requirements with respect to the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347), the National Historic Preservation Act of 1966 (16 U.S.C. 470–470n), or other related statutes or Executive Orders, or other requirements of this Part.

(Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535 (d)).

Issued at Washington, D.C. January 12, 1977.

CARLA A. HILLS,
Secretary of Housing and Urban Development.

Title 3—The President

PROCLAMATION 4481

American Heart Month, 1977

By the President of the United States of America

A Proclamation

For over three decades, diseases of the heart and blood vessels have constituted one of our Nation's most serious health problems. Cardiovascular diseases affect more than 29 million Americans, especially among the elderly, and are the direct cause of more than half of all deaths occurring each year in the United States. While their economic toll in terms of lost wages, productivity, and cost of medical care can be estimated at nearly $44 billion annually, the toll in terms of human suffering can never be measured.

America's continuing determination to meet any challenge to the well-being of its people is illustrated by the dedication that has characterized its efforts to control these disorders. Sustained research and clinical advances since 1950 have contributed substantially to declining mortality rates for stroke, rheumatic fever, coronary and congenital heart disease, and hypertension. Our investment in research, public and professional education, and community service activities has been rewarded. In that same time, the mortality rate in the United States from all heart and blood vessel diseases has declined by 30 percent. In 1975, deaths in this country from major cardiovascular diseases dropped below one million for the first time since 1967.

This multi-faceted assault on heart and blood vessel diseases has been led by the National Heart, Lung, and Blood Institute, a federal agency, and by the American Heart Association, a private health organization funded through contributions from citizens across the country. Their successful efforts illustrate what can be achieved when public and private institutions—and the American people as well—join forces against a common threat.

In recognition of the necessity for constant vigilance against the ravages of cardiovascular disease, and to encourage still greater efforts to combat its threat to the Nation's health, the Congress, by joint resolution approved December 30, 1963 (77 Stat. 843; 36 U.S.C. 169b) has requested the President to issue annually a proclamation designating February as American Heart Month.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby proclaim the month of February, 1977, as American Heart Month. I invite the Governors of the States, the Commonwealth of Puerto Rico, the officials of other areas subject to the jurisdiction of the United States, and the American people, to join with me in reaffirming our commitment to resolving the nationwide problem of cardiovascular disease.

IN WITNESS WHEREOF, I have hereunto set my hand this nineteenth day of January, in the year of our Lord nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and first.

Gerald R. Ford

Proclamation 4482 • January 19, 1977

Import Limitation on Dried Milk Mixtures

By the President of the United States of America

A Proclamation

Import quota limitations have been imposed on certain dairy products, including dried milk, pursuant to the provisions of Section 22 of the Agricultural Adjustment Act, as amended (7 U.S.C. 624). Those limitations are set forth in Part 3 of the Appendix to the Tariff Schedules of the United States, which schedules are hereinafter referred to as TSUS, under items 950.01, 950.02, and 950.03, and relate to products classified for tariff purposes under items 115.45, 115.50, 115.55, 115.60, and 118.05 of Schedule 1 of the TSUS.

The Secretary of Agriculture advised me that he had reason to believe that dried milk, containing not over 5.5 percent butterfat by weight, mixed with other ingredients (hereinafter referred to as dried milk mixtures) and thus classified for tariff purposes under items of the TSUS other than the items referenced above, are being, or are practically certain to be, imported under such conditions and in such quantities as to render or tend to render ineffective, or materially interfere with, the price support program now conducted by the Department of Agriculture for milk, or to reduce substantially the amount of products processed in the United States from domestic milk.

The Secretary of Agriculture also recommended that there be an increase in the monetary limitation in headnote 2(b) of Part 3 of the Appendix to the TSUS, which makes the quota restrictions provided for in Part 3 inapplicable to articles (except cotton and cotton waste) with an aggregate value of not over $10 in any shipment, if imported as samples for taking orders, for the personal use of the importer, or for research.

The Secretary of Agriculture further determined and reported to me that a condition existed with respect to dried milk mixtures which required emergency treatment and, as a result, Presidential Proclamation No. 4423 of March 26, 1976, was issued placing import restrictions upon certain dried milk mixtures without awaiting the recommendations of the United States International Trade Commission, hereinafter referred to as the Commission, such restrictions to continue in effect pending the report and recommendations of the Commission and action thereon by the President.

Under the authority of said Section 22, I requested the Commission to make an investigation with respect to these matters. The Commission has made its investigation and has reported to me its findings and recommendations.

On the basis of the information submitted to me, I find and declare that:

(a) The dried milk mixtures, upon which a limitation is hereinafter imposed, are being imported or are practically certain to be imported into the United States under such conditions and in such quantities as to render or tend to render ineffective, or materially interfere with, the price support program now conducted by the Department of Agriculture for milk, or to reduce substantially the amount of products processed in the United States from domestic milk;

(b) for the purpose of the first proviso of Section 22(b) of the Agricultural Adjustment Act, as amended, there is no representative period for imports of the said dried milk mixtures;

(c) the imposition of the import limitation hereinafter proclaimed is necessary in order that the entry, or withdrawal from warehouse, for consumption of such dried milk mixtures will not render or tend to render ineffective or materially interfere with, the price support program now conducted by the Department of Agriculture for milk, or reduce substantially the amount of products processed in the United States from domestic milk; and

(d) the monetary limitation in headnote 2(b) of Part 3 of the Appendix to the TSUS, which makes the quota restrictions provided for in Part 3 inapplicable to articles (except cotton and cotton waste) with an aggregate value of $10 in any shipment, if imported as samples for taking orders, for the personal use of the importer, or for research, should be increased to $25 and that such increase will not result in imports which will tend to render ineffective, or materially interfere with, any price support program now conducted by the Department of Agriculture, or to reduce substantially the amount of any product processed in the United States from any agricultural commodity or product thereof with respect to any price support program which is being undertaken.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, by virtue of the authority vested in me by Section 22 of the Agricultural Adjustment Act, as amended, and Section 604 of the Trade Act of 1974 (88 Stat. 2073, 19 U.S.C. 2483), do hereby proclaim as follows:

1. Item 950.19 of Part 3 of the Appendix to the Tariff Schedules of the United States is amended to read as follows:

"	Articles	Quota Quantity
950.19	Dried milk (described in items 115.45, 115.50, 115.55, and 118.05) which contains not over 5.5 percent by weight of butterfat and which is mixed with other ingredients, including but not limited to sugar, if such mixtures contain over 16 percent milk solids by weight, are capable of being further processed or mixed with similar or other ingredients and are not prepared for marketing to the retail consumers in the identical form and package in which imported; all the foregoing mixtures provided for in items 182.98 and 493.16, except articles within the scope of other import restrictions provided for in this part . . .	None

2. Headnote 2(b) of Part 3 of the Appendix to the Tariff Schedules of the United States is amended to read as follows:

"(b) commercial samples of cotton or cotton waste of any origin in uncompressed packages each weighing not more than 50 pounds gross weight; and articles (except cotton and cotton waste) with an aggregate value of not over $25 in any shipment, if imported as samples for taking orders, for the personal use of the importer, or for research;".

3. This proclamation shall be effective on the third day following the day it is published in the FEDERAL REGISTER.

IN WITNESS WHEREOF, I have hereunto set my hand this nineteenth day of January, in the year of our Lord nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and first.

Gerald R. Ford

Executive Order 11958 • January 18, 1977

Administration of Arms Export Controls

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including the Arms Export Control Act, as amended (22 U.S.C. 2751 *et seq.*), and Section 301 of Title 3 of the United States Code, and as President of the United States of America, it is hereby ordered as follows:

SECTION 1. *Delegation of Functions.* The following functions conferred upon the President by the Arms Export Control Act (22 U.S.C. 2751 *et seq.*), hereinafter referred to as the Act, are delegated as follows:

(a) Those under Section 3 of the Act, with the exception of subsections (a)(1), (b), (c)(3) and (c)(4), to the Secretary of State: *Provided,* That the Secretary of State, in the implementation of the functions delegated to him under Sections 3 (a) and (d) of the Act, is authorized to find, in the case of a proposed transfer of a defense article or related training or other defense service by a foreign country or international organization not otherwise eligible under Section 3(a)(1) of the Act, whether the proposed transfer will strengthen the security of the United States and promote world peace.

(b) Those under Section 5 to the Secretary of State.

(c) Those under Section 21 of the Act, with the exception of the last sentence of subsection (d) and all of subsection (h), to the Secretary of Defense.

(d) Those under Section 22(a) of the Act to the Secretary of Defense.

(e) Those under Section 23 of the Act, with the exception of the function of certifying a rate of interest to the Congress as provided by paragraph (2) of that Section, to the Secretary of Defense.

(f) Those under Section 24 of the Act to the Secretary of Defense.

(g) Those under Section 25 of the Act to the Secretary of State. The Secretary of Defense and the Director of the Arms Control and Disarmament Agency, within their respective areas of responsibility, shall assist the Secretary of State in the preparation of materials for presentation to the Congress under that Section.

(h) Those under Section 34 of the Act to the Secretary of State. To the extent the standards and criteria for credit and guaranty transactions are based upon national security and financial policies, the Secretary of State shall obtain the prior concurrence of the Secretary of Defense and the Secretary of the Treasury, respectively.

(i) Those under Section 35(a) of the Act to the Secretary of State.

(j) Those under Sections 36(a) and 36(b)(1) of the Act, except with respect to the certification of an emergency as provided by subsection (b)(1), to the Secretary of Defense. The Secretary of Defense, in the implementation of the functions delegated to him under Sections 36(a) and (b)(1) shall consult with the Secretary of State, who shall, with respect to matters related to subparagraphs (D) and (I) of Section 36(b)(1), consult with the Director of the Arms Control and Disarmament Agency. With respect to those functions under Sections 36(a) (5) and (6), the Secretary of Defense shall consult with the Director of the Office of Management and Budget.

(k) Those under Sections 36 (c) and (d) of the Act to the Secretary of State.

(l) Those under Section 38 of the Act:

(1) to the Secretary of State, except as otherwise provided in this subsection. Designations, including changes in designations, by the Secretary of State of items or categories of items which shall be considered as defense articles and defense services subject to export control under Section 38 shall have the concurrence of the Secretary of Defense;

(2) to the Secretary of the Treasury, to the extent they relate to the control of the import of defense articles and defense services. In carrying out such functions, the Secretary of the Treasury shall be guided by the views of the Secretary of State on matters affecting world peace, and the external security and foreign policy of the United States. Designations including changes in designations, by the Secretary of the Treasury of items or categories of items which shall be considered as defense articles and defense services subject to import control under Section 38 of the Act shall have the concurrence of the Secretary of State and the Secretary of Defense;

(3) to the Secretary of Commerce, to carry out on behalf of the Secretary of State, to the extent such functions involve Section 38(e) of the Act and are agreed to by the Secretary of State and the Secretary of Commerce.

(m) Those under Section 39(b) of the Act to the Secretary of State. In carrying out such functions, the Secretary of State shall consult with the Secretary of Defense as may be necessary to avoid interference in the application of Department of Defense regulations to sales made under Section 22 of the Act.

(n) Those under Sections 42 (c) and (f) of the Act to the Secretary of Defense.

SEC. 2. *Coordination.* (a) In addition to the specific provisions of Section 1 of this Order, the Secretary of State and the Secretary of Defense, in carrying out the functions delegated to them under this Order, shall consult with each other and with the heads of other departments and agencies, including the Secretary of the Treasury, the Administrator of the Agency for International Development, and the Director of the Arms Control and Disarmament Agency, on matters pertaining to their responsibilities.

(b) In accordance with Section 2(b) of the Act and under the directions of the President, the Secretary of State, taking into account other United States activities abroad, shall be responsible for the continuous supervision and general direction of sales and exports under the Act, including but not limited to, the negotiation, conclusion, and termination of international agreements, and determining whether there shall be a sale to a country and the amount thereof, and whether there shall be delivery or other performance under such sale or export, to the end that sales and exports are integrated with other United States activities and the foreign policy of the United States is best served thereby.

SEC. 3. *Allocation of Funds.* Funds appropriated to the President for carrying out the Act shall be deemed to be allocated to the Secretary of Defense without any further action of the President.

SEC. 4. *Revocation.* Executive Order No. 11501, as amended, is revoked; except that, to the extent consistent with this Order, all determinations, authorizations, regulations, rulings, certificates, orders, directives, contracts, agreements, and other actions made, issued, taken or entered into under the provisions of Executive Order No. 11501, as amended, and not revoked, superseded or otherwise made inapplicable, shall continue in full force and effect until amended, modified or terminated by appropriate authority.

Gerald R. Ford

THE WHITE HOUSE,

Executive Order 11959 • January 18, 1977

Administration of Foreign Assistance and Related Functions

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including Section 621 of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2381), and Section 301 of Title 3 of the United States Code, and as President of the United States of America, Executive Order No. 10973, as amended, is hereby further amended as follows:

SECTION 1. Section 101 is amended by striking out "and (6)" and inserting in lieu thereof "(6) sections 413(b) and 607 of the International Security Assistance and Arms Export Control Act of 1976 (90 Stat. 761, 768; 22 U.S.C. 2431, note 2394a), and (7)".

SEC. 2. Section 105 is revoked and the following new section is substituted therefor:

"Sec. 105. *Allocation of Foreign Assistance.* In carrying out the functions conferred upon the President by section 653 of the Act, the Secretary of State shall consult with the Director of the Office of Management and Budget.".

SEC. 3. Subsection (c) of Section 201 is revoked.

SEC. 4. Section 202 is amended to read as follows:

"Sec. 202. *Reports and Information.* In carrying out the functions under sections 514(e) and 634(b) of the Act delegated to him by section 201 of this order, the Secretary of Defense shall consult with the Secretary of State.".

SEC. 5. Section 203 is amended to read as follows:

"Sec. 203. *Exclusions from Delegation to Secretary of Defense.* The following described functions conferred upon the President by the Act are excluded from the functions delegated by the provisions of section 201(a) of this order:

"(a) Those under section 502(B)(a)(3) of the Act, except to the extent they relate to functions under the Act administered by the Department of Defense.

"(b) Those under sections 504(a), 505(a) relating to other provisions required by the President, and 505(d), (e), and (g) of the Act.

"(c) Those relating to consent under sections 505(a) (1) and (4) of the Act.

"(d) Those under sections 505(b) (1), (2), and (3) of the Act to the extent that they pertain to countries which agree to the conditions set forth therein.

"(e) Those of negotiating, concluding and terminating international agreements.".

SEC. 6. Section 301 is amended to read as follows:

"Sec. 301. *Department of the Treasury.* There are delegated to the Secretary of the Treasury the functions conferred upon the President by the third sentence of section 102(d) as it relates to international development organizations in which the United States is represented by the Secretary of the Treasury, section 301(e)(3) as it relates to organizations referred to in section 301(e)(2), the second sentence of section 612(a), section 634(f), and section 634(g) of the Act. The Secretary of the Treasury shall continue to administer any open special foreign country accounts established pursuant to former section 514 of the Act as enacted by section 201(f) of Public Law 92-226 (86 Stat. 25) and repealed by Section 12(b)(5) of Public Law 93-189 (87 Stat. 722).".

SEC. 7. Section 401 is amended as follows:

(a) Subsection (a) is amended:

(1) by inserting "505(c)" immediately after "504(b)"; and

(2) by inserting "620(x), 620A" immediately after "620(d)"; and

(3) by striking out "and 633(b)" and inserting in lieu thereof "633(b), 662(a), and 663(b)".

(b) Subsection (c) is amended:

(1) by striking out "481" and inserting in lieu thereof "481(a), 504(a)(6)"; and

(2) by inserting "505(d)(2)(A), 505(d)(3)" immediately after "505(b)(4),"; and

(3) by striking out "and 634(c)" and inserting in lieu thereof "634(c), 663(a) and 669(b)(1)".

(c) Subsection (d)(1) is amended to read as follows:

"(d)(1) Those under section 503(a) which relate to findings: *Provided,* That the Secretary of State in the implementation of the functions delegated to him under section 505(a)(1), (a)(4) and (e) of the Act, is authorized to find, in the case of a proposed transfer of a defense article or related training or a related defense service by a foreign country or international organization to a foreign country or international organization not otherwise eligible under section 503(a) of the Act, whether the proposed transfer will strengthen the security of the United States and promote world peace.".

Executive Order 11960 • January 19, 1977

Amending the Generalized System of Preferences

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including Title V and Section 604 of the Trade Act of 1974 (88 Stat. 2066, 19 U.S.C. 2461 *et seq.*; 88 Stat. 2073, 19 U.S.C. 2483), and as President of the United States of America, in order to adjust the designation of eligible articles, taking into account information and advice received in fulfillment of the requirements of Sections 503(a) and 131-134 of the Trade Act of 1974, it is hereby ordered as follows:

SECTION 1. In order to subdivide existing items for purposes of the Generalized System of Preferences, the Tariff Schedules of the United States (TSUS) are modified as provided in Annex I, attached hereto and made a part hereof.

SEC. 2. Annex II of Executive Order No. 11888 of November 24, 1975, as amended, is further amended as provided in Annex II, attached hereto and made a part hereof.

SEC. 3. Annex III of Executive Order No. 11888, as amended, is further amended as provided in Annex III attached hereto and made a part hereof.

SEC. 4. General Headnote 3(c)(iii) of the TSUS, as amended, is further amended as provided in Annex IV, attached hereto and made a part hereof.

SEC. 5. The amendments made by this Order shall be effective with respect to articles both: (1) imported on or after January 1, 1976, and (2) entered for consumption, or withdrawn from warehouse for consumption, on or after March 1, 1977.

Gerald R. Ford

THE WHITE HOUSE,
January 19, 1977.

ANNEX I

GENERAL MODIFICATIONS OF THE TARIFF SCHEDULES OF THE UNITED STATES

NOTES:

1: Bracketed matter is included to assist in the understanding of proclaimed modifications.

2. The following items, with or without preceding superior descriptions, supersede matter now in the Tariff Schedules of the United States (TSUS). The items and superior descriptions are set forth in columnar form and material in such columns is inserted in the columns of the TSUS designated "Item", "Articles", "Rates of Duty 1", and "Rates of Duty 2", respectively.

Subject to the above notes the TSUS is modified as follows:

1: Item 121.57 is superseded by:

	[Leather, in the rough, partly finished, or finished:]		
	[Other:]		
	[Other:]		
	[Not fancy:]		
"121.55	Buffalo	5% ad val.	25% ad val.
121.58	Other	5% ad val.	25% ad val."

2. Item 135.40 is superseded by:

	[Vegetables, fresh, chilled, or frozen : : ::]		
	"Carrots:		
135.41	Under 4 inches long	6% ad val.	50% ad val.
135.42	Other	6% ad val.	50% ad val."

3. Item 137.85 is superseded by:

	[Vegetables, fresh, chilled, or frozen : : ::]		
	[Other:]		
"137.71	Brussels sprouts	25% ad val.	50% ad val."
137.86	Other	25% ad val.	50% ad val.

4: Conforming change: Headnote 1 of subpart C, part 12, Schedule 1 is modified by substituting therein "168.52" for "168.50."

5. Item 389.60 is superseded by:

	[Articles not specially provided for, of textile materials:]		
	[Other articles, not ornamented:]		
	[Of man-made fibers:]		
	"Other:		
389.61	Artificial flowers	25¢ per lb. + 15% ad val.	45¢ per lb. + 65% ad val.
389.62	Other	25¢ per lb. + 15% ad val.	45¢ per lb. + 65% ad val."

6.(a) Item 403.60 is superseded by:

	[Cyclic organic chemical products : : ::]		
	"Other:		
403.58	Ethoxyquin (1, 2-Dihydro-6-ethoxy-2, 2, 4-trimethylquinoline)	1.7¢ per lb. + 12.5% ad val.	7¢per lb. + 40% ad val.
403.61	Other	1.7¢ per lb. + 12.5% ad val.	7¢ per lb. + 40% ad val."

(b) Conforming change: Headnote 1 of subpart B, part 1, Schedule 4 is modified by substituting therein "403.61" for "403.60."

7: Item 403.80 is superseded by:

	[All other products : : ::]		
	"Other:		
403.81	Maleic anhydride	1.7¢ per lb. + 12.5% ad val.	7¢ per lb. + 40% ad val.
403.82	Other	1.7¢ per lb. + 12.5% ad val.	7¢ per lb. + 40% ad val."

8. Item 642.10 is superseded by:

	[Strands, ropes, cables, and cordage : : ::]		
	[Not fitted with fittings and not made up into articles:]		
	[Not covered with textile or other non-metallic material:]		
	[Wire strand:]		
"642.09	Of copper	7.5% ad val.	35% ad val.
642.11	Other	7.5% ad val.	35% ad val."

ANNEX II

Annex II to Executive Order No. 11888, as amended by Executive Orders Nos. 11906 and 11934, is amended by adding, in numerical sequence, the following TSUS item numbers:

100.73	121.55	125.20	135.60	389.61	792.70
111.10	125.01	125.50	136.10	403.58	799.00
111.60	125.10	131.80	136.40	403.81	
121.35	125.15	135.41	177.40	642.09	

ANNEX III

Annex III to Executive Order No. 11888, as amended by Executive Orders Nos. 11906 and 11934, is amended by adding, in numerical sequence, the following TSUS item numbers:

136.50 137.71 140.21 176.49

ANNEX IV

General Headnote 3(c)(iii) of the TSUS as amended by Executive Orders Nos. 11906 and 11934, is amended by adding, in numerical sequence, the following TSUS item numbers and countries set opposite these numbers:

136.50	Lebanon
137.71	Mexico
140.21	Mexico
176.49	Republic of China

Executive Order 11961 • January 19, 1977

Administration of the International Investment Survey Act of 1976

By virtue of the authority vested in me by the International Investment Survey Act of 1976 (90 Stat. 2059, 22 U.S.C. 3101), and section 301 of title 3 of the United States Code, and as President of the United States of America, it is hereby ordered as follows:

SECTION 1. All the functions vested in the President by the International Investment Survey Act of 1976 (90 Stat. 2059, 22 U.S.C. 3101), hereinafter referred to as the Act, are hereby delegated to the Director of the Office of Management and Budget, hereinafter referred to as the Director. The Director may, from time to time, designate other officers or agencies of the Federal Government to perform any or all of the functions hereby delegated to the Director, subject to such instructions, limitations, and directions as the Director deems appropriate.

SEC. 2. Subject to the provisions of section 1 of this order, and in the absence of any contrary delegation or direction by the Director, the Secretary of the Treasury, with respect to portfolio investment, shall perform the functions set forth in sections 4(a) (1), (2), (4) and 4(c) of the Act.

SEC. 3. Subject to the provisions of section 1 of this order, and in the absence of any contrary delegation or direction by the Director, the Secretary of Commerce, with respect to direct investment, shall perform the functions set forth in sections 4(a) (1), (2), (4) and 4(b) of the Act.

SEC. 4. Subject to the provisions of section 1 of this order, and in the absence of any contrary delegation or direction by the Director, the Council on International Economic Policy shall perform the function of making periodic reports to the Committees of the Congress as set forth in Section 4(a) (3) of the Act.

Gerald R. Ford

THE WHITE HOUSE,
January 19, 1977.

Executive Order 11962 • January 19, 1977

Establishing the President's Advisory Board on International Investment

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including section 8(a) of the International Investment Survey Act of 1976 (90 Stat. 2064, 22 U.S.C. 3107), and as President of the United States of America, in accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), it is hereby ordered as follows:

SECTION 1. (a) There is hereby established the President's Advisory Board on International Investment, hereinafter referred to as the Board, which shall be composed of not more than fifteen members who shall be appointed by the President. Each member shall serve for a term limited to the remaining life of the Board as determined at the time of appointment.

(b) The President shall designate a Chairman and Vice Chairman from among the members.

SEC. 2. (a) Whenever requested, the Board shall advise the Executive Director of the Council on International Economic Policy, hereinafter referred to as the Executive Director, the Director of the Office of Management and Budget, and the heads of other agencies, with respect to matters relating to the performance of their functions under the International Investment Survey Act of 1976 (90 Stat. 2059, 22 U.S.C. 3101).

(b) In making its recommendations, the Board shall give due consideration to the usefulness of data to be collected as compared to the burden imposed on those who are to furnish the data.

SEC. 3. (a) The Executive Director shall, to the extent permitted by law, provide administrative and staff services, support, and facilities for the Board.

(b) The Executive Director shall appoint an Executive Secretary for the Board.

SEC. 4. Members of the Board may be compensated for their services in accord with 5 U.S.C. 3109, and may, to the extent permitted by law, be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 5702 and 5703) for persons in the government service employed intermittently.

SEC. 5. Notwithstanding the provisions of any other Executive order, the functions of the President under the Federal Advisory Committee Act (5 U.S.C. App. I), except that of reporting annually to the Congress, which are applicable to the Board, shall be performed by the Executive Director in accordance with guidelines and procedures established by the Office of Management and Budget.

SEC. 6. The Board shall terminate on December 31, 1978, unless sooner extended.

Gerald R. Ford

THE WHITE HOUSE,
January 19, 1977.

Executive Order 11963 • January 19, 1977

Delegating Reporting Functions Under the Agricultural Trade Development and Assistance Act of 1954, as Amended

By virtue of the authority vested in me by Section 408 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1736b), Section 301 of Title 3 of the United States Code, and as President of the United States of America, it is hereby ordered as follows:

SECTION 1. Executive Order No. 10900, as amended, is further amended by adding to Section 1 thereof a new subsection (d) as follows:

"(d) The Secretary of Agriculture, after consultation with the Secretary of State, Secretary of the Treasury, Administrator of the Agency for International Development, Chairman of the Council of Economic Advisers, Director of the Office of Management and Budget, Chairman of the Council on International Economic Policy and the Assistant to the President for National Security Affairs, shall transmit to the Congress all reports required by Section 408 of the Act (7 U.S.C. 1736b, 1970 ed., Supp. V)."

SEC. 2. Executive Order No. 10900, as amended, is further amended by revoking Section 5 thereof and redesignating Sections 6, 7 and 8 as Sections 5, 6 and 7 respectively.

Executive Order 11964 • January 19, 1977

Implementation of the Convention on the International Regulations for Preventing Collisions at Sea, 1972

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including Section 301 of Title 3 of the United States Code, and as President of the United States of America and Commander-in-Chief of the Armed Forces, in order to provide for the coming into force on July 15, 1977, of the Convention on the International Regulations for Preventing Collisions at Sea, 1972 (Senate Executive W, 93d Cong., 1st Sess.), it is hereby ordered as follows:

SECTION 1. (a) With respect to vessels of special construction or purpose, the Secretary of the Navy, for vessels of the Navy, and the Secretary of the Department in which the Coast Guard is operating, for all other vessels, shall determine and certify, in accord with Rule I of the International Regulations for Preventing Collisions at Sea, 1972, hereinafter referred to as the International Regulations, as to which such vessels cannot comply fully with the provisions of any of the International Regulations with respect to the number, positions, range or arc of visibility of lights or shapes, as well as to the disposition and characteristics of sound-signalling appliances, without interfering with the special function of the vessel.

(b) With respect to vessels for which a certification is issued, the Secretary issuing the certification shall certify as to such other provisions which are the closest possible compliance by that vessel with the International Regulations.

(c) Notice of any certification issued shall be published in the FEDERAL REGISTER.

SEC. 2. The Secretary of the Navy is authorized to promulgate special rules with respect to additional station or signal lights or whistle signals for ships of war or vessels proceeding under convoy, and the Secretary of the Department in which the Coast Guard is operating is authorized, to the extent permitted by law, including the provisions of Title 14 of the United States Code, to promulgate special rules with respect to additional station or signal lights for fishing vessels engaged in fishing as a fleet. In accord with Rule I of the International Regulations, the additional station or signal lights or whistle signals contained in the special rules shall be, as far as possible, such as they cannot be mistaken for any light or signal authorized by the International Regulations. Notice of such special rules for fishing vessels shall be published in the FEDERAL REGISTER.

SEC. 3. The Secretary of the Navy, for vessels of the Navy, and the Secretary of the Department in which the Coast Guard is operating, for all other vessels, are authorized to exempt, in accord with Rule 38 of the International Regulations, any vessel or class of vessels, the keel of which is laid, or which is at a corresponding stage of construction, before July 15, 1977, from full compliance with the International Regulations, provided that such vessel or class of vessels complies with the requirements of the International Regulations for Preventing Collisions at Sea, 1960. Notice of any exemption granted shall be published in the FEDERAL REGISTER.

SEC. 4. The Secretary of the Department in which the Coast Guard is operating is authorized, to the extent permitted by law, to promulgate such rules and regulations that are necessary to implement the provisions of the Convention and International Regulations. He shall cause to be published in the FEDERAL REGISTER any implementing regulations or interpretive rulings promulgated pursuant to this Order, and shall promptly publish in the FEDERAL REGISTER the full text of the International Regulations.

Executive Order 11965 • January 19, 1977

Establishing the Humanitarian Service Medal

By virtue of the authority vested in me as President of the United States of America, and as Commander in Chief of the Armed Forces, it is hereby ordered as follows:

SECTION 1. There is hereby established a Humanitarian Service Medal with accompanying ribbons and appurtenances for award by the Secretary of Defense or the Secretary of Transportation with regard to the Coast Guard when not operating as a Service in the Navy. Individuals eligible for the medal are members of the Armed Forces of the United States (including Reserve Components) who, subsequent to April 1, 1975, distinguished themselves by meritorious participation in a military act or operation of a humanitarian nature. The Secretary of Defense and the Secretary of Transportation for the Coast Guard will determine types of acts or operations that warrant award of the medal.

SEC. 2. The Humanitarian Service Medal and ribbons and appurtenances thereto shall be of appropriate design approved by the Secretary of Defense and shall be awarded by the Secretary of Defense and the Secretary of Transportation for the Coast Guard under uniform regulations, as prescribed by the Secretary of Defense. The regulations shall place the Humanitarian Service Medal in an order of precedence immediately after the Vietnam Service Medal.

SEC. 3. No more than one Humanitarian Service Medal shall be awarded to any one person, but for each subsequent participation in a humanitarian act or operation justifying such an award, a suitable device may be awarded to be worn with that medal as prescribed by appropriate regulations of the Military Departments.

SEC. 4. The Humanitarian Service Medal or device may be awarded posthumously, and when so awarded, may be presented to such representative of the deceased as may be deemed appropriate by the Secretary of Defense or the Secretary of Transportation.

Designating Certain Public International Organizations Entitled To Enjoy Certain Privileges, Exemptions, and Immunities

By virtue of the authority vested in me by Section 1 of the International Organizations Immunities Act (59 Stat. 669, 22 U.S.C. 288), and as President of the United States of America, having found that the United States participates in the following organizations, it is hereby ordered as follows:

SECTION 1. The International Development Association, in which the United States participates pursuant to the Act of Congress approved June 30, 1960 (74 Stat. 293, 22 U.S.C. 284) and the Articles of Agreement of the International Development Association (11 U.S.T. 2284, T.I.A.S. 4607), is hereby designated as a public international organization entitled to enjoy the privileges, exemptions, and immunities conferred by the International Organizations Immunities Act, provided that, this designation shall not affect in any way the applicability of Section 3, Article VIII, of the Articles of Agreement of the International Development Association.

SEC. 2. The International Centre for Settlement of Investment Disputes, in which the United States participates pursuant to the Act of Congress approved August 11, 1966 (80 Stat. 344, 22 U.S.C. 1650) and the Convention on the Settlement of Investment Disputes Between States and Nationals of Other States (17 U.S.T. 1270, T.I.A.S. 6090), is hereby designated as a public international organization entitled to enjoy the privileges, exemptions, and immunities conferred by the International Organizations Immunities Act.

SEC. 3. The International Telecommunications Satellite Organization (INTELSAT), in which the United States participates pursuant to the authority of the Communications Satellite Act of 1962 (76 Stat. 419, 47 U.S.C. 701–744) and in accord with the Agreement Relating to the International Telecommunications Satellite Organization (INTELSAT) and the Operating Agreement signed pursuant thereto (TIAS 7532), is hereby designated as a public international organization entitled to enjoy the privileges, exemptions, and immunities conferred by the International Organizations Immunities Act.

SEC. 4. Executive Order No. 11718 of May 14, 1973, is revoked.

SEC. 5. This Order shall be effective as of November 24, 1976.

OFFICE OF MANAGEMENT AND BUDGET

■

BUDGET RESCISSIONS AND DEFERRALS

OFFICE OF MANAGEMENT AND BUDGET

BUDGET RESCISSIONS AND DEFERRALS

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith propose nine new rescissions totalling $1,001.3 million and report eight new deferrals totalling $273.4 million in budget authority developed in connection with the 1978 budget. In addition, I am reporting $70.6 million in increases to five deferrals previously transmitted.

The rescission proposals pertain to programs of the Departments of Commerce, Defense, State, and Transportation as well as the Small Business Administration and an International Security Assistance program.

The new deferrals involve programs of the Departments of Commerce and Transportation and the Energy Research and Development Administration while the increases to existing deferrals relate to the Departments of Agriculture, Defense, and Transportation.

I urge the Congress to act favorably on the rescission proposals.

Gerald R. Ford

Agency Funds Appropriated to the President	New budget authority (P.L. 94-441) $ 740,000,000
Bureau International Security Assistance	Other budgetary resources ---
Appropriation title & symbol Foreign Military Credit Sales, 1977 1171082	Total budgetary resources 740,000,000
	Amount proposed for rescission $ 41,500,000
OMB identification code: 11-1082-0-1-052	Legal authority (in addition to sec. 1012): ☒ Antideficiency Act ☐ Other
Grant program ☐ Yes ☒ No	
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification

Pursuant to Public Law 90-629, the Foreign Military Sales Act, approved October 22, 1968, as amended (including Title II of Public Law 94-329, the International Security Assistance and Arms Export Control Act of 1976, approved June 30, 1976), and Executive Order No. 11501 of December 22, 1969, as amended, the Secretary of Defense, under the continuous supervision and general direction of the Secretary of State, uses appropriated funds to make loans to friendly foreign countries and international organizations to finance procurement of defense articles and defense services from the United States and to guarantee loans made by private U.S. financial institutions or the Federal Financing Bank for the same purpose.

Public Law 94-441, the "Foreign Assistance and Related Programs Appropriations Act, 1977," approved October 1, 1976, appropriated $740,000,000 for the period October 1, 1976, through September 30, 1977, "to enable the President to carry out the provisions of the Foreign Military Sales Act" (now known as the Arms Export Control Act). On December 3, 1976, all of the appropriated $740,000,000 was reported as deferred (D77-38) pending the approval of specific loans to eligible countries by the Departments of State, Defense, and the Treasury.

The President has determined that $41.5 million of the $740.0 million in available budget authority will not be required to carry out the full objectives and scope of the Foreign Military Credit Sales program for which it was provided. Therefore, a rescission of that amount is proposed. The $41.5 million in excess budget authority results from changes in program plans that place increased reliance on guaranteed loans rather than direct credit during fiscal year 1977. Under the guarantee program, funds equal to 10% of the face value of loans are obligated to guarantee loans provided to foreign aid recipients by the Federal Financing Bank or private lending institutions. In contrast, the full face value of the loans is obligated by the U.S. Government in direct credit transactions. The program would be operating at its full authorized level ($2,022.1 million) if the rescission is accepted.

R77-5

Estimated Effects

The planned 1977 program of $2,022.1 million would not be affected by this rescission proposal because the proposal is concerned only with a change in the method of financing the loans--not in the level of loans.

Outlay Effect (Estimated in millions of dollars) 1/

Comparison with the President's 1978 budget:

1. Budget outlay estimate for 1977	575.0
2. Outlay savings, if any, included in the estimate	15.0

Current outlay estimate for 1977:

3. Without rescission	590.0
4. With rescission	575.0
5. Current outlay savings (line 3-line 4)	15.0

Outlay savings for 1978	10.0
Outlay savings for 1979	10.0
Outlay savings for 1980	6.5

1/ The outlay savings listed are savings from on-budget outlays. The shift from direct loans to loan guarantees results in a corresponding shift from on-budget to off-budget (Federal Financing Bank) outlays in the same amount as the "outlay savings" when the loans are made by the Federal Financing Bank.

R77-5

TITLE II - FOREIGN MILITARY CREDIT SALES

Foreign Military Credit Sales

Of the funds appropriated under this head in the Foreign Assistance and Related Programs Appropriations Act, 1977, $41,500,000 are rescinded.

Rescission Proposal No: R77-6

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Commerce	New budget authority (P.L. 94-362) $14,470,000
Bureau United States Travel Service	Other budgetary resources 0
Appropriation title & symbol: Salaries and expenses 1370700	Total budgetary resources 14,470,000
	Amount proposed for rescission $525,000
OMB identification code: 13-0700-0-1-403	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act
Grant program ☐ Yes ☒ No	☐ Other
Type of account or fund: ☒ Annual ☐ Multiple-year (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification

The budget authority available to date in 1977 for the activities of the U.S. Travel Service (USTS) totals $14.5 million. The proposed rescission, if accepted, would reduce the amounts available for the Special Markets program and Industry and State programs.

Funds available for the Industry and State programs are utilized, in part, to support the development of a domestic tourism program. In 1977, budget authority of $1.5 million was made available for this purpose. $500,000 of this amount is proposed for rescission. The domestic tourism industry has agreed in principle with the Secretary of Commerce on the development of a domestic tourism program which would provide $1.0 million in Federal "seed" money to be matched by the industry. The industry has accepted this level of financial commitment as appropriate for developmental purposes. A plan for 1977 is estimated not to be in place until April 1977.

Funds available for the Special Markets program are utilized to support the development of tour packages which encourage travel to the U.S. During 1977 five European special markets will be added to the three primary USTS markets to provide coverage to four-fifths of the Visit USA travelers from Europe. The proposed rescission includes $25,000 in funds available for this program which are not required to support planned field visits to these special markets. $300,000 will remain available for contacting travel representatives in these markets to promote the development of low cost tour packages.

R77-6

2

Estimated Effects

The proposed rescission will have no adverse effects on planned USTS activities in the above two areas. Efforts will continue with industry toward the development of a domestic program in 1977 and contracts for development of tour packages in the five special European markets will be carried out.

Outlay Effect (estimated in millions of dollars):

Comparison with President's 1978 budget:	
1. Budget outlay estimate for 1977	13.8
2. Outlay savings, if any, included in the budget outlay estimate	0.5
Current Outlay Estimates for 1977	
3. Without rescission	14.3
4. With rescission	13.8
5. Current outlay savings (line 3 - line 4)	0.5

R77-6

TITLE III - DEPARTMENT OF COMMERCE

United States Travel Service

Salaries and expenses

Appropriations provided under this head in the Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1977, are rescinded in the amount of $525,000. Of the appropriations remaining, not less than $1,000,000 shall be available for the domestic tourism promotion program.

Rescission Proposal No: R 77-7

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Commerce	New budget authority (P.L. 94-362) $ 566,215,000 1/
Bureau National Oceanic and Atmospheric Administration	Other budgetary resources 62,781,270
Appropriation title & symbol Operations, Research, and Facilities 13X1450 (OCEANLAB)	Total budgetary resources 628,996,270
	Amount proposed for rescission $ 1,500,000
OMB identification code: 13-1450-0-1-306	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act
Grant program ☐ Yes ☒ No	☐ Other
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification:

The proposed rescission, if accepted, would decrease the funds available in 1977 to the Operations, research and facilities appropriation of the National Oceanic and Atmospheric Administration by $1,500,000. The funds, available until expended, were provided for the design and engineering studies preliminary to construction, in future years, of an underwater mobile laboratory, OCEANLAB.

Rescinding these funds in 1977 will avoid initiating the expenditure of an estimated total of $21.5 million over the next five years for full construction and operation of an OCEANLAB, and allow further careful review and consideration of any need for acquisition of an underwater laboratory. No specific missions have been identified for an exploratory facility such as the proposed OCEANLAB. Prior to construction and operation of such an expensive piece of scientific equipment, the specific types of studies required and the Federal objectives that would be accomplished should be identified. In addition, it is not now apparent that the proposed OCEANLAB is the most cost-effective means for obtaining necessary information.

Estimated Effects:

Rescission of the available funding in 1977 for design and engineering studies for an underwater mobile laboratory will have no impact on on-going programs. However, in the future some research on fish stocks may not be possible without the advanced capabilities envisioned for OCEANLAB. At the same time, the Executive Branch will be able to review and document the needs and users of the proposed facility, and actually estimate the benefits from the proposed facility against the likely costs of the program.

1/ Does not include $55,000 transfer to General Administration, Department of Commerce for water resources planning activity.

R77-7

2

Outlay Effect (estimated in millions of dollars)

Comparison with President's 1978 Budget:	
1. Budget outlay estimate for 1977	$575.0
2. Outlay savings, if any, included in the budget outlay estimate	0.7
Current Outlay Estimates for 1977	
3. Without rescission	575.7
4. With rescission	575.0
5. Current outlay savings (line 3 minus line 4)	0.7
Outlay Savings for 1978	0.8

R77-7

National Oceanic and Atmospheric Administration

Operations, Research, and Facilities

Of the amount appropriated under this head in the Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1977, $1,500,000 provided for studies (including surveys, mission analyses, cost analyses, and initiation of a design and engineering study) for an underwater ocean laboratory are rescinded.

Rescission Proposal No: R77-8

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Defense	New budget authority (P.L. 94-419) $8,381,700,000
Bureau Office of the Secretary of Defense	Other budgetary resources ____
Appropriation title & symbol Retired Pay, Defense 9770030	Total budgetary resources 8,381,700,000
	Amount proposed for rescission $ 143,600,000
OMB identification code: 97-0030-0-1-051	Legal authority (in addition to sec. 1012): [X] Antideficiency Act [ ] Other ____
Grant program [ ] Yes [X] No	
Type of account or fund: [X] Annual [ ] Multiple-year ____ (expiration date) [ ] No-year	Type of budget authority: [X] Appropriation [ ] Contract authority [ ] Other ____

Justification

The amount expected to be obligated is $143.6 million below the Fiscal Year 1977 Appropriation as a result of lower than anticipated Consumer Price Index (CPI) adjustments, the effect of the new method for adjusting annuities, and net strength and rate changes. Therefore, rescission of $143.6 million is proposed under provisions of the Antideficiency Act (31 U.S.C. 665).

Estimated Effects

There is no programmatic effect of this rescission proposal since the funds cannot be obligated.

Outlay Effect

There is no outlay effect of this proposal since the funds cannot be used.

R77-8

DEPARTMENT OF DEFENSE - MILITARY

TITLE II

RETIRED MILITARY PERSONNEL

Retired Pay, Defense

Of the amount appropriated under this head in the Department of Defense Appropriation Act, 1977, $143,600,000 is rescinded.

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

Agency Department of Defense	New budget authority (P.L. 94-419) $6,195,000,000
Bureau	Other budgetary resources
Appropriation title & symbol: Shipbuilding and Conversion, Navy 177/11611	Total budgetary resources 6,195,000,000
	Amount proposed for rescission $ 721,000,000
OMB identification code: 17-1611-0-1-051	Legal authority* (in addition to sec. 1012): ☐ Antideficiency Act
Grant program ☐ Yes ☒ No	☐ Other
Type of account or fund: ☐ Annual ☒ Multiple-year 1981 (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification

The funds proposed for rescission were appropriated for procurement of long lead-time components for the CVN 71 nuclear aircraft carrier ($350.0 million) and the U.S.S. Long Beach conversion program ($371.0 million). This rescission proposal results from a Presidential decision not to procure the CVN 71 or to convert the Long Beach in the 1978-1982 period. This decision resulted from a review of the five-year Navy shipbuilding program, which was based on a National Security Council study on U.S. strategy and naval force requirements.

Estimated Effects

This rescission proposal would reduce 1977 budget authority by $721 million, less any amount unrecoverable, and result in outlay reductions of $51 million in 1977 and $132 million in 1978 with the remainder of the reductions occurring in later years.

Outlay Effects (estimated in millions of dollars)
Comparison with the President's 1978 budget:

1. Budget outlay estimate for 1977	$2,983.0
2. Outlay savings, if any, included in the budget outlay estimate	51.0

Of the funds appropriated under this head in the Department of Defense Appropriation Act, 1977, $721,000,000 are rescinded.

Rescission Proposal No: R77-10

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Defense	New budget authority (P.L.) $
Bureau: Department of the Air Force	Other budgetary resources 213,817,857
Appropriation title & symbol: Other Procurement, Air Force 575/73080	Total budgetary resources 213,817,857
	Amount proposed for rescission $ 14,350,000
OMB identification code: 57-3080-0-1-051	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act
Grant program ☐ Yes ☒ No	☐ Other
Type of account or fund: ☐ Annual ☒ Multiple-year 1977 (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification

Funds provided to the Other Procurement, Air Force account have been used to terminate the Advanced Logistics System (ALS). The Department of Defense has determined--after the settlement of contracts for the termination of the ALS--that there is $14.4 million remaining which it does not plan to obligate. Since there is no intention to obligate these funds and they will lapse under present plans, they are being proposed for rescission. The House Appropriation Committee, in House Report (94-5) (pages 163-165), concurs in the view that any funds which remain after termination costs have been met should be permitted to lapse.

Estimated Effects

This rescission proposal has no programmatic effects since the funds are excess to program requirements.

Outlay Effects

There is no outlay effect of this proposed rescission.

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of State	New budget authority (P.L. 94-362): $40,000,000
Bureau: International Organization Affairs	Other budgetary resources:
Appropriation title & symbol: Contributions for International Peacekeeping Activities 1971124	Total budgetary resources: 40,000,000
	Amount proposed for rescission: $12,000,000
OMB identification code: 19-1124-0-1-152	Legal authority (in addition to sec. 1012): [X] Antideficiency Act
Grant program: [ ] Yes [X] No	[ ] Other
Type of account or fund: [X] Annual	Type of budget authority: [X] Appropriation
[ ] Multiple-year (expiration date)	[ ] Contract authority
[ ] No-year	[ ] Other

Justification:

Public Law 94-37, approved June 19, 1975, "authorized to be appropriated to the Department of State such sums as may be necessary from time to time for payment by the United States of its share of the expenses of the United Nations peacekeeping forces in the Middle East, as apportioned by the United Nations in accordance with article 17 of the United Nations Charter, notwithstanding the limitation on contributions to international organizations contained in Public Law 92-544 (86 Stat. 1109, 1110)." The 1977 Budget contained an estimate of $45,000,000 for the U.S. share of those expenses to be paid from funds appropriated for fiscal year 1977. The Foreign Relations Authorization Act, Fiscal Year 1977, (Public Law 94-350, approved July 12, 1976) authorized to be appropriated to the Department of State for fiscal year 1977 for "International Organizations and Conferences", $342,460,453, an amount sufficient to allow $45,000,000 to be appropriated for "Contributions for international peacekeeping activities."

The Department of State Appropriation Act, 1977 (Title I, Public Law 94-362, approved July 14, 1976) appropriated $40,000,000 for fiscal year 1977 "for payments, not otherwise provided for, by the United States for expenses of United Nations peacekeeping forces in the Middle East". From these funds the State Department will pay the U.S. assessed share (approximately 29%) of the expenses of the United Nations Emergency Force (UNEF) in the Sinai and the United Nations Disengagement Observer Force (UNDOF) on the Golan Heights through October 24, 1977. The amount of the appropriation was based on the best estimate, at the time of congressional action, of the U.S. assessed share of the expenses of both peacekeeping forces for the twelve month period ending as indicated above.

On December 21, 1976, the United Nations General Assembly approved a resolution which definitively established these peacekeeping budgets at substantially lower levels than anticipated, resulting in a total U.S. assessment of $28,000,000. Accordingly, the President has determined that part of the budget authority will not be required to carry out the full objectives or scope of the program for which it is provided, and a rescission of $12,000,000 is proposed. These funds have been reserved for savings under the Antideficiency Act (31 U.S.C. 665).

Estimated Effects:

The proposed rescission will have no programmatic effects.

Outlay Effect:

There is no outlay effect of this deferral because the funds would not be used if made available.

R77-11

INTERNATIONAL ORGANIZATIONS AND CONFERENCES

Contributions for International Peacekeeping Activities

Of the funds appropriated under this head in the Departments of State, Justice, and Commerce, and Judiciary, and Related Agencies Appropriation Act, 1977, $12,000,000 are rescinded.

Rescission Proposal No: R77-12

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Transportation	New budget authority (P.L. 94-387): $147,103,000
Bureau: U.S. Coast Guard	Other budgetary resources:
Appropriation title & symbol: Retired Pay 6970241	Total budgetary resources: 147,103,000
	Amount proposed for rescission: $6,803,000

Grant program: [ ] Yes [X] No	
Type of account or fund: [X] Annual; [ ] Multiple-year ____ (expiration date); [ ] No-year	Type of budget authority: [X] Appropriation; [ ] Contract authority; [ ] Other

Justification

Funds totalling $147,103,000, were appropriated in the Department of Transportation and Related Agencies Appropriation Act, 1977, for payment of retired pay for military personnel of the U.S. Coast Guard and U.S. Coast Guard Reserve and members of the former Lighthouse Service. In addition, this appropriation provides for annuities payable to beneficiaries of retired military personnel under the retired serviceman's family protection plan (10 U.S.C. 1431-1446) and survivor benefit plan (10 U.S.C. 1447-1455).

Lower-than-expected cost-of-living adjustments will result in the development of $6.8 million in budget authority that is excess to requirements and will--if not rescinded--lapse at the end of fiscal 1977. These funds have been reserved for savings under the Antideficiency Act (31 U.S.C. 665).

Estimated Effects

This rescission proposal would have no programmatic effect on the Coast Guard retirement program.

Outlay Effect

There is no outlay effect of this rescission proposal because the funds will lapse if they are not rescinded.

R77-12

Of the funds appropriated under this head in the Department of Transportation and Related Agencies Appropriation Act, 1977, $6,803,000 are rescinded.

Rescission Proposal No: R77-13

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency Small Business Administration	New budget authority (P.L. 94-362) $601,600,000
Bureau	Other budgetary resources 539,633,992
Appropriation title & symbol	Total budgetary resources 1,141,233,992
Business Loan Investment Fund 73X4154 (Section 7(a) Regular Business Loan Program)	Amount proposed for rescission $60,000,000
OMB identification code: 73-4154-0-3-403	Legal authority (in addition to sec. 1012): ☐ Antideficiency Act
Grant program ☐ Yes ☒ No	☐ Other
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification

The Regular Business Loan program pursuant to section 7(a) of the Small Business Act, as amended (15 U.S.C. 636), provides direct and guaranteed loan assistance to those small businesses which are unable to obtain financing in the private credit market on reasonable terms. Since 1975, the private credit market has been improving and providing small business with greater access to debt financing at lower interest rates. It is expected that these credit conditions will continue in 1977 and 1978. The Congress added $95 million to the 1977 budget request of $100 million for the 7(a) direct loan program in the State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1977, (enacted in July, 1976). A current assessment is that $60 million of these funds are not now needed in light of present credit market conditions and are, therefore, proposed for rescission. This proposal would reduce the loan level for this program in 1977 from $195 million to $135 million. The proposed revision in the 1977 direct loan level is in line with the level requested for 1978.

Estimated Effects

This proposal will result in approximately 1,400 fewer direct loans to small businesses in 1977. However, the revised program level of $135 million would still provide over 3,200 direct loans to small businesses in 1977 as compared to 2,673 loans actually approved in 1976. The revised program level also represents a 20 percent increase (+$23 million) above the $112 million in direct loan funds provided in 1976.

SUPPLEMENTARY REPORT
Report Pursuant to Section 1014 (c) of P.L. 93-344

This supplementary deferral report revises a previously submitted deferral report, Deferral No. D77-2, transmitted in a special message to Congress on October 1, 1976.

The amount to be deferred in FY 1977 for the Special Foreign Currency Program account of the Foreign Agricultural Service is now $1,742,928, an increase of $133,320 over the previously proposed deferral of $1,609,608. This change reflects an adjustment in unobligated balances brought forward on October 1, 1976, from an estimated to an actual basis.

Deferral No: D77-2A

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency U.S. Department of Agriculture	New budget authority (P.L. ———) $ ——— Other budgetary resources *2,242,928
Bureau Foreign Agricultural Service	Total budgetary resources *2,242,928
Appropriation title & symbol Special Foreign Currency Program 12X2901	Amount to be deferred: Part of year $ ——— Entire year *1,742,928
OMB identification code: 12-2901-0-1-352	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act
Grant program ☐ Yes ☒ No	☐ Other ———
Type of account or fund: ☐ Annual ☐ Multiple-year ——— (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other ———

Justification

Title I, Sec. 104 of P.L. 480, the Agricultural Trade Development and Assistance Act of 1954 authorizes the use of foreign currencies (acquired from the sale of U.S. farm products under Title I) to carry out programs for developing new markets for U.S. agricultural commodities. The funds appropriated are used to purchase excess foreign currencies necessary to carry out the program. The funds are available until expended, and the unused balance is carried over into the next year. The amount of funds used each year is dependent upon the availability of the U.S.-owned currencies and the availability of worthwhile market development projects in the foreign countries. Current indications are that no more than $500 thousand of the reserved balances brought forward can be utilized effectively in FY 1977. This deferral action is taken under provisions of the Antideficiency Act (31 USC 665) that authorize the establishment of reserves for contingencies.

Estimated Effects

No programmatic or budgetary impact results from this deferral action. Since the funds are used to purchase currencies already owned by the U.S., any outlays shown under this account would be offset by the receipt of a like amount in another account.

Outlay Effects

There is no outlay effect of this deferral because the funds would not be used if made available.

* Revised from previous report.

D77-5A

SUPPLEMENTARY REPORT
Report Pursuant to Section 1014(c) of P.L. 93-344

This report revises Deferral No. D77-5, transmitted to the Congress on October 1, 1976, and printed as House Document No. 94-650.

This revision reflects a change in the amount deferred from $145,665 to $239,139. This increase in the deferral of $93,474 results from an identical increase in the unobligated balance (from an estimate made in the connection with initial apportionment for 1977 to the actual unobligated balance carried in 1977).

Deferral No: D77-5A

	Amount to be deferred: Part of year: $ ____
	Entire year: * 239,139
OMB Identification code: 12-5214-0-2-302	Legal authority (in addition to sec. 1013): [X] Antideficiency Act
Grant program: [ ] Yes [X] No	[ ] Other ____
Type of account or fund: [ ] Annual	Type of budget authority: [X] Appropriation
[ ] Multiple-year ____ (expiration date)	[ ] Contract authority
[X] No-year	[ ] Other ____

* Justification:

Royalties collected under licenses for use of the characters "Smokey Bear" and "Woodsy Owl" are permanently appropriated and utilized for furthering the nationwide forest fire prevention campaign and promoting the wise use of the environment as provided by the Act of May 23, 1952 (18 USC 711), and for Woodsy Owl, 31 USC 488b-3--6. The total budgetary resources available in this program for fiscal year 1977 consist of $234,139 in actual receipts earned in fiscal year 1976 and transition quarter and $280,000 in receipts anticipated for fiscal year 1977. In keeping with routine financial management practices maintained over the years, $239,139 of the total budgetary resources available has been reserved. The reserve is justified on two grounds.

First, the reserve contributes to a consistent, stable program level from year to year which, in turn, promotes more efficient operations. The fiscal year 1977 program is being funded, in part, from reserved balances carried forward from last year. The 1978 program will be partially funded by the estimated receipts being deferred in fiscal year 1977.

* Revised from previous report.

D77-5 A

2

Second, reservation of funds is required to avoid the possibility of a violation of the Antideficiency Act (31 USC 665, (a), (b), (h)). A violation of the sections cited could occur if all the estimates of receipts now deferred were made available and obligated while estimated receipts were not fully realized.

This reserve action is taken under provisions of the Antideficiency Act that authorize the establishment of reserves for contingencies (31 USC 665(c) (2)).

Estimated Effects:

The funds made available are sufficient to carry out 1977 program objectives. If the deferred funds were made available for use and obligated in 1977, the 1978 program level would be below that conducted in the current year because some portion of 1977 receipts normally carried forward into the next fiscal year would not be available.

Release of deferred funds would necessitate development of a plan for an expanded 1977 program.

Outlay Effect

No effect on outlays results from this deferral action.

Deferral No: D77-45

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Commerce	New budget authority (P.L. _____) $ _____
Bureau: General Administration	Other budgetary resources 1,540,063
Appropriation title & symbol: Special Foreign Currency 13X0160	Total budgetary resources 1,540,063
	Amount to be deferred: Part of year $ _____
	Entire year 654,000
OMB identification code: 13-0160-0-1-403	Legal authority (in addition to sec. 1013): [X] Antideficiency Act
Grant program [ ] Yes [X] No	[ ] Other _____
Type of account or fund: [ ] Annual; [ ] Multiple-year _____ (expiration date); [X] No-year	Type of budget authority: [X] Appropriation; [ ] Contract authority; [ ] Other _____

Justification

This account is used to supplement the activities of Domestic and International Business Administration, the National Bureau of Standards, and the National Oceanic and Atmospheric Administration by providing U.S.-owned foreign currencies in those countries where the Department of the Treasury determines that the supply of currencies is in excess of the normal requirements of the U.S. Government. In fiscal year 1977, the "excess" currency countries are: Burma, Guinea, India, Pakistan, Tunisia and Egypt.

There is a total of $1,540,063 in unobligated balances, available until expended, remaining in this account. An estimated $886,063 will be needed during fiscal 1977. The remaining funds of $654,000 are to be deferred throughout fiscal 1977 for use in future years. These funds have been reserved for contingencies under the Antideficiency Act (31 U.S.C. 665).

Estimated Effects

None. Planned activities in 1977 can be conducted within the amount made available. The funds remaining after 1977 will be used to meet future requirements.

Outlay Effects

There is no outlay effect of this deferral.

Deferral No: D77-46

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Commerce	New budget authority (P.L. 94-362): $ 566,215,000 1/
Bureau: National Oceanic and Atmospheric Administration	Other budgetary resources: 62,781,270
Appropriation title & symbol: Operations, Research and Facilities (Ship Construction) 13X1450	Total budgetary resources: 628,996,270
	Amount to be deferred: Part of year: $ ____ Entire year: 7,500,000
OMB identification code: 13-1450-0-1-306	Legal authority (in addition to sec. 1013): ☐ Antideficiency Act ☐ Other ____
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other ____

Justification

This deferral of $7.5 million will delay funding until 1978 for the construction of two new (Class IV) fishery research vessels provided in the Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1977 (P.L. 94-362). The funds are available until expended. Construction of the two new research vessels was provided for in order to give the National Oceanic and Atmospheric Administration (NOAA) additional ship-days to conduct the expanded fisheries resources conservation, assessment, and management efforts required by section 304 of the United States Fisheries Management and Conservation Act of 1976, (P.L. 94-265). The deferral is appropriate because this expenditure of funds is not actually needed at this time to provide the additional ship-days.

Estimated Effects

The construction delay should have no adverse impact on the fisheries resource program in that the need for additional days at sea can be met by five other existing NOAA ships which will be upgraded.

1/ Does not include $55,000 transfer to General Administration, Department of Commerce for water resources planning activity.

D77-46

2

Outlay Effect (estimated in millions of dollars)

Comparison with President's 1978 Budget:	
1. Budget outlay estimate for 1977	$572.7
2. Outlay savings, if any, included in the budget outlay estimate	3.8
Current Outlay Estimate for 1977	
3. Without deferral	576.5
4. With deferral	572.7
5. Current outlay savings (line 3 minus line 4)	3.8
Outlay Savings for 1978	-0.1
Outlay Savings for 1979	-3.7

Deferral No: D77-47

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency Department of Commerce	New budget authority (P.L. _____) $ _____
Bureau Maritime Administration	Other budgetary resources 362,811,241
Appropriation title & symbol	Total budgetary resources 362,811,241
Ship Construction 13X1708	Amount to be deferred: Part of year $ _____
	Entire year 200,900,000
OMB identification code: 13-1708-0-1-406	Legal authority (in addition to sec. 1013): [X] Antideficiency Act

Type of account or fund: [ ] Annual	Type of budget authority: [X] Appropriation
[ ] Multiple-year _____ (expiration date)	[ ] Contract authority
[X] No-year	[ ] Other _____

Justification

This appropriation, available until expended, provides subsidies to U.S. shipyards for the construction and reconstruction of ships for foreign trade.

The deferral is based on the current projections of realizable demand for U.S. shipbuilding. Anticipated new subsidized shipbuilding contracts through the end of fiscal 1977 can be funded within the $161,911,241 apportioned for this period.

The amount being deferred has been reserved for contingencies under the Antideficiency Act (31 U.S.C. 665).

Estimated Effects

The deferral will not delay planned construction or conversion of subsidized ships and will not affect the international competitive position of U.S. shipyards.

Outlay Effect

There is no outlay effect of this deferral.

D77-10B

SUPPLEMENTARY REPORT

Report Pursuant to Section 1014(c) of P.L. 93-344

This report revises Deferral No. D77-10A transmitted to the Congress on December 3, 1976, and printed in the Federal Register of December 8, 1976, (Volume 41, No. 237, Part II).

This revision reflects a net increase of $51,768,837 in the amount to be deferred in fiscal year 1977 for the Military Construction and Family Housing, Defense appropriations. The increase is due to cost savings generated by favorable bids that were experienced during fiscal year 1976. The total amount now deferred is $387,651,837.

The decrease of $371,399,937 in total budgetary resources is the difference between the estimated and actual unobligated balances brought forward on October 1, 1976.

Deferral No: D77-10B

DEFERRAL OF BUDGET AUTHORITY

			387,651,837

Justification

The above amounts in the listed no-year appropriations are currently deferred under provisions of the Antideficiency Act (31 U.S.C. 665) which authorizes the establishment of reserves for contingencies.

* Revised from previous report.

D77-10B

2

Justification (continued)

Due to the long period of time required to construct facilities, the Congress makes appropriations for this purpose available until expended. The above funds are deferred due to administrative delays, such as project designs not being completed and incomplete coordination of projects with either other Federal agencies or local government agencies. Funds will be apportioned for individual projects throughout the year upon completion of project design and/or coordination.

Estimated effects

These deferrals have no programmatic or budgetary effect because the funds could not be obligated at this time, even if they were made available.

Outlay effect

There is no outlay effect resulting from this deferral since the funds could not be used if made available.

D77-24A

SUPPLEMENTARY REPORT

Report Pursuant to Section 1014(c) of P.L. 93-344

This report revises Deferral No.D77-24, transmitted to the Congress on October 1, 1976, and printed as House Document No.94-650.

This revision reflects a change in the amount deferred from $463,585 to $8,080,232. This increase in the deferral results from an identical increase in the unobligated balance available to this program. The actual unobligated balance that developed was $7,616,647 higher than had been originally estimated because of a deobligation of funds.

Deferral No: D77-24A

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Transportation Bureau: Federal Aviation Administration	New budget authority (P.L. ——) $ -0- Other budgetary resources * 8,116,232 Total budgetary resources * 8,116,232
Appropriation title & symbol Civil Supersonic Aircraft Development Termination, 69X0106 Civil Supersonic Aircraft Development, 69X1358	Amount to be deferred: Part of year $ -0- Entire year * 8,080,232
OMB identification code: 69-0106-0-1-405 Grant program ☐ Yes ☒ No	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other
Type of account or fund: ☐ Annual ☐ Multiple-year ——— (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

* Coverage	Total Budgetary Resources	Amount Deferred
Civil Supersonic Aircraft Development Termination	$ 812,283	$ 776,283
Civil Supersonic Aircraft Development	7,303,949	7,303,949
Total	$8,116,232	$8,080,232

Justification

This account finances the termination of the supersonic transport development program. The total cost of settlement of contractor claims and closeouts, airline refunds, completion of specifically designated technology programs, and necessary governmental administrative costs incidental to these activities is included. These funds were appropriated by the Department of Transportation and Related Agencies Appropriation Acts, 1971 and 1972. Because of the difficulty in ending such a complex and massive undertaking, termination has taken a number of years. Settlement is being accomplished as quickly as possible consistent with the legitimate claims of the contractors and the protection of government interests.

Estimated Effects

This deferral action has no programmatic effect.

Outlay Effect

There is no outlay effect of this deferral because the funds would not be used if made available.

* Revised from previous report.

D77-25A

SUPPLEMENTARY REPORT

Report Pursuant to Section 1014(c) of P.L. 93-344

This report revises Deferral No. D77-25, transmitted to the Congress on October 1, 1976, and printed as House Document No. 94-650.

This revision reflects a change in the amount deferred from $276,101,000 to $287,095,484. This increase in the deferral of $10,994,484, results from an identical increase in the unobligated balance (from an estimate made in connection with initial apportionment for 1977 to the actual unobligated balance carried into 1977).

Deferral No: D77-25A

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency Department of Transportation	New budget authority (P.L. 94-387) $200,000,000
Bureau Federal Aviation Administration	Other budgetary resources *294,495,484

	Amount to be deferred: Part of year $ ____ Entire year *287,095,484
OMB identification code: 69-8107-0-7-405	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other ____
Grant program ☐ Yes ☒ No	
Type of account or fund: ☐ Annual 695/78107 Sept 30, 1977 1/ 696/88107 Sept 30, 1978 ☒ Multiple-year 697/98109 Sept 30, 1979 (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other ____

Justification

Funds from this account are used to procure specific Congressionally-approved facilities and equipment for the expansion and modernization of the national airway system. Projects financed from this account include construction of buildings and purchase of new equipment for new or improved air traffic control towers, automation of the enroute airway control system, and expansion and improvement in the navigational and landing aid systems. These funds were appropriated in the Department of Transportation and Related Agencies Appropriation Acts of 1977 and prior years. The estimated total cost for each project is traditionally included in the budget submission and appropriation for the year in which it is requested. Because of the lengthy procurement and construction time for interrelated new facilities and complex equipment systems, it is not possible to obligate all funds necessary to complete each project in the year funds are appropriated. Therefore, it is necessary to apportion funds so that sufficient resources will be available in future periods to complete these projects. This deferral action is consistent with the Congressional intent to provide multi-year funding for the total costs of these projects and is taken under provisions of the Antideficiency Act (31 U.S.C. 665) which authorize the establishment of reserves for contingencies.

* Revised from previous report.

1/ None of these funds are deferred.

D77-25 A

2

Estimated Effects

This deferral action is consistent with normal operations for this program. The amount deferred could not be economically used if made available in fiscal 1977 because of the planned multi-year procurement, construction and installation cycle.

Outlay Effect

There is no outlay effect of this deferral because the funds would not be used if made available.

Deferral No: D77-48

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Transportation Bureau: Federal Highway Administration Appropriation title & symbol: Trust Fund Share of other Highway Programs (Great River Road) 69x8009	New budget authority (P.L. ——— ——— ———) $ ——— Other budgetary resources $91,003,333 1/ Total budgetary resources $91,003,333 1/ Amount to be deferred: Part of year $ ——— Entire year $31,250,000
OMB identification code: 69-8009-0-7-404 Grant program ☒ Yes ☐ No	Legal authority (in addition to sec. 1013): ☐ Antideficiency Act ☐ Other ———
Type of account or fund: ☐ Annual 9-30-77 ...$9,753,333 9-30-78 ...$25,000,000 ☒ Multiple-year 9-30-79 ...$25,000,000 9-30-80 ...$31,250,000 2/ ☐ No-year (expiration date)	Type of budget authority: ☐ Appropriation ☒ Contract authority ☐ Other ———

Justification

The National Scenic and Recreational Highway (Great River Road) was authorized by the Federal-Aid Highway Act of 1973 for the purpose of constructing or reconstructing a two-lane scenic highway in the ten states bordering the Mississippi River. The Great River Road spans over 2,000 miles.

The contract authority provided for this program is liquidated through both the Highway Trust Fund and the General Fund. A total of $121,250,000 in contract authority has been made available through FY 1977 for the program. Of this total, $90,000,000 was made available in the Federal-Aid Highway Act of 1973, and $31,250,000 (the amount to be deferred) was made available in the Federal-Aid Highway Act of 1976. The Highway Trust Fund Share of the $121,250,000 total is $91,250,000, with the balance of $30,000,000 constituting the General Fund Share. The table below displays the origin of the $121,250,000 in contract authority provided through 1977.

1/ This amount is the portion of "Trust Fund Share of other Highway Programs" made available for the Great River Road. Total funds available to the "Trust Fund Share of Other Highway Programs" is $141,097,124.

2/ This amount is deferred.

D77-48
2

($ in thousands)

Origin of Contract Authority	1974	1975	1976	TQ	1977	Total
1973 Highway Act:						
Trust Fund	10,000	25,000	25,000	--	--	60,000
General Fund	10,000	10,000	10,000	--	--	30,000
1976 Highway Act:						
Trust Fund	--	--	--	6,250	25,000	31,250
Totals	20,000	35,000	35,000	6,250	25,000	121,250

In fiscal year 1976, $90,000,000, the full amount of contract authority available at that time, was apportioned for use and allotted to the States (with the exception of a $10 million DOT discretionary reserve).3/ However, as of September 30, 1976, the States had obligated only $370,000 ($246,667 Trust Fund and $123,333 General Fund).

A deferral of the $31,250,000 of contract authority provided by the 1976 Highway Act is proposed for several reasons:

-- State plans for fiscal year 1977 indicate that no more than $34,630,000 will be obligated, falling far short of exhausting the original $90 million of contract authority provided in the 1973 Highway Act. The additional $31,250,000 provided in the 1976 Highway Act is clearly not needed at this time and should be deferred.

-- Present plans envision using only the original $90 million authorized by the 1973 Highway Act.4/ These funds are to be applied to engineering and design and to congressionally-expressed emphasis areas. As noted in House conference Report No. 94-1017, these emphasis areas include "acquisition of areas of archaeological, scentific, or historical importance, necessary easements for scenic purposes, and the construction of roadside rest areas and other appropriate facilities."

The Department of Transportation is currently gathering data on the costs of these emphasis areas. If it is apparent that costs associated with the types of activities mentioned above exceed $90 million, additional contract authority may be proposed for obligation up to a maximum of the additional funding provided in the 1976 Highway Act.

Outlay Effect

There is no outlay effect of this deferral because the funds would not be expected to be used if made available.

3/ Some States may be unable to obligate, in a timely fashion, all funds allocated to them. Therefore, if DOT allocated the entire $90.0 million among the States, some of the funds might lapse. The DOT discretionary reserve was established to provide the balance of funds to those States which have made the most progress in obligating their allocated funds (and, thereby, reducing the risk of a funding lapse).

4/ A general provision is being proposed in the 1978 budget that would permit obligational control at the $90 million level.

Deferral No: D77-49

☒ No-year

Legal authority (in addition to sec. 1013):
☐ Antideficiency Act
☐ Other _____

Type of budget authority:
☒ Appropriation
☐ Contract authority
☐ Other _____

Justification

This deferral withholds funding for an Energy Extension Service provided in the Department of the Interior and Related Agencies Appropriation Act, 1977 (P.L. 94-373). Because the fiscal 1977 authorization legislation for the Energy Research and Development Administration has not been enacted, there does not now exist a sufficient legislative basis on which to apportion funds for an Energy Extension Service.

Estimated Effects

Initiation of an Energy Extension Service will be delayed until such time as a necessary legislative authorization is enacted into law. Congressional disapproval of the deferral will not result in initiation of the program because of the lack of authorizing legislation.

Outlay Effect

There is not expected to be an outlay effect of this deferral. An Energy Extension Service is not now included in the 1977 ERDA Operating expenses outlay estimate. Adjustments to outlays would need to be considered if the program becomes authorized.

Deferral No: D77-50

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Energy Research and Development Administration	New budget authority (P.L. 94-355 &P.L. 94-373): $4,668,838,000
Bureau	Other budgetary resources: 1,577,109,000

Grant program: ☐ Yes ☒ No	☐ Other ____
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other ____

Justification

This action defers $12.0 million in budget authority provided for lower-priority long lead-time research activities in the Magnetic Fusion Energy program until an assessment of the most appropriate timing for these activities is completed. The funds could be more usefully applied once an assessment is made of what information is required and when it is required to most efficiently meet the objectives of the magnetic fusion energy program.

Estimated Effects

The 1977 Magnetic Fusion Energy program is planned for a level of $224 million in outlays. The effects on program outlays of this deferral are as follows:
Outlays for confinement systems will be reduced by $1.0 million to a level of $85.2 million; development and technology efforts will be reduced by $3.5 million to a level of $48.0 million; applied plasma physics research will be reduced by $.5 million to a level of $47.4 million; and reactor projects will be reduced by $1.0 million to a level of $43.6 million. This overall reduction of 2.6 percent in the level of effort for the Magnetic Fusion Energy program in FY 1977, maintains an increase of $85 million (or a 60 percent increase) over the FY 1976 level and will not delay the potential availability of fusion-generated commercial electrical power.

Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other ____

Justification

This deferral delays funding for Program Support-Community Operations provided by the Public Works for Water and Power Development and Energy Research Appropriation Act, 1977, (P.L. 94-355). These funds are being deferred because this special assistance--intended to be provided to the cities of Oak Ridge, Tennessee, Los Alamos, New Mexico, and Richland, Washington, and the counties around Oak Ridge and Los Alamos--is not presently needed.

Of the amount deferred, $1.7 million was to be provided for the schools at Oak Ridge, Los Alamos, and Richland in the event that funds made available to these schools in the past through the School assistance for federally-affected areas (impact aid) program of the Department of Health, Education, and Welfare would not be available. Impact aid funds will be available so that the substitute amounts will not be needed this year.

The remainder of the deferral ($3.7 million) was intended for special payments to the city of Oak Ridge and the counties around Oak Ridge and Los Alamos. The payments are not needed by the counties in fiscal 1977. These communities will receive sufficient special aid in 1977 through the Atomic Energy Act of 1954, as amended, (42 U.S.C. 2208) (Section 168) from payments intended to offset the loss of tax revenues incurred because of the presence of ERDA facilities. (Tax Loss provisions) These counties have not

qualified for payments intended to offset any extra costs to the communities incurred because of the presence of ERDA facilities (Special Burden provisions). In addition, the special payment to Oak Ridge, Tennessee, is reduced because recent tax receipts from Japanese facilities of $2.2 million offset the need for Federal assistance in fiscal 1977.

Estimated Effects

The $1.7 million provided as a substitute for impact aid and the remaining $3.7 million--which in the absence of this deferral would be distributed--will be available to finance general requirements of the program in 1978.

Outlay Effect (in millions of dollars)

Comparison with President's 1978 Budget:	
1. Budget outlay estimate for 1977	$4,217.6
2. Outlay savings, if any, included in the budget outlay estimate	5.4
Current Outlay Estimates for 1977:	
3. Without deferral	4,223.0
4. With deferral	4,217.6
5. Current outlay savings (line 3 - line 4)	$ 5.4
Outlay savings for 1978	-5.4

Deferral No: D77-52

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency Energy Research and Development Administration	New budget authority (P.L. 94-355 & P.L. 94-373) $4,668,838,000
Bureau	Other budgetary resources 1,577,109,000
Appropriation title & symbol: Operating Expenses 89X0100	Total budgetary resources 6,245,947,000
	Amount to be deferred: Part of year $; Entire year 8,200,000
OMB identification code: 89-0100-0-1-999	Legal authority (in addition to sec. 1013): ☐ Antideficiency Act ☐ Other
Grant program ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other

Justification

This deferral delays $8.2 million (from a total of $189.2 million in budget authority available for this program) for the biomedical and environmental research program provided in the Public Works for Water and Power Development and Energy Research Appropriation Act, 1977. The deferral reduces by half the funds available for the environmental policy analysis function, the National Coal Utilization Assessment, and multi-technology integrated assessments. The environmental policy analysis function is intended to review the impact on the energy supply of proposed environmental legislation, government policies, and regulations. The activity is not presently defined well enough to make the best use of all the available funds. It is appropriate that full-funding for this activity be delayed while plans for the efficient use of the deferred funds are developed. Funds for use in developing the National Coal Utilization Assessment and multi-technology integrated assessments are deferred because (1) the coal utilization study, as presently planned, is too broad in scope to achieve optimal benefits and (2) acceptably firm program plans for the multi-technology studies do not exist.

Estimated Effects

The effects of this deferral are as follows:

--The environmental policy analysis function will not, as the result of the funds deferred, have full-funding until the activities to be performed are more adequately defined. Plans that allow for the efficient use of the deferred funds are not expected to be developed before 1978. The deferral will result in a shift in emphasis away from longer-term studies and support for the National Laboratories toward shorter-term, in-house reviews of environmental regulatory, policy, and legislative proposals.

D77-52

2

--The scope of the National Coal Utilization Assessment will be reduced in order to meet only those information needs unfulfilled by earlier studies. The multi-technology studies will be slowed while firm program plans--including the formation of clearly-defined objectives--are developed and reviewed. Regional environmental analyses will be somewhat slowed by this deferral as will liaison efforts by ERDA with the State and regional environmental and energy agencies.

Outlay Effect (in millions of dollars)

Comparison with President's 1978 Budget:	
1. Budget outlay estimate for 1977	$4,217.6
2. Outlay savings, if any, included in the budget outlay estimate	6.2
Current Outlay Estimates for 1977:	
3. Without deferral	4,223.8
4. With deferral	4,217.6
5. Current outlay savings (line 3 - line 4)	$ 6.2
Outlay savings for 1978	-6.2

MONDAY, JANUARY 24, 1977

PART IX

THE PRESIDENT

JIMMY CARTER

PRESIDENTIAL PROCLAMATION OF PARDON OF JANUARY 21, 1977

EXECUTIVE ORDER RELATING TO PROCLAMATION OF PARDON

Title 3—The President

PROCLAMATION 4483

GRANTING PARDON FOR VIOLATIONS
OF THE SELECTIVE SERVICE ACT,
AUGUST 4, 1964 TO MARCH 28, 1973

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

Acting pursuant to the grant of authority in Article II, Section 2, of the Constitution of the United States, I, Jimmy Carter, President of the United States, do hereby grant a full, complete and unconditional pardon to: (1) all persons who may have committed any offense between August 4, 1964 and March 28, 1973 in violation of the Military Selective Service Act or any rule or regulation promulgated thereunder; and (2) all persons heretofore convicted, irrespective of the date of conviction, of any offense committed between August 4, 1964 and March 28, 1973 in violation of the Military Selective Service Act, or any rule or regulation promulgated thereunder, restoring to them full political, civil and other rights.

This pardon does not apply to the following who are specifically excluded therefrom:

2

(1) All persons convicted of or who may have committed any offense in violation of the Military Selective Service Act, or any rule or regulation promulgated thereunder, involving force or violence; and

(2) All persons convicted of or who may have committed any offense in violation of the Military Selective Service Act, or any rule or regulation promulgated thereunder, in connection with duties or responsibilities arising out of employment as agents, officers or employees of the Military Selective Service system.

IN WITNESS WHEREOF, I have hereunto set my hand this 21st day of January, in the year of our Lord nineteen hundred and seventy-seven, and of the Independence of the United States of America the two hundred and first.

Jimmy Carter

[FR Doc.77-2467 Filed 1-21-77;1:04 pm]

EXECUTIVE ORDER 11967

RELATING TO VIOLATIONS OF THE SELECTIVE SERVICE ACT, AUGUST 4, 1964 TO MARCH 28, 1973

The following actions shall be taken to facilitate Presidential Proclamation of Pardon of January 21, 1977:

1. The Attorney General shall cause to be dismissed with prejudice to the government all pending indictments for violations of the Military Selective Service Act alleged to have occurred between August 4, 1964 and March 28, 1973 with the exception of the following:

(a) Those cases alleging acts of force or violence deemed to be so serious by the Attorney General as to warrant continued prosecution; and

(b) Those cases alleging acts in violation of the Military Selective Service Act by agents, employees or officers of the Selective Service System arising out of such employment.

2. The Attorney General shall terminate all investigations now pending and shall not initiate further investigations alleging violations of the Military Selective Service Act between August 4, 1964 and March 28, 1973, with the exception of the following:

(a) Those cases involving allegations of force or violence deemed to be so serious by the Attorney General as to warrant continued investigation, or possible prosecution; and

JC

(b) Those cases alleging acts in violation of the Military Selective Service Act by agents, employees or officers of the Selective Service System arising out of such employment.

3. Any person who is or may be precluded from reentering the United States under 8 U.S.C. 1182(a)(22) or under any other law, by reason of having committed or apparently committed any violation of the Military Selective Service Act shall be permitted as any other alien to reenter the United States.

The Attorney General is directed to exercise his discretion under 8 U.S.C. 1182(d)(5) or other applicable law to permit the reentry of such persons under the same terms and conditions as any other alien.

This shall not include anyone who falls into the exceptions of paragraphs 1(a) and (b) and 2(a) and (b) above.

4. Any individual offered conditional clemency or granted a pardon or other clemency under Executive Order 11803 or Presidential Proclamation 4313, dated September 16, 1974, shall receive the full measure of relief afforded by this program if they are otherwise qualified under the terms of this Executive Order.

THE WHITE HOUSE,
January 21, 1977.

Jimmy Carter

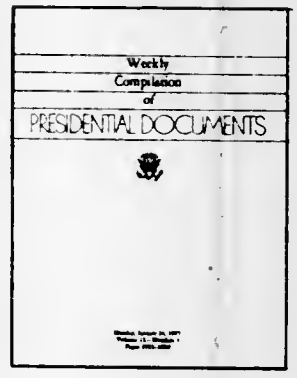
FEDERAL REGISTER, VOL. 42, NO. 15—MONDAY, JANUARY 24, 1977

The authentic text behind the news . . .

The Weekly Compilation of PRESIDENTIAL DOCUMENTS



Administration of Jimmy Carter

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published quarterly, semiannually, and annually. Other features include lists of acts approved by the President and of nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by Office of the Federal Register, National Archives and Records Service, General Services Administration

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

NOTE: There were no items eligible for inclusion in the list of RULES GOING INTO EFFECT TODAY.

List of Public Laws

This is a continuing numerical listing of public bills which have become law, together with the law number, the title, the date of approval, the U.S. Statutes citation, and the price. The list is kept current in the FEDERAL REGISTER and copies of the laws may be obtained from the U.S. Government Printing Office.

S.J. Res. 12..... Pub. Law 95–1
To authorize the United States Secret Service to continue to furnish protection to certain former Federal officials or members of their immediate families (Jan. 19, 1977; 91 Stat. 3) Price: $.35

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Revision of Delegations of Authority to the Judicial Officer

Paragraph (a) of § 2.35 of Part 2, Subtitle A, Title 7, Code of Federal Regulations, is amended to align the authority of the Judicial Officer with the recently adopted "Rules of Practice Governing Formal Adjudicatory Proceedings Instituted by the Secretary Under Various Statutes" (7 CFR Part 1, Subpart H), published in the FEDERAL REGISTER on January 4, 1977 (42 FR 743). The paragraph is revised to read as follows:

§ 2.35 Delegations of authority to the Judicial Officer.

• • • • • •

(a) Pursuant to the provisions of the Act of April 4, 1940 (7 U.S.C. 450c–450g), and Reorganization Plan No. 2 of 1953 (5 U.S.C. 1970 Ed., Appendix, p. 550), the Judicial Officer is hereby authorized to perform any regulatory function as defined in the said Act, which the Secretary of Agriculture is or hereafter may be authorized or required by law to perform, in acting as final deciding officer in adjudication proceedings subject to 5 U.S.C. 556 and 557; in other adjudication proceedings which are or may be made subject to the "Rules of Practice Governing Formal Adjudicatory Proceedings Instituted by the Secretary Under Various Statutes" set forth in 7 CFR Part 1, Subpart H; in rate proceedings under the Packers and Stockyards Act; and in reparation proceedings under statutes administered by the Department. As used herein the term "Judicial Officer" shall mean any person or persons so designated by the Secretary of Agriculture. The provisions of the delegation shall not be construed to limit the authority of the Judicial Officer to perform any functions, in addition to those defined in the said Act of April 4, 1940, which from time to time may be assigned by the Secretary to him.

• • • • • •

Effective date: This amendment shall become effective on February 1, 1977.

Dated: January 18, 1977.

JOHN A. KNEBEL,
Secretary of Agriculture.

[FR Doc.77-2241 Filed 1-24-77;8:45 am]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Navel Orange Reg. 396, Amdt. 1]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation increases the quantity of California-Arizona Navel oranges that may be shipped to fresh market during the weekly regulation period January 14–20, 1977. The quantity that may be shipped is increased due to improved market conditions for Navel oranges. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 907.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for an increase in the quantity of oranges available for handling during the current week results from changes that have taken place in the marketing situation since the issuance of Navel Orange Regulation 396 (42 FR 2665). The marketing picture now indicates that there is a greater demand for Navel oranges than existed when the regulation was made effective. Therefore, in order to provide an opportunity for handlers to handle a sufficient volume of Navel oranges to fill the current market demand thereby making a greater quantity of Navel oranges available to meet such increased demand, the regulation should be amended, as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of Navel oranges grown in Arizona and designated part of California.

(b) *Order, as amended.* The provisions in paragraph (b)(1) (i), (ii), and (iii) of § 907.696 (Navel Orange Regulation 396 (42 FR 2665)) are hereby amended to read as follows:

§ 907.696 Navel Orange Regulation 396.

• • • • • •

(b) • • • (1) • • •

(i) District 1: 1,094,000 cartons;

(ii) District 2: 216,000 cartons;

(iii) District 3: 40,000 cartons.

• • • • • •

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601-674).)

Dated: January 19, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-2238 Filed 1-24-77;8:45 am]

PART 959—ONIONS GROWN IN SOUTH TEXAS

Handling Requirements

This regulation, designed to promote orderly marketing of South Texas onions, imposes minimum grade, size and container standards and requires inspection of fresh market shipments to keep undesirable onions from being shipped to consumers.

Notice of rulemaking with respect to a proposed handling regulation, to be effective under Marketing Agreement No. 143 and Order No. 959, both as amended (7 CFR Part 959), regulating the handling of onions grown in the production area, was published in the December 16, 1976 FEDERAL REGISTER (41 FR 54948). This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.). The notice afforded interested persons until January 3, 1977, to file written comments. None was filed.

Findings. After consideration of all relevant matters, including the proposal set forth in the aforesaid notice which was recommended by the South Texas Onion Committee, established pursuant to said marketing agreement and order, it is hereby found and determined that

the handling regulation, as hereinafter set forth, will tend to effectuate the declared policy of the act.

The recommendations of the committee reflect its appraisal of the expected volume and composition of the 1977 early spring crop of South Texas onions and of the marketing prospects for the shipping season which is expected to begin about March 7.

The grade and size requirements are similar to last season's and are designed to prevent onions of poor quality or undesirable sizes from being distributed in fresh market channels.

Thus, only onions that contain not more than 20 percent defects of U.S. No. 1 grade and are not packed or loaded on Sunday except for export may be shipped from March 7 through May 14, 1977. Again this season in order to provide more orderly marketing from all districts, the inspection and container requirements will be extended through June 11, 1977.

The container requirements should prevent the use of off-size or deceptive containers which could adversely affect the reputation and returns of South Texas onions. However, it will not preclude the use of containers customarily packed for the retail trade. The prohibition on packaging and loading onions on Sunday is recommended principally to provide more orderly marketing by tailoring shipments from the production area more closely to the ability of receiving markets to accept marketings. However, this season handlers may, with approval of the committee, grade, package and load onions on Sunday for export: *Provided*, That they shut down packing and loading operations on the first working day after shipment for the same length of time as they operated on Sunday. This should prevent handlers who ship on Sunday for export from gaining a competitive advantage due to longer packing hours over handlers who do not have export orders.

Exceptions are provided to certain of these requirements to recognize special situations in which such requirements would be inappropriate or unreasonable. Up to 100 pounds of onions may be handled, other than for resale, per day without regard to requirements of this section in order to avoid placing an unreasonable burden on persons handling noncommercial quantities of onions.

The requirements with respect to special purpose shipments will allow the shipment of onions for experimental purposes or the use of containers including bulk bins which have been the subject of test shipments during past seasons, and should encourage exports by allowing the use of containers required for such purposes. Shipments for relief or charity are exempt from inspection and assessment requirements since no useful purpose would be served by regulating such shipments.

The regulation is as follows:

§ 959.317 Handling regulation.

During the period March 7 through June 11, 1977, no handler may package or load onions on any Sunday, except in accordance with paragraph (f) of this section, or handle any lot of onions grown in the production area, except red onions, unless such onions meet the assessment requirements of § 959.217 and the requirements of paragraphs (a), (b), (c) and (d) of this section, or unless such onions are handled in accordance with the provisions of paragraphs (e) or (f) of this section except that the grade and size requirements of paragraphs (a) and (b) and the Sunday packaging prohibition shall terminate at 11:59 p.m. on May 14, 1977.

(a) *Grade requirements.* Not to exceed 20 percent defects of U.S. No. 1 grade. In percentage grade lots, tolerances for serious damage shall not exceed 10 percent including not more than 2 percent decay. Double the lot tolerance shall be permitted in individual packages in percentage grade lots. Application of tolerances in U.S. onion standards shall apply to in-grade lots.

(b) *Size requirements.* (1) "Small"—1 to 2¼ inches in diameter, and limited to whites only;

(2) "Repacker"—1¾ to 3 inches in diameter, with 60 percent or more 2 inches in diameter or larger;

(3) "Medium"—2 to 3½ inches in diameter; or

(4) "Jumbo"—3 inches or larger in diameter.

(5) Tolerances for size in the U.S. onion standards shall apply except that for "repacker" and "medium" sizes not more than 20 percent, by weight, of onions in any lot may be larger than the maximum diameter specified. Application of tolerances in the U.S. onion standards shall apply.

(c) *Container requirements.* (1) 25-pound bags, with an average net weight in any lot of not more than 27½ pounds per bag, and with outside dimensions not larger than 29 inches by 31 inches; or

(2) 50-pound bags, with an average net weight in any lot of not more than 55 pounds per bag, and with outside dimensions not larger than 33 inches by 39½ inches.

(3) These container requirements shall not be applicable to onions sold to Federal agencies.

(d) *Inspection.* (1) No handler may handle any onions regulated hereunder, except pursuant to paragraphs (e) or (f)(3) of this section, unless an appropriate inspection certificate has been issued with respect thereto and the certificate is valid at the time of shipment.

(2) No handler may transport or cause the transportation by motor vehicle of any shipment of onions for which an inspection certificate is required unless each such shipment is accompanied by a copy of the inspection certificate applicable thereto or by documentary evidence on forms furnished by the committee identifying truck lots to which a valid inspection certificate is applicable and a copy of such inspection certificate or committee document, upon request, is surrendered to authorities designated by the committee.

(3) For purposes of operation under this part each inspection certificate or committee form required as evidence of inspection is hereby determined to be valid for a period not to exceed 72 hours following completion of inspection as shown on the certificate.

(e) *Minimum quantity exemption.* Any handler may handle, other than for resale, up to, but not to exceed 100 pounds of onions per day without regard to the requirements of this section, but this exemption shall not apply to any shipment or any portion thereof of over 100 pounds of onions.

(f) *Special purpose shipments and culls.* (1) Onions may be handled in containers customarily packed for the retail trade and in other designated special purpose containers as follows:

(i) Each handler desiring to make such shipments shall first apply to the committee for and obtain a Certificate of Privilege to make such shipments.

(ii) After obtaining an approved Certificate of Privilege, each handler may handle onions packed in 2, 3 or 5-pound containers customarily packed for the retail trade, or 50-pound cartons, if they meet the grade, size, and inspection requirements of paragraphs (a), (b) and (d) of this section and if they are handled in accordance with the reporting requirements established in subparagraph (2) of this paragraph on such shipments: *Provided*, That shipments of 2, 3 and 5-pound containers shall not exceed 10 percent of a handler's total weekly onion shipments, and provided further that shipments of 50-pound cartons shall not exceed 10 percent of a handler's total weekly onion shipments of all onions allowed to be marketed under this section.

(iii) The average gross weight per lot of onions packed in master containers shall not exceed 115 percent of the designated net contents.

(iv) The average net weight per lot of 50-pound cartons shall not exceed 55 pounds.

(2) *Reporting requirements for shipments in designated special purpose containers.* Each handler who handles shipments of onions in containers customarily packed for the retail trade and in other designated special purpose containers, shall report thereon to the committee, the inspection certificate numbers, the grade and size of onions packed, and the size of the containers in which such onions were handled. Such report, in accordance with § 959.80 shall be furnished to the committee in such manner, on such forms and at such times as it may prescribe. Also, each handler of such shipments of onions shall maintain records of such marketings, pursuant to § 959.80(c). Such records shall be subject to review and audit by the committee to verify reports thereon.

(3) *Experimental shipments.* Upon approval of the committee, onions may be shipped in bulk bins with inside dimensions of 47 inches x 37½ inches x 36 inches deep and having a volume of 59,440 cubic inches, or similar containers. Each container shall have a new perforated 2-mil polyethylene liner. Also, onions may be shipped in 40-pound cartons, but not to exceed 4,000 cartons. Such experimental shipments shall be exempt from paragraph (c) of this section but shall not exceed ten percent of a handler's total weekly onion shipments and shall be handled in accordance with safeguard provisions of § 959.54 and this paragraph. Also, the receiver must agree to furnish the committee with a report on the arrival condition of each shipment. Further, upon approval of the committee, onions may be shipped for other experimental purposes exempt from regulations issued pursuant to §§ 959.42, 959.52 and 959.60, provided they are handled in accordance with safeguard provisions of § 959.54.

(4) *Export shipments.* Upon approval of the committee, the prohibition against packaging or loading onions on any Sunday may be modified or suspended to permit the handling of onions for export. If a handler, with approval of the committee, grades, packages and ships onions for export on any Sunday, such handler shall on the first workday following shipment of the onions, cease all grading, packaging and shipping operations for the same length of time as the handler operated grading, packaging and shipping operations on Sunday.

(5) *Onions failing to meet requirements.* Onions failing to meet the grade, size, and container requirements of this section, and not exempt under paragraph (e) of this section, may be handled only pursuant to § 959.126. Culls may be handled pursuant to § 959.126(a)(1). Shipments for relief or charity may be handled without regard to inspection and assessment requirements.

(g) *Definitions.* "U.S. onion standards" mean the United States Standards for Grades of Bermuda-Granex-Grano Type Onions (§§ 51.3195–51.3209 of this title), or the United States Standards for Grades of Onions (Other Than Bermuda-Granex-Grano and Creole Types) (§§ 51.2830–51.2854 of this title), whichever is applicable to the particular variety, or variations thereof specified in this section. The term "U.S. No. 1" shall have the same meaning as set forth in these standards.

All other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 143, as amended, and this part.

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).)

Dated: January 19, 1977, to become effective March 7, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Grain Price Support Regs., 1976 Crop Wheat Supp., Amdt. 1]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1976 Crop Wheat Loan and Purchase Program

On October 13, 1976, Acting Secretary Knebel announced the 1977-crop wheat loan rate, an increase over the 1976-crop wheat loan rate. He further announced that the 1977-crop wheat loan rate would be immediately applicable to the 1976-crop of wheat. Premiums and discounts will remain unchanged.

Additional disbursements on 1976-crop wheat loans already made will be available retroactively for those producers who want their loans increased to the new rates.

Producers who wish to secure loans or adjust present loans at the new rate for 1976 wheat can do so by contacting their local Agricultural Stabilization and Conservation Service Office or Agricultural Service Center.

Under conditions of exceptionally heavy demand for credit in a very limited and overly tight money market, the new loan rates will better assist the producers in holding wheat for improved market prices. In light of this current trend, the 1976-crop national average loan and purchase rate revision is being made now to give farmers timely assistance in the orderly marketing of this year's record crop of wheat.

In order to show the new loan rates, 7 CFR 1421.488(a), published in the FEDERAL REGISTER at 41 FR 35702 and effective as to the 1976 crop of wheat, is revised to read as follows:

§ 1421.488 Loan and purchase rates.

(a) *Basic loan and purchase rates (counties).* Basic rates per bushel for loan and settlement purposes for wheat are established for wheat grading U.S. No. 1 and are as follows:

Since the 1976 crop of wheat has already been harvested in the wheat producing area and the provisions of this amendment are needed to carry out the loan program more effectively, compliance with the notice of proposed rulemaking would be impracticable and contrary to the public interest. Therefore, this amendment is issued without following such procedure.

(Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c); Secs. 107, 401, 63 Stat. 1051, as amended (7 U.S.C. 1445a, 1421))

Effective date: January 25, 1977.

Signed at Washington, D.C., on Jan. 14, 1977.

KENNETH E. FRICK,
Executive Vice President,
Commodity Credit Corporation.

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—GENERAL REGULATIONS

[FmHA Instructions 402.1, 443.1, 444.1, 444.4, 444.5, 444.8, 441.2]

LOANS AND GRANTS

Miscellaneous Amendments

On December 20, 1976, a document was published in the FEDERAL REGISTER (41 FR 55359–55365) proposing to review Part 1803, including a change in title, and numerous miscellaneous amendments to various Parts 1821, 1822, and 1832 of Title 7, Chapter XVIII, in the Code of Federal Regulations, to implement the multiple advance feature of the Loan Disbursement System (LDS) nationwide. This new method of disbursing loan and grant funds applies to the following loan types: Section 502 and 504 Rural Housing loans for construction and repair work, Farm Ownership, Individual Soil and Water, Recreation and Emergency, and enables the Farmers Home Administration to disburse loan and grant funds as they are needed, rather than disbursing them in a lump sum and allowing them to remain idle in a supervised bank account. Also, the multiple advance feature greatly reduces the need for supervised bank accounts as required by Part 1803 published at 35 FR 16399, as amended at 36 FR 17832 and 40 FR 16334. However, supervised bank accounts may still be used when needed.

The notice of proposed rulemaking document published in summary form at 40 FR 49577 dated October 23, 1975, proposing to revise Part 1803, "Supervised Bank Accounts," and a Supplemental Notice published at 40 FR 52854 dated November 13, 1975, indicating that a multiple advance feature of LDS would be field tested before nationwide implementation have been considered in the rule as set forth below. Accordingly, Part 1803, is revised and various sections of Parts 1821, 1822, and 1832, are amended as follows:

PART 1803—LOAN AND GRANT DISBURSEMENT

Sec.
1803.1 General.
1803.2 Policies governing disbursement of funds.
1803.3 Procedures to follow in fund disbursement.
1803.4 Establishing supervised bank accounts.
1803.5 Pledging collateral for deposit of funds in supervised bank account.
1803.6 Authority to establish supervised bank accounts, deposit loan checks and other funds, countersign checks, close accounts, and execute all forms in connection with supervised bank account transactions.
1803.7 Deposits.
1803.8 Withdrawals.
1803.9 County Office records.
1803.10 Reconciliation of accounts.
1803.11 Closing accounts.
1803.12 Request for withdrawals by State Director.

AUTHORITY: 7 U.S.C. 1989, 42 U.S.C. 1480, 42 U.S.C. 2942, 5 U.S.C. 301, sec. 10 Pub. L. 93–357, 88 Stat. 392, delegation of authority by the Secretary of Agriculture, 7 CFR 2.23, delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70, delegation of authority by Director, OEO 29 FR 14764, 33 FR 9850.

§ 1803.1 General.

This Part prescribes the policies and procedures of the Farmers Home Administration (FmHA) to be followed in the disbursement of funds under the Loan Disbursement System (LDS) and in establishing and using supervised bank accounts. The LDS system provides for funds on an as needed basis to substantially reduce interest costs to FmHA borrowers, U.S. Treasury, and FmHA.

(a) *Form FmHA 440–1*, "Request for obligation of Funds," provides for: (1) the obligation only, (2) obligation and check request for the full amount of the loan or grant, and (3) obligation and check request for a partial amount of the loan or grant. The instructions on when and how to use this form are contained in the Forms Manual Insert (FMI) for this form.

(b) *Form FmHA 440–57*, "Acknowledgment of obligated Funds/Check Request," provides for: (1) the initial loan amount check, (2) all subsequent loan checks, (3) making corrections on the data in the loan account as reflected on the form, (4) notifying the Finance Office of the loan closing date and the loan amortization effective date, and (5) providing requested information from the Finance Office. The instructions on when and how to use this form are contained in the Forms Manual Insert for this form.

(c) See applicable regulations for procedures to follow if checks are lost or destroyed.

(d) Borrowers as referred to in this Part include both loan and grant recipients. They are referred to as depositors in the deposit agreements hereinafter described. References herein and in deposit agreements to "other lenders" include lenders and grantors other than FmHA.

(e) Banks referred to in this Part are those in which deposits are insured by the Federal Deposit Insurance Corporation (FDIC).

(f) Supervised bank accounts referred to in this Part are bank accounts established through deposit agreements entered into between either (1) the borrower, the United States of America acting through the FmHA, and the bank on Form FmHA 402–1, "Deposit Agreement," or (2) the borrower, FmHA, other lenders, and the bank on Form FmHA 402–5, "Deposit Agreement (Non-FmHA Funds)."

(g) Form FmHA 402–1 provides for the deposit of funds in a supervised bank account as security for payment of the borrower's indebtedness to FHA and to assure the performance of the borrower's obligations to FHA in connection with a loan and grant.

(h) Form FmHA 402–5 provides for the deposit of funds advanced by other lenders as security for payments of the indebtedness to them and to assure the performance of the borrower's obligation to them in connection with a loan and grant are made in a separate supervised bank account.

(i) "Interest-Bearing Deposit Agreement," available in all FmHA offices provides for the deposit of loan or grant funds that are not required for immediate disbursement in specified interest-bearing deposits, and it is executed in conjunction with Form FmHA 402–1 or Form FmHA 402–5.

§ 1803.2 Policies Governing Disbursement of Funds.

(a) The partial advance feature of the LDS will be utilized whenever possible in accordance with the specific program procedures, except where prohibited by State statutes. The capability to request Treasury Checks on an as needed basis reduces the need for supervised bank accounts. Therefore, supervised bank accounts will be used only in rare instances, e.g.:

(1) When a construction loan is made and the construction is substantially complete, but a small amount is being withheld pending completion of landscaping or some similar item, or a small amount of funds usually not to exceed $2,000, is not disbursed at loan closing. In this case, the amount of funds not disbursed will be requested from the Finance Office using Form FmHA 440–57, or issued by the Finance Office when the predetermined amortization effective date occurs, and placed in a supervised bank account for future disbursement as appropriate.

(2) When a large number of checks will be issued in the construction of a dwelling or other development, as for

example under the "borrower method" of construction or in Operation (OL) loans and Emergency (EM) loans. In such cases, installment checks will continue to be requested from the Finance Office as necessary and deposited in a supervised bank account and disbursed to suppliers, sub-contractors, etc., as necessary. When the construction process requires several checks to be issued at one time the LDS system can still be utilized. Those County Offices authorized to request checks by telephone may request more than one check at a time. The offices not authorized to use the telephone method for requesting checks will use Form FmHA 440–57 to request one check at a time. If more than one check is required, a Form FmHA 440–57 will be prepared for each check.

(3) Association loan and grant funds made on a multiple advance basis need not be deposited in a supervised bank account unless required by State statutes or otherwise determined necessary by the State Director.

(4) Supervised bank accounts will be used only when necessary to assure the correct expenditure of all or a part of loan and grant funds, borrower contributions, and borrower income. Such accounts will be limited in amount and duration to the extent feasible through the prudent disbursement of funds and the prompt termination of the interests of FmHA funds and other lenders when the accounts are no longer required.

(5) Income from the sale of security property or Economic Opportunity (EO) property or the proceeds from insurance on such property will be deposited in a supervised bank account under Form FmHA 402–1 when the County Supervisor determines that it is necessary to do so to assure that the funds will be available for replacement of the property.

(6) When a borrower has clearly demonstrated inability to handle his financial affairs, all or part of his income or other funds may be deposited in the supervised bank account under Form FmHA 402–1 or Form FmHA 402–5 if the County Supervisor determines that such an arrangement is necessary to provide guidance in major financial management practices essential to the borrower's success, subject to the following requirements.

(i) This supervisory technique will be used for a temporary period to help the borrower learn to properly manage his financial affairs. Such a period will not exceed one year unless extended by the District Director; and

(ii) The borrower is agreeable to such an arrangement.

(7) In exceptional cases when the unincorporated EO cooperative or association borrower cannot obtain a position fidelity bond, its income may be deposited as provided for in §§ 1803.5 and 1803.2(f) if another lender is involved.

(b) For all construction loans, and those loans to be advanced in increments, only the actual amount to be disbursed at loan closing will be requested either through the initial submission of Form FmHA 440–1 or through Form FmHA 440–57. Subsequent checks will be ordered as needed by submitting Form FmHA 440–57 to the Finance Office.

(c) Program instructions and FMI's provide information as to the type of note to be utilized and the method of handling advances and the interest accrued thereon. For individual loan programs, interest will accrue from date of the check or date of loan closing whichever occurs later. For association and organization type loans, interest will accrue from the date the check is delivered to the borrower.

(d) For all loan accounts, when the total amount has not been advanced at the amortization effective date, as defined in the forward the remaining ballance to the County Supervisor for appropriate action, unless the County Supervisor notifies the Finance Office of other arrangements.

(e) When a check cannot be negotiated within 20 working days from the date of the check, the County Supervisor will return the check(s) with Form FmHA 440–10, "Cancellation of Loan or Grant Check and/or Obligation," in accordance with applicable regulations.

(f) Funds provided to an FmHA borrower by another lender (through subordination agreements by the FmHA or under other arrangements between the borrower, FmHA, and other lender) that are not used immediately after the loan or grant closing will be deposited in a supervised bank account under Form FmHA 402–5, provided:

(1) The County Supervisor determines such action is necessary to protect FmHA's interest and to assure that the funds will be used for the purposes planned, (2) The other lender is unwilling to control the use of such funds, and (3) The other lender is agreeable to the use of the FHA supervised bank account.

(g) The debt instruments executed at the time of loan closing constitutes an obligation on the part of the Government to disburse all funds at one time or in multiple advances provided the funds are for purposes authorized by the Government at the time of loan closing. This obligatory commitment takes priority over any intervening liens or advances by other creditors regardless of the provisions of the State laws involved.

§ 1803.3 Procedures to follow in fund disbursement.

(a) The County Supervisor will determine during loan approval the amount(s) of loan check(s)—full or partial—and forward such request to the Finance Office by complying with the FMI for Form FmHA 440–1 and Form FmHA 440–57.

(b) *Counties using the telephone to request subsequent advances* will call the designated telephone number provided by the Finance Office and request all subsequent checks by providing the information required on a Form FmHA 440–57.

(c) When check(s) are delivered to the County Office, the County Supervisor will assure himself that the name of the borrower and the amount(s) of check(s) coincide with the request on file. The County Supervisor should assure himself that the check is properly endorsed to insure payment to the intended recipient. An example of such a restrictive endorsement is:

"Pay to the order of (3rd party payee)"—(Contractor, Developer, Sub-Contractor, Building Supply House, etc.) for the purpose of ----------.

(d) *When necessary and only under the circumstances* as listed in paragraph II the County Supervisor will establish or cause to be established a supervised bank account.

§ 1803.4 Establishing supervised bank accounts.

(a) Each borrower will be given an opportunity to choose the bank in which his supervised bank account will be established, provided the bank is a member of the FDIC.

(b) When accounts are established, it should be determined that:

(1) The bank is fully informed concerning the provisions of Form FmHA 402–1 and/or Form FmHA 402–5, and

(2) Agreements are reached with respect to the services to be provided by the bank including the frequency and method of transmittal of bank statements, and

(3) Agreement is reached with the bank regarding the place where the counter-signature will be on checks, particularly those drawn on banks under electronic checking systems.

(c) When possible, County Supervisor will make arrangements with banks which are members of the FDIC under which they will waive service charges in connection with supervised bank accounts established in such banks. However, there is no objection to the payment by the borrower of a reasonable charge for such service.

(d) If the amount of Association, Watershed (WS), Organizational Rural Rental Housing (RRH), Rural Renewal (RN), Resource Conservation and Development (RCD), EO loans to a Cooperative Association, Rural Cooperative Housing (RCH), or Organizational Labor Housing (LH) loan funds and grant funds plus any borrower contributions and funds from other sources to be deposited in the supervised bank account will exceed $40,000 the bank will be required to pledge collateral for the excess over $40,000 before the deposit is made (see § 1803.5 of this Chapter). In addition, a pledge of collateral for any excess over $40,000 in a supervised bank account may be required for other types of loans or grants in amounts in excess of the State Director's approval authorization when determined necessary by the National Office on an individual case basis.

(e) Only one supervised bank account will be established for any borrower regardless of the amount or source of funds, except for RRH loans separate accounts will be established for each project.

(f) When a supervised bank account is established, an original and two copies of Form FmHA 402–1 or Form FmHA 402–5, and the Interest-Bearing Deposit Agreement available in all FmHA offices, when applicable, will be executed by the borrower, the bank, and a County Office employee. The original will be retained in the borrower's case file, one executed copy will be delivered to the bank, and one executed copy to the borrower. An extra copy of the Interest-Bearing Deposit Agreement will be prepared and attached to the certificate passbook, or other evidence of deposit representing the interest-bearing deposit.

(1) If an agreement on Form FmHA 402–1 or Form FmHA 402–5 has previously been executed and Form FmHA 402–6, "Termination of Interest in Supervised Bank Account," has not been executed with respect to it, a new agreement is not required when additional funds are to be deposited unless requested by the bank.

(2) When the note and security instrument are signed by two joint borrowers or by both husband and wife, a joint survivorship supervised bank account will be established from which either can withdraw funds if State laws permit such accounts. In such cases both parties will sign the Deposit Agreement(s).

§ 1803.5 Pledging collateral for deposit of funds in supervised bank account.

(a) Funds in excess of $40,000 for borrowers referred to in § 1803.4(d) deposited in supervised bank accounts, must be secured by pledging acceptable collateral with the Federal Reserve Bank in an amount not less than the excess.

(b) As soon as it is determined that the loan will be approved and the applicant has selected or tentatively selected a bank for the supervised bank account, the County Supervisor will contact the bank to determine:

(1) That the bank selected is a bank that is insured by the FDIC.

(2) Whether the bank is willing to pledge collateral with the Federal Reserve Bank under Treasury Circular No. 176 to the extent necessary to secure the amount of funds being deposited in excess of $40,000.

(c) If the bank is agreeable to pledging collateral, the County Supervisor should complete a form letter available in all FmHA offices in an original and three copies, the original and one copy for the National Office, the second copy for the State Office, and the third copy for the County Office. The form letter should be forwarded to the National Office at least 30 days before the date of loan closing.

(d) The National Office will arrange for the Treasury Department have the bank designated as a depositary unless already designated, and to have collateral pledged.

(e) If, two days before loan closing, the State Director has not received a copy of the Treasury Department's letter to the bank confirming the pledge of collateral, he should contact the National Office, Attention: Financial Support Division.

(f) When the amount of the deposit in the supervised bank account has been reduced to a point where the bank desires part or all of its collateral released, it should write to the Treasury Department, Domestic Banking Staff Bureau of Government Operations, Washington, D.C. 20226, requesting the release and stating the balance in the supervised bank account.

§ 1803.6 Authority to establish supervised bank accounts, deposit loan checks and other funds, countersign checks, close accounts, and execute all forms in connection with supervised bank account transactions.

County Supervisors are authorized to establish supervised bank accounts, deposit loan checks and other funds, countersign checks, close accounts, and execute all forms in connection with supervised bank account transactions and redelegate this authority to authorized collection officers under their supervision who are considered capable of exercising such authority. State Directors will make written demand upon the bank for withdrawals as outlined in § 1803.12 of this Chapter.

§ 1803.7 Deposits.

(a) *Deposits by FmHA Personnel.* (1) Checks made payable solely to the Federal Government, or any agency thereof, and a joint check when the Treasurer of the United States a joint payee, may not be deposited in a supervised bank account.

(2) FmHA personnel will accept funds for deposit in a borrower's supervised bank account ONLY in the form of a check or money order endorsed by the borrower "For Deposit Only," or a check drawn to the order of the bank in which the funds are to be deposited or a loan check drawn on the U.S. Treasury.

(i) A joint check that is payable to the borrower and FmHA will be endorsed by the County Supervisor as provided in Part 1862 of this Chapter.

(ii) Ordinarily, when deposits are to be made from funds which are received as the result of consent or subordination agreements or assignments of income, the check should be drawn to the order of the bank in which the supervised bank account is established or jointly to the order of the borrower and the FmHA. All such checks should be delivered or mailed to the County Office.

(iii) If direct or insured loan funds (other than OL, EM, or EO loan funds) or borrower contributions are to be deposited in a supervised bank account, such funds will be deposited on the date of loan closing afer it has been determined that the loan can be closed. However, if it is impossible to deposit the funds on the day the loan is closed due to reasons such as distance from the bank or banking hours, the funds will be deposited on the first banking day following the date of loan closing.

(iv) Grant funds will be deposited when such funds are delivered.

(v) When funds from any source are deposited by FmHA personnel in a supervised bank account, a deposit slip will be prepared in an original and two copies and distributed as follows: Original to the bank, one copy to the borrower, and one copy for the borrower's case folder. The name of the borrower, the source of funds, and "Subject to FmHA Countersignature", and if applicable, the account number will be entered on each deposit slip.

(vi) A loan or grant check drawn on the U.S. Treasury may be deposited in a Supervised Bank Account without endorsement by the borrower when it will facilitate delivery of the check and is acceptable to the bank. The borrower will be notified immediately of any deposit made and will be furnished a copy if the deposit of this nature is made, the following endorsement will be used:

"For deposit only in the supervised bank account of ----------
(Name of borrower)
in the ----------
(Name of bank and address
---------- pursuant
when necessary for identification)
to Deposit Agreement dated----------."

(vii) Accounts established through the use of an Interest-Bearing Deposit Agreement will be in the name of the depositor and the Government.

(b) *Deposits by Borrowers.* Funds in any form may be deposited in the supervised bank account by the borrower if authorized by the FmHA provided the bank has agreed that when a deposit is made to the account by other than FmHA personnel, the bank will promptly deliver or mail a copy of the deposit slip to the FmHA County Office.

(1) A loan or grant check drawn on the U.S. Treasury may be deposited in a supervised bank account by a borrower, provided the following endorsement is used and is inserted thereon prior to delivery to the borrower for signature:

"For deposit only in my supervised bank account in the ----------
(name of bank and address
---------- pursuant
when necessary for identification)
to Deposit Agreement dated----------."

(2) Funds other than loan or grant funds may be deposited by the borrower in those exceptional instances where an agreement is reached between the County Supervisor and the borrower whereby the borrower will make deposits of income from any source directly into the supervised bank account. In such instances the borrower will be instructed to prepare the deposit slip in the manner described in § 1803.6(a)(v) of this chapter.

§ 1803.8 Withdrawals.

(a) The County Supervisor will not countersign checks on the supervised bank account for the use of funds unless the funds deposited by the borrower from other sources were cash deposits or checks which the County Supervisor

knows to be good or until he knows that the deposited checks have cleared.

(b) Withdrawals of funds deposited under Form FmHA 402–1 or Form FmHA 402–5 are permitted only by order of the borrower and countersignature of authorized FmHA personnel or upon written demand on the bank by the State Director of the FmHA.

(c) Upon withdrawal or maturity of interest-bearing accounts established through the use of an Interest-Bearing Deposit Agreement, such funds will be credited to the supervised bank account established through the use of Form FmHA 402–1 or Form FmHA 402–5.

(d) The issuance of checks on the supervised bank account will be kept to the minimum possible without defeating the purpose of such accounts. When major items of capital goods are being purchased, or a limited number of relatively costly items of operating expenses are being paid, or when debts are being refinanced, the checks will be drawn to the vendors or creditors. If minor capital items are being purchased or numerous items of operating and family living expenses are involved as in connection with a monthly budget, a check may be drawn to the borrower to provide the funds to meet such costs.

(1) A check will be issued payable to the appropriate payee but will never be issued to "cash". The purpose of the expenditure will be clearly shown on Form FmHA 402–2, "Statement of Deposits and Withdrawals," and indicated on the face of the check. When checks are drawn in favor of the borrower to cover items too numerous to identify, the expenditure will be identified on the check if space permits as "miscellaneous."

(2) Normally, OL and EM loan funds will not be withdrawn from the supervised bank account until the lien search has been made and the determination reached that the required security has been obtained. This applies also to withdrawal of funds in secured individual loan cases. However, in those instances when the applicant is unable to pay for the lien search and filing fees from his own funds, a check for this purpose may be drawn on the supervised bank account to meet these loan making requirements.

(3) Ordinarily, a check will be countersigned before it is delivered to the payee. However, in justifiable circumstances such as when excessive travel on the part of the borrower or the County Supervisor would be involved or purchases would be prevented, and the borrower can be relied upon to select goods and services in accordance with the plans, a check may be delivered to the payee by the borrower before being countersigned.

(i) When a check is to be delivered to the payee before being countersigned, the County Supervisor must make it clear to the borrower and to the payee, if possible, that the checks will be countersigned only if the quantity and quality of items purchased are in accordance with approved plans.

(ii) Checks delivered to the payee before countersignature will bear the following legend in addition to the legend for countersignature: "Valid only upon Countersignature of Farmers Home Administration."

(iii) The check must be presented by the payee or his representative to the County Office of the FmHA servicing the account for the required countersignature.

(iv) Such check must be accompanied by a bill of sale, invoice, or receipt signed by the borrower identifying the nature and cost of the goods or services purchased or similar information must be indicated on the check.

(4) For real estate loans or grants, whether the check is delivered to the payee before or after countersignature, the number and date of the check will be inserted on all bills of sale, invoices, receipts, and itemized statements for materials, equipment, and services.

(5) Bills of sale, and so forth, may be returned to the borrower together with the canceled check for the payment of the bill.

(6) Checks to be drawn on a supervised bank account will bear the legend:

Countersigned, not as co-maker or endorser.

(Title)

Farmers Home Administration.

§ 1803.9 County office records.

A record of funds deposited in a supervised bank account will be maintained on Form FHA 402–2 in accordance with instructions for its preparation available at all FmHA Offices. The record of funds provided for operating purposes by another creditor or grantor will be on a separate Form FHA 402–2 so that they can be clearly identified.

§ 1803.10 Reconciliation of accounts.

(a) A bank statement will be obtained periodically in accordance with established banking practices in the area. If requested by the bank, a supply of addressed, franked envelopes will be provided for use in mailing bank statements and canceled checks for supervised bank accounts to the County Office. Bank statements will be reconciled promptly with County Office records. The persons making the reconciliation will initial the record and indicate the date of the action.

(b) All banks statements and canceled checks will be forwarded immediately to the borrower when bank statements and County Office records are in agreement. If a transmittal is used, Form FHA 140–4, "Transmittal of Documents," is prescribed for that purpose.

§ 1803.11 Closing accounts.

When FmHA loan or grant funds or those of another lender have all been properly expended or withdrawn, Form FmHA 402–6 may be used to give the consent of FmHA (and of another lender, if involved) to close the supervised bank account in the following situations:

(a) When FHA loan funds in the supervised bank account of a borrower have been reduced to $100 or less, and a check for the unexpended balance has been issued to the borrower to be used for authorized purposes.

(b) For all loan accounts, except association loans, after completion of authorized loan fund expenditures, and after promptly refunding any remaining unexpended loan funds on the borrower's loan account with FmHA or another lender, as appropriate.

(c) For association loan and grant accounts, when the funds have been expended in accordance with the requirements of Subparts A and I of this chapter the supervised bank account will be closed within 90 days following completion of development unless an extension of time is authorized in writing by the District Supervisor. If the borrower will not agree to closing the account. The County Supervisor will request the State Director to make demand upon the bank in accordance with § 1803.12.

(d) Promptly (1) upon the death of a borrower, except when the loan is being continued with a joint debtor, or (2) when a borrower is in default and it is determined that no further assistance will be given, or (3) when a borrower is no longer classified as "active."

(1) Deceased borrowers.

(i) Ordinarily, upon notice of the death of a borrower, the County Supervisor will request the State Director to make demand upon the bank for the balance of deposit and apply all of the balance after payment on any bank charges to the borrower's FmHA indebtedness. When the State Director approves continuation with a survivor, the Supervised bank account of a deceased borrower may be continued with a remaining joint debtor who is liable for the loan and agrees to use the unexpended funds as planned, provided:

(A) The account is a joint survivorship supervised bank account, or

(B) If not a joint survivorship account, the bank will agree to permit the addition of the surviving joint debtor's name to the existing signature card and Form FmHA 402–1 and/or Form FmHA 402–5 and continue to disburse checks out of the existing account upon FmHA's countersignature and the joint debtor's signature in place of the deceased borrower, or

(C) The bank will permit the State Director to withdraw the balance from the existing supervised bank account with a check jointly payable to the FHA and the surviving joint debtor and deposit the money in a new supervised bank account with the surviving joint debtor, and will disburse checks from this new account upon the signature of such survivor and the countersignature of an authorized FHA official.

(ii) The State Director, before applying the balance remaining in the supervised bank account to the FmHA indebtedness, is authorized upon approval by the Office of the General Counsel (OGC) to release any unobligated balances thereof made by other lenders to the FmHA borrower for specific operating purposes in accordance with subordination agreements or other arrangements between the FmHA, the lender, and the borrower.

(iii) The State Director, upon the recommendation of an authorized representative of the estate of the deceased borrower and the approval of the OGC, is authorized to approve the use of deposited funds for the payment of commitments for goods delivered or services performed in accordance with the deceased borrower's plans approved by FmHA.

(2) *Borrowers in Default.* Whenever it is impossible or impractical to obtain a signed clerk from a borrower whose supervised bank account is to be closed, the County Supervisor will request the State Director to make demand upon the bank for the balance on deposit in the borrower's supervised bank account for application as appropriate:

(i) To the borrower's FHA indebtedness, or

(ii) As refunds of any unobligated advances provided by other lenders which were deposited in the account, or

(iii) For the return of FmHA grant funds to the FmHA Finance Office, or

(iv) For the return of grant funds to other grantors.

(3) *Reclassified Borrowers.* When a borrower's loan has not been paid in full, but the borrower is no longer classified as "active."

(4) *Paid up Borrowers.* A paid up borrower is one who has a balance remains in the supervised bank account and has repaid his entire indebtedness to FmHA and has properly expended all funds advanced by other lenders. In such cases the County Supervisor will (a) notify the borrower in writing that the interests of in the account FmHA and the other lender, if any, in the account have been terminated, and (b) inform the borrower of the balance remaining in the bank account.

§ 1803.12 Request for withdrawals by State Directors.

When the State Director is requested to make written demand upon the bank for the balance on deposit in the supervised bank account, or any part thereof, the request will be accompanied by the following information:

(a) Name of borrower as it appears on Form FHA 402–1 and/or Form FHA 402–5.

(b) Name and location of the bank.

(c) Amount to be withdrawn for refund to another lender of any balance that may remain of funds received by the borrower from such lender as a loan or grant or under a subordination agreement or other arrangement between the FmHA, the other lender, and the borrower.

(d) Amount to be withdrawn, excluding any bank charges, for a refund of FmHA's or other lender's loans or grants.

(e) Other pertinent information including reasons for the withdrawal.

PART 1821—FARM PURCHASE AND DEVELOPMENT LOANS TO INDIVIDUALS

Subpart A—Farm Ownership Loan Policies, Procedures, and Authorizations

1. The introductory paragraph and paragraph (b) of 31821.16 are revised to read as follows:

§ 1821.16 Deferred payments.

Payments may be deferred when income is not available to meet regular installments. Deferment may be up to the end of the second full crop year from the date of the loan providing there is:

* * * * *

(b) A new system of farming or nonfarm enterprise is being established that will require substantial improvements, such as land clearing, draining, leveling, irrigating, basic fertilizing, seeding, other land development, soil improvement, and extensive nonfarm facilities. Deferred payment alternate III on Form FmHA 440–16, "Promissory Note," is authorized for FO loans. Refer to the Form Manual insert for preparing the form.

2. Paragraph (d)(1) and (d)(3) of § 1821.20 are revised to read as follows:

§ 1821.20 Loan approval.

* * * * *

(d) *Distribution of docket forms and loan approval.* * * *

(1) *To the finance office.* Form FmHA 440–1 (copy). After Form FmHA 440–1 is processed in the Finance Office it will return to the County Office a copy of Form FmHA 440–57, "Acknowledgement of Obligated Funds/Check Request," Form FmHA 443–12 (Original), Form FmHA 494–19 (Original when required).

* * * * *

(3) *To the State Office.* If a loan is approved in the State Office, a copy of Form FmHA 440–1 will be retained in the State Office unless exempted by State Supplements and a copy of Form FmHA 443–12 will be retained. If the loan is approved in the County Office, a conformed copy of Form FmHA 440–1 will be sent to the State Office for retention unless exempted by State Supplements and a copy of Form FmHA 443–12 will be sent to the State Office for retention; also, a copy of Form FmHA 492–19 when required by FmHA regulations.

* * * * *

3. Section 1821.21 is revised to read as follows:

§ 1821.21 Requesting title service and accepting option:

When the loan is approved, the County Supervisor will see that title service is requested in accordance with Part 1807 of this Chapter. If this has not already been done, and where land is being acquired also see that Form FmHA 440–35, "Acceptance of Option," is completed, signed, and mailed to the seller. However, in connection with the acceptance of an option on a subdivision, Form FmHA 443–10, "Acceptance of Option by Assignee (Land to be Subdivided)," and Form FmHA 443–11, "Acceptance of Option to Buyer (Land to be Subdivided)," will be used, as appropriate. When the acceptance of option letter has been mailed to the seller, the borrower will arrange with the seller, in consultation with the County Supervisor, to occupy and operate the farm as soon as practicable. Agreements will be in writing and cover such subjects as disposition of growing crops, rentals, payment of maintenance cost, and other pertinent points. The following forms will be used for this purpose, as appropriate:

Form FmHA 443–5, "Short-Term Lease of Optioned Land," Form FmHA 443–6, "Short-Term Lease (Between Purchaser and Seller)," Form FmHA 443–8, "Agreement (Between Seller, Purchaser, and Tenant)."

4. Section 1821.22 (a) and (b)(2) are revised and read as follows:

§ 1821.22 Actions subsequent to loan approval.

(a) *Requesting check.* If real estate will not be taken as security or if real estate is taken as security and satisfactory title evidence is obtained prior to loan approval or when the County Supervisor is reasonably certain that satisfactory title evidence can be obtained so the loan can be closed within 15 days from the date of the check request, loan funds may be requested at the time of loan approval by entering the amount needed in block 21 of Form FmHA 440–1. If funds are not requested when the loan is approved, advances in the amount needed will be requested by using Form FmHA 440–57 in accordance with the FMI. The original 440–57 will be retained in the County Office and a copy sent to the Finance Office. The initial loan advance will be requested when loan approval conditions can be met, satisfactory title to real estate security can be provided, and a date has been set for loan closing.

(1) When all loan funds can be disbursed at or within 15 days after loan closing or if the amount of funds that cannot be disbursed does not exceed $2,000, the total amount of the loan will be requested in a single advance.

(2) When loan funds cannot be disbursed as outlined in subparagraph 1 above, the amount needed to meet the needs of the borrower will be requested by submitting a copy of Form FmHA 440–57 to the Finance Office. The amount of the advances should be as near as possible to meet the needs of borrowers so that the amount in the supervised bank account will be kept at a minimum. The Finance Office will continue to supply Form FmHA 440–57 until the entire loan has been disbursed. The County Supervisor should inform borrowers of their responsibility of notifying the County Office of amounts needed on a timely basis.

(b) *Handling loan checks.*

* * * * *

(2) If a loan check is received and the loan cannot be closed within 20 working days from the date of the check, the County Supervisor will take appropriate

action in accordance with FmHA regulations.

* * * * *

PART 1822—RURAL HOUSING LOANS AND GRANTS

Subpart A—Section 502 Rural Housing Loan Policies, Procedures, and Authorizations

1. Section 1822.7(n) is revised to read as follows:

§ 1822.7 Special requirements.

* * * * *

(n) *Mutual self-help housing loans.* Applicants who are unable to build modest dwellings by customary methods, because of limited income and repayment ability, may build their homes by participating in a mutual self-help housing project. The County Supervisor will not approve RH loans or proceed in the development of a self-help project without prior approval of the State Director. He will, therefore, submit complete information about each family in the proposed self-help project to the State Office for review and request authority to proceed. Information submitted will include items such as the family's size, income, age of family members who will work on the dwelling, the size and cost of the planned dwelling, estimated savings, and the amount of the needed loan. Exhibit A, "Mutual Self-Help Housing Guidelines," will be used as a guide for developing self-help projects and counseling with participating families. The County Supervisor, in counseling with families participating in self-help housing projects, will determine the anticipated time required for construction and the extent to which the borrower will be able to meet loan payments during this period. If the applicants will not have enough income to meet payments of interest accruing at the note rate of interest, or regular amortized loan payments during the construction period, interest and principal payments will be deferred and interest accruing during the construction period will be added to the principal and scheduled for repayment in regular amortized installments over the remaining term of the loan.

* * * * *

2. Section 1822.13, paragraphs (c)(3)(i)(A) and (c)(3)(ii) are revised to read as follows:

§ 1822.13 Loan approval.

* * * * *

(c) * * *
(3) * * *
(i) * * *
(A) *Form FmHA 440–1.* (copy)

* * * * *

(ii) *To the State Office.* If the loan is approved by the County Supervisor, an unsigned copy of Form FmHA 440-1 will be sent to the State Office unless exempted by State instructions, and a copy of Form FmHA 444–2 will be sent to the State Office. If the loan is approved in the State Office, an unsigned copy of Form FmHA 440–1 and a copy of Form FmHA 444–2 will be retained in the State Office.

* * * * *

3. Section 1822.14, paragraph (a) introductory text is revised; paragraphs (a)(1) and (a)(2) are added; and paragraph (b)(2) is revised to read as follows:

§ 1822.14 Actions subsequent to loan approval.

(a) *Requesting check.* When the loan has been approved, approval conditions can be met, any necessary curative actions have been taken to provide a satisfactory title to any real estate security, and a tentative date has been set for loan closing, the County Supervisor or his delegate will complete the original and copy of Form FmHA 440–57 in accordance with the Forms Manual Insert (FMI) and send the copy to the Finance Office. If real estate will not be taken as security or if real estate is taken as security and satisfactory title evidence is obtained prior to loan approval, or when the County Supervisor is reasonably certain that satisfactory title evidence can be obtained so the loan can be closed within 15 days from the date of the check request, the loan check may be requested at the time of loan approval by entering the amount of the check requested in the appropriate block of Form FmHA 440–1.

(1) If all the loan funds will be disbursed at or within 15 days after loan closing or in cases where the amount of funds that cannot be disbursed at loan closing does not exceed $4,000, the total amount of the loan will be requested in a single advance.

(2) If loan funds cannot be disbursed in accordance with time frame in paragraph (a)(1) of this section, the County Supervisor will enter in the appropriate block of Form FmHA 440–1 the amount of the loans funds to be disbursed at loan closing. Additional loan funds will be requested when and in amounts needed by submitting a completed copy of Form FmHA 440–57 to the Finance Office, or by telephone request if the additional funds cannot be received by the day needed using mail service. The County Supervisor should work with developers and others to be sure that funds will be available when needed and, at the same time, to keep the future advances to a reasonable minimum. Any loan funds not requested by the date reported to the Finance Office as the "amortization effective date" for the loan will be disbursed by the Finance Office to the County Office by check dated on the amortization effective date. The check will be deposited in the borrower's supervised bank account if it cannot be endorsed directly to a payee within 20 working days from the date of the check.

* * * * *

(b) *Handling loan checks.*

* * * * *

(2) If a loan Treasury check is received and the loan cannot be closed within 20 working days from the date of the check, the County Supervisor will take appropriate action in accordance with FmHA regulations.

* * * * *

In § 1822.15, paragraphs (b)(2) and (b)(3) are revised and completely restructured to read as follows:

§ 1822.15 Loan closing actions.

* * * * *

(b) * * *

(2) *Promissory note.* Form FmHA 440–16, "Promissory Note," will be used for loans made under this subpart. The note will be prepared and signed in accordance with Part 1807 of this chapter, concerning cosigners, § 1822.10(b)(5), and the FMI.

(i) The payment alternatives of the note will be completed in accordance with the FMI and the following:

(A) Payments of principal and interest will be deferred during the period the dwelling is not expected to be suitable for occupancy as a residence because of construction or repairs to be made. In such cases, accrued interest is added to principal and repaid in regular amortized installments (payment alternative II) after the deferment period.

(B) Payments of principal but not interest may be deferred on subsequent loans when authorized by the Administrator in accordance with Section 1822.17. Payments of principal and interest and principal only may be deferred on RHD loans in accordance with Section 1822.16.

(C) Payments will not be deferred if the dwelling is suitable to be occupied as the borrower's residence when the loan is closed.

(ii) The payment provision of the note will be completed in accordance with the FMI and the following:

(A) The monthly payment provision will be used for all borrowers who regularly receive monthly income and who can repay the loan in 12 equal monthly payments.

(B) The annual payment provision will be used only for borrowers who do not regularly receive monthly income. If installments are not to be deferred, the following provisions apply.

(*1*) The amount of the first installment will be determined by the County Supervisor after considering the immediate debt-paying ability of the borrower. The amount of the first installment may be less, but not more, than a regular annual installment.

(*2*) The amount of the first installment may not be less than the amount equal to interest on the loan from the date of loan closing to January 1 of the calendar year following the calendar year in which the loan is closed.

(*3*) Form FmHA 440–9 should be used to supplement this payment provision to facilitate servicing of loans for borrowers who pay more than one time a year.

(3) *Collection of first installment.* If the annual payment provision of the note is used and payments are not deferred, the first installment of a loan closed during December will be collected at the time of loan closing.

5. Section 1822.16(f) is revised to read as follows:

§ 1822.16 Rural Housing disaster loans.

* * * * *

(f) *Deferred payments.* The initial payments of principal and interest or principal only may be deferred so as not to become due until as late as the third January 1 after the date of loan closing subject to all of the following conditions.

* * * * *

Subpart C—Farm Labor Housing Loan Policies, Procedures and Authorizations

6. In § 1822.74, paragraphs (a), (b)(1) and (b)(3) are revised and read as follows:

§ 1822.74 Action subsequent to loan approval.

(a) *Requesting the check.* * * *

(1) In those cases where relatively large amounts of funds are to be expended for purchase of real estate or for other reasons, separate checks for such purposes may be ordered and endorsed by the borrower to the seller or other appropriate party. This will preclude the necessity for depositing such loan funds in the supervised bank account and reduce the amount of required collateral.

(2) Multiple advances may be used for all loans in accordance with Part 1803 of this chapter. Except as indicated in paragraph (a)(1) of this section, advances will be made only as needed to cover disbursements required by the borrower for a 30-day period. Normally, the advances should not exceed 24 in number or extend longer than 2 years beyond loan closing. Generally contracts provide that a percentage will be retained to assure that the construction will be completed in accordance with the contract documents. The County Supervisor will be sure that these funds are withheld and included in the last advance.

(i) For multiple advances to public bodies whose loans will be secured by bonds, instructions will be provided by the National Office in their letter of authorization.

(ii) For all loans other than public bodies:

(A) Advances will be requested in sufficient amounts to insure that ample funds will be on hand to pay costs of construction, land purchase, legal, engineering or architectural costs, interest, and other expenses, as needed. The borrower will prepare Form FmHA 440–11, "Estimate of Funds Needed For 30-day period." This form will be approved by the County Supervisor. After the County Supervisor determines that the estimate prepared by the borrower is adequate, he will request the advance by indicating the amount of the immediate need on Form FmHA 440–57 in accordance with the FMI and forward it to the Finance Office, St. Louis, Missouri. As an example, for a loan of $200,000 the advances may be made as follows: Assuming that the loan will be closed on July 1, the borrower will complete Form FmHA 440–11 in sufficient time so that the funds will be available on the day of loan closing. The estimates should be broken down for the first advance in a manner similar to the following:

Construction	$43,000
Land acquisition	10,000
Engineering or architectural	14,000
Legal	3,000
Total	70,000

An advance in the amount of $70,000 would then be available on July 1, the date of loan closing. The second advance will also be based on the borrower's estimate prepared on Form FmHA 440–11, and will be prepared in sufficient time so that the estimate amount of funds will be available on August 1. This estimate of funds might be broken down as follows:

Construction	$19,000
Engineering phase	400
Total	19,400

A copy of Form FmHA 440–57 specifying the amount then will be forwarded to the Finance Office. The same routine will be followed for each advance until the project is completed. Loan funds for the payment of interest due on each January 1 will be requested in sufficient time to be available in the December advance.

(B) Any deviation from the multiple advance procedure must have the prior approval of the National Office.

(b) *Handling the loan check.* (1) Any loan check to be deposited in the supervised bank account will be deposited in accordance with Part 1803 of this chapter.

* * * * *

(3) If a loan check other than a check from a private lender is received and the loan cannot be closed within a reasonable amount of time, no more than 20 working days from the date of the check, the County Supervisor will take appropriate action in accordance with FmHA regulations.

* * * * *

7. In § 1822.75, paragraphs (c)(1), (2), (3), (4), and (5) are revised to read as follows:

§ 1822.75 Loan closing.

* * * * *

(c) *Promissory note and insurance endorsement.*

(1) The total amount to be shown in the note will be the amount of the loan appearing on Form FmHA 440–1.

(2) Payments on LH loans will be scheduled in accordance with the FMI for Form FmHA 440–16, "Promissory Note." Any funds included in the loan for the payment of interest will be collected and applied as a regular payment at the time of loan closing. Scheduled principal installments during the first or first and second years after loan closing may be deferred. Interest payments may not be deferred.

(3) Form FmHA 440–16, "Promissory Note," will be used. Preparation will be in accordance with the FMI.

(4) For a loan to a public body whose obligations bear interest exempt from Federal income taxation, the forms of obligation and insurance endorsement will be determined in accordance with Part 1811 of this chapter.

(5) The note will be signed in accordance with Part 1807 of this chapter.

* * * * *

Subpart D—Rural Rental Housing Policies, Procedures, and Authorizations

8. In § 1822.88, paragraph (b) is revised to read as follows:

§ 1822.88 Special conditions.

* * * * *

(b) *Deferred principal payments.* When necessary and advisable, smaller than regular payments of principal or no payments of principal may be provided for the first and second year after loan closing. However, accrued interest must be paid according to the regular installment schedule.

* * * * *

9. In § 1822.93, paragraphs (b)(2) and (b)(3) are revised to read as follows:

§ 1822.93 Loan approval.

* * * * *

(b) *Loan approval action.*

* * * * *

(2) *Approval or disapproval of a loan.*

(i) Approval. When a loan is approved, the approval official will:

(A) Sign the original and one copy of Form FmHA 440–1 and insert his title in the space provided. Indicate on all copies any conditions that must be met at or before the time of the loan is closed. Such conditions could include the amount of surety fidelity bond coverage, other insurance, the title evidence, and any other special requirements. If more space is needed, the form will be supplemented by a memorandum.

(B) Prepare a completed Form FmHA 071–1 and handle in accordance with FmHA Instruction 2015–C.

(C) Forward an executed Form FmHA 440–1 to the applicant in accordance with the Forms Manual Insert (FMI) and FmHA Instruction 2015–C.

(ii) Disapproval. If a loan is disapproved after the docket has been developed, the reason for such action will be shown on the original Form FmHA 440–1. Form FmHA 440–1 will be initialed and dated. The County Supervisor will notify the applicant of the disapproval of the loan and the reasons therefor. The disapproved docket will then be handled in accordance with appropriate FmHA regulations.

* * * * *

(3) *Distribution of items.* After the loan is approved, the contents of the docket will be distributed as follows:

(i) To the Finance Office. Form FmHA 444–5 (original), and Form FmHA 440–1, (copy). After being processed, an original and copy of Form FmHA 440–57, "Acknowledgement of Obligated Funds/Check Request," will be processed and distributed by the Finance Office.

(iii) To the State Office. One copy of Form FmHA 440–1 and one copy of Form FmHA 444–5.

(iii) To the County Office. One copy of Form FmHA 440–1 and the remainder of the loan docket.

(iv) To the OGC. For a loan to an organization, or for a loan to an individual in special cases, the approved loan docket, including any title evidence, will be sent to the OGC for preparation of closing instructions and any special legal documents required for closing. A certified copy of a required loan resolution or the original executed, witnessed loan agreement must be supplied by the applicant in time to be included in the loan docket. No docket will be considered which fails to include such a required resolution or agreement. The OGC will route the docket, including closing instructions and any such legal documents, to the County Office through the State Office for review and for inclusion of any further instructions needed in closing the loan.

(v) To the National Office a copy of Form FmHA 444–5.

10. In § 1822.95, paragraph (c) (1), (2), (3), (4), and (5) are revised to read as follows:

§ 1822.95 Loan closing.

* * * * *

(c) *Promissory note.*

(1) The total amount to be shown in the note will be shown on Form FmHA 440–1. The note will be dated the date of loan closing except as authorized in § 1807.2(f)(8) of this chapter.

(2) Payments on RRH loans will be scheduled on the note in accordance with the Forms Manual Insert (FMI). Monthly payments will be implemented. As provided in § 1822.88(b) the monthly principal installments during the first or the first and second years after loan closing may be deferred. Interest payments may not be deferred.

(3) Form FmHA 440–16, "Promissory Note," will be used. Instructions for preparation for monthly installments in the FMI will be followed.

(4) The note(s) will be signed in accordance with the FMI and Part 1807 of this chapter.

(5) Any funds included in the loan for the payment of interest will be collected and applied as a regular payment at the time of loan closing.

* * * * *

Subpart G—Rural Housing Site Loan Policies, Procedures, and Authorizations

11. § 1822.272(a)(1) is revised to read as follows:

§ 1822.272 Approval or disapproval of a loan.

(a) * * *

(1) Sign the original and one copy of completed Form FmHA 440–1 and insert his title in the space provided.

* * * * *

12. § 1822.274, paragraph (c) is revised and restructured to read as follows:

§ 1822.274 Loan closing.

* * * * *

(c) *Promissory note.* Form FmHA 440–16, "Promissory Note," will be used. Instructions for preparation will be in accordance with the FMI and the following:

(1) The total amount to be shown in the note will be the amount of the loan shown on Form FmHA 440–1. The note will be dated the date of the loan closing. Items (1) through (6b) will be completed in accordance with the FMI for the note. Immediately after the item (6b) following the words "Per Annum" delete the period and type, "Shall be paid at the end of two years from the date of this note," except that prepayments may be made as provided herein below.

(2) The note will be signed in accordance with Part 1807 of this chapter and the FMI for the Form FmHA 440–16.

(3) The note will be signed in accordance with Part 1807 of this chapter and the FMI Form FmHA 440–16, FMI.

(4) Payments shall not be deferred.

* * * * *

13. In § 1822.278, paragraphs (e) and (f) are revised to read as follows:

§ 1822.278 Special requirements for RHS section 523 loans (loans to Organizations providing sites for self-help housing).

* * * * *

(e) *Multiple advances.* These loans may be disbursed over a period not to exceed 18 months from the date of the first advance.

(f) *Note forms.* Form FmHA 440–16, "Promissory Note," will be used. See § 1822.274(c).

* * * * *

PART 1832—EMERGENCY LOANS

Subpart A—Emergency Loan Policies, Procedures, and Authorizations

1. Section 1832.29 is added and reads as follows:

§ 1832.29 Loan fund disbursement.

EM loan funds will be disbursed as provided in Part 1803 of this chapter.

(a) Loan funds may be requested as follows:

(1) An immediate advance of all loan funds may be requested by using Form FmHA 440–1, "Request for obligation of funds," at the time the loan is obligated or by using Form FmHA 440–57, "Acknowledgment of obligated funds/check request," at a later date.

(2) An initial partial advance, may be requested by using Forms FmHA 440–1 or FmHA 440–57. One or more subsequent advances may be requested by using Form FmHA 440–57.

(b) When an actual loss loan is made to an applicant for expenditures he has already made, the loan check may be turned over directly to him after such prior expenditures have been reasonably verified by the borrower's county case file.

2. In § 1832.30, paragraphs (a) through (e) are revised to read as follows:

§ 1832.30 Loan docket forms.

(a) *Promissory Note(s).* One or more notes will be prepared for the full amount of the loan, rounded to the nearest $10. Each scheduled installment will include interest in addition to principal unless deferment of principal is authorized in accordance with § 1832.21(c). The first installment may not be less than the amount equal to interest on the loan from the estimated date or actual date of closing to installment due date.

(1) Form FmHA 441–1, "Promissory Note," will be used when a loan is scheduled for payment in unequal annual installments, or within one full crop year after loan closing.

(2) Form FmHA 440–16, "Promissory Note," will be used when a loan is scheduled for payment in equal annual installments of three years or more. Also, this note may be used when the first two installments are unequal and the balance consists of equal installments.

(3) When the applicant is partnership, the promissory note(s) will be executed so as to evidence the liability of the partnership as well as each partner as an individual. This will be accomplished by typing the name of the partnership above the space provided for signatures and having the note executed by each member of the partnership both as a partner and as an individual. To evidence the liability of the partnership, the words "As Partners" will be typed immediately beneath the name of the partnership and each partner will sign thereunder. To evidence partners' liability as individuals, the words "As Individuals" will be typed at the top of the blank space to the left of the lines for signatures, and each partner will sign thereunder, along with his spouse if required by State Supplements or loan closing instructions.

(4) When the applicant is a corporation, the promissory note(s) will be executed by the corporation acting through its appropriate officials and, in order to evidence their personal liability for the debt, by the principal stockholders as individuals. To evidence the principal stockholders' liability as individuals each principal stockholder will sign the note(s) except in unusual circumstances including legal disability, absence from the country, or legal justification. Their spouses will also sign the note if required by State Instructions or loan closing instructions.

(b) *Form FmHA 440–1, "Request for Obligation of Funds."* This form is used to obligate loan funds to provide certain statistical information about the loan and applicant and to request all or part of the loan funds obligated.

(1) EM loans approved for borrowers presently indebted for an EM loan, but having NEW qualifying losses from a subsequent major or natural disaster for which a MDDN, PEDN, SDDN, or SDAN has been assigned, will show the new appropriate disaster designation number. This number will be used for all subsequent EM loans approved unless the borrower has new qualifying losses from a different disaster for which another disaster designation number has been assigned.

(2) The Finance Office will not process Form FmHA 440–1 for EM loans that are not coded with a disaster designation number.

(c) *Form FmHA 441–5, "Subordination Agreement."* When a subordination agreement is required on crops, livestock, farm equipment, and other chattel property, including items which have become personal property through execution of a severance agreement, Form FmHA 441–5, or other form approved by the State Director with the advice of the OGC, where Form FmHA 441–5 is not legally sufficient, will be used. Subordinations will be for a specified amount of money rather than for a specific period of time.

(d) *Form FmHA 440–6, "Severance Agreement."* This form will be used when required by State Instructions.

(e) *Form FmHA 440–26, "Consent and Subordination Agreement."* Unless otherwise provided by a State Supplement this form, rather than a severance agreement, will be used in Uniform Commercial Code (UCC) States when a security interest is taken in property after it has become a fixture.

* * * * *

3. In § 1832.31, the listing for Form FmHA 440–1 should read as follows:

* * * * *

440–1 Request for obligation of funds, 5, 2-O&C[1] 1–0, 1–C, State director.

* * * * *

4. Section 1832.36 (c) is revised to read as follows:

§ 1832.36 Loan closing.

* * * * *

(c) *Supervised bank accounts.* EM loan funds will only be deposited in a supervised bank account as provided in Part 1803 of this chapter.

(7 U.S.C. 1989, 42 U.S.C. 1480, 42 U.S.C. 2942, 5 U.S.C. 301, Section 10 P.L. 93–357, 88 Stat. 392, delegation of authority by the Secretary of Agriculture, 7 CFR 2.23, delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70, delegations of authority by Director, OEO 29 FR 14764, 33 FR 9850.)

Effective date: These regulations will become effective on January 25, 1977.

Dated: January 19, 1977.

SUBCHAPTER B—LOANS AND GRANTS PRIMARILY FOR REAL ESTATE PURPOSES

[FmHA Instruction 442.12]

PART 1823—ASSOCIATION LOANS AND GRANTS—COMMUNITY FACILITIES, DEVELOPMENT, CONSERVATION, UTILIZATION

Grants for Facilitating Development of Private Business Enterprises and Community Water and Waste Disposal Facilities

DISBURSEMENT OF GRANT FUNDS—CORRECTION

In FR Doc. 76–38119 appearing at page 56626 in the FEDERAL REGISTER of December 29, 1976, the introductory text of § 1823.460 is corrected in the last sentence by adding a comma and the words ", signed statements from other lenders and the applicant showing that such financing is not" immediately following the word "available" and immediately before the word "at."

As corrected, the entire introductory text for § 1823.460 follows:

§ 1823.460 Grant closing and delivery of funds.

Closing is the process by which FmHA determines that applicable administrative actions and required work of the grantee have been completed and delivers the grant funds. If all or a portion of the grant is for construction, the grant will not be closed and funds will not be delivered before construction is completed; however, in exceptional cases grants may be closed at an earlier date with prior concurrence of the National Office. In such exceptional cases, State Directors will forward their recommendations for fund disbursal and the following information to the National Office for concurrence before grant closing or commencement of construction, whichever comes first: The applicant's certification that it has no other resources to pay for completion of the construction; and if interim financing cannot be used due to legal reasons, an opinion from the State Attorney General to that effect, provided by the applicant; or when interim financing is not otherwise available, signed statements from other lenders and the applicant showing that such financing is not available at reasonable rates and terms.

* * * * *

(7 U.S.C. 1989; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70.)

Effective date: This correction shall become effective January 25, 1977.

Dated: January 18, 1977.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

[FEA Ruling 1977–2]

DOMESTIC CRUDE OIL

Further Clarifications to Mandatory Petroleum Price Regulations

I. BACKGROUND

On August 20, 1976, the Federal Energy Administration ("FEA") issued a Notice entitled "Clarifications to Mandatory Petroleum Price Regulations Applicable to Domestic Crude Oil" (41 FR 36172, August 26, 1976). In the August 20 Notice FEA adopted certain regulatory amendments designed to improve the incentives offered under the two tier pricing system. FEA also set forth its conclusions with respect to a variety of technical issues that had arisen in connection with FEA's implementation of the crude oil pricing policy of the Energy Policy and Conservation Act ("EPCA," Pub. L. 94–163). The conclusions with respect to these issues were subsequently contained in "FEA Ruling 1977–1" (42 FR 3628, January 19, 1977). Among the specific issues addressed in the August 20 Notice were the definitions of "property" and "posted price"; whether a well is properly classified as an oil well for purposes of the stripper well property rule; and the partial rescission and modification of "FEA Ruling 1975–15" (including the issue whether a property's producing patterns have been "significantly altered" for purposes of treating a unitized property as a single property under the price regulations.

Although the August 20 Notice addressed many of the issues raised in connection with the price regulations applicable to first sales of domestic crude oil, it was recognized and expressly noted in the August 20 Notice itself, that there might remain some issues that justify further consideration. Accordingly, further comments were requested addressed to the way in which the issues considered in the August 20 Notice were resolved, or to any other issue not specifically considered in that Notice that might need clarification and resolution.

FEA has received written comments specifically in response to the request in the August 20 Notice—and several other comments of a less formal nature—which indicate the need for additional technical clarification of some of the issues addressed in the August 20 Notice. These comments also illustrate the need to clarify a number of issues not otherwise previously resolved. Accordingly, the purpose of this Ruling is to resolve as many as possible of the remaining issues that have arisen with respect to the price regulations applicable to first sales of domestic crude oil. Some of these issues relate to past applications of the definition of property, while others of these issues relate to the reservoir definition of property adopted by FEA effective September 1, 1976. Conclusions stated in this Ruling with respect to past applications of the definition of property will be applied from August 1973 forward. Clarifications stated in this Ruling with respect to the reservoir definition of property which was adopted effective September 1, 1976, will be applied from September 1, 1976 forward.

II. PAST APPLICATIONS OF THE DEFINITION OF "PROPERTY"

As indicated above, comments have been received from interested parties raising several issues with respect to certain conclusions contained in the August 20 Notice (and later restated in "FEA Ruling 1977–1"), which justify further clarification at this time.

A. CONTINUATION AFTER SEPTEMBER 1, 1976 OF PAST APPLICATIONS OF THE DEFINITION OF "PROPERTY"

In "Ruling 1977–1," FEA set forth its conclusions with respect to certain past applications of the definition of property in which departures from a literal application of the "premises described by

an oil and gas lease" concept were permissible. As proper departures from a literal interpretation, FEA discussed generally (1) situations in which a single oil and gas instrument might convey more than one right to produce, which might properly have been treated as more than one "property"; (2) situations in which premises subject to a single right to produce could properly have been segregated into two or more properties for purposes of the price regulations; and (3) situations in which two or more single rights to produce (or parts of two or more single rights to produce) could properly have been aggregated into a single property for purposes of the price regulations. Specific examples of each of these situations were given in "Ruling 1977–1".

Several producers have requested FEA to clarify whether determinations of property status, made in accordance with the clarifications set forth in "Ruling 1977–1," may continue to be used after September 1, 1976.

FEA will permit producers to continue such determinations after September 1, 1976, insofar as they were made in accordance with the clarifications contained in "Ruling 1977–1." Those clarifications are applicable to the definition of property as it was adopted by the Cost of Living Council ("CLC") in August 1973, and which remained substantially unchanged until its amendment by FEA effective September 1, 1976. Moreover, the September 1 amendment did not alter the basic property definition, which continues to provide in part:

> "Property" means the right to produce domestic crude oil, which arises from a lease or from a fee interest * * *.

The substantive effect of the September 1 amendment was to provide an option, whereby producers:

> May treat as a separate property each separate and distinct producing reservoir subject to the same right to produce crude oil, provided that such reservoir is recognized by the appropriate governmental regulatory authority as a producing formation that is separate and distinct from, and not in communication with, any other producing formation.

Accordingly, the September 1 amendment merely provided an option whereby producers might, in certain circumstances on or after September 1, 1976, make property determinations from that time forward on a reservoir-by-reservoir basis. Inasmuch as FEA made no substantive change in the basic property definition as it had existed since promulgation by CLC in August 1973, the clarifications contained in "Ruling 1977–1" continue to be valid with respect to construing "the right to produce crude oil." Therefore, FEA will, after September 1, 1976, continue to recognize property determinations which comport with those clarifications.

Where a producer's historical and consistent property determinations comport with the clarifications contained in "Ruling 1977–1", such determinations, of course, are required to be continued by the producer after September 1, 1976, and may be altered only to the extent that for each such property, the producer may, but is not required to, treat each separate and distinct producing reservoir as a separate property after September 1, 1976, if such reservoir meets the separate reservoir criteria as set forth in the September 1 amendment and further clarified in Part III of this Ruling.

Inasmuch as the clarifications to past applications of property have been recognized by FEA as appropriate departures from a literal application of the "premises described by an oil and gas lease" concept only to the extent that such determinations were employed by a producer historically and consistently since the inception of price regulations when such determinations were first required to be made, such departures are generally not permitted to be adopted for the first time subsequent to FEA's issuance of the August 20 Notice, where the clarifications were first announced. However, FEA recognizes that some producers departed from historical and consistent "property" determinations that would have comported with the clarifications set forth in the August 20 Notice in order to make property determinations based upon a more literal application of the "premises described by an oil and gas lease" concept. Where this was done at the outset under CLC regulations, or where it was done later in response to a CLC, FEO or FEA compliance action, FEA will permit such determinations to be readopted effective September 1, 1976.

B. SEGREGATION OF PREMISES SUBJECT TO A SINGLE RIGHT TO PRODUCE, ACCORDING TO SEVERANCE TAX OR ROYALTY OWNER ACCOUNTABILITY

1. *Royalty owner accountability.* FEA indicated in "Ruling 1977–1" that:

> Where the payment of revenues to state tax authorities or to royalty owners requires separate accounting for production from identified portions of a premises subject to a single right to produce, and where such portions of the premises have consistently and historically been treated as separate properties, such separate treatment may appropriately be continued.

FEA has received a number of inquiries regarding this clarification, specifically with regard to division orders. Although there was no specific discussion of this issue in "Ruling 1977–1," FEA understands division orders generally to be a means whereby the purchasers of crude oil from a property are authorized to distribute the payment for purchases of crude oil produced and sold from the property among the various interest holders who are entitled to such distribution.

Inasmuch as FEA understands the typical division order to act primarily as a means to protect the purchaser against the possibility that payment for crude oil produced and sold from a certain property might be improperly distributed—rather than as an instrument which acts to segregate a premises subject to a single right to produce—the language above was not intended to suggest that the treatment by a producer of each division order as establishing a separate property was appropriate under the price regulations. Moreover, the language above referred only to royalty owners (and not to overriding royalty owners, working interest owners, or other interest owners) and therefore takes into account only the situation in which an operator is required, under a single oil and gas lease, to account separately to different royalty owners (whose interests are limited to specific identified portions of the premises, as delineated in the oil and gas lease) for production from corresponding identified portions of the premises granted in a single oil and gas lease.

To illustrate, such an instance might exist where "O," the owner of an oil and gas interest in Blackacre granted a working interest in Blackacre to a producer "P," reserving a royalty interest in production from the North half of Blackacre to "O's" daughter, and reserving a royalty interest in production from the South half of Blackacre to "O's" son, and where P has historically and consistently treated the North and South halves of Blackacre as separate properties. In this instance, therefore, when originally making property determinations, P might appropriately have determined that for purposes of the price regulations, the North half of Blackacre constituted one property, and the South half of Blackacre constituted a separate property, because of the requirement to account for production from the North half of Blackacre to one royalty owner and the requirement to account for production from the South half of Blackacre separately to a different royalty owner. On the other hand for example, where several small tracts (each having different royalty interests) have been aggregated under a single lease granting a single operating interest in order to meet minimum well spacing requirements, the single premises granted in the lease should have been treated as a single property regardless that payment was made to different royalty owners and accounted for separately on the basis of their proportionate interests in that premises. The mere existence of separate royalty owners and a requirement to account to them separately for their proportionate interests does not satisfy the requirement that there be " * * * separate accounting for production from identified portions of a premises * * *." In other words, with respect to royalty owner accountability, it is only where production and sale of crude oil from an identified portion of a premises subject to a single right to produce entails no duty to account to royalty owners of another identified portion of the premises that separate properties may exist.

2. *Severance tax accountability.* With respect to separate accounting for severance tax purposes, FEA understands that it might be necessary in some instances for a producer to account separately for different types of crude oil produced and sold from different specified portions of a tract in order to determine liability for severance taxes to the state in which the property is located.

It is FEA's understanding that although this is not usually the case, it may be necessary in isolated cases where the severance tax is more in the nature of an ad valorem real estate tax, the rate of which varies according to the value of the crude oil produced and sold from the property. In such a situation, where the imposition of an ad valorem tax has required the producer separately to account for production from separately identified portions of a premises subject to the same right to produce crude oil, and where the producer has since the inception of price regulations consistently treated such distinct portions of the premises as separate properties, such separate property treatment may appropriately be continued. On the other hand, where a severance tax is determined merely by applying a fixed tax rate to total production volume (normally on a firm-wide basis), separate property treatment would not have been appropriate unless "different rates of tax were applied to identified portions of a particular premises."

With respect to severance tax accountability, then, the mere fact that total tax liability may be determined by cumulating production figures that are required to be reported on a well-by-well basis does not mean that there is severance tax accountability on a well-by-well basis. Such separate accountability exists only where separate accounting for production from identified portions of a premises is required in order to determine a severance tax liability which is different from that which would have resulted had there not been such separate accounting.

C. SEPARATE GEOLOGICAL STRUCTURES

FEA made it clear in "Ruling 1977–1" that prior to September 1, 1976:

> A premises which contains multiple reservoirs but which is subject to a single right to produce may not, simply by virtue of the existence of separate reservoirs, be treated as comprising multiple "properties."

Notwithstanding this clear prohibition against separate reservoir treatment before September 1, 1976, FEA has received further comments since August 20, 1976 which indicate that some parties have perceived a conflict between this policy and the discussion in "Ruling 1977–1" involving segregation of a premises subject to a single right to produce in the case of "very large tracts," where FEA indicated that:

> Separate geological formations subject to the same right to produce which have been developed and produced separately, and which have historically and consistently been accounted for separately may continue to be so regarded.

By this language FEA did not intend to imply that separate reservoir treatment was proper in every case before September 1, 1976. Rather, this discussion recognizes that in certain instances extremely large tracts—sometimes large fee interests, but more commonly large state-owned leases—were developed and produced pursuant to a single lease or fee interest under circumstances that made treatment of separate geological formations as separate properties appropriate.

The term "geological formation" was used in this regard to signify not an individual producing reservoir, but a number of producing reservoirs, usually of common characteristics. This term should be understood in this context to be equivalent to the term "geological structure," which has been defined as:

> Layers of sedimentary rock which have been displaced from the horizontal by various forces of nature. Five general categories of structures are recognized: (1) Faults, (2) anticlines, (3) monoclines, (4) synclines, and (5) domes. ("Williams and Myers, Manual of Oil and Gas Terms" at 199.)

FEA will not permit, before September 1, 1976, the treatment of separate reservoirs as separate properties except in those cases where such treatment was permitted by express FEA order or interpretation, as indicated in "Ruling 1977–1." In order further to eliminate any confusion that might exist with respect to geological formations, a technical amendment to the definition of property will be made effective September 1, 1976, to eliminate any reference in that definition to producing "formation."

III. SEPTEMBER 1, 1976 AMENDMENT TO THE DEFINITION OF "PROPERTY"

As FEA indicated in the August 20 Notice, FEA's initial consideration of a reservoir property definition led to the conclusion that the advantages of permitting producers to make property determinations on a reservoir-by-reservoir basis were largely outweighed by the attendant administrative complexity associated with FEA having to (a) make reservoir determination in the first instance, and/or (b) verify asserted determinations previously made by others. FEA's further consideration of this issue resulted in adoption of a system that would permit FEA to "defer to other expert agencies to make reservoir-by-reservoir determinations" (41 FR 36179). Therefore, the September 1, 1976 definition of property permits producers to treat as separate properties, each separate and distinct producing reservoir underlying a tract, to the extent that the reservoir is recognized by the appropriate governmental regulatory authority, and production has been consistently and historically reported as such.

A. RESERVOIR RECOGNITION BY THE APPROPRIATE GOVERNMENTAL REGULATORY AUTHORITY

In requiring governmental recognition of a reservoir before a producer may treat that reservoir as a separate property under the September 1, 1976 amendment, FEA sought to adopt a system whereby FEA auditors could have at their disposal easily understandable records from which could be determined the limits of each producing property. Moreover, the requirement that production must have been reported to the governmental authority on the basis of its reservoir determination, is intended to ensure a necessary supplemental means for FEA to verify production and sales volumes used to determine volumes of upper and lower tier crude oil. By itself, however, the mere requirement by a state or other regulatory authority for producers to report on a reservoir-by-reservoir basis does not constitute "recognition by the governmental authority."

FEA understands that most states in which crude oil is produced in significant volumes have historically regulated the production of crude oil for various reasons, principally to ensure the conservation of the state's natural resources. In this regard, most producing states have empowered regulatory bodies to govern the drilling of wells and the production of oil and gas. In many instances, the state regulatory body limits well density and will not permit the drilling of additional producing wells into a reservoir that has already been developed. Inasmuch as development drilling and production are typically regulated on a reservoir-by-reservoir basis, most state regulatory bodies make some determination with respect to whether production from a new well will affect production from a developed reservoir. Where controlled, rates of production are typically set by the state, and these rates are determined on a reservoir-by-reservoir basis, and production volumes are reported to the state by the producer on a basis that production from each reservoir on each lease can be determined.

What constitutes "recognition" by the appropriate governmental authority will be a matter for resolution on a case-by-case basis by FEA regional officials who are in a position to be more familiar with state practices in their region. Generally, however, the following guidelines shall be used in making such determinations. The mere requirement that a producer must report to the regulatory body on the basis of separate reservoirs does not constitute government recognition. Rather, before a producer may treat a producing reservoir as an FEA property, there must have been some review by the appropriate regulatory body of factual considerations leading to a determination by the regulatory body that the reservoir is separate and distinct from, and not in communication with, any other reservoir subject to the same right to produce. Such determination by the regulatory body must be signified by an affirmative action: the mere receipt by the regulatory body of production or other types of reports, for example, does not constitute the requisite affirmative action.

In some states, the state regulatory body may conduct a formal proceeding to establish the limits of producing reservoirs. At such proceedings, evidence is taken from interested parties, a hearing is held, and after thorough considera-

tion of the record, the state issues an order setting forth its determination as to the physical limits of the reservoir. The state's determination contained in such an order would constitute the requisite affirmative action.

FEA recognizes, however, that not all states have such thorough procedures for making reservoir determinations. Nevertheless, in most states some review of factual considerations is made by the regulatory body, and some affirmative determination (usually contained in an order) as to the limits of the reservoir are made. Where such review is undertaken, FEA will recognize a subsequent affirmative determination by the state as "state recognition" of the existence of a separate reservoir. Provided also that the producer is required to report production volumes to the state on the basis of that determination, the producer may, effective September 1, 1976, treat the reservoir as a separate property.

With regard to properties not subject to the jurisdiction of any state regulatory body, a similar determination by an other governmental authority (e.g., the United States Geological Survey) will be recognized by FEA as "governmental recognition" so long as the determination satisfies the guidelines set forth above.

B. THE REQUIREMENT THAT EACH RESERVOIR BE SEPARATE AND DISTINCT AND NOT IN COMMUNICATION WITH ANY OTHER RESERVOIR SUBJECT TO THE SAME RIGHT TO PRODUCE

The principal objective in permitting producers to treat separate reservoirs as separate properties is to maximize the incentive to increased production by allowing:

> Decisions regarding the exploration for and development of crude oil reserves [to be] made on an individual reservoir basis without regard to the happenstance of production characteristics of other reservoirs underlying the same tract. (41 FR at 36178.)

That is, FEA believes that over the remaining term of crude oil price controls mandated by the EPCA the incentives intended under the two tier price system will work best to the extent that producers are able to make economic determinations and production decisions on the basis of separate producing entities. Inasmuch as FEA also believes that in the absence of crude oil price controls such decisions would be made on a reservoir-by-reservoir basis, the rewards offered under the two tier system of price controls should be structured accordingly

Therefore, for example, FEA believes that where a producer is faced with the expenditure of large sums of capital to initiate measures designed to increase production from one producing reservoir—or to develop new reserves subject to the same right to produce—the producer should be permitted to measure the benefits of such a decision against the real risks, and should not be required to take into account the production characteristics of other producing entities, "the production from which is not physically affected by actions taken with respect to the producing entity under consideration."

The same rationale, however, does not apply where production from two or more reservoirs (that are otherwise separate and distinct) is commingled in the well bore, because the production characteristics become interrelated. For this reason, the September 1 amendment permits a producer to treat as separate properties separate and distinct producing reservoirs only to the extent that they continue not to be in communication with each other. Accordingly, a producer may not treat as separate properties two or more otherwise seperate and distinct producing reservoirs if production from those reservoirs is commingled in the well bore. To the extent that commingled production is begun from two or more reservoirs subsequent to a post-September 1, 1976 determination by the producer to treat the reservoirs as separate properties, the producer must, as of the date that commingled production is begun, treat the two or more reservoirs as a single property. Where this is required, the BPCL for the single property (consisting of the two or more reservoirs with commingled production) will be determined as the sum of the BPCL's for all the reservoirs from which production is commingled. Moreover, the property (consisting of two or more reservoirs with commingled production) will be determined to have a current cumulative deficiency, if any, equal to the sum of the current cumulative deficiency as of the date production is commingled for all the reservoirs from which production is commingled.

In this context of determining two or more reservoirs to be separate and distinct, FEA will recognize production not to be "commingled" in a particular well where the well meets the test of a "multiple completion well" as set forth in "FEA Ruling 1975–12" (40 FR 40828, September 4, 1975), i.e., where:

> (a) The well consists of two (or more) separate tubing strings run inside the casing, each of which carries crude oil from a separate and distinct producing reservoir, and
>
> (b) The production capabilities of each reservoir are unaffected by any change in the production level of any other reservoir producing through the same well.

Additionally, for purposes of determining if two or more reservoirs are "separate and distinct and not in communication with each other," FEA will recognize production not to be commingled—even though produced through a single well—where production from one reservoir is carried through a tubing string and production from a separate and distinct reservoir is carried through the annulus between that tubing string and the casing: *Provided*, That the production capabilities of each reservoir are unaffected by any change in the production level of any other reservoir being produced through the same well: *And provided further*, That production from each reservoir can be separately measured at the wellhead. Where two otherwise separate and distinct producing reservoirs are produced through a multiple completion well that meets either test set forth above, either or both of the reservoirs may be treated as a stripper well property to the extent that production levels of 10 barrels or less per well per day are sustained from that reservoir for 12 consecutive months following a determination to treat the separate reservoirs as separate properties. (See Part III.E. below.) However, the recognition of two reservoirs as separate and distinct (where crude oil is produced through the annulus between a tubing string and the casing), does not affect the test announced in "FEA Ruling 1975–12" for determining when a multiple completion well may be treated as two or more producing wells for purposes of the stripper well property rule, where the reservoirs are not treated as separate properties. In the case of a multiple completion well that produces from two separate reservoirs not treated as separate properties, the multiple completion well may be treated as two or more producing wells for purposes of the stripper well property rule only if it meets the standards set forth in "FEA Ruling 1975–12."

The requirement that two or more otherwise separate and distinct producing reservoirs be treated as a single property because of commingled production applies on a property-by-property basis. That is, where production from two or more otherwise separate and distinct reservoirs is determined to be commingled with respect to a particular property, a producer from a second property may nevertheless treat those same reservoirs as separate properties, so long as production from those reservoirs is not commingled on the second property.

Finally, FEA will not consider production from two or more otherwise separate and distinct reservoirs to be commingled where the reservoirs are produced through different wells but such production is commingled into a single tank battery, provided that production is separately measured at the wellhead, or that production volumes are allocated back to each well based on regular well tests.

C. TREATMENT OF SEPARATE RESERVOIRS AS SEPARATE PROPERTIES

With respect to the treatment of separate reservoirs as separate properties, FEA has not required that such decisions be made immediately for every property. To the contrary, producers are permitted to make separate reservoir determinations at any time on or after September 1, 1976. Of course, post-September 1, 1976 determinations to treat separate reservoirs as separate properties must become effective from the first day of the month in which such a decision is made and may not be applied retroactively beyond the two-month recertification restriction of 10 CFR 212.72. Under no circumstances are such determinations permitted to affect volumes of crude oil produced and sold prior to the September 1, 1976 effective date of the amendment to the definition of property.

Once a producer has elected to treat separate reservoirs subject to a single right to produce as separate properties, such a decision shall be effective from

that time forward with respect to all of the separate and distinct producing reservoirs subject to the same right to produce. To permit the selective segregation of individual reservoirs subject to the same right to produce might encourage selective recalculation of base production control levels ("BPCL") solely to increase levels of new crude oil without promoting any increase in crude oil production.

Moreover, the decision to segregate all of the producing reservoirs subject to the same right to produce, is one that, once made for a particular property, is not subject to modification throughout the duration of price controls applicable to the first sale of domestic crude oil. Purchasers as well as producers must be able to function under a system of price regulation with an adequate degree of finality. To permit the continual redesignation of properties (with the accompanying recomputations of BPCL's) would unnecessarily complicate the operation of the two tier pricing system without providing any discernible additional incentives to producers to increase domestic production. As only one example, such a practice would involve a multitude of additional certifications, and would defeat the purpose of certification requirements intended to be made one time for each property.

The only exception to this policy will be, as indicated above, where commingled production begins subsequent to a post-September 1, 1976 determination to treat separate reservoirs as separate properties, or where two or more reservoirs are subsequently unitized. Where such commingled production is begun for two or more, but less than all, of the reservoirs subject to the same right to produce, only those commingled reservoirs must then be aggregated to form a single property, and all other separate and distinct reservoirs must continue to be treated as separate FEA properties.

Accordingly, for each property, effective September 1, 1976, each producer may treat each separate and distinct producing reservoir as a separate property. To the extent that a single property consists of several reservoirs, only some of which are commingled, the producer may treat the non-commingled reservoirs as separate properties (if all such reservoirs are so treated), and if so, production from commingled reservoirs must be aggregated and treated as a separate property (or properties, if there is more than one set of commingled reservoirs). Moreover, to the extent that the property consists of what the producer believes to be more than one separate and distinct reservoir (only some of which are recognized by the appropriate governmental authority) the decision to treat any one governmentally-recognized reservoir as a separate property must include all such governmentally-recognized reservoirs. Any other production from the property, even if believed by the producer to be from separate and distinct reservoirs, must, in the absence of governmental recognition, be aggregated and treated as if from a single property.

The decision to redesignate properties on the basis of separate and distinct producing reservoirs need not be made for all of a producer's properties. For any particular property, however, a producer must treat separate and distinct reservoirs as separate properties according to the requirements set forth above, if the producer elects so to treat any one separate reservoir. Once separate reservoir designations are made for a specific property, any newly-developed producing reservoir must be designated as a separate property.

D. DETERMINATION OF BASE PRODUCTION CONTROL LEVELS ON A RESERVOIR-BY-RESERVOIR BASIS

In the August 20 Notice, FEA set forth guidelines for recalculating BPCL's for properties redesignated on or after September 1, 1976 on a reservoir-by-reservoir basis. Those guidelines did not, however, address the treatment of current cumulative deficiencies in making such recalculations. The failure of FEA in the August 20 Notice specifically to address the treatment of cumulative deficiencies has generated sufficient comment from interested parties to justify the following, more detailed guidelines, which are to be used by producers that elect to treat separate reservoirs as separate properties in determining BPCL's for those reservoir-properties.

As of the effective date upon which a producer elects to redesignate a particular property on the basis of each separate and distinct reservoir encompassed by that property, the producer must determine a BPCL for each reservoir. This is done generally by making "attributed" calculations for each reservoir as if the reservoir had been a separate property since the inception of the price regulations (i.e., by calculating attributed volumes of new, released and old crude oil for each reservoir for every month from August 1973 to the effective date that the reservoir is treated as a separate property). It should be emphasized that these calculations of attributed volumes are done only for the purpose of determining a BPCL and a cumulative deficiency (if any) for each reservoir-property; no recertification of any volumes of new, released, or stripper well crude oil is intended and none will be permitted.

1. *Reservoirs from which no crude oil was produced in 1972.* As FEA stated in the August 20 Notice, any reservoir from which no crude oil was produced in 1972 will, as of the effective date that the producer elects to treat that reservoir as a separate property, have a BPCL of zero. This result is reached because, had the reservior been treated as a separate property since the inception of price regulations, that "property" would have produced and sold all new crude oil. Inasmuch as the "property" would have produced and sold no old crude oil in 1975, its BPCL effective February 1, 1976, would also have been zero.

Accordingly, for any reservoir that did not produce crude oil in 1972, the BPCL for that reservoir-property will be zero. Inasmuch as production of crude oil could not at any time have been less than the reservoir-property's BPCL, there can be no cumulative deficiency for such reservoir-property.

2. *Reservoirs from which crude oil was produced in 1972.* For any reservoir from which crude oil was produced in 1972, the producer must, as of the effective date that the reservoir is treated as a separate property, determine a BPCL. This will be accomplished as follows:

a. The producer must establish an "attributed BPCL." The initial step in determining a reservoir-property's attributed BPCL is to determine the actual production and sale of crude oil from the reservoir for every month in 1972.

b. Based on those figures, the producer must then establish the attributed volumes of new and released crude oil for the reservoir-property, for each month from August 1973 through January 1976. This is accomplished by comparing actual production and sale volumes for the reservoir for every month during that period with the attributed BPCL. For any month (during that period) in which production and sale from that reservoir did not exceed the attributed BPCL, an attributed cumulative deficiency will exist. Any volumes of attributed cumulative deficiencies must be accounted for in subsequent months in determining volumes of attributed new and attributed released crude oil.

c. The producer must then establish an attributed BPCL based upon average monthly production and sale of attributed old crude oil for the reservoir-property in 1975.

d. The producer will then be able to compare the attributed 1972 BPCL with the attributed 1975 BPCL. The lower attributed BPCL may then be adopted as the reservoir-property BPCL for the period commencing with February 1, 1976 and thereafter.

e. Using the reservoir-property BPCL, the producer should determine attributed volumes of new and old crude oil for every month during the period from February 1, 1976 to the effective date that the reservoir is treated as a separate property. The reservoir-property begins on February 1, 1976 with no attributed cumulative deficiency. However, once attributed new crude oil was "produced and sold" from the reservoir after February 1, 1976, and the actual monthly production and sale of crude oil from the reservoir subsequently fell below the attributed BPCL, an attributed cumulative deficiency must be accounted for. Any attributed cumulative deficiency existing on the effective date that the reservoir is treated as a separate property must then be accounted for before any new crude oil may be sold from that reservior-property. (The use of 1972 or 1975 as the reservoir-property's BPCL may

be done for each reservoir independently, but calculations of attributed volumes of new crude oil must be made as if a BPCL selection had occurred on February 1, 1976. That is, calculations of attributed cumulative deficiencies subsequent to February 1, 1976 may be made based upon either year. However, once those calculations are made, the same base year (either 1972 or 1975) must continue to be used thereafter to determine actual volumes of new and old crude oil.)

B. TREATMENT OF SEPARATE RESERVOIRS AS STRIPPER WELL PROPERTIES

Effective September 1, 1976, prices charged in the first sale of crude oil produced and sold from a stripper well property are exempt from the price regulations applicable to first sales of domestic crude oil. A "stripper well property" is defined in 10 CFR 212.54 as:

> a "property" whose average daily production of crude oil (excluding condensate recovered in non-associated production) per well did not exceed 10 barrels per day during any preceding consecutive 12-month period beginning after December 31, 1972.

Section 212.54 was adopted by FEA on October 29, 1976 (41 FR 40319, November 3, 1976) to implement the congressional policy, set forth in the Energy Conservation and Production Act ("ECPA," Pub. L. 94–385), of promoting continued production of crude oil from marginal properties. In this regard, FEA indicated in the October 29 Notice that:

> as evidenced in the ECPA legislative history, the Congress has intended to *prolong* the production of crude oil from properties that produce 10 barrels per well per day or less, and *not to generate development of new stripper well properties.* (Emphasis added, 41 FR at 48321.)

Accordingly, FEA made it clear that newly-developed properties must establish a 12-month history of marginal production before they may be treated as stripper well properties.

FEA believes that the same policy is appropriately applied to newly-designated properties, whose property status is predicted upon a reclassification, on or after September 1, 1976, by the producer.

The September 1 amendment to the definition of property was designed to ensure that the incentives intended under the two tier price system would be maximized over the remainder of the term of crude oil price controls mandated by EPCA. Accordingly, the option to treat separate reservoirs as separate properties is intended to provide producers with additional incentives, though additional revenues, to increase production, and not to promote property reclassifications solely to achieve stripper well property status.

To the extent that an individual reservoir-property sustains production levels of 10 barrels or less per well per day for a period of 12 consecutive months after being designated a property, that reservoir-property would, of course, qualify as a stripper well property.

IV. UNITIZED PROPERTIES

In order to resolve certain issues that have arisen with respect to the price regulations applicable to unitized properties, it is necessary to review several actions that have been taken by FEA in this regard.

A. RULING 1975–15

On August 31, 1975, FEA issued "Ruling 1975–15" (40 FR 40832, September 4, 1975) addressed to those cases where, due to a change or restructuring since 1972 of the right to produce crude oil, guidance concerning application of the definition of "property" would be required in determining BPCL's. In particular, "Ruling 1975–15" stated that:

> • • • where a unit consists of several leases that were unitized in 1973, the property consists of the unit, and the BPCL is the total 1972 monthly production from all the several leases that now comprise the unit. (40 FR at 40832.)

In response to comments urging reconsideration of "Ruling 1975–15," FEA, on February 1, 1976 (in connection with the first stage rulemaking to implement the pricing policy of the EPCA) rescinded that part of the Ruling which required producers of unitized properties to total all the BPCL's of the participating leases and to treat the unit as a single property as of the date of unitization. Instead, producers of unitized properties were permitted to continue to determine quantities of upper tier crude oil on a lease-by-lease basis until the actual implementation of enhanced recovery operations or until such time as there has been "a significant alteration in producing patterns," whichever occurred first. The February 1 Notice did not define "a significant alteration in producing patterns" but indicated instead that a Ruling would follow, to set forth objective criteria to be used in determining when a significant alteration of producing patterns has occurred on a unitized property. (Those objective criteria were subsequently set forth in the August 20 Notice.) With respect to "enhanced recovery units" required to establish a unit BPCL on or after February 1, 1976, FEA adopted in the February 1 Notice a new unitized property rule (10 CFR 212.75) which provided a means for preserving under the unit BPCL the benefits of the stripper well status of any leases included in the unit. Section 212.75 was subsequently amended, effective September 1, 1976, to provide a rule whereby unit BPCL's established on or after that date are permitted to reflect upper tier crude oil volumes previously produced and sold from the previously separate properties which comprise the unit. The result of these actions concerning unitized properties can be summarized as follows:

1. *All unitized properties required to establish a unit BPCL on or after September 1, 1976.* A unit base production control level must, in general be established as of the effective date of unitization, and the producer must treat the unit as a single property. Section 212.75 provides an exception to this requirement where (1) the producer has certified to FEA[1] its intention to continue to determine volumes of upper, lower and stripper well crude oil separately for all properties that constitute the unitized property, and (2) the unitized property has not sustained a significant alteration in producing patterns. A significant alteration in producing patterns is defined in § 212.75 as the occurrence of either (a) the application of extraneous energy sources by the injection of liquids or gases into the reservoir, or (b) the increase in production allowables for any property that comprises the unitized property. Once a significant alteration in producing patterns has occurred, a unitized BPCL must be established.

Regardless whether established as of the effective date of unitization or as of the time that a significant alteration in producing patterns occurs, a unit BPCL established on or after September 1, 1976 is the sum of (1) the total average monthly production and sale of old crude oil during the 12-month period immediately preceding the establishment of a unit BPCL, from all the properties that constitute the unitized property, plus (2) the average monthly production and sale of crude oil during the 12-month period immediately preceding the establishment of a unit BPCL, from all stripper well properties—qualified as such prior to the establishment of a unit BPCL—that constitute the unitized property.

Once a unit BPCL has been established, it may be eligible for adjustment under § 212.76. In determining upper tier crude oil volumes each month following the establishment of a unit BPCL, the producer measures the entire current monthly production and sale of crude oil from the unit and compares that volume against the unit BPCL. Current monthly production and sale volumes in excess of the unit BPCL qualify for treatment each month as new crude oil produced and sold from the unitized property unless there is a cumulative deficiency.

Section 212.75 also contains provisions for determining volumes of imputed new crude oil and volumes of imputed stripper well crude oil produced and sold each month for a unitized property for which a unit BPCL is established on or after September 1, 1976. Volumes of imputed new crude oil may be sold each month at a price not to exceed the upper tier ceiling price; volumes of imputed stripper well crude oil may be sold each month at exempt prices. Imputed new crude oil is a number equal to the average monthly production and sale of new (and released, if any) crude oil during the 12-month period immediately preceding the establishment of a unit BPCL, from all the properties that comprise the unitized property. Imputed stripper well crude oil is a number equal to the average monthly production and sale of crude oil during the 12-month period immediately preceding the establishment of a unit BPCL, from all previously qualified stripper well properties that constitute the unitized property. In the case of some stripper well properties, the 12-month period immediately preceding the establishment of a unit BPCL may include some period of time (up to eleven months) during which the stripper well property had not yet qualified as such.

2. *Enhanced recovery unitized properties required to establish a unit BPCL on or after February 1, 1976 and before September 1, 1976.* Section 212.75, adopted on February 1, 1976, is applicable only to enhanced recovery unitized properties which established a unit BPCL on or after February 1, 1976. Section 212.75(a) required that the unitized property be treated as a single FEA property and a unit BPCL established "as of the date of implementation of enhanced recovery operations on a unit or as of the date production patterns with respect to individual leases within a unit are substantially altered (which ever date occurs first) • • •." However, § 212.75 did not, until September 1, 1976, contain a definition of "significant alteration in producing patterns." Accordingly, for any enhanced recovery unit formed during that time the producer was permitted to continue determinations of upper and lower tier crude oil volumes on a lease-by-lease basis until such time as enhanced recovery operations had begun. After such an occurrence, however, the unitized property was required to be treated as a single property and a unit BPCL had to be established. The unit BPCL was determined to be the sum of (1) the total average production and sale of old crude oil during the 12-month period immediately preceding the establishment of a unit BPCL, for all properties that constitute the unitized property, plus (2) the average monthly production and sale of crude oil during the 12-month period immediately preceding the establishment of a unit BPCL, from all previously-qualified stripper well properties that constitute the unit. After a unit BPCL had been established, the producer was required to compare the total production and sale of crude oil from the unitized property with the unit BPCL to determine current volumes of new crude oil. Section 212.75 as in effect from February 1, 1976 until August 31, 1976, contained a provision, similar to the current provisions for imputed stripper well crude oil, whereby certain previously-qualified volumes of stripper well crude oil could be sold from the unit each month as upper tier crude oil. It did not, however, include a provision similar to the current provision for imputed new crude oil.

With respect to any enhanced recovery unitized property formed during the period February 1, 1976 to September 1, 1976, for which a unit BPCL was not established, the current definition of "significant alteration in producing patterns," adopted in the August 20 Notice and effective September 1, 1976 is applicable effective September 1, 1976. Accordingly, if such an alteration in producing patterns (as that term is now defined in § 212.75) did occur prior to September 1, 1976, the unitized property must be treated as a single property and a unit BPCL must be established under § 212.75 as of September 1, 1976, if the producer had not begun to treat the unit as a single property as of the time that a significant alteration in producing patterns occurred. If such an alteration in producing patterns has not occurred as of September 1, 1976, but does occur subsequent to September 1, 1976, the unitized property must at that time be treated as a single property and a unit BPCL must be established, and the provisions of § 212.75 then in effect shall apply. Of course, once a unit BPCL has been established, it may be eligible for adjustment under § 212.76.

3. *All unitized properties required to establish a unit BPCL prior to February 1, 1976 and unitized properties required to establish a unit BPCL prior to September 1, 1976.* Determinations of new, released and stripper well crude oil for units formed prior to the date on which unit BPCL regulations were adopted (February 1, 1976 for enhanced recovery units and September 1, 1976 for all units) are subject to the provisions of "FEA Ruling 1975–15" as modified on February 1, 1976. Accordingly, all such units formed during or after 1972 were required to calculate a BPCL by aggregating the BPCL's of all the participating properties at such time as significant changes in the unit's producing patterns occurred (and with respect to enhanced recovery unitized properties beginning February 1, 1976, as of the date of implementation of enhanced recovery operations). To the extent that a unit BPCL was required to be established prior to the effective date of any applicable unit BPCL regulation, the aggregation of BPCL's pursuant to "Ruling 1975–15" did not afford any means to reflect the prior stripper well lease status or production and sale of volumes of new or released crude oil of the previously separate properties which comprise the unit. Although a regulatory definition of "significant alteration in producing patterns" was not provided until September 1, 1976, that definition will be considered as guidance in audits and compliance cases in determining whether a significant alteration has occurred with respect to such units. FEA will, however, on a case-by-case basis, permit unit operators to justify the establishment of the date of significant alteration in producing patterns in such units on reasonable bases other than those specified by the present definition. If no such alteration has occurred as of September 1, 1976, determinations of upper tier and stripper well crude oil volumes may continue to be made on a lease-by-lease basis until such time as a significant alteration does occur, at which time the unitized property must be treated as a single property and a unit BPCL must be established. As of the time that a unit BPCL is established, the provisions of § 212.75 then in effect are applicable, and the unitized property may be eligible for a BPCL adjustment pursuant to § 212.76.

B. UNITIZATION OF TWO OR MORE PREVIOUSLY-QUALIFIED STRIPPER WELL PROPERTIES

Effective February 1, 1976 (with respect to enhanced recovery units for which a unit BPCL is established after that time) and effective September 1, 1976 (with respect to any unitized property for which a unit BPCL is established after that time), § 212.75 provides a mechanism to ensure that producers of crude oil from previously-qualified stripper well properties will not be deterred for economic reasons from entering the unit. This mechanism provides generally that an amount equal to current volumes of crude oil produced from participating stripper well properties may continue to be sold from the unit as stripper well crude oil after the establishment of a unit BPCL. (A similar rule, effective September 1, 1976, is designed to encourage producers of new crude oil to participate in the unitization.)

FEA has determined that this mechanism is the most effective method to remove the disincentive to unitization by producers of stripper well crude oil. The unit BPCL regulations do not, however, permit the unitized property to qualify as a stripper well property until the unitized property itself has sustained an average daily production of 10 barrels or less per well for 12 consecutive months following the establishment of a unitized BPCL. There are basically two reasons for this policy.

First, as noted above, FEA believes that the concept of "imputed stripper well crude oil" is adequate to ensure the participation in a unitized project and continued production of crude oil from previously-qualified stripper well properties.

Second, to permit a unit to qualify as a stripper well property on the basis of the production characteristics of its participating properties would likely encourage the selective unitization of marginal and non-marginal properties merely to obtain exempt stripper well property status for other than truly marginal properties. Such a result would obviously not comport with the congressional policy behind the exemption contained in the Energy Conservation and Production Act (ECPA, Pub. L. 94–385).

The only appropriate exception to this policy would appear to be for a unitized property in which all participating properties have previously qualified as stripper well properties. In such case, under a proposal set forth in a contemporaneous Notice of Proposed Rulemaking, the unitized property would be treated as a stripper well property as of the effective date of unitization.

[1] Such certifications should be made pursuant to 10 CFR 205.90 and filed with the Deputy Assistant Administrator for Compliance, FEA, 2000 M Street, N.W., Washington, D.C. 20461.

V. Applicability of the Stripper Well Property Rule to Condensate Produced From Gas Wells

Since January 1, 1975, a producer may not include gas wells in the calculation of a property's per-well average daily production to determine whether the property qualifies as a stripper well property. (40 FR 40818, September 4, 1975.) In order to resolve the uncertainty that had arisen due to diverse state criteria for classifying producing wells as either gas wells or oil wells, FEA undertook in the August 20 Notice to provide a functional test whereby producers might be able to determine whether a particular well may be considered an "oil well" for purposes of the stripper well property rule, regardless whether the particular well has been classified as a gas well for other purposes by the state regulatory authority.

FEA preliminarily concluded in the April 13 Notice that the inclusion of a well for purposes of determining stripper well property qualification is only prohibited to the extent that the well provides only non-associated production of natural gas and condensates, and that if a well produces some crude oil, the well would qualify as an oil well for purposes of the stripper well property rule. After soliciting comments on this distinction, FEA concluded in "FEA Ruling 1977–1" that:

> If a well produces from an associated reservoir (i.e., a reservoir in which gas occurs in association with crude oil), that well may be included to determine if the property is a stripper well property only if crude oil is produced from that well. If only condensate is produced, in association with the gas, the well may not be included to determine if the property is a stripper well property. On the other hand, if a well is producing non-associated gas (i.e., free gas not in contact with crude oil in the reservoir), or only natural gas (even if from an associated gas reservoir), that well may not be included as a producing well because it does not produce crude oil.

FEA has continued to receive inquiries, however, concerning the crude oil/condensate distinction, which suggest that there is an inconsistency between the distinction drawn in "Ruling 1977–1" and the definition of "crude oil" in 10 CFR 212.31, which includes condensate:

> "Crude oil" means a mixture of hydrocarbons that existed in liquid phase in underground reservoirs and remains liquid at atmospheric pressure after passing through surface separating facilities. *"Crude oil" includes condensate recovered in associated and non-associated production by mechanical separators, whether located on the lease, at central field facilities, or at the inlet side of a gas processing plant.* (Emphasis added.)

The definition of "crude oil" in § 212.31 includes condensate in recognition of the treatment of condensate as crude oil by producers on a historical pricing basis. (See 40 FR 40818, September 4, 1975.) However, FEA recognizes that some gas wells produce condensate, which under the § 212.31 definition is treated as "crude oil" for purposes of Subpart D, but which does not constitute crude oil for purposes of the crude oil/condensate distinction which is used to differentiate oil wells from gas wells for purposes of stripper well property qualification.

Thus, a distinction between crude oil and condensate is necessary for purposes of determining whether the particular well from which the condensate is produced may be counted in determining the property's per-well average daily production for purposes of the stripper well property rule. For all other purposes, condensate, whether recovered in associated or non-associated production, is treated as crude oil under Subpart D in determining a first sale price.

FEA understands that associated production occurs if hydrocarbons in both liquid and gaseous states exist together in one reservoir. Thus, a reservoir in which gas occurs in solution with crude oil would produce crude oil and gas in "associated" production. An oil reservoir having a gas cap normally produces crude oil and gas in associated production but could (in theory though not ordinarily in practice) produce crude oil and gas in either associated or nonassociated production depending on the manner in which the well has been completed in the reservoir. Non-associated production is understood to occur when both liquid and gaseous hydrocarbons are jointly produced from a reservoir in which they exist in the reservoir only in a gaseous state.

The further tests described below are not fully definitive, but should in most circumstances provide an adequate basis for distinguishing "associated" from "non-associated" production for purposes of determining if the particular well may be included in determining a property's per-well average daily production. Generally, each of the following tests should indicate whether the condensate is recovered in "associated production."

A. *Phase test.* FEA does not expect that a phase test will actually be conducted for each well, or reservoir, and none is required. However, if such tests have been conducted or if phase behavior is inferable from other relevant well or reservoir data, a valid determination can probably be made. If as the hydrocarbon stream rises from the reservoir to the surface a bubble point occurs, (that is, the entrained dissolved gas separates from the liquid into bubbles), the joint production of oil and gas is said to be "associated." If, under production conditions of pressure reduction at reservoir temperature the hydrocarbon stream exhibits a dewpoint, the joint production of fluid and gas is said to be "non-associated."

B. *Production method test.* If the hydrocarbon stream is raised to the surface by pumping, the joint production of liquid and gas is almost surely "associated." If the stream rises to the surface by its own underground pressure, the joint production is more likely "non-associated" than "associated." This delineation is particularly true for old wells and reservoirs, which generally correspond to marginal situations.

C. *Gravity test.* If the production at the surface is a single liquid stream having a gravity of 45° API or lighter, that stream would be generally deemed pure condensate (although FEA recognizes that there are a few crude oils in the 50° to 60° range), and the production would be deemed to be "non-associated." If production at the surface consists of two streams, one having a gravity heavier than 45° API (crude oil) and the other 45° API or lighter (condensate), that joint production would indicate "associated" production.

PART 210—GENERAL ALLOCATION AND PRICE RULES

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Exemption of Motor Gasoline from Mandatory Petroleum Allocation Regulations

Introduction

On November 19, 1976, the Federal Energy Administration ("FEA") issued a notice of proposed rulemaking and public hearing (41 FR 51832, November 24, 1976) to amend 10 CFR Parts 210, 211 and 212 to exempt motor gasoline (as defined in 10 CFR 211.51 and 212.31 of the Mandatory Petroleum Allocation and Price Regulations) and to establish a special motor gasoline set-aside for the transitional period following decontrol. The proposal was based on tentative conclusions set forth in a document dated November 16, 1976, entitled "Preliminary Findings and Views Concerning the Exemption of Motor Gasoline from the Mandatory Petroleum Allocation and Price Regulations" ("Preliminary Findings").

Concurrent with the issuance of this amendment exempting motor gasoline from the Mandatory Petroleum Allocation Regulations, a separate amendment is being issued to exempt motor gasoline from the Mandatory Petroleum Price Regulations. Both amendments are being submitted for Congressional review, as Energy Actions Nos. 8 and 9, respectively, pursuant to section 551 of the Energy Policy and Conservation Act, Pub. L. 94–163 ("EPCA"), and in accordance with section 102 of the Energy Conservation and Production Act, Pub. L. 94–385 ("EPCA"), which in effect requires that FEA submit separate energy actions to the Congress when proposing the exemption of a refined petroleum product from both price and allocation regulations, but does not prohibit concurrent submissions of such separate energy actions.

Written comments on the exemption proposal and on the Preliminary Findings were invited through December 15, 1976 and public hearings were held on December 14 and 15, 1976 in Washington, D.C.; Atlanta, Georgia; Chicago, Illinois; Dallas, Texas; Denver, Colorado; New York, N.Y.; and San Francisco, California. As of December 31, 1976, 307 parties had submitted oral and written comments in response to the proposed exemption. Those offering comments included major integrated refining companies, large and small independent refining companies, branded and nonbranded wholesale gasoline distributors, retail sales outlets, trade associations, consumer groups and governmental representatives.

A substantial majority of those commenting agreed with FEA that motor gasoline should be exempted from FEA's allocation and price regulations. This support was based generally upon agreement with FEA's conclusions as to supply and demand projections, competition, and other findings and views set forth in the Preliminary Findings. In particular, there was widespread agreement that competition has been keeping retail gasoline prices below the maximum prices allowed under the Mandatory Petroleum Price Regulations. Most marketers commenting also favored the establishment of a mechanism to assure them a source of supply during the transition following the exemptions. Certain comments at the December hearings noted that the Preliminary Findings, issued contemporaneously with the exemption proposal, were not consistent with data from the economic forecasting firm, Data Resources, Inc. ("DRI"), whose macroeconomic model drives FEA's short-term petroleum demand model. DRI released revised economic forecasts, on which these comments were based, after the analysis for the Preliminary Findings was completed. Information derived from the most recent DRI "Cyclelong" forecast has, however, now been incorporated into FEA's current findings and views. After carefully considering all the comments and making the appropriate revisions to the data supporting its proposed findings, FEA has concluded that its initial view that motor gasoline should be exempted from regulations is correct.

No information or data were presented in this proceeding which significantly alter FEA's Preliminary Findings and Views. FEA does not anticipate that supply shortages will occur or that motor gasoline prices will rise to higher levels than if controls were continued. In any event, FEA has standby authority under section 12(f) of the Emergency Petroleum Allocation Act of 1973 (EPAA) to reimpose controls (on a temporary or permanent basis) if necessary to attain the objectives set forth in section 4(b)(1) of the EPAA. Therefore, FEA hereby adopts the proposed amendments exempting motor gasoline from the Mandatory Petroleum Allocation Regulations.

In the exemption proposal, FEA requested comments on the appropriate lead time which should be provided before the decontrol amendment would become effective so as to assure a smooth transition to a decontrolled market. FEA proposed an effective date of the first day of the month following the first full month subsequent to the expiration of the Congressional review period. The fifteen day review period under section 551 of the EPCA will expire shortly after February 1, 1977. Upon consideration of the comments received on this issue, FEA has concluded that it would be appropriate to provide for an effective date of March 1, given that firms will have more than a month's notice of FEA's exemption proposals. Therefore, unless disapproved by either House of Congress under section 551 of the EPCA, this exemption will be effective March 1, 1977.

Findings and Views

In addition to this amendment exempting motor gasoline from the Mandatory Petroleum Allocation Regulations and the concurrent amendment exempting motor gasoline from the Mandatory Petroleum Price Regulations, FEA has prepared its findings and views supporting these amendments as required by section 12 of the EPAA, based upon its consideration of the comments of those persons who participated in the rulemaking and other information available to FEA. These findings and views are set forth in a single document dated January 14, 1977 and entitled "Findings and Views Concerning the Exemption of Motor Gasoline from the Mandatory Petroleum Allocation and Price Regulations" (the "Findings and Views"). The findings and views set forth therein may be summarized, in part, as follows:

(1) Motor gasoline is no longer in short supply; anticipated supplies of motor gasoline will be sufficient to meet the demand over the near term.

(2) Exemption of motor gasoline from the Mandatory Petroleum Allocation and Price Regulations will not have an adverse impact on the supply of any other refined product. With projected expansions, domestic refining capacity is projected to be more than adequate to meet demand.

(3) Competition and market forces are adequate to protect consumers following exemption of motor gasoline from regulation.

(4) Exemption of motor gasoline from regulation will not result in inequitable prices for any class of end-user. FEA does not expect that exemption of motor gasoline from price controls would lead to any price increases over and above those that would be experienced under continued regulation.

> Adequate refinery capacity to meet all refined product requirements should guarantee continued competition in the refining segment of the industry. The large number of independent and small refiners now competing successfully in the motor gasoline market indicates that sufficient competition exists to protect consumers.

(5) Exemption of motor gasoline from the price and allocation regulations is consistent with the attainment of the objectives set forth in section 4(b)(1) of the EPAA.

> Since an adequate supply is anticipated, continued allocation and pricing controls over motor gasoline are not necessary to protect the public health, safety and welfare, and the national defense (section 4(b)(1)(A)); the maintenance of all public services (section 4(b)(1)(B)); the mantenance of agricultural operations (section 4(b)(1)(C)); or the maintenance of exploration for and production or extraction of fuels and minerals (section 4(b)(1)(G)).
>
> Adequate supply and the positive effects of competition should insure that the exemption is consistent with: The equitable distribution of crude oil, residual fuel oil and refined petroleum products at equitable prices (section 4(b)(1)(F)); preservation of an economically sound and competitive petroleum industry (section (4)(b)(1)(D)); economic efficiency (section 4(b)(1)(H)); and minimization of economic distortions, inflexibility, and interference with market mechanisms (section 4(b)(1)(I)).
>
> The exemption should have no adverse effect on the allocation of suitable types of crude oil to U.S. refineries (section 4(b)(1)(E)).

The Findings and Views also state FEA's views concerning the potential economic impacts of exempting motor gasoline from the Mandatory Petroleum Allocation and Price Regulations. Because no supply, demand or price impacts are anticipated as a result of the exemption, it is not expected that there will be any significant state or regional impacts resulting from the proposed exemption. In particular, no undue adverse impact is expected on any governmental units. In addition, FEA anticipates no adverse economic impacts on the availability of consumer goods or services, the Gross National Product, small business or the supply and availability of energy resources as fuel or feedstock for industry. FEA expects that the exemption will not adversely affect the competitive viability of independent refiners and marketers. The exemption is likewise expected not to cause an adverse effect on employment or consumer prices. FEA's assessment of the effects of the exemption on the rate of unemployment in the U.S., on the Consumer Price Index and on the implicit price deflator for the Gross National Product are set forth in detail in the Findings and Views.

Special Rule No. 4

While FEA did not and does not expect supply dislocations to occur as a result of motor gasoline decontrol, Special Rule No. 4, as proposed in the November 19 notice, was designed as a safeguard against the same type of potential supply dislocations which prompted the adoption of Special Rule No. 3, following the exemption of middle distillates. In the proposal, FEA sought to insure that no marketer of gasoline would lose its supply source without adequate time to arrange for a new supplier during the transitional period following the removal of controls. As proposed, Special Rule No. 4 permitted marketers who have made diligent unsuccessful efforts to obtain supplies of motor gasoline to be assigned

as much as their previously authorized base period use from the special set-aside. These assignments could have been made for periods of up to three months if required to permit the marketers to make their own supply arrangements or for longer if required to preclude hardships to consumers. The proposal also allowed assignments to be made directly to consumers under the same hardship criteria that currently exist for motor gasoline in the state set-aside program. As proposed, the set-aside for each prime supplier constituted three percent of the estimated portion of its total supply of motor gasoline for the particular month to be sold into the distribution system of a state for consumption therein. FEA also proposed that the motor gasoline special set-aside be administered by State Offices, which currently are authorized to administer both the state set-aside for motor gasoline and the special set-aside for middle distillates.

As a result of evaluating marketers' comments, FEA has concluded that the proposed Special Rule No. 4 may not be a fully adequate safeguard to assure continued supply. As adopted, therefore, Special Rule No. 4 provides greater protection for independent marketers than the initial proposal. Special Rule No. 4 now contains a double type of supply guarantee for all wholesale purchasers. Under the transition assignment program, to terminate motor gasoline supplier/wholesale purchaser relationships prior to March 1, 1978, all suppliers will be required to provide at least 90 days notice to any wholesale purchaser (commencing no earlier than the effective date of this amendment) before terminating the supply relationship with that purchaser. Any such termination may be effective only at the end of a period corresponding to a base period coinciding with or following the end of the ninety day notice period. If the purchaser is unable, after a diligent effort, to obtain a supply of motor gasoline equal to its base period use, it may apply at least thirty days prior to the date on which the termination is to become effective to the FEA Regional Office for the region where it is located, to continue its supplier/purchaser relationship with its base period supplier for three additional months. The wholesale purchaser may reapply to the FEA Regional Office for two additional continuation orders for three month periods if it remains unable to find alternative sources of supply. A purchaser which chooses not to receive product from its base period supplier during any three month period, however, will be assumed to have an alternative source of supply and not be eligible to apply for a further transition assignment as to the volume of product not lifted, unless such failure to lift is due to factors beyond the control of the purchaser and FEA determines that the purchaser's inability to obtain that volume would impose an undue hardship on that purchaser. The notification and transition assignment period will provide a maximum of four three month periods of assured supply. In any event, no assignment under Special Rule No. 4 will extend beyond one year from March 1, 1977, the announced effective date of this exemption.

Special Rule No. 4 also provides that if FEA fails to act on an application for continuation of a supplier/purchaser relationship that was filed in a timely fashion, that is, at least thirty days prior to the date on which a termination following ninety days' notice was to take effect or a prior continuation order was to expire, the supplier/purchaser relationship will not end but will automatically continue for an additional month pending FEA action on the application. Moreover, if a late-filed application has not been acted on by FEA on the termination date, Special Rule No. 4 authorizes FEA to issue a temporary continuation order for one month pending final action on the application if the applicant shows good cause for the late filing.

Inasmuch as prices will no longer be subject to controls during this period if the exemption with regard to price is not disapproved, Special Rule No. 4 also prevents circumvention of the transition assignment procedures set forth above by requiring that prices charged to wholesale purchasers, including marketers, receiving product under Special Rule No. 4 shall be nondiscriminatory. Suppliers must make gasoline available to purchasers which are assigned to them pursuant to Special Rule No. 4 on the same terms and conditions under which they make gasoline available to other similarly situated purchasers. In other words, suppliers may not discriminate against purchasers solely because they are assigned purchasers. The same definition of "discrimination" applies for purposes of the Special Rule as currently is used in § 210.62(b).

Special Rule No. 4 further provides the additional protection of a continuing, but gradually diminishing, operation of the state set-aside for motor gasoline for nine months following decontrol, which would be available to resellers, as well as end-users which can demonstrate hardship or emergency requirements. The decreasing volumes available in the set-aside are based on FEA's view that, as the transition to a normally functioning decontrolled market continues, a decreasing number of end-users and wholesale purchasers, including marketers, have the potential of being faced with hardship and emergency requirements. For the first three months following decontrol, the set-aside for each prime supplier would constitute three percent of the estimated portion of its total supply of motor gasoline for each particular month to be sold into the distribution system of a state for consumption therein. For the next succeeding three months the set-aside would constitute two percent and, for the following three months, one percent, after which time it will terminate. Aside from modifying the state set-aside percentage and making it available to resellers (e.g., independent retail marketers) as well as end-users, all other current procedures governing use of the state set-aside would remain in effect.

FEA intends to issue guidelines pursuant to Special Rule No. 4 to provide both FEA and the public greater guidance on the operation of the provisions of the Rule. These guidelines would explain in greater detail such matters as what efforts FEA would deem to constitute a "diligent unsuccessful effort to locate an alternate source of supply" and how the non-discrimination requirements would apply in particular situations.

Section 12(f) of the EPAA provides that following the exemption of any product from regulation, FEA shall have the authority at any time to reimpose allocation controls if necessary to attain the objections of the EPAA. For this reason, FEA is adopting amendments which exempt motor gasoline from the general allocation regulations but which do not delete those regulations from the Code of Federal Regulations. They are in effect converted to standby status, so that, in the event of shortages or other occurrences which might require reimposition of controls, they may, with appropriate modifications, be quickly put into effect.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended, Pub. L. 94–385; Energy Policy and Conservation Act, Pub. L. 94–163, as amended, Pub. L. 94–385; E.O. 11790, 39 FR 23185; E.O. 11933, 41 FR 36641)

In consideration of the foregoing, Parts 210 and 211 of Chapter II, Title 10 of the Code of Federal Regulations, are amended as set forth below, effective March 1, 1977, unless this amendment is disapproved by either House of Congress pursuant to the review procedures set forth in Section 551 of the EPCA or withdrawn by the President prior to Congressional approval or disapproval during the 15-day period provided for Congressional review in section 551 of the EPCA.

Issued in Washington, D.C., January 19, 1977.

DAVID G. WILSON,
Acting General Counsel.

1. Section 210.35 is amended by adding paragraph (h) (1) to read as follows:

§ 210.35 Exempted products.

* * * * *

(h) (1) Motor gasoline as defined in § 211.51 of this chapter is exempt from the provisions of Part 211 of this chapter (except as set forth in Special Rule No. 4 to Subpart A of Part 211 of this chapter).

2. Section 211.1 is amended in paragraph (b) by adding new subparagraph (10) to read as follows:

§ 211.1 Scope.

* * * * *

(b) *Exclusions.* * * *

(10) Notwithstanding the other provisions of this part, including Subpart F, motor gasoline is excluded from this part (except as set forth in Special Rule No. 4 to Subpart A of this Part 211).

3. The Appendix to Subpart A of Part 211 is amended by the addition of a Special Rule No. 4 to read as follows:

SPECIAL RULE NO. 4

1. *Scope.* Notwithstanding the exemption of motor gasoline from the Mandatory Petroleum Allocation Regulations, this Special Rule provides for a continuation of the State set-aside program for motor gasoline for the months March 1977 through November 1977, as set forth below, and the establishment of a transitional assignment program for motor gasoline for the months March 1977 through February 1978.

2. *Provision for motor gasoline set-aside.* (a) Notwithstanding the provisions of paragraph (h) of § 210.35 and of subparagraph (10) of paragraph (b) of § 211.1, the set-aside established for motor gasoline for assignment by State Offices in accordance with the provisions of §§ 211.17 and 211.107(a) and Subpart Q of the Federal Energy Administration Administrative Procedures and Sanctions (10 CFR 205.210 et seq.) is hereby continued for the months March 1977 through November 1977, except as modified herein.

(b) In addition to those wholesale-purchaser consumers and end-users eligible to receive an assignment from the State set-aside, and those wholesale purchaser-resellers seeking an assignment to enable them to supply such wholesale purchaser-consumers and end-users under 10 CFR 205.211 (a), any wholesale purchaser-reseller which is experiencing a hardship due to its inability to obtain an adequate supply of motor gasoline may apply for and receive an assignment of motor gasoline in accordance with the provisions of § 211.17 and 10 CFR 205.210 et seq.

(c) The State set-aside percentage level for motor gasoline will be three percent for the months March, April, and May 1977, two percent for June, July, and August 1977, and one percent for September, October, and November 1977.

3. *Transitional assignment program.* Notwithstanding any contrary provisions of Parts 205 and 211 of this chapter, assignments of base period suppliers and base period use for wholesale purchasers of motor gasoline shall be made in accordance with the provisions of this Special Rule.

(a) No supplier/wholesale purchaser relationship in effect under § 211.9 of this part as of February 28, 1977, may be terminated before March 1, 1978 by a supplier except upon written notice to the wholesale purchaser given at least ninety (90) days prior to the date on which the supplier intends to terminate the supply relationship. A termination under this paragraph (a) may only be effective at the end end of the period corresponding to a base period coinciding with or following the expiration of the ninety (90) day notice period. Any such ninety (90) day period may not begin prior to March 1, 1977.

(b) Any wholesale purchaser which has received a notice from its supplier under paragraph (a) above shall make a diligent effort to locate an alternate source of supply. If its effort is unsuccessful it may apply to the appropriate FEA Regional Office for a continuation of its current supplier/purchaser relationship, but any such application shall be made at least thirty (30) days prior to the date on which the termination under paragraph (a) is to become effective. The applicant shall certify to the FEA that it has made a diligent unsuccessful effort to locate an alternate source of supply and shall set forth in its application (i) the name and address of its base period supplier; (ii) its base period use with that supplier for each period corresponding to a base period; and (iii) the names and addresses of other suppliers contacted with respect to the applicant's efforts to locate an alternate source of supply, the volumes requested from each such other supplier, and the dates of those contacts. The applicant shall send a copy of its application to its base period supplier.

(c) If FEA determines that an applicant has made a diligent unsuccessful effort to locate an alternate source of supply, FEA shall order a continuation of the applicant's existing supplier/purchaser relationship for a period of three consecutive periods corresponding to a base period. While a continuation order is in effect, the wholesale purchaser shall again make a diligent effort to locate an alternate source of supply. If the wholesale purchaser is again unsuccessful, it may again apply for a continuation in accordance with paragraph (b) above.

(d) If FEA fails to take action on a timely filed application under paragraph (b) or (c) prior to the date upon which the termination of the supplier/purchaser relationship which is the subject of the application is to become effective, the supplier/purchaser relationship shall be automatically extended for a period of one (1) month pending FEA action on the application. If FEA fails to take action on a late filed application under paragraph (b) or (c) prior to the date upon which the termination of the supplier/purchaser relationship which is the subject of the application is to become effective, FEA may issue a temporary continuation order for a period of one (1) month pending FEA action on the application upon a showing by the applicant of good cause for the late filing.

(e) FEA may issue with respect to any supplier/purchaser relationship no more than three (3) continuation orders. In no event may the provisions of a continuation order be effective beyond February 28, 1978.

(f) The failure of any wholesale purchaser to purchase its full allocation entitlement from its base period supplier without the written consent of that supplier in any three (3) month period shall disqualify any such purchaser from being eligible for issuance of a further continuation order covering volumes in excess of the percentage of the allocation entitlement lifted in the previous three (3) month period, unless such failure to purchase is due to factors beyond the control of that wholesale purchaser and FEA determines that such disqualification would impose an undue hardship on that wholesale purchaser.

4. *Non-discrimination requirement.* To prohibit any form of discrimination (including price discrimination) which has the effect of circumventing, frustrating, or impairing the objectives, purposes and intent of this Special Rule, the requirements of paragraph (b) of § 210.62 of this chapter shall continue to apply to suppliers to which an authorizing document is presented pursuant to the continuation of the motor gasoline set-aside under this Special Rule, to suppliers which are subject to a continuation order under the transitional assignment program of this Special Rule, and to all suppliers which are still supplying purchasers because they have failed to give notice of intent to terminate supplies or such termination has not yet become effective.

[FR Doc.77-2269 Filed 1-19-77;2:10 p.m.]

PART 210—GENERAL ALLOCATION AND PRICE RULES

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Exemption of Motor Gasoline From Mandatory Petroleum Price Regulations

INTRODUCTION

On November 19, 1976, the Federal Energy Administration ("FEA") issued a notice of proposed rulemaking and public hearing (41 FR 51832, November 24, 1976) to amend 10 CFR Parts 210, 211 and 212 to exempt motor gasoline (as defined in 10 CFR 211.51 and 212.31 of the Mandatory Petroleum Allocation and Price Regulations) and to establish a special motor gasoline set-aside for the transitional period following decontrol. The proposal was based on tentative conclusions set forth in a document dated November 16, 1976, entitled "Preliminary Findings and Views Concerning the Exemption of Motor Gasoline from the Mandatory Petroleum Allocation and Price Regulations" ("Preliminary Findings").

Concurrent with the issuance of this amendment exempting motor gasoline from the Mandatory Petroleum Price Regulations, a separate amendment is being issued to exempt motor gasoline from the Mandatory Petroleum Allocation Regulations. Both amendments are being submitted for Congressional review, as Energy Actions Nos. 9 and 8, respectively, pursuant to section 551 of the Energy Policy and Conservation Act, Pub. L. 94–163 ("EPCA"), and in accordance with section 102 of the Energy Conservation and Production Act, Pub. L. 94–385 ("ECPA"), which in effect requires that FEA submit separate energy actions to the Congress when proposing the exemption of a refined petroleum product from both price and allocation regulations, but does not prohibit concurrent submissions of such separate energy actions.

Written comments on the exemption proposal and on the Preliminary Findings were invited through December 15, 1976 and public hearings were held on December 14 and 15, 1976 in Washington, D.C.; Atlanta, Georgia; Chicago, Illinois; Dallas, Texas; Denver, Colorado; New York, N.Y.; and San Francisco, California. As of December 31, 1976, 307 parties had submitted oral and written comments in response to the proposed exemption. Those offering comments included major integrated refining companies, large and small independent refining companies, branded and non-branded wholesale gasoline distributors, retail sales outlets, trade associations, consumer groups and governmental representatives.

A substantial majority of those commenting agreed with FEA that motor gasoline should be exempted from FEA's allocation and price regulations. This support was based generally upon agree-

ment with FEA's conclusions as to supply and demand projections, competition, and other findings and views set forth in the Preliminary Findings. In particular, there was widespread agreement that competition has been keeping retail gasoline prices below the maximum prices allowed under the Mandatory Petroleum Price Regulations. Most marketers commenting also favored the establishment of a mechanism to assure them a source of supply during the transition following the exemptions. Certain comments at the December hearings noted that the Preliminary Findings, issued contemporaneously with the exemption proposal, were not consistent with data from the economic forecasting firm, Data Resources, Inc. ("DRI"), whose macroeconomic model drives FEA's short-term petroleum demand model. DRI released revised economic forecasts, on which these comments were based, after the analysis for the Preliminary Findings was completed. Information derived from the most recent DRI "Cycle-long" forecast has, however, now been incorporated into FEA's current findings and views. After carefully considering all the comments and making the appropriate revisions to the data supporting its proposed findings, FEA has concluded that its initial view that motor gasoline should be exempted from regulations is correct.

No information or data were presented in this proceeding which significantly alter FEA's Preliminary Findings and Views. FEA does not anticipate that supply shortages will occur or that motor gasoline will rise to higher levels than if controls were continued. In any event, FEA has standby authority under section 12(f) of the Emergency Petroleum Allocation Act of 1973 (EPAA) to reimpose controls (on a temporary or permanent basis) if necessary to attain the objectives set forth in section 4(b)(1) of the EPAA. Therefore, FEA hereby adopts the proposed amendments exempting motor gasoline from the Mandatory Petroleum Price Regulations.

In the exemption proposal, FEA requested comments on the appropriate lead time which should be provided before the decontrol amendment would become effective so as to assure a smooth transition to a decontrolled market. FEA proposed an effective date of the first day of the month following the first full month subsequent to the expiration of the Congressional review period. The fifteen day review period under section 551 of the EPCA will expire shortly after February 1, 1977. Upon consideration of the comments received on this issue, FEA has concluded that it would be appropriate to provide for an effective date of March 1, given that firms will have more than a month's notice of FEA's exemption proposals. Therefore, unless disapproved by either House of Congress under section 551 of the EPCA, this exemption will be effective March 1, 1977.

Findings and Views

In addition to this amendment exempting motor gasoline from the Mandatory Petroleum Price Regulations and the concurrent amendment exempting motor gasoline from the Mandatory Petroleum Allocation Regulations, FEA has prepared its findings and views supporting these amendments as required by section 12 of the EPAA, based upon its consideration of the comments of those persons who participated in the rulemaking and other information available to FEA. These findings and views are set forth in a single document dated January 14, 1977 and entitled "Findings and Views Concerning the Exemption of Motor Gasoline from the Mandatory Petroleum Allocation and Price Regulations" (the "Findings and Views"). The findings and views set forth therein may be summarized, in part, as follows:

(1) Motor gasoline is no longer in short supply; anticipated supplies of motor gasoline will be sufficient to meet the demand over the near term.

(2) Exemption of motor gasoline from the Mandatory Petroleum Allocation and Price Regulations will not have an adverse impact on the supply of any other refined product. With projected expansions, domestic refining capacity is projected to be more than adequate to meet demand.

(3) Competition and market forces are adequate to protect consumers following exemption of motor gasoline from regulation.

(4) Exemption of motor gasoline from regulation will not result in inequitable prices for any class of end-user. FEA does not expect that exemption of motor gasoline from price controls would lead to any price increases over and above those that would be experienced under continued regulation.

Adequate refinery capacity to meet all refined product requirements should guarantee continued competition in the refining segment of the industry. The large number of independent and small refiners now competing successfully in the motor gasoline market indicates that sufficient competition exists to protect consumers.

(5) Exemption of motor gasoline from the price and allocation regulations is consistent with the attainment of the objectives set forth in section 4(b)(1) of the EPAA.

Since an adequate supply is anticipated, continued allocation and pricing controls over motor gasoline are not necessary to protect the public health, safety and welfare, and the national defense (Section 4(b)(1)(A)); the maintenance of all public services (section 4(b)(1)(B)); the maintenance of agricultural operations (section 4(b)(1)(C)); or the maintenance of exploration for and production or extraction of fuels and minerals (section 4(b)(1)(G)).

Adequate supply and the positive effects of competition should insure that the exemption is consistent with: the equitable distribution of crude oil, residual fuel oil and refined petroleum products at equitable prices (section 4(b)(1)(F)); preservation of an economically sound and competitive petroleum industry (section 4(b)(1)(D)); economic efficiency (section 4(b)(1)(H)); and minimization of economic distortions, inflexibility, and interference with market mechanisms (section 4(b)(1)(I)).

The exemption should have no adverse effect on the allocation of suitable types of crude oil to U.S. refineries (section 4(b)(1)(E)).

In connection with FEA's projection that no price increase will occur solely as a result of the exemption from the price regulations, it should be noted that FEA expects that upon decontrol the additional costs of refining unleaded gasoline over the costs of producing leaded gasoline will be more accurately reflected in the prices of unleaded gasoline. FEA has estimated that a price differential of up to two cents per gallon could result. However, even if price controls were to continue, FEA has on this same date issued a regulatory change which permits refiners to reflect the difference in refining costs between these two grades of motor gasoline in the prices charged for these products.

The Findings and Views also state FEA's views concerning the potential economic impacts of exempting motor gasoline from the Mandatory Petroleum Allocation and Price Regulations. Because no supply, demand or price impacts are anticipated as a result of the exemption, it is not expected that there will be any significant state or regional impacts resulting from the proposed exemption. In particular, no undue adverse impact is expected on any governmental units. In addition, FEA anticipates no adverse economic impacts on the availability of consumer goods or services, the Gross National Product, small business or the supply and availability of energy resources as fuel or feedstock for industry. FEA expects that the exemption will not adversely affect the competitive viability of independent refiners and marketers. The exemption is likewise expected not to have an adverse effect on employment or consumer prices. FEA's assessment of the effects of the exemption on the rate of unemployment in the U.S., on the Consumer Price Index and on the implicit price deflator for the Gross National Product are set forth in detail in the Findings and Views.

Post Exemption Monitoring of Gasoline Prices

FEA intends to issue shortly for comment a method of monitoring prices of motor gasoline to assure the continued reasonableness of price levels following the effective date of the exemption of motor gasoline from price and allocation controls. FEA will request written comments and hold public hearings with respect to the specific features of the price monitoring system.

The monitoring system which FEA intends to adopt provides for the monthly measurement of average actual gasoline prices, calculating prices on both a national and regional basis through the end of the 1977 summer driving season. Actual prices would be compared with price indices representing the average price levels FEA believes would have prevailed had gasoline continued under price controls, with sufficient flexibility to allow for statistical error, inherent deficiencies in the operation of the price index, seasonal price adjustments and short term market aberrations. The proposed price monitoring system will provide for remedial action in the event the actual average prices exceed by two cents the appropriate price index.

Section 12(f) of the EPAA provides that following the exemption of any product from regulation, FEA shall have the authority at any time to reimpose price controls if necessary to attain the objectives of the EPAA. For this reason, FEA is adopting amendments which exempt gasoline from the price regulations but which do not delete those regulations from the Code of Federal Regulations. They are in effect converted to standby status, so that, in the event of shortages or other occurrences which might require reimposition of controls, they may, with appropriate modifications, be quickly put into effect.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185; E.O. 11933, 41 FR 36641)

In consideration of the foregoing, Parts 210 and 212 of Chapter II, Title 10 of the Code of Federal Regulations, are amended as set forth below, effective March 1, 1977, unless this amendment is disapproved by either House of Congress pursuant to the review procedures set forth in section 551 of the EPCA or withdrawn by the President prior to Congressional approval or disapproval during the 15-day period provided for Congressional review in section 551 of the EPCA.

Issued in Washington, D.C., January 19, 1977.

David G. Wilson,
Acting General Counsel.

1. Section 210.35 is amended by adding subparagraph (2) to paragraph (h) to read as follows:

§ 210.35 Exempted products.

• • • • • •

(h) • • •

(2) Gasoline as defined in § 212.31 of this chapter is exempt from the provisions of Part 212 of this chapter.

2. Section 212.31 is amended in the definition of "covered products" to read as follows:

§ 212.31 Definitions.

• • • • • •

"Covered products" means aviation fuel (kerosene-type), aviation gasoline, butane, crude oil, natural gas liquids, natural gasoline, and propane. A blend of two or more particular covered products is considered to be that particular covered product constituting the major proportion of the blend.

• • • • • •

3. Subpart C of Part 212 is amended by adding a new § 212.58 as follows:

§ 212.58 Gasoline.

The prices charged for gasoline are exempt from the provisions of this part.

[FR Doc.77-2286 Filed 1-19-77;2:39 pm]

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Emergency Amendment on Use of Naphtha for Synthetic Natural Gas Plant Feedstock Use

The Federal Energy Administration ("FEA") hereby adopts on an emergency basis an amendment, effective immediately, to § 211.29 of the Mandatory Petroleum Allocation Regulations (10 CFR Part 211). The purpose of this amendment is to make explicit FEA's intent to limit the volumes of naphtha that can be used for synthetic natural gas (SNG) plant feedstock use.

FEA's allocation program regulates the use of petroleum feedstocks for SNG manufacture. 10 CFR 211.29 sets forth the basic rule that

> • • • a firm which purchases crude oil and allocated products for use as feedstock in a synthetic natural gas plant which has requirements that exceed its base period volume or which has no base period volume may seek an adjustment to its base period volume or establishment of a base period volume only upon application to the FEA National Office • • •

10 CFR 211.29 also states the criteria to be considered by FEA in processing an application for assignment or adjustment, and these criteria are further discussed in Special Rule No. 1 to Subpart A, Part 211. In addition to 10 CFR 211.29 and the Special Rule, FEA has issued a Statement of Policy setting forth the FEA's general policy regarding the use of liquid petroleum feedstocks for the production of SNG.

Prior to the exemption of naphtha from the Mandatory Petroleum Allocation Regulations for all uses except for SNG feedstock use, an allocation level of one hundred percent of base period use was provided for naphtha for SNG plant feedstock use. Under FEA's mandatory allocation regulations before the exemption of naphtha, allocation levels for naphtha were not subject to an allocation fraction. Because of the peculiar role of naphtha in internal refinery operations, particularly the use of naphthas for gasoline blending, the calculation of an allocation fraction for that product was impracticable, and the provisions of § 211.10(g) governing surplus product were not applied to naphtha. Thus, access to volumes and sources of naphtha for purchasers of naphtha for SNG feedstock use was only expressly authorized as permitted under FEA orders and regulations, other than § 211.10(g), and an effective use limitation of one hundred percent of base period use therefore applied. The exemption of naphtha from the allocation program, except for naphtha allocated under §§ 211.29 and 211.183(b)(2), did not change FEA's view that an implicit use limitation existed for naphtha.

Nevertheless, since the use limitation for naphtha is not explicitly stated in FEA regulations as it is for propane and butane for use as SNG feedstocks, and since there are no present regulations governing the distribution of naphtha which is excess to a refiner's needs, certain questions with respect to the existence of the limitation have been brought to FEA's attention. FEA is therefore adopting this amendment to provide explicitly that SNG manufacturers are limited to volumes of naphtha for SNG feedstock use equivalent to one hundred percent of base period use. In those instances where FEA has not yet established a base period use of naphtha, the purchaser is limited to use of those volumes specifically permitted by FEA orders. This clarification of FEA's intentions is consistent with the manner in which FEA has historically administered § 211.29 with respect to naphtha allocations.

As indicated at the time naphtha was exempted from the allocation regulations (except for those sections pertaining to SNG feedstock), FEA is preparing a programmatic environmental impact statement (EIS) on its regulations affecting SNG. Until the completion of the EIS, FEA intends to maintain the operation of its SNG program as it has previously been in effect. After a comprehensive evaluation of the EIS, FEA will determine whether the continued allocation of naphtha for SNG plant feedstock use would be appropriate.

FEA believes that this amendment must be issued on an emergency basis to ensure continued compliance with FEA's SNG allocation program. Specifically, it is essential that the existence of this use limitation be made explicit to prevent an unauthorized increase in consumption of naphtha for SNG manufacture, which might otherwise occur subsequent to the exemption from the Mandatory Petroleum Allocation Regulations of naphtha for all uses except SNG plant feedstock, and which would be in violation of the regulation and underlying policies set forth in § 211.29, Special Rule No. 1 and the Statement of Policy. If this amendment were to be adopted after notice and a hearing, the use limitation on naphtha would not have been made explicit until the current heating season was almost over. FEA therefore finds that strict compliance with the notice requirements of section 7(i)(1)(B) of the Federal Energy Administration Act of 1974, as amended ("FEAA"), Pub. L. 93-275, Pub. L. 94-385, will cause serious harm and injury to the public health, safety and welfare, and the notice requirements of that section are hereby waived.

As required by section 7(c)(2) of the FEAA, a copy of this emergency amendment was submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator had no comments.

In accordance with Executive Order 11821 and OMB Circular A-107, FEA is considering the inflationary impact of this proposal.

Because this amendment is being issued on an emergency basis, an opportunity for oral presentation of views is not possible prior to its implementation. A public hearing, however, will be held beginning at 9:30 a.m., on February 24, 1977, in Room 2105, 2000 M Street NW.,

Washington, D.C., to receive comments from interested persons. Any person who has an interest in the subject of the hearing, or who is a representative of a group or class of persons which has an interest in the subject of the hearing, may make a written request for an opportunity to make an oral presentation. Such a request should be directed to Executive Communications, FEA, 1200 Pennsylvania Avenue, NW., Washington, D.C. 20461, and must be received before 4:30 p.m., e.s.t., February 2, 1977. Such a request may be hand delivered to Room 3309, Federal Building, 1200 Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., e.s.t., Monday through Friday, except Federal holidays. The person making the request should be prepared to describe the interest concerned; if appropriate, to state why he or she is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through February 4, 1977. Each person selected to be heard will be so notified by the FEA before 5:30 p.m., e.s.t., February 4, 1977, and must submit 50 copies of his or her statement to Office of Allocation Regulation Development, FEA, Room 2214, 2000 M Street NW., Washington, D.C. 20461, before 9:00 a.m., e.s.t., February 23, 1977.

The FEA reserves the right to select the persons to be heard at the hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. Each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. It will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. Any decision made by the FEA with respect to the subject matter of the hearing will be based on all information available to the FEA. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions, to be asked of any person making a statement at the hearing, to Executive Communications, FEA, before 4:30 p.m., e.s.t., February 22, 1977. Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. The FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant, and whether time limitations permit it to be presented for answers.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by the FEA and made available for inspection at the FEA Freedom of Information Office, Room 2107, Federal Building, 1200 Pennsylvania Avenue, N.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Anyone may buy a copy of the transcript from the reporter.

Interested persons are invited to submit data, views, or arguments with respect to this emergency amendment to Executive Communications, Federal Energy Administration, Box KE, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to Executive Communications, FEA, with the designation "Use Limitation—SNG Feedstocks." Fifteen copies should be submitted. All comments received by February 22, 1977, and all relevant information, will be considered by the Federal Energy Administration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, in accordance with the procedures stated in 10 CFR 205.9(f). The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

(Emergency Petroleum Allocation Act of 1973, P.L. 93-159, as amended P.L. 93-511, P.L. 94-99, P.L. 94-133, P.L. 94-163, P.L. 94-385; Federal Energy Administration Act of 1974, P.L. 93-332, P.L. 94-385; E.O. 11790 (39 FR 23185).)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is amended as set forth below, effective immediately.

Issued in Washington, D.C., January 19, 1977.

DAVID G. WILSON,
Acting General Counsel.

1. Section 211.29 is revised by redesignating paragraphs (a), (b), (c) and (d) thereof as subparagraphs (1), (2), (3) and (4), respectively, by designating the introductory paragraph thereof as paragraph (a), and by adding a new paragraph (b), to read as follows:

§ 211.29 Synthetic natural gas production.

* * * * *

(b) Unless directed by FEA upon application pursuant to Subpart G of Part 205 of this chapter, no supplier shall supply and no wholesale purchaser or end-user shall accept or use naphtha in excess of one hundred percent of base period use for synthetic natural gas plant feedstock use.

[FR Doc.77-2285 Filed 1-19-77;2:30 pm]

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Emergency Amendment Authorizing Waiver of Propane and Butane Peak Shaving Use Limitation

The Federal Energy Administration ("FEA") hereby adopts on an emergency basis amendments to the Mandatory Petroleum Allocation Regulations, 10 CFR Part 211, with respect to the volumetric limitation imposed on the use of propane and butane for peak shaving. The amendments adopted today are effective immediately.

In light of the severely cold winter weather that many parts of the nation are experiencing, gas utilities are faced with extremely large demand for natural gas to meet the requirements of their highest priority customers. Because of this increased demand for natural gas and also because of equipment breakdowns resulting from the cold weather, the FEA has received a large number of requests from gas utilities for permission to use propane for peak shaving in excess of the use limitations imposed by FEA Regulations. These applications must currently be processed as applications for exception from the regulations. Since evaluation of an application for exception is frequently a somewhat lengthy process, there may well be instances in which FEA could not provide relief promptly, with the result that some high priority customers such as hospitals and schools would have to be curtailed pending final FEA action on a meritorious application. This emergency amendment is being issued to provide FEA with the authority to waive the peak shaving use limitations set forth in §§ 211.83(c)(2)(v) and 211.93(c)(2)(iv) for propane and butane respectively, without requiring a utility to obtain an exception to the regulations.

In September 1975, FEA issued an amendment to § 211.10(g)(8) to allow imported non-Canadian propane and butane to be employed for certain uses (other than gas utility or synthetic natural gas feedstock use) without regard to use limitations contained in that section (40 FR 40821, September 4, 1975). At that time, FEA retained in § 211.10(g)(8) the limitation on the use of propane or butane for gas utility or synthetic natural gas feedstock use to one hundred percent (100) of base period use. In the preamble to that amendment, FEA stated:

[T]here are certain gas utilities which by reason of the very high level of residential use of natural gas and the inability of their customers to convert to use of substitute fuels in the near term should be permitted to acquire and use supplies of non-Canadian propane and butane in excess of base period use. For this reason, FEA has retained authority in §§ 211.10(g)(8), 211.86 and 211.96 to permit relaxation of the use limitation and inventory accumulation restrictions otherwise applicable to gas utilities. Gas utilities may petition for relief pursuant to these sections and Subpart G of Part 205 of the FEA procedural regulations. Such a petition will not be treated as an exception request and should be submitted to the Assistant Administrator for Regulatory Programs. * * * (40 FR 40821, September 4, 1975).

Thus, FEA intended to retain its flexibility to respond to applications for permission to exceed the use limitation by providing that the volumetric limitation could be waived if "directed by FEA upon application pursuant to Subpart G of Part 205 of this chapter." FEA has now determined, however, that by not including the same procedure in the use limitations for peak shaving contained in §§ 211.83(c)(2)(v) and 211.93(c)(2)(iv) of the Mandatory Petroleum Allocation Regulations, FEA may have limited its authority under the regulations to allow a gas utility to exceed its base period use, except through the exceptions process.

The volumetric portion of the use limitation for peak shaving in 10 CFR § 211.83(c)(v) provides:

The use of propane for peak shaving by gas utilities during any consecutive twelve month period beginning after January 1, 1974, is limited to the volume of propane equal to one hundred (100) percent of that volume which a gas utility contracted for or purchased for delivery during the period April 1, 1972 through March 31, 1973, regardless of whether that volume was used during the period.

The same use limitation is provided in § 211.93(c)(2)(iv) for butane.

Therefore, under current regulations, FEA may waive the use limitation of § 211.10(g)(8) but may permit gas utilities to exceed their base period use of propane or butane for peak shaving only by the increment which would bring the total amount to that for which they contracted or which they purchased for delivery in the base period. For some utilities this relief would be inadequate. FEA has therefore determined that the same waiver procedure should be available in §§ 211.83(c)(2)(v) and 211.93(c)(2)(iv) as appears in § 211.10(g)(8). By including the procedure in each of the cited sections, FEA is providing a means of expeditiously responding to applications for waiver with an adequate remedy in cases where relief is warranted.

In connection with the issuance of these amendments, FEA is soliciting comments on the criteria which should apply to the issuance of waivers of the volumetric limitations of propane and butane for peak shaving by gas utilities and on whether FEA should issue either regulations or guidelines in this regard. Prior to the development of regulations or guidelines, FEA intends to examine all the relevant circumstances surrounding each application before granting a waiver.

These amendments are being issued on an emergency basis so that FEA may respond expeditiously to requests from gas utilities for additional propane or butane to help meet the demands of their high priority customers during the current heating season, without requiring the utilities to go through the exceptions process. If these amendments were not adopted until after notice and a hearing, they would not be effective until after the coldest portion of the heating season, long after most of the requests for additional peak shaving material should have been acted upon. FEA therefore finds that strict compliance with the notice requirements of section 7(i)(1)(B) of the Federal Energy Administration Act of 1974, as amended, ("FEAA"), Pub. L. 93-275, Pub. L. 94-385, will cause serious harm and injury to the public health, safety and welfare, and the notice requirements of that section are hereby waived.

Section 7(c)(1) of the FEAA provides that FEA shall, before promulgating proposed regulations affecting the quality of the environment, provide a period of not less than five working days during which the Administrator of the Environmental Protection Agency ("EPA") may provide written comments concerning the impact of such regulations on the quality of the environment. Such comments are required to be published concurrently with or as part of the notice of proposed rulemaking.

Under section 7(c)(2) of the FEAA, the prior review required by section 7(c)(1) may be waived for a period of 14 days if there is an emergency situation which requires taking action at a date earlier than would permit the EPA the five day opportunity for prior comment required under section 7(c)(1). Notice of any such waiver must be given to the EPA and filed with the FEDERAL REGISTER with the notice of proposed or final FEA action and must include an explanation of the reasons for such waiver together with supporting data and factual background information.

Pursuant to section 7(c)(2) of the FEAA, FEA hereby waives the requirements of section 7(c)(1) of the FEAA concerning prior review by EPA of the environmental impact of this proposed rulemaking. This waiver is based on an emergency situation which, as explained above, mandates that FEA be able immediately to determine whether to permit gas utilities to use propane or butane for peak shaving in excess of their base period use to serve high priority customers who might otherwise be curtailed. A copy of this emergency amendment has been sent concurrent with its issuance to the Administrator for his comments.

In accordance with Executive Order 11821 and OMB Circular A-107, FEA is considering the inflationary impact of this proposal.

Because this amendment is being issued on an emergency basis, an opportunity for oral presentation of views is not possible prior to its implementation. A public hearing, however, will be held beginning at 9:30 a.m., on February 16, 1977, in Room 2105, 2000 M Street NW., Washington, D.C., to receive comments from interested persons. Any person who has an interest in the subject of the hearing, or who is a representative of a group or class of persons which has an interest in the subject of the hearing, may make a written request for an opportunity to make an oral presentation. Such a request should be directed to Executive Communications, FEA, 1200 Pennsylvania Avenue NW., Washington, D.C. 20461, and must be received before 4:30 p.m., e.s.t., February 3, 1977. Such a request may be hand delivered to Room 3309, Federal Building, 1200 Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., e.s.t., Monday through Friday, except Federal holidays. The person making the request should be prepared to describe the interest concerned; if appropriate, to state why he or she is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through February 4, 1977. Each person selected to be heard will be so notified by the FEA before 5:30 p.m., e.s.t., February 4, 1977, and must submit 50 copies of his or her statement to Office of Allocation Regulation Development, FEA, Room 2214, 2000 M Street NW., Washington, D.C. 20461, before 9:00 a.m., e.s.t., February 15, 1977.

The FEA reserves the right to select the persons to be heard at the hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. Each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. It will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. Any decision made by the FEA with respect to the subject matter of the hearing will be based on all information available to the FEA. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions, to be asked of any person making a statement at the hearing, to Executive Communications, FEA, before 4:30 p.m., e.s.t., February 11, 1977. Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. The FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant, and whether time limitations permit it to be presented for answers.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by the FEA and made available

for inspection at the FEA Freedom of Information Office, Room 2107, Federal Building, 1200 Pennsylvania Avenue, N.W., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Anyone may buy a copy of the transcript from the reporter.

Interested persons are invited to submit data, views, or arguments with respect to this emergency amendment to Executive Communications, Federal Energy Administration, Box KH, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to Executive Communications, FEA, with the designation "Propane and Butane Peak Shaving Limitation." Fifteen copies should be submitted. All comments received by February 11, 1977, and all relevant information, will be considered by the Federal Energy Administration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, in accordance with the procedures stated in 10 CFR 205.9(f). The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-332, Pub. L. 94-385; E.O. 11790 (39 FR 23185)).

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is amended as set forth below, effective immediately.

Issued in Washington, D.C., January 18, 1977.

DAVID G. WILSON,
Acting General Counsel.

1. Section 211.83 is amended by revising paragraph (c)(2)(v) to read as follows:

§ 211.83 Allocation levels.

* * * * * * *

(c) *Allocation levels subject to an allocation fraction.* * * *

(2) * * *

(v) *Peak shaving for gas utilities.* Unless directed by FEA upon application pursuant to Subpart G of Part 205 of this chapter, the use of propane for peak shaving by gas utilities during any consecutive twelve month period beginning after January 1, 1974, is limited to the volume of propane equal to one hundred (100) percent of that volume which a gas utility contracted for or purchased for delivery during the period April 1, 1972 through March 31, 1973, regardless of whether that volume was used during the period. Propane shall not be used for peak shaving as long as the gas utility continues service during such peak shaving usage to interruptible industrial customers (other than for process fuel, plant protection fuel, or raw material) or to any nonresidential customer who can use a fuel other than natural gas, propane or butane; and

* * * * * * *

2. Section 211.93 is amended by revising paragraph (c)(2)(iv) to read as follows:

§ 211.93 Allocation levels.

* * * * * * *

(c) *Allocation levels subject to an allocation fraction.* * * *

(2) * * *

(iv) *Peak shaving for gas utilities.* Unless directed by FEA upon application pursuant to Subpart G of Part 205 of this chapter, the use of butane for peak shaving by gas utilities during any consecutive twelve month period beginning after January 1, 1974 is limited to the volume of butane equal to one hundred (100) percent of that volume which a gas utility contracted for or purchased for delivery during the period April 1, 1972 through March 31, 1973, regardless of whether that volume was used during the period. Butane shall not be used for peak shaving as long as the gas utility continues service during such peak shaving usage to interruptible industrial customers (other than for process fuel, plant protection fuel, or raw material) or to any nonresidential customer who can use a fuel other than natural gas propane or butane; and

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 34-13156, 35-19853, IC-9604, AS-206]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

Adoption of Amendments of Certain Forms and Related Rules

The Securities and Exchange Commission today announced that it has adopted amendments to certain of its rules, schedules and reporting forms under the Securities Exchange Act of 1934 (the "Exchange Act") (15 U.S.C. 78a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) which will (1) provide for more timely filing of reports on Form 8-K (17 CFR 249.308) by amending General Instruction B to Form 8-K and Rules 13a-11 (17 CFR 240.13a-11) and 15d-11 (17 CFR 240.15d-11); (2) decrease the number of items of information required to be included in reports on Form 8-K (17 CFR 249.308) by approximately 62 percent by transferring certain items to the Form 10-Q (17 CFR 249.308a); (3) revise two of the items retained in the Form 8-K and four of those transferred to the Form 10-Q; (4) provide for different filing requirements as to Parts I and II of the Form 10-Q by revising Rules 13a-13 (17 CFR 240.13a-13) and 15d-13 (17 CFR 240.15d-13); (5) add three new items to Form 10-K (17 CFR 249.310) and revise one item of the Form 10-K to require disclosure of items of information previously required in reports on Form 8-K filed during the fourth quarter of the fiscal year for which no report on Form 10-Q is required; and (6) revise Item 5 of Schedule 14A to Regulation 14 under the Exchange Act (17 CFR 240.14a-101) to conform to the amendment to Item 1 of Form 8-K. Forms 8-K, 10-Q and 10-K are the general forms for, respectively, current, quarterly and annual reports filed pursuant to Section 13 or 15(d) of the Exchange Act, and Regulation 14 specifies the information required to be set forth in proxy and information statements filed pursuant to Section 14 of that Act. Schedule 14A is also applicable to the solicitation of proxies under the Public Utility Holding Company Act of 1935 (15 U.S.C. 79a et seq., as amended by Pub. L. No. 94-29 (June 4, 1975)) and the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq., as amended by Pub. L. 94-29 (June 4, 1975)).

This release contains a general discussion of the purpose and effect of the amendments and of the consideration given to the comments received on the proposed amendments. Comments of a general nature are discussed in the General Statement, and specific comments are discussed within the brief synopses of the principal amendments. Attention is directed to the text of the amendments for a more complete understanding.

GENERAL STATEMENT

Notice of the proposed amendments to Forms 8-K, 10-Q and 10-K and to Schedule 14A was published on July 12, 1976 in Securities Exchange Act Release No. 12619 [41 FR 29784, July 19, 1976]. Comments on the proposed amendments were received from 60 interested parties, and changes have been made to reflect a number of the suggestions made by the commentators.

In Exchange Act Release No. 12619, the Commission stated that the proposals therein represented a step forward in the efforts to further simplify and rationalize the corporate disclosure system under the federal securities laws and to provide more meaningful information to investors. Although a few commentators suggested that these goals would be more fully achieved through the elimination of the Form 8-K and the transfer of all of the items of the Form 8-K to the Form 10-Q,[1] the Commission believes that registrants should describe in reports on Form 8-K certain matters about which investors might not otherwise receive adequate and reasonably current information. Accordingly, the Form 8-K has been retained to serve as the report for disclosure of changes in control of the registrant (Item 1), acquisition and disposition of significant amounts of assets (Item 2), the appointment of a receiver of the registrant in a bankruptcy or similar proceeding (Item 3), and changes in a registrant's certifying accountant (Item 4). The voluntary disclosure item has been retained in the Form 8-K as Item 5 because the Commission believes that registrants may wish to describe certain material events in the monthly report. In order to provide for more current reporting of events of major significance to investors, the Form 8-K and Rules 13a-11 and 15d-11 have been amended to require registrants to file reports on Form 8-K within fifteen days after the occurrence of a reportable event.

The Commission believes that the amendments which are adopted today should reduce the number of reports on Form 8-K required to be filed and, therefore, should result in a significant savings of costs and time to registrants and the Commission. Registrants are reminded, however, of the obligations of publicly held companies to make full and prompt announcements of material facts regarding the company's financial condition, notwithstanding their compliance with the reporting requirements of the Exchange Act. The Commission believes that these amendments do not in any way affect the responsibility of management to make such announcements. The failure of companies to make prompt and accurate disclosure of both favorable and unfavorable information to security holders and the investing public may violate the Exchange Act and, in the case of an issuer making a continuous offering of its shares, may also violate the Securities Act of 1933 if the prospectus is not appropriately updated. Therefore, corporate managements are urged once again to review their policies with respect to corporate disclosure and endeavor to set up procedures which will insure that prompt disclosure be made of all material corporate developments.[2]

During the past several months, the Commission has accelerated further its program to integrate, streamline and update the corporate disclosure system it administers under the Securities Act and the Exchange Act. The adoption of these amendments is a significant step forward in these efforts. The Commission has also adopted a revised Form S-8 in Securities Act Release No. 5767 (November 22, 1976 (41 FR 52662) and has adopted amendments to Forms S-7 and S-16 which make these forms available to more registrants in Securities Act Release No. 5791 (December 20, 1976 (41 FR 56301). Public comments have been invited on the following additional proposals: (1) The adoption of a new registration form to permit use of an abbreviated prospectus with certain business combination transactions in Securities Act Release No. 5744 (October 4, 1976) (41 FR 43876); (2) the amendment of the rules relating to tender offers, in Securities Act Release No. 5731 (August 6, 1976 (41 FR 33004); (3) the amendment of Form S-16 to broaden the availability of the form to a limited category of large companies for the registration of certain primary offerings of securities in Securities Act Release No. 5792 (December 20, 1976) (41 FR 56331). The Commission announced it is reviewing the procedures available to small issuers to raise capital, and proposals may be published soon soliciting comments on simplifying these procedures.

[1] These commentators expressed support for the recommendations of the so-called Wheat Report that the Form 8-K be substantially eliminated and that most of the 8-K items be included in a quarterly report. See "Report and Recommendations to the Securities and Exchange Commission from the Disclosure Policy Study, Disclosure to Investors, A Reappraisal of Administrative Policies under the 1933 and 1934 Acts" (March 1969) at pp. 356-364.

[2] *See* Securities Act Release No. 5092 (October 15, 1970), 35 FR 16733 (October 29, 1970).

I. AMENDMENTS RELATING TO THE TIME FOR FILING REPORTS ON FORM 8-K

Securities Exchange Act Rules 13a-11 and 15d-11 have been amended to delete the specific requirement relating to the time for filing reports on Form 8-K and to refer instead to the filing requirements set forth in the form itself. General Instruction B to the form has been amended to require that reports on Form 8-K be filed within fifteen days after the occurrence of an event specified in the form or within ten days after the end of the month during which occurred an event reported pursuant to Item 5, the voluntary disclosure item. Registrants are encouraged, however, to file all reports on Form 8-K as soon as practicable regardless of these filing requirements. Registrants may continue to report more than one event in a report on Form 8-K provided there is compliance with the requirements of the form relating to the time for filing the report.

The Commission has considered the objections to the proposed filing requirement of ten days after the occurrence of the reportable event which were raised by many of the commentators but believes that any inconvenience to registrants will be more than offset by the benefits to investors from more timely reporting. In addition, the Commission believes that upon the occurrence of any one of the four events requiring current disclosure registrants should have knowledge of the event and access to most of the information required to be set forth in response to the applicable item. In order to alleviate any difficulties which registrants might encounter as a result of weekends, holidays or the mail service, the Commission has adopted the filing date of fifteen days after the occurrence of the reportable event rather than the proposed ten days after the occurrence of the event.

In light of the proposed earlier filing date for reports on Form 8-K, the Commission has also amended General Instruction B to provide registrants with an additional 30 days after the report is filed in which to file the auditor's letter required by Item 6(b) when the registrant reports a change in its certifying accountant.

The Commission has not adopted, however, the proposal to permit registrants to file within 60 days after the report is filed the financial statements required to be included in reports pursuant to Item 2 of Form 8-K. The Commission believes that the proposed revision is unnecessary because of the provisions of Rule 12b-25 under the Exchange Act (17 CFR 240.12b-25) relating to requests for extension of time for furnishing information. Rule 12b-25 provides for an automatic 30-day extension of time unless the Commission enters an order denying the application or notifies the registrant that the application has been denied within 15 days after the application on Form 12b-25 (17 CFR 249.322) is filed. An additional 30 days in which to file the required information may be available upon separate application.

II. AMENDMENTS RELATING TO THE ELIMINATION OF ITEMS FROM FORM 8-K

The amendments authorized today eliminate the following information items from Form 8-K: Item 3 (Legal Proceedings), Item 4 (Changes in Securities), Item 5 (Changes in Security for Registered Securities), Item 6 (Defaults Upon Senior Securities), Item 7 (Increase in Amount of Securities Outstanding), Item 8 (Decrease in Amount of Securities Outstanding), Item 9 (Options to Purchase Securities), Item 10 (Extraordinary Item Charges and Credits, other Material Charges and Credits to Income of an Unusual Nature, Restatements of Capital Share Account), and Item 11 (Submission of Matters to a Vote of Security Holders). To the extent that any of the events previously reported pursuant to these former 8-K items, such as material legal proceedings, constitutes an event of material importance to security holders in the opinion of the registrant, it may be reported under the new Item 5 of the Form 8-K, the voluntary disclosure item. The items remaining in Form 8-K have been renumbered.

A. ELIMINATION OF ITEM 6 (DEFAULTS UPON SENIOR SECURITIES)

In Securities Exchange Act Release No. 12619, the Commission proposed to retain in revised form previously numbered Form 8-K Items 6 and 10. It was proposed that Item 6 be revised to require disclosure of non-compliance with the terms for payment of principal and interest on senior securities. Upon reconsideration of the proposal and after review of the comments, the Commission has transferred the unrevised former 8-K Item 6 to the Form 10-Q. The proposed revision would not have fully achieved the objective of requiring early disclosure of significant liquidity difficulties and the quarterly report is the more appropriate report for disclosure of defaults upon senior securities.

B. ELIMINATION OF ITEM 10 OF THE FORM 8-K RELATING TO MATERIAL CHARGES AND CREDITS

Former Item 10 of Form 8-K required disclosure of material charges and credits to income of an unusual or infrequent nature and direct charges and credits to retained earnings. The objectives of the item were to require appropriate and timely reporting of events or trans-

actions which had a material impact upon the registrant's financial position or results of operations. The Commission continues to believe that disclosure of such information is necessary. However, it believes that the objective is achieved without the necessity for specific requirements in Forms 8–K, 10–Q and 10–K. The Commission has, therefore, determined to eliminate Item 10 and not transfer the item to the Form 10–Q.

The Commission believes that Item 10 of Form 8–K is now unnecessary because the information previously required by that item has become a part of other regulations subsequently adopted by the Commission and/or revisions to generally accepted accounting principles. The Commission believes that Accounting Principles Board Opinions No. 28 (Interim Financial Reporting) and No. 30 (Reporting the Results of Operations) and Accounting Series Releases No. 159 (Textual Analysis of Summary of Earnings or Operations) (39 FR 31896) and No. 177 (Interim Financial Reporting, including Instruction 5 to Form 10–Q, Management's Analysis of Quarterly Income) (40 FR 46107), provide an appropriate framework or requirements for the disclosure of material charges and credits.

Accounting Principles Board Opinion No. 30 requires that disclosure of the nature and financial effects of unusual or infrequently occurring items on the fact of the income statement. In addition, the management discussion and analysis of the statement of operations required by ASR 159 requires a discussion of material facts, whether favorable or unfavorable, which in the opinion of the management may make the historical operations or earnings not indicative of current or future operations or earnings. The Commission believes that these disclosure requirements encompass reporting the nature of a charge or credit, the reasons for a charge or credit, and an analysis of the components of the charge or credit, including information as to the types of items written off and provision made for future expenses. They also encompass the reporting of the timing of significant future cash requirements or recoveries.

The Commission also believes that provisions for future charges and the changes in such provisions are subject to the reporting requirements of Schedule XII of Regulation S–X (Valuation and Qualifying Accounts and Reserves) (17 CFR 210.12–13). Major components of such reserves should be set forth separately in Schedule XII.

By eliminating the specific material charges and credits item from the forms, the Commission does not believe the requirements for such disclosures have been lessened nor does it believe that the timeliness or quality of disclosures regarding material events or transactions of registrants will be diminished. The Commission again reminds registrants of their responsibilities under the Securities Acts for full and timely disclosure of material charges and credits in the absence of specific requirements in its forms. The Commission intends to monitor compliance with the disclosure requirements for these forms and will take further action in appropriate circumstances.

III. Amendments Relating to the Transfer of Items From the Form 8–K to the Form 10–Q

A. Amendments to Form 10–Q for quarterly reports under section 13 or 15 (d) of the Securities Exchange Act

The information called for by the items which have been eliminated from the Form 8–K will be reported in quarterly reports on Form 10–Q, with the exception of Items 9 (Options to Purchase Securities) and 10 (Extraordinary Item Charges * * *). Item 9 has not been included in Form 10–Q because the disclosure it calls for already is required in annual reports on Form 10–K and in proxy and information statements filed pursuant to Section 14 of the Securities Exchange Act; Item 10 has not been transferred to the Form 10–Q for the reasons discussed above.

The amendments to Form 10–Q provide for a two part report. Part I contains the quarterly financial information and Part II, which is deemed to be a "filed" document and subject to the liability provisions of Section 18 of the Exchange Act, contains the following items of information: (1) The information reported pursuant to the seven items being transferred to the Form 10–Q from the Form 8–K; (2) a new Item 8 which enables a registrant voluntarily to include in its quarterly report any information not otherwise called for by Form 10–Q which the registrant deems of material importance to security holders; (3) a new Item 9 relating to reports on Form 8–K, if any, which have been filed by registrant during the quarter covered by the report; and (4) appropriate instructions as to required exhibits. The General Instructions to Form 10–Q have been amended to reflect the reorganization of the form into the two parts and to include instructions appropriate to the information required by new Part II of the form.

New Item 8 of Part II of Form 10–Q, which permits registrants to report matters of material importance to security holders, is similar to former Item 13 of Form 8–K and to Item 5 of the amended form. It differs from the 8–K item in that it provides for disclosure of events "not previously reported in a report on Form 8–K."

In addition, new Item 9 of Part II of Form 10–Q requires registrants to file certain necessary exhibits to the other items of Part II and state whether any reports on Form 8–K have been filed during the quarter covered by the report, listing the dates of any such reports, the items reported and any financial statements filed. This amendment is intended to provide users of the reporting system with a convenient reference to determine whether a registrant has filed any reports on Form 8–K.

B. Amendments to Securities Exchange Act Rules 13a–13 (17 CFR 240.13a–13) and 15d–13 (17 CFR 240.15d–13)

In connection with the transfer of items from the Form 8–K to the Form 10–Q, the Commission has adopted certain technical amendments to Rules 13a–13 and 15d–13 under the Exchange Act in order to set forth the persons required to file pursuant to and the nature of the filing requirements of Parts I and II of the form.

Rules 13a–13 and 15d–13 have been amended to revise the exemption contained therein from the requirement to file quarterly reports on Form 10–Q. All life insurance companies and holding companies, regardless of the effect on such companies of the amendments announced in Accounting Series Release No. 197 (41 FR 42645), and certain mining companies henceforth will be required to file quarterly reports on Part II of Form 10–Q to report the occurrence of any one or more of the events specified in Part II and to state whether or not any reports on Form 8–K have been filed. These companies have been required to file current reports on Form 8–K and, therefore, the amendment merely preserves the status quo. The exemption from the requirements to file quarterly and current reports on Forms 10–Q and 8–K formerly available to certain investment companies and foreign private issuers has not been affected by the amendments announced today.

Secondly, in order to retain the requirement that public utilities, common carriers and pipeline carriers report the information called for by the items which have been transferred from the Form 8–K to the 10–Q, Rules 13a–13 and 15d–13 have been amended to provide that those corporations which are regulated by the Civil Aeronautics Board, the Federal Communications Commission, the Federal Power Commission or the Interstate Commerce Commission may file their reports submitted to such agencies in lieu only of Part I of the form.[3]

Securities Exchange Act Rules 13a–13 and 15d–13 have provided prior to their amendment that the quarterly reports are not deemed to be "filed" for the purpose of Section 18 of the Exchange Act or otherwise subject to the liabilities of that section.[4] Section 18 has been applicable to the information reported on Form 8–K and, accordingly, the Commission has amended Rules 13a–13 and 15d–13 to extend Section 18 liability to the information required by Part II of the Form 10–Q.

[3] In Securities Exchange Act Release No. 12769 (September 3, 1976) (41 FR 39050), the Commission proposed amendments to Rules 13a–13 and 15d–13 to require registrants subject to the jurisdiction of the above federal agencies to file annual reports on Form 10–K and quarterly financial reports on Form 10–Q; these proposals are still pending.

[4] The basis stated for the determination that Section 18 should not apply to the quarterly financial information was that "interim earnings figures can frequently be arrived at only by the use of reasonable estimates or on the basis of certain assumptions * * *" *See* Securities Exchange Act Release No. 5129 (January 27, 1955), 20 FR 771 (February 4, 1955).

C. Amendments to Form 10–K for annual reports pursuant to section 13 or 15(d) of the Securities Exchange Act

Reports on Form 10–Q are not required for the fourth quarter of a registrant's fiscal year, and the Form 10–K has not previously required the disclosure of certain of the events reportable under the items contained in new Part II of the Form 10–Q. Therefore, in order to provide for prompt reporting of the information called for by these items concerning events occurring during registrant's fourth quarter, the Commission has amended the Form 10–K to require disclosure of the following matters unless previously reported in a report on Form 10–Q:

(1) The institution and termination of material legal proceedings (revised Item 5);

(2) Increases and decreases in registered debt securities and in indebtedness (revised Item 6);

(3) Changes in securities and changes in security for registered securities (new Item 7);

(4) Defaults upon senior securities (new Item 8); and

(5) Submission of matters to a vote of security holders (new Item 10).[5]

Item 6 has been amended further to eliminate former paragraph (b) which required disclosure relating to securities sold by registrants in reliance upon Section 4(2) of the Securities Act of 1933 (the "Securities Act") (15 U.S.C. 77a et seq. as amended by Pub. L. No. 94–29 (June 4, 1975)). The Commission believes that this paragraph is unnecessary because disclosure of sales of securities in reliance upon Section 4(2) is required already by other provisions. All issuances of equity securities are reported under paragraph (a) of Item 6. In addition, all increases in the amount outstanding of debt securities will be reported in quarterly reports on Form 10–Q (or in annual reports on Form 10–K when the transactions occurred during the fourth quarter of registrant's fiscal years) if the aggregate amount of all such increases not previously reported exceeds five percent of the outstanding securities of the class. In lieu of former paragraph (b) of Item 6, new paragraph (b) requires registrants to list and briefly discuss increases and decreases in the amount outstanding of debt securities and indebtedness which were previously reported in quarterly reports on Form 10–Q. The Commission believes that this amendment will make disclosure in the Form 10–K more complete while eliminating disclosure of less significant transactions and unnecessary repetition of previously disclosed information.

In addition, a new item has been adopted in Form 10–K requiring registrants to state whether any reports on Form 8–K have been filed during the last quarter of the period covered by the report and to list the items reported and financial statements filed, and the dates of the reports. Certain technical amendments to the Form 10–K have also been adopted to renumber the prior 10–K items and references to items contained therein, and to list the exhibits required by the new items of the form. (New Item 13(b) Reports on Form 8–K).

III. Amendments to Form 8–K for Current Reports Under Section 13 or 15(d) of the Securities Exchange Act and to Schedule 14A to Regulation 14 Under the Securities Exchange Act

A. Amendment to item 1 of Form 8–K (changes in control of registrant) and to item 5 of Schedule 14A to Regulation 14 (voting securities and principal holders thereof)

The Commission has revised Item 1 of Form 8–K to expand the disclosure heretofore required to be reported concerning changes in control of registrants and to conform the disclosure requirements of the item to the existing requirements of Item 5 (e) and (f) of Schedule 14A to Regulation 14 under the Securities Exchange Act, applicable to proxy and information statements. The revised item will require disclosure of (1) the identity of the person or persons from whom control was assumed and (2) a description of any arrangements, including a pledge of securities of the registrant or any of its parents, which might result in a change in control of the registrant.

The Commission has also amended Item 1 of Form 8–K and Item 5 of Schedule 14A[6] to require the following additional disclosure concerning changes in control: (1) The amount and source of the consideration used by the person or persons who acquired control; (2) the terms of any loans or pledges obtained by the new control group for the purpose of acquiring control and the names of the lenders or pledgees; and (3) a description of any arrangements or understandings among members of both the former and new control group and their associates with respect to election of directors or other matters. If the source of all or any part of the consideration paid by the person(s) who acquired control is a loan made in the ordinary course of business by a bank as defined in Section 3(a)(6) of the Act, the revised items permit the registrant to delete the name of the bank provided a request for confidentiality has been made pursuant to Section 13(d)(1)(B) of the Act by the person(s) who acquired control.[7]

Certain commentators questioned the need for requiring disclosure of changes in control of registrants in reports on the Form 8–K in view of the filing requirements of Section 13(d) of the Exchange Act. It is the Commission's belief that a change in control of a registrant is an important event about which current information should be readily available to investors. The Schedule 13D (17 CFR 240.13d–101) is not an adequate substitute for the report on Form 8–K for the following reasons: (1) Section 13(d) is not applicable to the acquisition of securities of a company which files reports under the Exchange Act pursuant to Section 15(d) of the Act; (2) many, if not most, of the acquisitions of securities reported in accordance with Section 13(d) do not result in changes in control of the registrant; and (3) changes in control are not always the result of an acquisition of securities. Accordingly, Item 1 has been retained in the Form 8–K.

In addition, various commentators noted that the disclosure required by the item may be unavailable to the management. Rule 12b–21 under the Exchange Act (17 CFR 240.12b–21) relates to those instances when information is unknown to the registrant; therefore, these items have not been amended to state that information need be given only insofar as it is known or reasonably available to management.

B. Amendment to item 2 of Form 8–K (acquisition or disposition of assets)

In order to provide for reporting of more complete information concerning acquisitions or dispositions of significant amounts of assets, otherwise than in the ordinary course of business, the Commission has amended Item 2 of Form 8–K to require disclosure of the source of the funds used by the registrant or its subsidiary in making an acquisition. If all or any part of the consideration is a loan made in the ordinary course of business by a bank as defined in Section 3(a)(6) of the Act, the revised item permits the registrant to delete the name of the bank provided a request for confidentiality has been made pursuant to Section 13(d)(1)(B) of the Act by the person(s) who acquired control.[8] The proposed revision to require disclosure of management's reasons for acquiring or disposing of the assets has been deleted upon its reconsideration by the Commission.

C. Addition of new item 3 to Form 8–K (bankruptcy or receivership)

The Commission has adopted a new Item 3 to Form 8–K to require reporting of information concerning the appointment of a receiver for the registrant or its parent in a proceeding under the

[5] These matters have heretofore been reported in reports on Form 8–K under Items 10, 3, 7 and 8, 4 and 5, 6, and 11 respectively. For a discussion of the amendments of some of these items in Part II of the Form 10–Q, see the discussion in Section IV.

[6] The Commission recently has proposed for comment certain amendments to Item 5 of Schedule 14A which would require more disclosure regarding the background of the management of publicly-held companies. See Securities Act Release No. 5728 (November 2, 1976), 41 FR 4949 (November 9, 1976).

[7] If a request for confidentiality has not been made pursuant to Section 13(d)(1)(B) of the Act, registrant may request confidentiality of the identity of the bank pursuant to the provisions of Rule 24b–2 of the Act (17 CFR 240.24b–2).

[8] See also note 7 supra.

Bankruptcy Act or in any other proceeding under State or Federal law in which a court or governmental body has assumed jurisdiction over substantially all of the assets or business of the registrant or its parent, or if such jurisdiction has been assumed by leaving the existing directors and officers in possession, but subject to the supervision and control of a court or governmental body. The Commission believes that the availability of this information in the Commission's public files will be useful to investors.

D. AMENDMENT TO INSTRUCTION 4 OF THE INSTRUCTION RELATING TO THE FILING OF FINANCIAL STATEMENTS OF BUSINESSES ACQUIRED

Instruction 4 relating to the financial statements required when an acquisition of a business is reported pursuant to item 2 has been amended to clarify when the Commission may grant a waiver from the requirement to furnish financial statements. In addition, the instruction has been revised to state that requests for relief should be filed as a part of the report on Form 8–K and to set forth the information to be included together with such a request.

The Commission may grant relief from the provisions relating to the required financial statements if the statements are not reasonably available to the registrant, because the obtaining thereof would involve unreasonable effort or expense or practicable difficulties. When a request for relief is submitted, the Commission considers the reasons advanced by the registrant and the magnitude of the acquisition based on the financial data submitted.

The Commission believes that these amendments will facilitate the consideration of requests for relief in the future.

E. TECHNICAL AMENDMENTS

The new item and the items which have been retained in the Form 8–K as well as the instructions to the required exhibits have been renumbered and revised to reflect the above-outlined changes, the deletion of Items 9 and 10 and the transfer of former Items 3, 4, 5, 6, 7, 8 and 11 to the Form 10–Q. The cover page of the form has been amended to add a line for disclosure of the registrant's former name or former address if they have been changed since the registrant's last report was filed. General Instruction E has been deleted because Rule 12b–23 under the Exchange Act (17 CFR 240.12b–23) clearly discusses incorporation by reference.

IV. AMENDMENTS TO ITEMS OF THE FORM 8–K TRANSFERRED TO NEW PART II OF FORM 10–Q

A. ITEM 1, PART II OF FORM 10–Q (LEGAL PROCEEDINGS) (FORMERLY ITEM 3 OF FORM 8–K)

The Commission has transferred to the Form 10–Q in revised form previously numbered Item 3 of the Form 8–K. This item has been revised to require registrants to describe the disposition of previously reported legal proceedings.

B. ITEM 4 (INCREASE IN AMOUNT OUTSTANDING OF SECURITIES OR INDEBTEDNESS) AND ITEM 5 (DECREASE IN AMOUNT OUTSTANDING OF SECURITIES OR INDEBTEDNESS) OF PART II OF FORM 10–Q (FORMERLY ITEMS 7 AND 8 OF FORM 8–K)

Former Items 7 and 8 of the Form 8–K relating to disclosure of increases and decreases in securities outstanding have been transferred to Part II of the Form 10–Q in revised form. The items have been revised to reflect the staff's interpretation that increases and decreases in commercial loans must be reported thereunder.

A few commentators questioned the applicability of prior Form 8–K Items 7 and 8 to various types of commercial loans, such as revolving credit agreements, citing cases which hold that commercial loans are not securities. In view of their observations and in order to clarify the extent of disclosure which the Commission believes should be required by these items, the captions and the text of the items in the Form 10–Q have been revised to require disclosure of fluctuations in the amount outstanding of indebtedness as well as securities. Obligations which mature not later than one year from the date of issuance are excluded from the applicability of the items.

In addition, the items have been revised in order to require disclosure only of significant increases and decreases of indebtedness. A new instruction applicable to these items has been adopted which permits registrants to classify all of their indebtedness (including short term indebtedness) into convertible long term debt and other indebtedness for the purpose of determining whether the aggregate amount of all changes in the amount of one of these two classes of indebtedness, including changes not previously reported, exceeds five percent of the outstanding debt in the class.

The required disclosure with respect to increases and decreases in the amount of equity securities will be the same as that required by former Items 7 and 8 of the Form 8–K.

The Commission believes that the narrative disclosure relating to increases and decreases in commercial debt is necessary in Part II of the Form 10–Q despite the opinion expressed by certain commentators that the expanded balance sheet disclosure required in the quarterly report should be sufficient. The information which must be disclosed pursuant to Items 5 and 6 of Part II of the Form 10–Q is more complete than the information which is required by Part I of the form.

C. TECHNICAL AMENDMENTS

The instructions to Part I and the items and the instructions in Part II of the Form 10–Q have been numbered, revised or drafted to reflect the above-outlined changes and the reorganization of the form into 2 parts. Former General Instruction M to the Form 10–Q has been deleted because similar disclosure is now required in Part II of the revised form.

The text of amendments is set forth below:

1. Rule 13a–11 (§ 240.13a–11) is amended by revising paragraph (a) to read as follows:

§ 240.13a–11 Current reports on Form 8–K (§ 249.308 of this chapter).

(a) Except as provided in paragraph (b) of this section, every registrant subject to § 240.13a–1 shall file a current report on Form 8–K within the period specified in that form unless substantially the same information as that required by Form 8–K has been previously reported by the registrant.

* * * * *

2. Rule 13a–13 (§ 240.13a–13) is revised to read as follows:

§ 240.13a–13 Quarterly reports on Form 10–Q (§ 249.308a of this chapter).

(a) Except as provided in paragraphs (b) and (c) of this section, every issuer which has securities registered pursuant to section 12 of the Act and which is required to file annual reports pursuant to section 13 of the Act on Form 10–K (§ 249.310 of this chapter), 12–K (§ 249.312 of this chapter) or U5S (§ 249.450 of this chapter) shall file a quarterly report on Form 10–Q (§ 249.308a of this chapter) within the period specified in General Instruction A to that form, for each of the first three fiscal quarters of each fiscal year of the issuer, commencing with the first such fiscal quarter which ends after securities of the issuer become so registered.

(b) The provisions of this rule shall not apply to the following issuers:

(1) Investment companies required to file quarterly reports pursuant to § 240.13a–12; or

(2) Foreign private issuers required to file reports pursuant to § 240.13a–16.

(c) Part I of the quarterly report on Form 10–Q need not be filed by the following issuers:

(1) Life insurance companies and holding companies having only life insurance subsidiaries for quarters in fiscal years ending on or before December 25, 1978, if they do not meet the tests specified in § 210.3–16(t)(1)(i)(B);

(2) Mutual life insurance companies; or

(3) Mining companies not in the production stage but engaged primarily in the exploration for or the development of mineral deposits other than oil, gas or coal, if all the following conditions are met:

(i) The registrant has not been in production during the current fiscal year or the two years immediately prior thereto; except that being in production for an aggregate period of no more than eight months over the three-year period shall not be a violation of this condition.

(ii) Receipts from the sale of mineral products or from the operations of mineral producing properties by the registrant and its subsidiaries combined have not exceeded $500,000 in any of the most recent six years and have not aggregated more than $1,500,000 in the most recent six fiscal years.

(d) Public utilities, common carriers and pipeline carriers which submit financial reports to the Civil Aeronautics Board, the Federal Communications Commission, the Federal Power Commission or the Interstate Commerce Commission may, at their option, in lieu of furnishing the information called for by Part I of Form 10–Q, file as exhibits to reports on this form copies of their reports submitted to such Board or Commission for the preceding fiscal quarter or for each month of such quarter, as the case may be, together with copies of their quarterly reports, if any, for such periods sent to their stockholders.

(e) Notwithstanding the foregoing provisions of this section, the financial information required by Part I of Form 10–Q, or financial information submitted in lieu thereof pursuant to paragraph (d) of this section, shall not be deemed to be "filed" for the purpose of section 18 of the Act or otherwise subject to the liabilities of that section of the Act but shall be subject to all other provisions of the Act.

3. Rule 15d–11 (§ 240.15d–11) is amended by revising paragraph (a) to read as follows:

§ 240.1d–11 Current reports on Form 8–K (§ 249.308 of this chapter).

(a) Except as provided in paragraph (b) of this section, every registrant subject to § 240.15d–1 shall file a current report on Form 8–K within the period specified in that form unless substantially the same information as that required by Form 8–K has been previously reported by the registrant.

* * * * *

4. Rule 15d–13 (§ 240.15d–13) is revised to read as follows:

§ 240.15d–13 Quarterly reports on Form 10–Q (§ 249.308a of this chapter).

(a) Except as provided in paragraphs (b) and (c) of this section, every issuer which has securities registered pursuant to the Securities Act of 1933 and which is required to file annual reports pursuant to section 15(d) of the Securities Exchange Act of 1934 on Forms 10–K (§ 249.310 of this chapter), 12–K (§ 249.312 of this chapter) or U5S (§249.450 of this chapter) shall file a quarterly report on Form 10–Q (§ 249.308a of this chapter) within the period specified in General Instruction A to that form, for each of the first three fiscal quarters of each fiscal year of the issuer, commencing with the first such fiscal quarter which ends after securities of the issuer become so registered.

(b) The provisions of this rule shall not apply to the following issuers:

(1) Investment companies required to file quarterly reports pursuant to §240.15d–12; or

(2) Foreign private issuers required to file reports pursuant to §240.15d–16.

(c) Part I of the quarterly report on Form 10–Q need not be filed by the following issuers:

(1) Life insurance companies and holding companies having only life insurance subsidiaries for quarters in fiscal years ending on or before December 25, 1978, if they do not meet the tests specified in § 210.3–16(t)(1)(i)(B);

(2) Mutual life insurance companies; or

(3) Mining companies not in the production stage but engaged primarily in the exploration for or the development of mineral deposits other than oil, gas or coal, if all the following conditions are met:

(i) The registrant has not been in production during the current fiscal year or the two years immediately prior thereto; except that being in production for an aggregate period of no more than eight months over the three-year period shall not be a violation of this condition.

(ii) Receipts from the sale of mineral products or from the operations of mineral producing properties by the registrant and its subsidiaries combined have not exceeded $500,000 in any of the most recent six years and have not aggregated more than $1,500,000 in the most recent six fiscal years.

(d) Public utilities, common carriers and pipeline carriers which submit financial reports to the Civil Aeronautics Board, the Federal Communications Commission, the Federal Power Commission or the Interstate Commerce Commission may, at their option, in lieu of furnishing the information called for by Part I of Form 10–Q, file as exhibits to reports on this form copies of their reports submitted to such Board or Commission for the preceding fiscal quarter or for each month of such quarter, as the case may be, together with copies of their quarterly reports, if any, for such periods sent to their stockholders.

(e) Nothwithstanding the foregoing provisions of this section, the financial information required by Part I of Form 10–Q, or financial information submitted in lieu thereof pursuant to paragraph (d) of this section, shall not be deemed to be "filed" for the purpose of section 18 of the Act or otherwise subject to the liabilities of that section of the Act but shall be subject to all other provisions of the Act.

5. Section 249.308 is amended by revising Form 8–K to read as follows:

§ 249.308 Form 8–K, for current reports.

* * * * *

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 8–K

CURRENT REPORT

Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Date of Report (Date of earliest event reported) ----------

(Exact name of registrant as specified in its charter)

(State or other jurisdiction of incorporation)

(Commission File Number)	(IRS Employer Identification No.)

(Address of principal executive offices)	(Zip Code)

Registrant's telephone number, including area code----------

(Former name or former address, is changed since last report.)

GENERAL INSTRUCTIONS

A. *Rule as to Use of Form 8–K.*

Form 8–K shall be used for current reports under Section 13 or 15(d) of the Securities Exchange Act of 1934, filed pursuant to Rule 13a–11 [17 CFR 240.13a–11] or Rule 15d–11 [17 CFR 240.15d–11].

B. *Events to be Reported and Filing of Reports.*

A report on this form is required to be filed upon the occurrence of any one or more of the events specified in the items of this form. Reports are to be filed within 15 days after the occurrence of the earliest event required to be reported. However, reports which disclose events pursuant to Item 5 may be filed within 10 days after the close of the month during which the event occurred. If the letter from the independent accountants to be furnished pursuant to Item 4(d) is unavailable at the time of filing, it shall be filed within thirty days thereafter. Moreover, if substantially the same information as that required by this form has been previously reported by the registrant, an additional report of the information on this form need not be made. The term "previously reported" is defined in Rule 12b–2 [17 CFR 240.12b–2].

C. *Application of General Rules and Regulations.*

(a) The General Rules and Regulations under the Act [17 CFR Part 240] contain certain general requirements which are applicable to reports on any form. These general requirements should be carefully read and observed in the preparation of filing of reports on this form.

(b) Particular attention is directed to Regulation 12B [17 CFR 240.12b–1 et seq.] which contains general requirements regarding matters such as the kind and size of paper to be used, the legibility of the report, the information to be given whenever the title of securities is required to be stated, and the filing of the report. The definitions contained in Rule 12b–2 should be especially noted. See also Regulations 13A [17 CFR 240.13a–1 et seq.] and 15D [17 CFR 240.15d–1 et seq.].

D. *Preparation of Report.*

This form is not to be used as a blank form to be filled in, but only as a guide in the preparation of the report on paper meeting the requirements of Rule 12b–12 [17 CFR 240.12b–12]. The report shall contain the numbers and captions of all applicable items, but the text of such items may be omitted, provided the answers thereto are prepared in the manner specified in Rule 12b–13 [17 CFR 240.12b–13]. All items which are not required to be answered in the particular report may be omitted and no reference thereto need be made in the report. All instructions should also be omitted.

E. *Signature and Filing of Report.*

Three complete copies of the report, including any financial statements, exhibits or other papers or documents filed as a part thereof, and five additional copies which need not include exhibits, shall be filed with the Commission. At least one complete copy of the report, including any financial statements, exhibits or other papers or documents filed as a part thereof, shall be filed with each exchange on which any class of securities of the registrant is registered. At least one complete copy of the report filed with the Commission and one such copy filed with

each exchange shall be manually signed. Copies not manually signed shall bear typed or printed signatures.

INFORMATION TO BE INCLUDED IN THE REPORT

Item 1. Changes in Control of Registrant.

(a) If, to the knowledge of management, a change in control of the registrant has occurred, state the name of the person(s) who acquired such control; the amount and the source of the consideration used by such person(s); the basis of the control; the date and a description of the transaction(s) which resulted in the change in control; the percentage of voting securities of the registrant now beneficially owned directly or indirectly by the person(s) who acquired control; and the identity of the person(s) from whom control was assumed. If the source of all or any part of the consideration used is a loan made in the ordinary course of business by a bank as defined by Section 3(a)(6) of the Act, the identity of such bank shall be omitted provided a request for confidentiality has been made pursuant to Section 13(d)(1)(B) of the Act by the person(s) who acquired control. In lieu thereof, the material shall indicate that disclosure of the identity of the bank has been so omitted and filed separately with the Commission.

Instructions. 1. State the terms of any loans or pledges obtained by the new control group for the purpose of acquiring control, and the names of the lenders or pledgees.

2. Any arrangements or understandings among members of both the former and new control groups and their associates with respect to the election of directors or other matters shall be described.

(b) Describe any contractual arrangements, including any pledge of securities of the registrant, or any of its parents, known to management, the operation of the terms of which may at a subsequent date result in a change in control of the registrant.

Instruction. Paragraph (b) does not require a description of ordinary default provisions contained in the charter, trust indentures or other governing instruments relating to securities of the registrant.

Item 2. Acquisition or Disposition of Assets.

If the registrant or any of its majority-owned subsidiaries has acquired or disposed of a significant amount of assets, otherwise than in the ordinary course of business, furnish the following information:

(a) The date and manner of the acquisition or disposition and a brief description of the assets involved, the nature and amount of consideration given or received therefor, the principle followed in determining the amount of such consideration, the identity of the person(s) from whom the assets were acquired or to whom they were sold and the nature of any material relationship between such person(s) and the registrant or any of its affiliates, any director or officer of the registrant, or any associate of any such director or officer. If the transaction being reported is an acquisition, identify the source(a) of the funds used unless all or any part of the consideration used is a loan made in the ordinary course of business by a bank as defined by Section 3(a)(6) of the Act in which the identity of such bank shall be omitted provided a request for confidentiality has been made pursuant to Section 13(d)(1)(B) of the Act. In lieu thereof, the material shall indicate that the identity of the bank has been so omitted and filed separately with the Commission.

(b) If any assets so acquired by the registrant or its subsidiaries constituted plant, equipment or other physical property, state the nature of the business in which the assets were used by the person(s) from whom acquired and whether the registrant intends to continue such use or intends to devote the assets to other purposes, indicating such other purposes.

Instructions. 1. No information need be given as to (i) any transaction between any person and any wholly-owned subsidiary of such person; (ii) any transaction between two or more wholly-owned subsidiaries of any person; or (iii) the redemption or other acquisition of securities from the public, or the sale or other disposition of securities to the public, by the issuer of such securities.

2. The term "acquisition" includes every purchase, acquisition by lease, exchange, merger, consolidation, succession or other acquisition; provided, that such term does not include the construction or development of property by or for the registrant or its subsidiaries or the acquistion of materials for such purpose. The term "disposition" includes every sale, disposition by lease, exchange, merger, consolidation, mortgage, or hypothecation of assets, assignment, whether for the benefit of creditors or otherwise, abandonment, destruction, or other disposition.

3. The information called for by this item is to be given as to each transaction or series of related transactions of the size indicated. The acquisition or disposition of securities shall be deemed the indirect acquisition or disposition of the assets represented by such securities if it results in the acquisition or disposition of control of such assets.

4. An acquisition or disposition shall be deemed to involve a significant amount of assets (i) if the registrant's and its other subsidiaries' equity in the net book value of such assets or the amount paid or received therefor upon such acquisition or disposition exceeded 10 percent of the total assets of the registrant and its consolidated subsidiaries, (ii) if it involved the succession to or disposition of a business which would meet the test of a significant subsidiary, or (iii) if it involved the acquisition or disposition of an interest in a business which would meet the test of a significant subsidiary and would be required to be accounted for by the equity method.

5. Where assets are acquired or disposed of through the acquisition or disposition of control of a person, the person from whom such control was acquired or to whom it was disposed of shall be deemed the person from whom the assets were acquired or to whom they were disposed of, for the purposes of this item. Where such control was acquired from or disposed of to not more than five persons, their names shall be given; otherwise it will suffice to identify in an appropriate manner the class of such persons.

6. Attention is directed to the requirements in Item 6 of the form with respect to the filing of financial statements for businesses acquired and to the filing of copies of the plans of acquisition or disposition as exhibits to the report.

Item 3. Bankruptcy or Receivership.

If a receiver, fiscal agent or similar officer has been appointed for a registrant or its parent, in a proceeding under the Bankruptcy Act or in any other proceeding under State or Federal law in which a court or governmental agency has assumed jurisdiction over substantially all of the assets or business of the registrant or its parent, or if such jurisdiction has been assumed by leaving the existing directors and officers in possession but subject to the supervision and orders of a court or governmental body, identify the proceeding, the court or governmental body, the date jurisdiction was assumed, the identity of the receiver, fiscal agent or similar officer and the date of his appointment.

Item 4. Changes in Registrant's Certifying Accountant.

If an independent accountant who was previously engaged as the principal accountant to audit the registrant's financial statements resigns (or indicates he declines to stand for reelection after the completion of the current audit) or is dismissed as the registrant's principal accountant, or another independent accountant is engaged as principal accountant, or if an independent accountant on whom the principal accountant expressed reliance in his report regarding a significant subsidiary resigns (or formally indicates he declines to stand for re-election after the completion of the current audit) or is dismissed or another independent accountant is engaged to audit that subsidiary:

(a) State the date of such resignation (or declination to stand for re-election), dismissal or engagement.

(b) State whether in connection with the audits of the two most recent fiscal years and any subsequent interim period preceeding such resignation, dismissal or engagement there were any disagreements with the former accountant on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which disagreements if not resolved to the satisfaction of the former accountant would have caused him to make reference in connection with his report to the subject matter of the disagreement(s); also, describe each such disagreement. The disagreements required to be reported in response to the preceding sentence include both those resolved to the former accountant's satisfaction and those not resolved to the former accountant's satisfaction. Disagreements contemplated by this rule are those which occur at the decisionmaking level; i.e., between personnel of the registrant responsible for presentation of its financial statements and personnel of the accounting firm responsible for rendering its report.

(c) State whether the principal accountant's report on the financial statements for any of the past two years contained an adverse opinion or a disclaimer of opinion or was qualified as to uncertainty, audit scope, or accounting principles; also describe the nature of each such adverse opinion, disclaimer of opinion, or qualification.

(d) The registrant shall request the former accountant to furnish the registrant with a letter addressed to the Commission stating whether he agrees with the statements made by the registrant in response to this item and, if not, stating the respects in which he does not agree. The registrant shall file a copy of the former accountant's letter as an exhibit with all copies of the Form 8-K required to be filed pursuant to General Instruction F.

Item 5. Other Materially Important Events.

The registrant may, at its option, report under this item any events, with respect to which information is not otherwise called for by this form, which the registrant deems of material importance to security holders.

Item 6. Financial Statements and Exhibits.

List below the financial statements and exhibits, if any, filed as a part of this report.

(a) Financial statements of businesses acquired.

Instructions. 1. Businesses for Which Statements are Required.

The financial statements specified below shall be filed for any business the succession to which or the acquisition of an interest in which is required to be described in answer to Item 2 above.

2. Statements Required.

(a) There shall be filed a balance sheet of the business as of a date reasonably close to the date of acquisition. This balance sheet need not be audited, but if it is not audited there shall also be filed an audited balance sheet as of the close of the preceding fiscal year.

(b) Income and source and application of funds statements of the business shall be filed for each of the last three full fiscal years and for the period, if any, between the close of the latest of such fiscal years and the date of the latest balance sheet filed. These income and source and application of funds statements shall be audited up to the date of the audited balance sheet.

(c) If the business was in insolvency proceedings immediately prior to its acquisition, the balance sheets required above need not be audited. In such case, the income and source and application of funds statements required shall be audited to the close of the latest full fiscal year.

(d) Except as otherwise provided in this instruction, the principles applicable to a registrant and its subsidiaries with respect to the filing of individual, consolidated and group statements in an original application or annual report shall be applicable to the statements required by this instruction.

3. Application of Regulation S-X.

Regulation S-X governs the examination and the form and content of the statements required by the preceding instruction, including the basis of consolidation, and prescribes the statements of other stockholders' equity to be filed. No supporting schedules need be filed. A manually signed accountant's report should be provided as required by Rule 2-02(a) of Regulation S-X [17 CFR 210.2-02(a)].

4. Filing of Other Financial Information in Certain Cases.

The Commission may, upon the written request of the registrant and where consistent with the protection of investors, permit the omission of one or more of the financial statements herein required or the filing in substitution therefor of appropriate statements of comparable character. If the required audited financial statements are not reasonably available to the registrant, because the obtaining thereof would involve unreasonable effort, expense or practicable difficulties. A request for such relief shall be filed as a part of the report. If an extension of time has been granted pursuant to Rule 12b-25 [17 CFR 240.12b-25], a request for relief shall be filed as a part of an amendment to the initial report within the additional time provided under said rule. The request shall set forth the following information:

(a) The reason(s) for the unavailability of the audited financial statements;

(b) The estimated costs of the audit;

(c) An explanation of any other practical auditing problems;

(d) A letter from the registrant's independent auditors confirming the above representation; and

(e) A tabular presentation of the following items of information, comparing the acquired business(es) with the registrant on a consolidated basis (excluding the acquired business(es)): (1) gross sales and operating revenues; (2) net income; (3) total assets; (4) total stockholder equity; and (5) total purchase price compared to total assets of registrant.

The Commission may also by informal written notice require the filing of other financial statements in addition to, or in substitution for, the statements herein required in any case where such statements are necessary or appropriate for an adequate presentation of the financial condition of any person whose financial statements are required, or whose statements are otherwise necessary for the protection of investors.

(b) Exhibits. Subject to the rules as to incorporation by reference, the following documents shall be filed as exhibits to this report:

1. Copies of any plan of acquisition or disposition described in answer to Item 2, including any plan of reorganization, readjustment, exchange, merger, consolidation or succession in connection therewith.

2. Letters from the independent accountants furnished pursuant to Item 4(d).

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Date ---------- ----------
(Registrant)

(Signature)[1]

6. Section 249.308a is amended by amending Form 10-Q to read as follows:

§ 249.308a Form 10-Q, for quarterly reports under section 13 or 15(d) of the Securities Exchange Act of 1934.

* * * * *

GENERAL INSTRUCTIONS

A.-C. [No change.]

D. *Incorporation by Reference.*

(a) If the registrant makes available to its stockholders or otherwise publishes, within the period prescribed for filing the report, a financial statement containing the information required by this form, the information called for may be incorporated by reference to such published statement provided copies thereof are filed as an exhibit to Part I of the report on this form.

(b) Other information may be incorporated by reference in answer or partial answer to any item or items of Part II of this form in accordance with the provisions of Rule 12b-23.

E. *Signature and Filing of Report.*

Eight copies of the report shall be filed with the Commission. At least one copy of the report shall be filed with each exchange on which any class of securities of the registrant is listed and registered. At least one copy of the report filed with the Commission and one copy filed with each such exchange shall be manually signed on the registrant's behalf by a duly authorized officer of the registrant and by the principal financial officer or chief accounting officer of the registrant. Copies not manually signed shall bear typed or printed signatures.

PART I. FINANCIAL INFORMATION

Instruction 1. Persons for Whom the Financial Information Is To Be Given.

(a) The required information is to be given as to the registrant or, if the registrant includes consolidated financial statements in its annual reports filed with the Commission, it shall be given for the registrant and its consolidated subsidiaries. If the information is given for the registrant and its consolidated subsidiaries, it need not be given separately for the registrant.

(b) Summarized income statement information shall be given separately as to each subsidiary not consolidated or 50 percent or less owned persons or as to each group of such subsidiaries or fifty percent or less owned persons for which separate individual or group statements are required to be included in the registrant's annual reports filed with the Commission. It need not be furnished, however, for any such subsidiary or person which would not be required pursuant to Rule 13a-13 or 15d-13 to file quarterly financial information if it were a registrant.

Instruction 2. Preparation of Financial Information.

This part requires only the items of information specified. The information is not required to be audited and may carry a notation to that effect and any other qualification considered necessary or appropriate. Amounts may be stated in thousands or hundred thousands of dollars provided it is stated that such has been done. Losses or other negative amounts shall be indicated clearly in the caption and the amounts shown in brackets or parentheses.

Instruction 3. Delay in Filing Financial Information.

The information required may be omitted with respect to foreign subsidiaries not consolidated or other foreign persons if it is impracticable to furnish it within the time specified for filing the report, provided it is indicated that such information has been omitted and the omitted information is furnished by amendment when available. Apart from the foregoing, any request for extension of time for the filing of the report or the furnishing of any of the required information shall be made pursuant to Rule 12b-25.

Instructions 4 and 5. [No change from former Instructions H and I of Form 10-Q.]

Instruction 6. Other Financial Information.

The registrant may furnish any additional information related to the periods being reported on which, in the opinion of management, is of significance to investors, such as the seasonality of the company's business, major uncertainties currently facing the company, significant accounting changes under consideration and the dollar amount of backlog of firm orders.

Instructions 7 and 8. [No change from former Instructions K and L of Form 10-Q.]

Instruction 9. Exhibits.

List below the following documents, if any, cited as a part of Part I of this report:

1. Financial information filed in lieu of the information required by this form in accordance with General Instruction D.

2. Letters from the independent accountants furnished pursuant to Instruction 4(f).

3. Statements setting forth the computation of per share earnings furnished in accordance with Instruction 4(g).

4. Letters from the independent accountant furnished pursuant to Instruction 7.

PART II. OTHER INFORMATION

Instruction. The report shall contain the item numbers and captions of all applicable items of Part II, but the text of such items may be omitted provided the responses clearly indicate the coverage of the item. Any item which is inapplicable or to which the answer is negative may be omitted and no reference thereto need be made in the report. If substantially the same information has been previously reported by the registrant, an additional report of the information on this form need not be made. The term "previously reported" is defined in Rule 12b-2 [17 CFR 240.12b-2].

Item 1. Legal Proceedings

(a) Briefly describe any material legal proceedings, other than ordinary routine litigation incidental to the business, to which the registrant or any of its subsidiaries has become a party or of which any of their property has become the subject. Include the name of the court or agency in

[1] Print name and title of the signing officer under his signature.

which the proceedings are pending, the date instituted, the principal parties thereto, a description of the factual basis alleged to underlie the proceedings and the relief sought.

(b) If any such proceeding previously reported has been terminated, identify the proceeding, give the date of termination and describe the disposition thereof with respect to the registrant and its subsidiaries.

Instructions. 1. If the business ordinarily results in actions for negligence or other claims, no such action or claim need be described unless it departs from the normal kind of such actions.

2. No information need be given with respect to any proceeding which involves primarily a claim for damages if the amount involved, exclusive of interest and costs, does not exceed 10 percent of the current assets of the registrant and its subsidiaries on a consolidated basis. However, if any proceeding presents in large degree the same issues as other proceedings pending or known to be contemplated, the amount involved in such other proceedings shall be included in computing such percentage.

3. Notwithstanding the foregoing instructions, any bankruptcy, receivership or similar proceeding with respect to the registrant or any of its significant subsidiaries shall be described. Any proceeding to which any director, officer or affiliate of the registrant, any principal holder of equity securities of the registrant or any associate of any such director, officer or security holder, is a party adverse to the registrant or any of its subsidiaries shall also be described.

4. Notwithstanding the foregoing, administrative or judicial proceedings arising under any Federal, State or local provisions regulating the discharge of materials into the environment or otherwise relating to the protection of the environment shall not be deemed "ordinary routine litigation incidental to the business" and shall be described if such proceeding is material to the business or financial condition of the registrant or if it involves primarily a claim for damages and the amount involved, exclusive of interest and costs, exceeds 10 percent of the current assets of the registrant and its subsidiaries on a consolidated basis. Any such proceedings by governmental authorities shall be deemed material and shall be described whether or not the amount of any claim for damages involved exceeds 10 percent of current assets on a consolidated basis and whether or not such proceedings are considered "ordinary routine litigation incidental to the business"; provided, however, that such proceedings which are similar in nature may be grouped and described generically stating: the number of such proceedings in each group; a generic description of such proceedings; the issues generally involved; and, if such proceedings in the aggregate are material to the business or financial condition of the registrant, the effect of such proceedings on the business or financial condition of the registrant.

Item 2. Changes in Securities.

(a) If the constituent instruments defining the rights of the holders of any class of registered securities have been materially modified, give the title of the class of securities involved and state briefly the general effect of such modification upon the rights of holders of such securities.

(b) If the rights evidenced by any class of registered securities have been materially limited or qualified by the issuance or modification of any other class of securities, state briefly the general effect of the issuance or modification of such other class of securities upon the rights of the holders of the registered securities.

Instruction. Working capital restrictions and other limitations upon the payment of dividends are to be reported hereunder.

Item 3. Changes in Security for Registered Securities.

If there has been a material withdrawal or substitution of assets securing any class of registered securities of the registrant, furnish the following information:

(a) Give the title of the securities.

(b) Identify and describe briefly the assets involved in the withdrawal or substitutions.

(c) Indicate the provision in the underlying indenture, if any, authorizing the withdrawal or substitution.

Instruction. This item need not be answered where the withdrawal or substitution is made pursuant to the terms of an indenture which has been qualified under the Trust Indenture Act of 1939.

Item 4. Defaults Upon Senior Securities.

(a) If there has been any material default in the payment of principal, interest, a sinking or purchase fund installment, or any other material default not cured within 30 days, with respect to any indebtedness of the registrant or any of its significant subsidiaries exceeding 5 percent of the total assets of the registrant and its consolidated subsidiaries, identify the indebtedness and state the nature of the default. In the case of such a default in the payment of principal, interest, or a sinking or purchase fund installment, state the amount of the default and the total arrearage on the date of filing this report.

Instruction. This paragraph refers only to events which have become defaults under the governing instruments, *i.e.*, after the expiration of any period of grace and compliance with any notice requirements.

(b) If any material arrearage in the payment of dividends has occurred or if there has been any other material delinquency not cured within 30 days, with respect to any class of preferred stock of the registrant which is registered or which ranks prior to any class of registered securities, or with respect to any class of preferred stock of any significant subsidiary of the registrant, give the title of the class and state the nature of the arrearage or delinquency. In the case of an arrearage in the payment of dividends, state the amount and the total arrearage on the date of filing this report.

Instruction. Item 4 need not be answered as to any default or arrearage with respect to any class of securities all of which is held by, or for the account of, the registrant or its totally held subsidiaries.

Item 5. Increase in Amount Outstanding of Securities of Indebtedness.

If the amount outstanding of securities or indebtedness of the registrant has been increased through the issuance of any new class of securities or indebtedness or through the issuance of reissuance of any additional securities or indebtedness of a class outstanding, and the aggregate amount of all such increases not previously reported exceeds 5 percent of the outstanding securities or indebtedness of the class, furnish the following information:

(a) Title of class, the amount outstanding as last previously reported, and the amount presently outstanding (as of a specified date);

(b) A brief description of the transaction(s) resulting in the increase and a statement of the aggregate net cash proceeds or the nature and aggregate amount of any other consideration received or to be received by the registrant;

(c) The names of the principal underwriters, if any, indicating any such underwriters which are affiliates of the registrant;

(d) A reasonably itemized statement of the purposes so far as determinable, for which the net proceeds have been or are to be used and the approximate amount used or to be used for each such purpose;

(e) A statement as to whether or not any such securities were registered under the Securities Act of 1933; if not, an indication of the exemption claimed and the facts relied upon to make the exemption available; and

(f) If the securities were capital shares, a statement of the amount of the proceeds credited or to be credited to any account other than the appropriate capital share account.

Instructions. 1. For the purpose of responding to this item, the registrant may treat each of the following as a single class of indebtedness: (i) convertible long term debt; and (2) other indebtedness.

2. This item does not apply to notes, drafts, bills of exchange, bankers' acceptances or other obligations which mature not later than 1 year from the date of issuance. No report need be made where the amount not previously reported, although in excess of 5 percent of the amount outstanding, does not exceed $50,000 face amount of indebtedness or 1,000 shares or other units.

3. This item includes the reissuance of treasury securities and securities held for the account of the issuer thereof. The extension of the maturity date of indebtedness shall be deemed to be the issuance of new indebtedness for the purpose of this item. In the case of such an extension, the percentage shall be computed upon the basis of the principal amount of the indebtedness extended.

Item 6. Decrease in Amount Outstanding of Securities or Indebtedness.

If the amount outstanding of any class of securities or indebtedness of the registrant has been decreased through one or more transactions and the aggregate amount of all such decreases not previously reported exceeds 5 percent of the amount of securities or indebtedness of the class previously outstanding, furnish the following information:

(a) Title of the class, the amount outstanding as last previously reported, and the amount presently outstanding (as of a specified date).

(b) A brief description of the transaction(s) involving the decrease and a statement of the aggregate amount of cash or the nature and aggregate amount of any other consideration paid or to be paid by the registrant in connection with such transaction or transactions.

Instruction. Instructions 1 and 2 to Item 5 shall also apply to this item. THis item need not be answered as to decreases resulting from ordinary sinking fund operations, similar periodic decreases made pursuant to the terms of the constituent instruments, decreases resulting from the conversion of securities or decreases resulting from the payment of indebtedness at maturity.

Item 7. Submission of Matters to a Vote of Security Holders.

If any matter has been submitted to a vote of security holders, through the solicitation of proxies or otherwise, furnish the following information:

(a) The date of the meeting and whether it was an annual or special meeting.

(b) If the meeting involved the election of directors, state the name of each director elected at the meeting and the name of each other director whose term of office as a director continued after the meeting.

(c) Briefly describe each other matter voted upon at the meeting and state the number of affirmative votes and the number of negative votes cast with respect to each such matter.

Instructions. 1. If any matter has been submitted to a vote of security holders otherwise than at a meeting of such security holders, corresponding information with respect to such submission shall be furnished. The solicitation of any authorization or consent (other than a proxy to vote at a stockholders' meeting) with respect to any matter shall be deemed a submission of such matter to a vote of security holders within the meaning of this item.

2. Paragraph (a) need be answered only if paragraph (b) or (c) is required to be answered.

3. Paragraph (b) need not be answered if (i) proxies for the meeting were solicited pursuant to Regulation 14 under the Act, (ii) there was no solicitation in opposition to the management's nominees as listed in the proxy statement, and (iii) all of such nominees were elected. If the registrant did not solicit proxies and the board of directors as previously reported to the Commission was re-elected in its entirety, a statement to that effect in answer to paragraph (b) will suffice as an answer thereto.

4. Paragraph (c) need not be answered as to procedural matters or as to the selection or approval of auditors.

5. If the registrant has published a report containing all of the information called for by this item, the item may be answered by a reference to the information contained in such report, provided copies of such report are filed as an exhibit to the report on this form.

Item 8. Other Materially Important Events.

The registrant may, at its option, report under this item any events, not previously reported in a report on Form 8–K, with respect to which information is not otherwise called for by this form but which the registrant deems of material importance to security holders.

Item 9. Exhibits and Reports on Form 8–K [17 CFR 249.308]

(a) Exhibits. List below the documents, if any, filed as a part of this report. Subject to the rules as to incorporation by reference, the following documents shall be filed as exhibits:

1. Copies of the amendments to all constituent instruments and other documents described in answer to Item 2.

2. Copies of all constituent instruments defining the rights of the holders of any new class of securities referred to in answer to Item 5.

3. Copies of the text of any proposal described in answer to Item 7.

4. Copies of any published report furnished in response to Item 7. (See Item 7, Instruction 5.)

5. Copies of any material amendment to the registrant's charter or by-laws not otherwise required to be filed.

(b) Reports on Form 8–K. State whether any reports on Form 8–K have been filed during the quarter for which this report is filed, listing the items reported, any financial statements filed, and the dates of any such reports.

SIGNATURES [1]

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

§ 249.310 Form 10–K, annual report pursuant to section 13 or 15(d) of the Securities Exchange Act of 1934.

* * * * *

GENERAL INSTRUCTIONS

A.–G. [No change.]

H. *Omission of Information Previously Filed.*

(a) Except as provided in paragraph (b) below, the information called for by Part I of this form (Items 1 through 13) is to be furnished by all registrants required to file a report on this form. Part II (Items 14 through 18) may be omitted from the report by any registrant which, since the close of the fiscal year, has filed with the Commission a definitive proxy statement pursuant to Regulation 14A, or a definitive information statement pursuant to Regulation 14C, which involved the election of directors, or which files such a proxy or information statement not later than 120 days after the close of the fiscal year.

(b) If the information called for by Items 4, 5 or 12 would be unchanged from that given in a previous report, a reference to the previous report which includes the required information will be sufficient. Copies of such previous report need not be filed with the report currently being filed on this form.

PART I

Item 1. [No change.]

Item 2. Summary of Operations

* * * * *

Instructions. 1.–5. [No change.]

6. For any previously reported material charge or credit to income of an unusual or infrequent nature in which an amount of cost was estimated to be incurred in the fiscal year being reported on or the prior fiscal year, summarize such transaction and state the amounts of such estimated cost and the amounts of the actual cost incurred in such periods, the reasons for differences between estimated and actual amounts, if any, and provide a detailed reconciliation showing all chages and credits to any reserve provided.

Items 3. and 4. [No change.]

Item 5. Legal Proceedings

(a) Briefly describe any material pending legal proceedings, other than ordinary routine litigation incidental to the business, to which the registrant or any of its subsidiaries is a party or of which any of their property is the subject. Include the name of the court or agency in which the proceedings are pending, the date instituted, the principal parties thereto, a description of the factual basis alleged to underlie the proceeding and the relief sought. Include similar information as to any such proceedings known to be contemplated by governmental authorities.

(b) If any material legal proceeding which was previously reported or which became reportable during the fourth quarter of registrant's fiscal year was terminated during such quarter, give the date of termination and describe the disposition thereof with respect to the registrant and its subsidiaries.

Instructions. 1. If the business ordinarily results in actions for negligence or other claims, no such action or claim need be described unless it departs from the normal kind of such actions.

2. No information need be given with respect to any proceeding which involves primarily a claim for damages if the amount involved, exclusive of interest and costs, does not exceed 10 percent of the current assets of the registrant and its subsidiaries on a consolidated basis. However, if any proceeding presents in large degree the same issues as other proceedings pending or known to be contemplated, the amount involved in such other proceedings shall be included in computing such percentage.

3. Notwithstanding Instructions 1 and 2, any material bankruptcy, receivership, or similar proceeding with respect to the registrant or any of its significant subsidiaries shall be described. Any material proceedings to which any director, officer or affiliate of the registrant, any security holder named in answer to Item 14(a), or any associate of any such director, officer or security holder, in a party, or has a material interest, adverse to the registrant or any of its subsidiaries shall also be described.

4. Notwithstanding the foregoing, administrative or judicial proceeding arising under any Federal, State or local provisions regulating the discharge of materials into the environment or otherwise relating to the protection of the environment shall not be deemed "ordinary routine litigation incidental to the business" and shall be described if such proceeding is material to the business or financial condition of the registrant or if it involves primarily a claim for damages and the amount involved, exclusive of interest and costs, exceeds 10 percent of the current assets of the registrant and its subsidiaries on a consolidated basis. Any such proceedings by governmental authorities shall be deemed material and shall be described whether or not the amount of any claim for damages involved exceeds 10 percent of current assets on a consolidated basis and whether or not such proceedings are considered "ordinary routine litigation incidental to the business"; provided, however, that such proceedings which are similar in nature may be grouped and described generically stating: the number of such proceedings in each group; a generic description of such proceedings; the issues generally involved; and, if such proceedings in the aggregate are material to the business or financial condition of the registrant, the effect of such proceedings on the business or financial condition of the registrant."

Item 6. Increases and Decreases in Outstanding Securities and Indebtedness.

(a) Give the following information as to all increases and decreases during the fiscal year in the amount of equity securities of the registrant outstanding:

(1) The title of the class of securities involved;

(2) The date of the transaction;

(3) The amount of securities involved and whether an increase or decrease; and

(4) A brief description of the transaction in which the increase or decrease occurred.

If previously reported, the description may be incorporated by a specific reference to the previous filing.

Instruction. The information shall be prepared in the form of a reconciliation between the amounts shown to be outstanding on the balance sheet to be filed with this report and the amounts shown on the registrant's balance sheet for the previous year. The exercise of outstanding options or warrants (separately by class or type of option or warrant), conversions of previously issued convertible securities (separately by class of security) and the issuance of options may be grouped together showing the dates between which all such transactions occurred. If the information called for has been previously reported on Form 10–Q it may be incorporated by a specific reference to the previous filing.

(b) Increases and decreases in the amount outstanding of debt securities and indebtedness which were previously reported in reports on Form 10–Q should be listed and briefly discussed with appropriate cross references to the earlier disclosure.

(c) If, during the fourth quarter of registrant's fiscal year, the amount of debt securities or indebtedness outstanding has been increased or decreased through one or more transactions, and the aggregate amount of all such increases or decreases not previously reported exceeds 5% of the outstanding securities or indebtedness of the affected class, furnish, the following information:

(1) Title of class, the amount outstanding as last previously reported, and the amount presently outstanding (as of a specified date);

(2) A brief description of the transaction or transactions resulting in the change;

(3) If an increase in securities or indebtedness is reported, furnish: (i) a statement of the aggregate net cash proceeds or the nature and aggregate amount of any consideration received or to be received by the registrant; (ii) the names of the principal underwriters, if any, indicating any such underwriters which are affiliates of the registrant; (iii) a reasonably itemized statement of the purposes, so far as determinable, for which the net proceeds have been or are to be used and the approximate amount used or to be used for each such purpose; and (iv) a statement as to whether or not any such securities were registered under the Securities Act of 1933; if not, an indication of the exemption claimed and the facts relied upon to make the exemption available; and

(4) If a decrease in securities or indebtedness is reported, a statement of the aggregate amount of cash or the nature and aggregate amount of any other consideration paid or to be paid by the registrant in connection with such transaction or transactions.

Instructions. 1. For the purposes of responding to paragraph (b) the registrant may treat each of the following as a single class of indebtedness: (1) convertible long term debt, and (2) other indebtedness.

2. This paragraph does not apply to notes, drafts, bills of exchange, bankers' acceptances, or other obligations which mature not later than 1 year from the date of issuance. No report need be made where the amount not previously reported, although in excess of 5 percent of the amount outsfanding, does not exceed $50,000 face amount of indebtedness or 1,000 shares or other units.

3. This paragraph includes the reissuance of treasury securities and securities held for the account of the issuer thereof. The extension of the maturity date of indebtedness shall be deemed to be the issuance of new indebtedness for the purpose of this paragraph. In the case of such an extension, the percentage shall be computed upon the basis of the principal amount of the indebtedness extended.

4. This paragraph need not be answered as to decreases resulting from ordinary sinking fund operations, similar periodic decreases made pursuant to the terms of the constituent instruments, decreases resulting from the conversion of securities or decreases resulting from the payment of indebtedness at maturity.

Item 7. Changes in Securities and Changes in Security for Registered Securities.

General Instruction. No response to this item is required if the information called for herein has been previously reported in a report on Form 10–Q.

(a) If the constituent instruments defining the rights of the holders of any class of registered securities have been materially modified, give the title of the class of securities involved and state briefly the general effect of such modification upon the rights of holders of such securities.

(b) If the rights evidenced by any class of registered securities have been materially limited or qualified by the issuance or modification of any other class of securities, state briefly the general effect of the issuance or modification of such other class of securities upon the rights of the holders of the registered securities.

Instruction. Working capital restrictions and other limitations upon payment of dividends are to be reported hereunder.

(c) If there has been a material withdrawal or substitution of assets securing any class of registered securities of the registrant, furnish the following information:

1. Give the title of the securities.

2. Identify and describe briefly the assets involved in the withdrawal or substitutions.

3. Indicate the provision in the underlying indenture, if any, authorizing the withdrawal or substitution.

Instruction. This paragraph need not be answered where the withdrawal or substitution is made pursuant to the terms of an indenture which has been qualified under the Trust Indenture Act of 1939.

Item 8. Defaults upon Senior Securities.

General Instruction. No response to this item is required if the information called for herein has been previously reported in a report on Form 10–Q.

(a) If there has been any material default in the payment of principal, interest, a sinking or purchase fund installment, or any other material default not cured within 30 days, with respect to any indebtedness of the registrant or any of its significant subsidiaries exceeding 5 percent of the total assets of the registrant and its consolidated subsidiaries, identify the indebtedness and state the nature of the default. In the case of such a default in the payment of principal, interest or a sinking or purchase fund installment, state the amount of the default and the total arrearage on the date of filing this report.

Instruction. This paragraph refers only to events which have become defaults under the governing instruments, i.e., after the expiration of any period of grace and compliance with any notice requirements.

(b) If any material arrearage in the payment of dividends has occurred or if there has been any other material delinquency not cured within 30 days, with respect to any class of preferred stock of the registrant which is registered or which ranks prior to any class of registered securities, or with respect to any class of preferred stock of any significant subsidiary of the registrant, give the title of the class and state the nature of the arrearage or delinquency. In the case of an arrearage in the payment of dividends, state the amount and the total arrearage on the date of filing this report.

Instruction. Item 8 need not be answered as to any default or arrearage with respect to any class of securities all of which is held by, or for the account of, the registrant or its totally held subsidiaries.

Item 9. Approximate Number of Equity Security Holders.

[No change from former Item 7 of Form 10–K.]

Item 10. Submission of Matters to a Vote of Security Holders.

If any matter has been submitted to a vote of security holders, through the solicitation of proxies or otherwise, furnish the following information if not previously disclosed in a report on Form 10–Q:

(a) The date of the meeting and whether it was an annual or special meeting.

(b) If the meeting involved the election of directors, state the name of each director elected at the meeting and the name of each other director whose term of office as a director continued after the meeting.

(c) Briefly describe each other matter voted upon at the meeting and state the number of affirmative votes and the number of negative votes cast with respect to each such matter.

Instructions. 1. If any matter has been submitted to a vote of security holders otherwise than at a meeting of such security holders, corresponding information with respect to such submission shall be furnished. The solicitation of any authorization or consent (other than a proxy to vote at a stockholders' meeting) with respect to any matter shall be deemed a submission of such matter to a vote of security holders within the meaning of this item.

2. Paragraph (a) need be answered only if paragraph (b) or (c) is required to be answered.

3. Paragraph (b) need not be answered if (i) proxies for the meeting were solicited pursuant to Regulation 14 under the Act, (ii) there was no solicitation in opposition to the management's nominees as listed in the proxy statement, and (iii) all of such nominees were elected. If the registrant did not solicit proxies and the board of directors as previously reported to the Commission was re-elected in its entirety, a statement to that effect in answer to paragraph (b) will suffice as an answer thereto.

4. Paragraph (c) need not be answered as to procedural matters or as to the selection or approval of auditors.

5. If the registrant has published a report containing all of the information called for by the item, the item may be answered by a reference to the information contained in such report, provided copies of such report are filed as an exhibit to the report on this form.

Item 11. Executive Officers of Registrant.

[No change from former Item 8 of Form 10–K.]

Item 12. Indemnification of Directors and Officers.

[No change from former Item 9 of Form 10–K.]

Item 13. Financial Statements, Exhibits filed, and Reports on Form 8–K.

(a) List all of the following documents filed as a part of the report:

1. All financial statements.

2. All exhibits, including those incorporated by reference.

Instruction. Where any financial statement or exhibit is incorporated by reference, the incorporation by reference shall be set forth in the list required by this Item. See Rule 12b–23 [17 CFR 240.12b–23]

(b) Reports on Form 8–K. State whether any reports on Form 8–K have been filed during the last quarter of the period covered by this report, listing the items reported, any financial statements filed and the dates of any such reports.

PART II

[The items and references to item numbers within the items in Part II have been renumbered.]

Item. 14. [No change from former Item 11 of Form 10–K.]

Item 15. Directors of the Registrant.

NOTE.—Paragraph (c) of Item 15 also applies to executive officers of the registrant.

* * * * *

Instruction. 1. Instruction 2 to Item 11 shall also apply to this item.

[No change in remainder from former Item 12.]

Item 16. Remuneration of Directors and Officers.

* * * * *

Instructions. 1.–3. [No change from Intions 1.–3. to paragraph (a) of former Item 13.]

4. Do not include remuneration paid to a partnership in which any director or officer was a partner, but see Item 18.

[No change in remainder from former Item 13.]

Item 17. Options Granted to Management to Purchase Securities.

Furnish the following information, in substantially the tabular form indicated, as to all options to purchase any securities from the registrant or any of its subsidiaries which were granted to or exercised by the following persons since the beginning of the fiscal year, and as to all options held by such persons as of the latest practicable date regardless of when such options were granted: (i) each director and officer named in answer to Item 16(a)(1), naming each such person; and (ii) all directors and officers of the registrant as a group, without naming them:

* * * * *

Instructions. 1.–2. No change from Instructions 1.–2. of former Item 14.]

3. (i) Where the total market value on the granting dates of the securities called for by all options granted during the period specified does not exceed $10,000 for any officer or director named in answer to Item 16(a)(1) or $40,000 for all officers and directors as a group, this item need not be answered with respect to options granted to such person or group. (ii) Where the total market value on the dates of purchase of all securities purchased through the exercise of options during the period specified does not exceed $10,000 for any such person or $40,000 for such group, this item need not be answered with respect to options exercised by such person or group. (iii) Where the total market value as of the latest practicable date of the securities called for by all options held at such time does not exceed $10,000 for any such person or $40,000 for such group, this item need not be answered with respect to options held as of the specified date by such person or group.

[No change in remainder from former Item 14 of Form 10–K]

Item 18. Interest of Management and Others in Certain Transactions.

(a) [No change from paragraph (a) of former Item 15.]

(1) [No change from subsection (a)(1) of former Item 15.]

(2) Any security holder named in answer to Item 14(a).

(3) [No change from subsection (a)(3) of former Item 15.]

Instructions. 1. (No change from Instruction 1 to paragraph (a) of former Item 15.)

2. No information need be given in response to this item as to any remuneration or other transaction reported in response to Items 16 or 17, or as to any transaction with respect to which information may be omitted pursuant to Instruction 2 to Item 16(b), the instruction to Item 16(c), or Instruction 2 or 3 to paragraph (b) of this item.

3.–7. [No change from Instructions 3.–7. to paragraph (a) of former Item 15.]

(b) [No change from paragraph (b) of former Item 15.]

(c) [No change from paragraph (c) of former Item 15.]

(1) [No change from subsection (c)(1) of former Item 15.]

(2) Any security holder named in answer to Item 14(a).

[No change in remainder from former Item 15.]

SIGNATURES

[No change.]

INSTRUCTIONS AS TO FINANCIAL STATEMENTS

[No change.]

INSTRUCTIONS AS TO EXHIBITS

Subject to Rule 12b–32 regarding the incorporation of exhibits by reference, the following exhibits shall be filed as a part of the report:

A. Copies of all amendments or modifications, not previously filed, to all exhibits previously filed (or copies of such exhibits as amended or modified).

B. Copies of all contracts and other documents of a character required to be filed as an exhibit to an original registration statement on Form 10 which were executed or in effect during the fiscal year and not previously filed.

C. Copies of the exhibits called for by Instructions 3, 4(d) and 5 to Item 2.

D. Copies of all constituent instruments defining the rights of the holders of any new class of securities referred to in answer to Item 6(c).

E. Copies of the amendments to all constituent instruments and other documents described in answer to Item 7.

F. Copies of the text of any proposal described and copies of any published report furnished in response to Item 10.

8. Section 240.14a–101 is amended by amending Item 5 of Schedule 14A to read as follows:

§ 240.14a–101 Schedule 14A. Information required in proxy statement.

* * * * *

Item 5. Voting securities and principal holders thereof.

* * * * *

(e) If, to the knowledge of the persons on whose behalf the solicitation is made, a change in control of the issuer has occurred since the beginning of its last fiscal year, state the name of the person(s) who acquired such control, the amount and the source of the consideration used by such person or persons; the basis of the control, the date and a description of the transaction(s) which resulted in the change of control and the percentage of voting securities of the issuers now beneficially owned directly or indirectly by the person(s) who acquired control; and the identity of the person(s) from whom control was assumed. If the source of all or any part of the consideration used is a loan made in the ordinary course of business by a bank as defined by Section 3(a)(6) of the Act, the identity of such bank shall be omitted provided a request for confidentiality has been made pursuant to Section 13(d)(1)(B) of the Act by the person(s) who acquired control. In lieu thereof, the material shall indicate that the identity of the bank has been so omitted and filed separately with the Commission.

Instructions. 1. State the terms of any loans or pledges obtained by the new control group for the purpose of acquiring control, and the names of the lenders or pledgees.

2. Any arrangements or understandings among members of both the former and new control groups and their associates with respect to election of directors or other matters should be described.

(f) Describe any contractual arrangements, including any pledge of securities of the issuer, or any of its parents, known to the persons on whose behalf the solicitation is made, the operation of the terms of which may at a subsequent date result in a change in control of the issuer.

Instruction. Paragraph (f) does not require a description of ordinary default provisions contained in the charter, trust indentures or other governing instruments relating to securities of the issuer.

* * * * *

(Secs 13, 14(a), 15(d), 23(a), 48 Stat. 894, 895, 901; sec. 203(a), 49 Stat. 704; secs. 3, 8, 49 Stat. 1377, 1379; secs. 4, 5, 6, 78 Stat. 569, 570–574; sec. 2, 82 Stat. 454; secs. 1, 2, 84 Stat. 1497; secs. 10, 18, 89 Stat. 119, 155 (15 U.S.C. 78m, 78n(a), 78o(d), 78w(a)); Secs. 12(e), 20(a), 49 Stat. 823, 833 (15 U.S.C. 79l(e), 79t(a)); Secs. 20(a), 38(a), 54 Stat. 822, 841 (15 U.S.C. 80a–20(a), 80a–37(a)).)

DATE OF EFFECTIVENESS

The amendments to Rules 13a–11 and 15d–11, to the Form 8–K, and to Schedule 14A shall be effective for events which occur subsequent to February 28, 1977. The amendments to Rules 13a–13 and 15d–13 and to Form 10–Q shall be effective for quarterly periods beginning after December 31, 1976. The amendments to the Form 10–K shall be effective for reports filed for periods beginning after March 31, 1976.

STATUTORY AUTHORITY FOR AMENDMENTS

The foregoing amendments are adopted pursuant to Sections 13, 14(a), 15(d) and 23(a) of the Securities Exchange Act of 1934, Sections 12(e) and 20(a) of the Public Utility Holding Company Act of 1935, and Sections 20(a) and 38(a) of the Investment Company Act of 1940. Pursuant to Section 23(a) of the Securities Exchange Act, the Commission has considered the effect that the proposed amendments would have on competition and has concluded that, to the extent the amendments impose burdens on competition, such burdens are necessary and appropriate in furtherance of the purposes of the securities laws.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7465]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Community Trust's Governing Body; Effect of Restrictions and Conditions

By notice of proposed rulemaking appearing in the FEDERAL REGISTER for November 17, 1976 (41 FR 50698), amendments to Income Tax Regulations (26 CFR Part 1) were proposed under section 170(b)(1)(A) of the Internal Revenue Code of 1954, relating to the definition of a community trust, and section 507(b)(1) of the Code, relating to the termination of private foundation status. After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, certain changes were made, and the proposed amendments of the regulations, subject to the changes, are adopted by this document.

These final regulations contain rules relating to the powers that the governing body of a community trust must possess, such as, the power to modify restrictions and conditions on the distributions from funds to specified distributees and the power to replace any participating trustee, custodian, or agent.

In addition, these final regulations provide guidance under § 1.507-2(a)(8) (relating to the effect of restrictions and conditions upon the distribution of net assets by a private foundation terminating its status as such) with regard to donor advice pertaining to distributions made by a public charity from the donor's fund to specified distributees.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

In view of the foregoing, the Income Tax Regulations (26 CFR Part 1) are amended as follows:

Paragraph 1. Section 1.170A-9(e)(11) is amended by revising paragraph (e)(11)(iv), by adding a heading to paragraph (e)(11)(v)(A) and by adding paragraph (e)(11)(v)(B), (C), (D), (E) and (F) to read as follows:

§ 1.170A-9 Definition of section 170(b)(1)(A) organizations.

* * * * *

(e) *Definition of section 170(b)(1)(A)(vi) organization.* * * *

(11) *Community trusts; requirements for treatment as a single entity.* * * *

(iv) *Common instrument.* All funds of the organization must be subject to a common governing instrument or a master trust or agency agreement (herein referred to as the "governing instrument"), which may be embodied in a single document or several documents containing common language. Language in an instrument of transfer to the community trust making a fund subject to the community trust's governing instrument or master trust or agency agreement will satisfy the requirements of paragraph (e)(11)(iv) of this section. In addition, if a community trust adopts a new governing instrument (or creates a corporation) to put into effect new provisions (applying to future transfers to the community trust), the adoption of such new governing instrument (or creation of a corporation with a governing instrument) which contains common language with the existing governing instrument shall not preclude the community trust from meeting the requirements of such paragraph (e)(11)(iv).

(v) *Common governing body*—(A) *In general.* * * *

(B) *Powers of modification and removal.* Except as provided in paragraph (e)(11)(v)(C) of this section, the governing body must have the power in the governing instrument, the instrument of transfer, the resolutions or by-laws of the governing body, a written agreement, or otherwise—

(*1*) To modify any restriction or condition on the distribution of funds for any specified charitable purposes or to specified organizations if in the sole judgment of the governing body (without the necessity of the approval of any participating trustee, custodian, or agent), such restriction or condition becomes, in effect, unnecessary, incapable of fulfillment, or inconsistent with the charitable needs of the community or area served;

(*2*) To replace any participating trustee, custodian, or agent for breach of fiduciary duty under State law; and

(*3*) To replace any participating trustee, custodian, or agent for failure to produce a reasonable (as determined by the governing body) return of net income (within the meaning of paragraph (e)(11)(v)(F) of this section) over a reasonable period of time (as determined by the governing body).

The fact that the exercise of any such power in paragraph (e)(11)(v)(B) (*1*), (*2*) or (*3*) of this section is reviewable by an appropriate State authority will not preclude the community trust from meeting the requirements of paragraph (e)(11)(v)(B) of this section.

(C) *Transitional rule.* (*1*) Notwithstanding paragraph (e)(11)(v)(B) of this section, if a community trust meets the requirements of paragraph (e)(11)(v)(C)(*2*) of this section, then in the case of any instrument of transfer which is executed before July 19, 1977 and is not revoked or amended thereafter (with respect to any dispositive provision affecting the transfer to the community trust), and in the case of any instrument of transfer which is irrevocable on January 19, 1982, the governing body must have the power to cause proceedings to be instituted (by request to the appropriate State authority)—

(*i*) To modify any restriction or condition on the distribution of funds for any specified charitable purposes or to specified organizations if in the judgment of the governing body such restriction or condition becomes, in effect, unnecessary, incapable of fulfillment, or inconsistent with the charitable needs of the community or area served; and

(*ii*) To remove any participating trustee, custodian, or agent for breach of fiduciary duty under State law.

The necessity for the governing body to obtain the approval of a participating trustee to exercise such a power shall be treated as not preventing the governing body from having such power, unless (and until) such approval has been (or is) requested by the governing body and has been (or is) denied.

(*2*) Paragraph (e)(11)(v)(C)(*1*) of this section shall not apply unless the community trust meets the requirements of paragraph (e)(11)(v)(B) of this section, with respect to funds other than those under instruments of transfer described in the first sentence of such paragraph (e)(11)(v)(C)(*1*), by January 19, 1978, or such later date as the Commissioner may provide for such community trust, and unless the community trust does not, once it so complies, thereafter solicit for funds that will not qualify under the requirements of such paragraph (e)(11)(v)(B).

(D) *Inconsistent State law.* (*1*) For purposes of paragraph (e)(11)(v)(B)(*1*), (*2*), or (*3*) or (C)(*1*) (*i*) or (*ii*) or (E) of this section, if a power described in such a provision is inconsistent with State law even if such power were expressly granted to the governing body by the governing instrument and were accepted without limitation under an instrument of transfer, then the community trust will be treated as meeting the requirements of such a provision if it meets such requirements to the fullest extent possible consistent with State law (if such power is or had been so expressly granted).

(*2*) For example, if, under the conditions of paragraph (e)(11)(v)(D)(*1*) of this section, the power to modify is inconsistent with State law, but the power to institute proceedings to modify, if so expressly granted, would be consistent with State law, the community trust will be treated as meeting such requirements to the fullest extent possible if the governing body has the power (in the governing instrument or otherwise) to institute proceedings to modify a condition or restriction. On the other hand, if in such a case the community trust has only the power to cause proceedings to be instituted to modify a condition or restriction, it will not be treated as meeting such requirements to the fullest extent possible.

(*3*) In addition, if, for example, under the conditions of paragraph (e)(11)(v)(D)(*1*) of this section, the power to modify and the power to institute proceedings to modify a condition or restriction is inconsistent with State law, but the power to cause such proceedings to be instituted would be consistent with State law, if it were expressly granted in the governing instrument and if the approval of the State Attorney General were obtained, then the community trust will be treated as meeting such requirements to the fullest extent possible if it has the power (in the governing instrument or otherwise) to cause such proceedings to be instituted, even if such proceedings can be instituted only with the approval of the State Attorney General.

(E) *Exercise of powers.* The governing body shall (by resolution or otherwise) commit itself to exercise the powers described in paragraph (e)(11)(v)(B), (C) and (D) of this section in the best interests of the community trust. The governing body will be considered not to be so committed where it has grounds to exercise such a power and fails to exercise it by taking appropriate action. Such appropriate action may include, for example, consulting with the appropriate State authority prior to taking action to replace a participating trustee.

(F) *Reasonable return.* In addition to the requirements of paragraph (e)(11)(v)(B), (C), (D) or (E) of this section, the governing body shall (by resolution or otherwise) commit itself to obtain information and take other appropriate steps with the view to seeing that each participating trustee, custodian, or agent, with respect to each restricted (within the meaning of paragraph (e)(13)(x) of this section) trust or fund that is, and with respect to the aggregate of the unrestricted trusts or funds that are, a component part of the community trust, administers such trust or fund in accordance with the terms of its governing instrument and accepted standards of fiduciary conduct to produce a reasonable return of net income (or appreciation where not inconsistent with the community trust's need for current income), with due regard to safety of principal, in furtherance of the exempt purposes of the community trust (except for assets held for the active conduct of the community trust's exempt activities). In the case of a low return of net income (and, where appropriate, appreciation), the Internal Revenue Service will examine carefully whether the governing body has, in fact, committed itself to take the appropriate steps.

* * * * *

Paragraph 2. Section 1.507-2(a)(8) is amended by revising paragraph (a)(8)(iv)(A) to read as follows:

§ 1.507-2 Special rules; transfer to or operations as, public charity.

(a) *Transfer to public charities.* * * *

(8) *Effect of restrictions and conditions upon distributions of net assets.* * * *

(iv) *Adverse factors.* The presence of any of the following factors will be considered as preventing the transferee "from freely and effectively employing the transferred assets, or the income derived therefrom, in futherance of its exempt purposes" (within the meaning of paragraph (a)(8)(i) of this section):

(A) *Distributions.* (*1*) With respect to distributions made after April 19, 1977, the transferor private foundation, a disqualified person with respect thereto, or any person or committee designated by, or pursuant to the terms of an agreement with, such a person (hereinafter referred to as "donor"), reserves the right, directly or indirectly, to name (other than by designation in the instrument of transfer of particular section 509(a)(1), (2), or (3) organizations) the persons to which the transferee public charity must distribute, or to direct the timing of such distributions (other than by direction in the instrument of transfer that some or all of the principal, as opposed to specific assets, not be distributed for a specified period) as, for example, by a power of appointment. The Internal Revenue Service will examine carefully whether the seeking of advice by the transferee from, or the giving of advice by, any donor after the assets have been transferred to the transferee constitutes an indirect reservation of a right to direct such distributions. In any such case, the reservation of such a right will be considered to exist where the only criterion considered by the public charity in making a distribution of income or principal from a donor's fund is advice offered by the donor. Whether there is a reservation of such a right will be determined from all of the facts and circumstances, including, but not limited to, the facts contained in paragraph (a)(8)(iv)(A)(*2*) and (*3*) of this section.

(*2*) The presence of some or all of the following factors will indicate that the reservation of such a right does not exist:

(*i*) There has been an independent investigation by the staff of the public charity evaluating whether the donor's advice is consistent with specific charitable needs most deserving of support by the public charity (as determined by the public charity);

(*ii*) The public charity has promulgated guidelines enumerating specific charitable needs consistent with the charitable purposes of the public charity and the donor's advice is consistent with such guidelines;

(*iii*) The public charity has instituted an educational program publicizing to donors and other persons the guidelines enumerating specific charitable needs consistent with the charitable purposes of the public charity;

(*iv*) The public charity distributes funds in excess of amounts distributed from the donor's fund to the same or similar types of organizations or charitable needs as those recommended by the donor; and

(*v*) The public charity's solicitations (written or oral) for funds specifically state that such public charity will not be bound by advice offered by the donor.

(*3*) The presence of some or all of the following factors will indicate the reservation of such a right does exist:

(*i*) The solicitations (written or oral) of funds by the public charity state or imply, or a pattern of conduct on the part of the public charity creates an expectation, that the donor's advice will be followed;

(*ii*) The advice of a donor (whether or not restricted to a distribution of income or principal from the donor's trust or fund) is limited to distributions of amounts from the donor's fund, and the factors described in paragraph (a)(8)(iv)(A)(*2*) (*i*) or (*ii*) of this section are not present;

(*iii*) Only the advice of the donor as to distributions of such donor's fund is solicited by the public charity and no procedure is provided for considering advice from persons other than the donor with respect to such fund; and

(*iv*) For the taxable year and all prior taxable years the public charity follows the advice of all donors with respect to their funds substantially all of the time.

* * * * *

(Sec. 7805 Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).)

DONALD C. ALEXANDER,
Commissioner of
Internal Revenue.

Approved: January 19, 1977.

CHARLES M. WALKER,
Assistant Secretary of the
Treasury.

SUBCHAPTER F—PROCEDURE AND ADMINISTRATION

[T.D. 7464]

PART 404—TEMPORARY REGULATIONS ON PROCEDURE AND ADMINISTRATION UNDER THE TAX REFORM ACT OF 1976

Disclosure of Returns and Information

Temporary regulations relating to disclosures after December 31, 1976 by officers and employees of Federal agencies of returns and return information (including taxpayer return information) disclosed to such officers and employees

by the Secretary before January 1, 1977 for a purpose not involving tax administration.

This document contains temporary regulations on procedure and administration (26 CFR Part 404) under section 6103(a) of the Internal Revenue Code of 1954, as added by section 1202 of the Tax Reform Act of 1976 (Pub. L. 94-455, 90 Stat. 1667) in order to provide rules governing disclosures after December 31, 1976 of returns and return information (including taxpayer return information), as defined in section 6103(b) (1), (2), and (3), disclosed before January 1, 1977, by the Secretary to officers and employees of Federal agencies for a purpose not involving tax administration.

Prior to its amendment by Section 1202 of the Tax Reform Act of 1976, effective as of January 1, 1977, section 6103(a) authorized the disclosure of Federal tax data by the Secretary to Federal agencies for nontax related purposes as provided by orders of the President and implementing rules and regulations prescribed by the Secretary and approved by the President. The temporary regulations provide that returns and return information so disclosed by the Secretary to a Federal agency before January 1, 1977 pursuant to the authority of prior law (and orders of the President and implementing rules and regulations) may, with one restriction, be disclosed after December 31, 1976 by such agency for any purpose authorized by such prior law (and orders, rules, and regulations). The restriction on such further disclosure would be use of such returns or return information after December 31, 1976, by, or on behalf of, the Federal agency in an administrative or judicial proceeding. Such use would be restricted to an administrative or judicial proceeding described in section 6103 (i) (4) and then only if the requirements of section 6103(i) (4) are first met.

These temporary regulations are effective as of January 1, 1977.

ADOPTION OF AMENDMENT TO THE REGULATIONS

In order to prescribe temporary regulations on procedure and administration relating to disclosures after December 31, 1976 by officers and employees of Federal agencies of returns and return information (including taxpayer return information) disclosed to such officers and employees by the Secretary before January 1, 1977, for a purpose not involving tax administration pursuant to the authority of section 6103 of the Internal Revenue Code of 1954 (or any order of the President under section 6103 or rules and regulations thereunder prescribed by the Secretary and approved by the President) before amendment of such section by section 1202 of the Tax Reform Act of 1976 (Pub. L. 94-455, 90 Stat. 1667), the following temporary regulations are hereby adopted:

§ 404.6103(a)-1 Disclosures after December 31, 1976 by officers and employees of Federal agencies of returns and return information (including taxpayer return information) disclosed to such officers and employees by the Secretary before January 1, 1977 for a purpose not involving tax administration.

(a) *General rule.* Except as provided by paragraph (b) of this section, a return or return information (including taxpayer return information), as defined in section 6103(b) (1), (2), and (3) of the Internal Revenue Code, disclosed by the Secretary before January 1, 1977, to an officer or employee of a Federal agency (as defined in section 6103(b) (9)) for a purpose not involving tax administration (as defined in section 6103 (b) (4)) pursuant to the authority of section 6103 (or any order of the President under section 6103 or rules and regulations thereunder prescribed by the Secretary and approved by the President) before amendment of such section by Section 1202 of the Tax Reform Act of 1976 (Pub. L. 94-455, 90 Stat. 1667) may be disclosed by, or on behalf of, such officer, employee, or agency after December 31, 1976, for any purpose authorized by such section (or such order or rules and regulations) before such amendment.

(b) *Exception.* Notwithstanding the provisions of paragraph (a) of this section, a return or return information (including taxpayer return information) disclosed before January 1, 1977, by the Secretary to an officer or employee of a Federal agency for a purpose unrelated to tax administration as described in paragraph (a) may, after December 31, 1976, be disclosed by, or on behalf of, such agency, officer, or employee in an administrative or judicial proceeding only if such proceeding is one described in section 6103(i) (4) and if the requirements of section 6103(i) (4) have first been met.

Because of the need for immediate guidance with respect to the provisions contained in this Treasury decision, it is found impracticable to issue it with notice and public procedure thereon under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (c) of that section.

(This Treasury decision is issued under the authority contained in sections 6103(q) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1685, 68A Stat. 917; 26 U.S.C. 6103 (q), 7805).)

DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

Approved: January 19, 1977.

CHARLES M. WALKER,
Assistant Secretary of the Treasury.

[T.D. 7463]

PART 404—TEMPORARY REGULATIONS ON PROCEDURE AND ADMINISTRATION UNDER THE TAX REFORM ACT OF 1976

Disclosure of Returns and Information

In the matter of temporary regulations relating to disclosures of returns and return information to and by officers and employees of the Department of Justice and other Federal agencies in connection with preparation for certain administrative and judicial proceedings (or investigations which may result in such proceedings).

This document contains temporary regulations on procedure and administration (26 CFR Part 404) under section 6103(h) (2) and (i) (1) and (2) of the Internal Revenue Code of 1954, as added by section 1202 of the Tax Reform Act of 1976 (Pub. L. 94-455, 90 Stat. 1674) in order to provide rules governing disclosures of returns and return information (including taxpayer return information), as defined in section 6103(b) (1), (2), and (3), to and by officers and employees of the Department of Justice and other Federal agencies in connection with preparation for certain administrative and judicial proceedings (or investigations which may result in such proceedings).

The temporary regulations describe the circumstances and conditions under which returns and return information may be disclosed to and by officers and employees of the Department of Justice and other Federal agencies in connection with preparation for, or investigations which may result in, proceedings involving tax administration (as defined in section 6103(b) (4)) and proceedings pertaining to the enforcement of specifically designated Federal criminal statutes (not involving tax administration) to which the United States or a Federal agency is or may be a party.

These temporary regulations are effective as of January 1, 1977.

ADOPTION OF AMENDMENT TO THE REGULATIONS

In order to prescribe temporary regulations on procedure and administration relating to disclosures of returns and return information (including taxpayer return information) to and by officers and employees of the Department of Justice and other Federal agencies in connection with preparation for certain administrative and judicial proceedings (or investigations which may result in such proceedings) under section 6103(h) (2) and (i) (1) and (2) of the Internal Revenue Code of 1954, as added by section 1202 of the Tax Reform Act of 1976 (Pub. L. 94-455, 90 Stat. 1674), the following temporary regulations are hereby adopted and added to Part 404 of Title 26 of the Code of Federal Regulations:

§ 404.6103(h)(2)-1 Disclosure of returns and return information (including taxpayer return information) to and by attorneys and other officers and employees of the Department of Justice or other Federal agencies in preparation for proceeding or investigation involving tax administration and certain other matters.

(a) *Disclosure of returns and return information (including taxpayer return information) to and by attorneys of the Department of Justice.* (1) Returns and return information (including taxpayer return information), as defined in section 6103(b) (1), (2), and (3) of the Internal Revenue Code, shall, to the extent provided by subparagraphs (A), (B), and (C) of paragraph (2) of section 6103(h) and subject to the requirements of section 6103(h)(3), be open to inspection by or disclosure to attorneys of the Department of Justice (including United States attorneys) personally and directly engaged in, and for their necessary use in, preparation for any proceeding (or for their necessary use in an investigation which may result in such a proceeding) before a Federal grand jury or any Federal or State court in a matter involving tax administration (as defined in section 6103(b)(4)), including any such proceeding (or any such investigation) also involving the enforcement of a related Federal criminal statute which has been referred by the Secretary to the Department of Justice.

(2) Returns and return information (including taxpayer return information) inspected by or disclosed to attorneys of the Department of Justice as provided in paragraph (a)(1) of this section may also be used by such attorneys, or disclosed by them to other attorneys (including United States attorneys and supervisory personnel, such as Section Chiefs, Deputy Assistant Attorneys General, Assistant Attorneys General, the Deputy Attorney General, and the Attorney General) of the Department of Justice where necessary in connection with preparation for any proceeding (or with an investigation which may result in such a proceeding) described in paragraph (a)(1) of this section or any proceeding (or investigation) involving any other matter related to tax administration or involving any matter brought before a Federal grand jury or Federal court pertaining to enforcement of a specific Federal criminal statute (other than one described in paragraph (a)(1) of this section) to which the United States is or may be a party, provided that such proceeding (or investigation) involves or arises out of the particular facts and circumstances giving rise to the proceeding (or investigation) described in paragraph (a)(1) of this section.

(b) *Disclosure of returns and return information (including taxpayer return information) by attorneys of the Department of Justice.* (1) Returns and return information (including taxpayer return information), as defined in section 6103(b) (1), (2), and (3) of the Code, inspected by or disclosed to attorneys of the Department of Justice as provided by paragraph (a) of this section may be disclosed by such attorneys to other persons, including, but not limited to, persons described in paragraph (b)(2) of this section but only to the extent necessary in connection with the proper preparation for a proceeding (or in connection with an investigation which may result in such a proceeding) described in paragraph (a). Such disclosures may include, but are not limited to, disclosure where necessary—

(i) To properly accomplish any purpose or activity of the nature described in § 404.6103(k)(6)-1 which is essential to proper preparation for such proceeding (or to such investigation);

(ii) To properly interview, consult, depose, or interrogate or otherwise obtain relevant information from, the taxpayer to whom such return or return information relates (or such taxpayer's legal representative) or from any witness who may be called to give evidence in the proceeding; or

(iii) To properly conduct negotiations concerning, or obtain authorization for, settlement or disposition of the proceeding, in whole or in part, or stipulations of fact in connection with the proceeding.

Disclosure of a return or return information to a person other than the taxpayer to whom such return or return information relates or such taxpayer's legal representative to properly accomplish any purpose or activity described in this paragraph should be made, however, only if such purpose or activity cannot otherwise properly be accomplished without making such disclosure.

(2) Among those persons to whom returns and return information may be disclosed by attorneys of the Department of Justice as provided by paragraph (b) (1) of this paragraph are—

(i) Other officers and employees of the Department of Justice, such as, personnel of an office, board, division, or bureau of such department (for example, the Federal Bureau of Investigation or the Drug Enforcement Administration), clerical personnel (for example, secretaries, stenographers, docket and file room clerks, and mail room employees) and supervisory personnel (such as supervisory personnel of the Federal Bureau of Investigation or the Drug Enforcement Administration);

(ii) Officers and employees of another Federal agency (as defined in section 6103(b)(9)) working under the direction and control of any such attorney of the Department of Justice; and

(iii) Court reporters.

§ 404.6103(i)-1 Disclosure of returns and return information (including taxpayer return information) to and by officers and employees of the Department of Justice or another Federal agency in preparation for proceeding or investigation involving enforcement of Federal criminal statute not involving tax administration.

(a) *Disclosure of returns and return information (including taxpayer return information) to attorneys of the Department of Justice or another Federal agency.* Returns and return information (including taxpayer return information), as defined in section 6103(b) (1), (2), and (3) of the Internal Revenue Code, shall, to the extent provided by paragraphs (1), (2), and (3) of section 6103(i) and subject to the requirements of such paragraphs (1) and (2), be open to inspection by or disclosure to attorneys of the Department of Justice (including United States attorneys) or of another Federal agency (as defined in section 6103(b)(9)) personally and directly engaged in, and for their necessary use in, preparation for any administrative or judicial proceeding (or their necessary use in an investigation which may result in such a proceeding) pertaining to enforcement of a specifically designated Federal criminal statute not involving or related to tax administration to which the United States or such agency is or may be a party.

(b) *Disclosure of returns and return information (including taxpayer return information) by attorneys of the Department of Justice or another Federal agency.* (1) Returns and return information (including taxpayer return information), as defined in section 6103(b) (1), (2), and (3) of the Code, disclosed to attorneys of the Department of Justice or other Federal agency (as defined in section 6103(b)(9)) as provided by paragraph (a) of this section may be disclosed by such attorneys to other persons, including, but not limited to, persons described in paragraph (b)(2) of this section, but only to the extent necessary in connection with the proper preparation for a proceeding (or in connection with an investigation which may result in such a proceeding) described in paragraph (a). Such disclosures may include, but are not limited to, disclosures where necessary—

(i) To properly obtain the services of persons having special knowledge or technical skills (such as, but not limited to, handwriting analysis, photographic development, sound recording enhancement, or voice identification);

(ii) To properly interview, consult, depose, or interrogate or otherwise obtain relevant information from, the taxpayer to whom such return or return information relates (or such taxpayer's legal representative) or any witness who may be called to give evidence in the proceeding; or

(iii) To properly conduct negotiations concerning, or obtain authorization for, disposition of the proceeding, in whole or in part, or stipulations of fact in connection with the proceeding.

Disclosure of a return or return information to a person other than the taxpayer to whom such return or return information relates or such taxpayer's legal representative to properly accomplish any purpose or activity described in this paragraph should be made, however, only if such purpose or activity cannot otherwise properly be accomplished without making such disclosure.

(2) Among those persons to whom returns and return information may be

disclosed by attorneys of the Department of Justice or other Federal agency as provided by paragraph (b)(1) of this section are—

(i) Other officers and employees (including attorneys) of the Department of Justice (including an office, board, division, or bureau of such department, such as the Federal Bureau of Investigation or the Drug Enforcement Administration) or other Federal agency described in paragraph (b)(1) of this section, such as clerical personnel (for example, secretaries, stenographers, docket and file room clerks, and mail room employees) and supervisory personnel (for example, in the case of the Department of Justice, Section Chiefs, Deputy Assistant Attorneys General, Assistant Attorneys General, the Deputy Attorney General, the Attorney General, and supervisory personnel of the Federal Bureau of Investigation or the Drug Enforcement Administration);

(ii) Officers and employees of another Federal agency (as defined in section 6103(b)(9)) working under the direction and control of such attorneys of the Department of Justice or other Federal agency described in paragraph (b)(1) of this section; and

(iii) Court reporters.

Because of the need for immediate guidance with respect to the provisions contained in this Treasury decision, it is found impracticable to issue it with notice and public procedure thereon under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

(This Treasury decision is issued under the authority contained in sections 6103(q) and 7805 of the Internal Revenue Code of 1954 (90 Stat. 1685, 68A Stat. 917; 26 U.S.C. 6103(q), 7805).)

DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

Approved: January 19, 1977.

CHARLES M. WALKER,
Assistant Secretary of the Treasury.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 678-77]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart B—Office of the Attorney General

ADMINISTRATION OF THE FEDERAL JUSTICE RESEARCH PROGRAM

This order amends the functions of the Office of Policy and Planning by assigning to it responsibility for the administration of the Federal Justice Research Program.

By virtue of the authority vested in me by 28 U.S.C. 509, 510, and 5 U.S.C. 301, Subpart B of Part 0 of Chapter I of Title 28, Code of Federal Regulations, is amended as follows:

1. Paragraph (d) of § 0.6 is redesignated paragraph (e).

2. A new paragraph (d) of § 0.6 is inserted immediately after paragraph (c), to read as follows:

§ 0.6 Office of Policy and Planning.

* * * * *

(d) Administer the Federal Justice Research Program, a departmental program for the conduct, by contract or otherwise, of research bearing upon federal civil and criminal justice.

Dated: January 14, 1977.

EDWARD H. LEVI,
Attorney General.

Title 29—Labor

CHAPTER V—WAGE AND HOUR DIVISION, DEPARTMENT OF LABOR

PART 657—TOBACCO MANUFACTURES INDUSTRY IN PUERTO RICO

Wage Order

Pursuant to sections 5, 6, and 8 of the Fair Labor Standards Act of 1938 (52 Stat. 1062, 1064, as amended (29 U.S.C. 205, 206, 208)), including the Fair Labor Standards Amendments of 1974 (Pub. L. 93-259; 88 Stat. 55), and Reorganization Plan No. 6 of 1950 (3 CFR 1949-53 Comp., p. 1004), and by means of Administrative Order No. 647 (41 FR 40254), the Seretary of Labor appointed and convened Industry Committee No. 137 for Tobacco Manufactures Industry, referred to the Committee the question of the minimum rate or rates of wages to be paid under section 6 of the Act to such employees, and gave notice of a hearing to be held by the Committee.

Subsequent to an investigation and a hearing conducted pursuant to the notice, the Committee has filed with the Administrator of the Wage and Hour Division of the Department of Labor a report containing its finding of fact and recommendations with respect to the matters referred to it.

Accordingly, as authorized and required by section 8 of the Fair Labor Standards Act of 1938, Reorganization Plan No. 6 of 1950, and 29 CFR 511.18, the recommendations of Industry Committee 137 are hereby published, amending §§ 657.2 (a)(1), (a)(2), (a)(3), and (a)(5) of Part 657, Title 29, Code of Federal Regulations. The other wage rates have heretofore reached the mainland rates and are continued.

As amended § 657.2 reads as follows:

§ 657.2 Wage rates.

* * * * *

(a) *Pre-1961 coverage classifications.*
* * *

(1) *Filler tobacco processing classification.* (i) The minimum wage for this classification is $1.56 an hour through April 30, 1977. Under section 6(c) of the Act, the rate is increased $.15 on May 1, 1977, and an additional $.15 on May 1 of each succeeding year until the mainland rate is reached.

* * * * *

(2) *Wrapper type tobacco processing classification.* (i) The minimum wage for this classification is $1.85 an hour through April 30, 1977. Under section 6(c) of the Act, the rate is increased $.15 on May 1, 1977, and an additional $.15 on May 1 of each succeeding year until the mainland rate is reached.

* * * * *

(3) *Machine threshing, other operations classification.* (i) The minimum rate for this classification is $2.07 an hour through April 30, 1977. Under section 6(c) of the Act, the rate is increased $.15 on May 1, 1977, and an additional $.15 on May 1 of each succeeding year until the mainland rate is reached.

* * * * *

(5) *Other products and activities classification.* (i) The minimum rate for this classification is $2.13 an hour through April 30, 1977. Under section 6(c) of the Act, the rate is increased $.15 on May 1, 1977, and an additional $.15 on May 1 of each succeeding year until the mainland rate is reached.

* * * * *

(Secs. 5, 6, 8, 52 Stat. 1062 and 1064, as amended (29 U.S.C. 205, 206, 208).)

Effective date: The effective date of these amendments is February 10, 1977.

Signed at Washington, D.C., on this 14th day of January 1977.

RONALD J. JAMES,
Administrator, Wage and Hour Division, United States Department of Labor.

[FR Doc.77-2135 Filed 1-24-77;8:45 am]

CHAPTER XXVI—PENSION BENEFIT GUARANTY CORPORATION

PART 2608—INTERIM REGULATION ON ALLOCATION OF ASSETS

Amendment to Allow Subclasses

Correction

In FR Doc. 77-1132 appearing on page 2677 in the issue of Thursday, January 13, 1977 on page 2678, 1st column, the 2nd paragraph, beginning with the amendatory language, the document should be corrected to read as follows:

In consideration of the foregoing part 2608 of Chapter XXVI, Title 29, is amended as follows:

1. Sections 2608.7(b)(1)(i)(C) and (b)(2)(i)(A) are revised to read:

§ 2608.7 Priority category 2 benefits.

* * * * *

(b) * * *
(1) * * *
(i) * * *

* * * * *

(C) Interest, if any, on the sum of the amounts determined under paragraphs (b)(1)(i)(A) and (B) of this section compounded annually at the applicable rate under section 204(c)(2)(C)(iii) of the Act, from the beginning of the first plan year to which section 204(c) of the Act applies to the earlier of the participant's retirement date or the date of plan termination.

* * * * *

(2) * * *
(i) * * *

(A) Add accumulated employee contributions computed under paragraph (b)(1) of this section and interest at the applicable rate on such contributions under section 204(c)(2)(C)(iii) of the Act from the date of plan termination to the date on which the participant would attain normal retirement age.

2. Section 2608.10(a) is revised to read:

§ 2608.10 Priority category 5 benefits.

(a) Priority category 5 benefits consist of all nonforfeitable benefits payable with respect to a participant in a plan, other than benefits derived from voluntary employee contributions assigned to priority category 1 and all benefits assigned to priority categories 2, 3 or 4. The only benefits payable as annuities contained in this section are those benefits payable as annuities to which a participant is entitled under § 2605.5 of this chapter.

Title 30—Mineral Resources

CHAPTER II—GEOLOGICAL SURVEY, DEPARTMENT OF THE INTERIOR

PART 211—COAL MINING OPERATING REGULATIONS

Surface Management; Final Regulations

On December 6, 1976, the Department of the Interior proposed several changes in the regulations contained in 30 CFR Part 211 as part of its efforts to comply with the requirements of the Federal Coal Leasing Amendments Act of 1975, 90 Stat. 1083. The proposed changes were published in 41 FR 53360 (1976). This rulemaking adopts final changes based on that proposed rulemaking. The changes from the original proposal are explained in a related rulemaking that amends Title 43 CFR. That rulemaking is published today in the FEDERAL REGISTER at page 4442. This rulemaking notice also contains several changes in the regulations in 30 CFR Part 211 that were not previously proposed. The changes are minor and are made to clarify existing requirements or to conform the language of minor provisions of the regulations to the intent of the drafters. The Department believes it is unnecessary to publish these changes as proposed rulemaking because they are minor, do not change existing right or impose new requirements. Comments on these latter changes may be directed to the Director, U.S. Geological Survey, The National Center, Reston, Virginia, 22092. Appropriate action will be taken on any comments.

Under the authority granted to the Secretary of the Interior, Title 30 CFR Part 211 is amended to read as follows:

§ 211.1 [Amended]

1. The thirteenth line of 30 CFR 211.1(b) is amended by the insertion of "economic" between "maximum" and "recovery."

§ 211.2 [Amended]

2. 30 CFR 211.2(r) is amended as follows:

(r) *Lessee* means any person or persons, partnership, association, corporation, public body, or governmental entity to whom a coal lease is issued, subject to the regulations in this Part, or an assignee of such a lease under an approved assignment.

3. 30 CFR 211.2(s) is amended by the substitution of a comma for the period at the end and the addition of the following: "or any person, association, corporation, public body, or governmental entity to whom an exploration license is issued pursuant to section 201(b) of Title 30 of the United States Code."

§ 211.10 [Amended]

4. The first sentence in 30 CFR 211.10(a)(1) is amended to read as follows:

(a) *General.* (1) Before conducting any operation on leased, permitted, or licensed land other than casual use, the operator shall submit to the Mining Supervisor, and obtain his approval of an exploration or mining plan; on any lease issued or readjusted after August 4, 1976, the first mining plan shall be submitted to the Mining Supervisor not later than three years after the effective date of the lease or three years after the date of readjustment, whichever is later.

5. 30 CFR 211.10(c)(6) is amended to read as follows:

(ii) The method of mining, including mining sequence and proposed production rate; the plan for any lease issued or readjusted after August 4, 1976, must provide for the mining of all the reserves of the logical mining unit of which the lease is a part in a period of not more than forty years; that period shall begin on the date of approval of the first mining plan for that logical mining unit.

6. 30 CFR § 211.10(d)(1) is amended by adding a sentence after the last sentence of that paragraph which says: "Where the land involved in the mining plan is under the surface jurisdiction of an agency other than the Department of the Interior, that other agency must consent to the terms of the approval of the mining plan."

§ 211.40 [Amended]

7. Title 30 CFR § 211.40(a)(12) is amended by adding a new subsection (iii) to read as follows:

(iii) For the purpose of paragraph (a)(12)(i) hereof, "access roads" shall not include temporary roads constructed within a working pit for the purpose of use by equipment and personnel for access to the coal being mined.

§ 211.5 [Amended]

8. Title 30 CFR § 211.5(c)(1)(i) is amended to read as follows:

(i) Approval of a new mining plan, or any major modification thereof, and approval of any modification to a previously approved mining or exploration plan which contains a request for a variance pursuant to § 211.74 hereof.

Dated: January 19, 1977.

THOMAS S. KLEPPE,
Secretary of the Interior.

[FR Doc.77-2257 Filed 1-24-77;8:45 am]

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

SUBCHAPTER C—MINERALS MANAGEMENT (3000)

PART 3040—ENVIRONMENTAL AND SAFETY

Subpart 3041—Surface Management

This rulemaking adopts as final two conforming changes to Title 43 CFR Subpart 3040. The first of the changes is directly related to actions that the Department of the Interior has taken under 30 CFR 211.75(a). Under that section, the Department may, under certain circumstances adopt the requirements of a state's reclamation law as Federal. The Department has taken this action in Wyoming, 41 FR 53793, and proposed to do so in Montana, 41 FR 39036. The amendment made in this rulemaking codifies the Department's stated position that the requirements of 43 CFR subpart 3041 are effected by adoption of State law as Federal law. The second amendment in this rulemaking clarifies that the definition of access roads in 43 CFR § 3041.2-2(f)(12) does not include temporary roads in the mining pit. The Department has already made a similar amendment to the requirement on this point in 30 CFR 211.40(a)(12). The Department has not published either of these regulations as proposed rulemaking because it has concluded that publication as a proposed rule is unnecessary because of the minor nature of these changes. Comments on these changes may be filed with the Director, Bureau of Land Management, (210), Washington, D.C. 20240, and the Department will take appropriate action on any comments.

Under the authority granted to the Secretary of the Interior, Subpart 3041 of Title 43 CFR is amended to read as follows:

* * * * *

1. Title 43 CFR § 3041.2-2(f) is amended by adding after "subpart" and before ":", the following, "except as otherwise provided by the action of the Secretary under 30 CFR § 211.75(a)."

2. Title 43 CFR § 3041.2-2(f)(12), is amended by adding a new paragraph (f)(12)(iii), as follows:

§ 3041.2-2 Obligations and standards of performance.

* * * * *

(f) * * *
(12) * * *

(iii) For the purpose of paragraph (f)(12)(i) of this section, "access roads" shall not include temporary roads constructed within a working pit for the pur-

pose of use by equipment and personnel for access to the coal being mined.

Dated: January 19, 1977.

THOMAS S. KLEPPE,
Secretary,
Department of the Interior.

[FR Doc.77-2259 Filed 1-24-77;8:45 am]

COMPETITIVE COAL LEASING SURFACE MINING REGULATIONS: COAL

Final Regulations

This rulemaking notice discusses and adopts as final rules proposals that were made in three separate rulemaking notices: (1) proposed revisions to the Energy Minerals Activity Recommendation System (EMARS), 41 FR 47258; proposed revisions to miscellaneous regulations, 41 FR 48124; and proposed revisions to surface management coal mining operating regulations, 41 FR 53360. Each of these proposals was made to ensure that the Department of the Interior's coal leasing and management regulations conformed to the requirements of the Federal Coal Leasing Amendments Act of 1975 (FCLAA), 90 Stat. 1083, Because these three sets of proposed regulations are closely related, the Department is publishing the final rulemaking for each in this consolidated proceeding.

The Department has fully considered all of the comments that were received during the comment periods for these regulations, and has considered to the extent possible comments received after that time. This notice discusses those comments that the Department feels are of the greatest public interest. The Department has made several changes in the proposed regulations in response to the comments that were received. The notice discusses most of these important changes. These changes have also forced the Department to renumber the proposed regulations. Consequently, the section numbers in this rulemaking may not correspond to those in the proposals.

DISCUSSION OF CHANGES AND COMMENTS

1. *Confusion Over the Relationship Between EMARS and the Surface Management Regulations in 43 CFR Part 3040.* Although the Department intended that EMARS should contain the major set of requirements for competitive coal leasing, the regulations in 43 CFR Part 3040 also have contained language that is related to leasing procedures. The final rulemaking clarifies the role of both sets of regulations by removing all leasing aspects of Part 3040 and, where necessary, placing the appropriate language in the EMARS subpart, 3525. Part 3040 retains its intended function of establishing standards and procedures for the surface management of future and existing federal coal leases. To ensure that the changes made in Part 3040 are understood, this rulemaking notice reprints that entire subpart as revised. The changes made in Part 3040 are not substantive changes and do not affect or change the standards or procedures that will be used. Although this revision of Part 3040 was not included in the earlier proposals, the Department has concluded that it is unnecessary to publish them as proposed rulemaking because they make no changes in the prior standards and are essentially a recodification of the existing regulations. The public is encouraged to bring to the attention of the Department any deficiencies in the changes. If further amendments are required, the Department will make the necessary changes at an appropriate time.

The major change in subpart 3041 is the removal of the section on lease applications. The EMARS regulations, in section 3525.9, now list the exclusive requirements for coal lease applications. A person who wishes to file an application for a competitive coal lease will have to comply with this section. The application procedures in other parts of 43 CFR Part 3500, such as § 3521.2–2, do not apply to competitive coal leasing. The procedures in subpart 3525 do apply. The revised application procedures also make explicit what was implicit in previous regulations: the Department will only accept competitive lease applications for short-term competitive lease sales. Section 3525 of the final regulations restates the short-term leasing criteria that the Department adopted in May 1973, and that Secretary Kleppe reaffirmed his policy statement in January 1976. The criteria require that the coal to be leased will be used to maintain an existing operation or be used as a reserve for production in the near future for a new mine. Under the second standard, operation must be scheduled to commence within 3 years, and delivery of the coal must be expected to commence in 5 years. Short-term leases will be issued in compliance with all of the EMARS procedures except for nominations and the coal lease schedule. Except for those situations, the Department, under EMARS, will rely on nominations (and competitive coal lease applications on file) to indicate the need for additional coal leasing. To help ensure that nominations will be requested with sufficient frequency, the final regulations specifically authorize any person to ask for a call for nominations. This request is informational only, and does not trigger any Bureau action.

One other change was made in the regulations in Part 3040. Existing 3040 regulations refer to "leases, permits or licenses." Since Congress repealed the Department's authority to issue prospecting permits, the references throughout that part to permits have been deleted. (The references in Part 211 have been retained since they deal with post-issuance matters.)

2. *Clarification of EIS Requirements.* One comment requested the Department to clarify whether under EMARS, the Department would prepare an EIS on both a coal lease and a mining plan. The Department has been preparing impact statements when it proposes to approve mining plans that will significantly affect the environment. However, all of the mining plans to date cover leases for which no EIS was done prior to lease issuance. Where the Department has prepared an impact statement prior to lease issuance, it does not expect it will have to do a second statement at the mine plan stage since the impacts of mining will have been adequately considered in the leasing EIS.

3. *Special Leasing Opportunities.* The preamble to the draft regulations stated that the Department would choose a reasonable number of tracts for special leasing opportunities on an ad hoc basis. Comments on this proposal were generally favorable, and the final regulations retain this flexibility. The proposed regulations had a requirement that the Department would hold a special leasing opportunity sale only if a public body nominated tracts in a state. Because the Department wishes to promote this anti-monopoly aspect of EMARS system, the nomination requirement has been eliminated. The Department will consider timely post-nomination requests for special leasing opportunities to the extent that it is feasible. The Department urges public bodies to participate extensively in the nomination process since it is the major way the Department receives information on the need for federal coal leasing.

Several comments inquired whether a public body which has or will engage in a joint venture with a private company qualifies for the special leasing opportunity. Each situation will require separate analysis. In general, arrangements of that type will be satisfactory if there is no attempt to circumvent the obligation to use the federal coal for the benefit of the members of the public body. For example, a public body would not be disqualified from participating in a special leasing opportunity if it intended to burn the coal from a federal lease in a plant controlled by a private corporation if the power delivered to the public body was essentially equivalent to the coal it supplied to the power plant.

A comment by a coal association suggests that where both public bodies and others nominate a tract, public bodies should have to bid against private bodies and that "[t]he special leasing opportunity would derive from the fact that if a public body were willing to pay more than the highest bid made by a private company, the public entity would be allowed to lease the tract." This suggestion would negate totally the leasing preference granted in the Act and has been rejected. Some of the comments suggested that the definition of public bodies proposed in 43 CFR 3500.0–5 was too broad, others that it was too narrow. The Department has reviewed the legislative history of the Act and has concluded that although the term "public bodies" was directed primarily at rural electric cooperatives and other consumer-controlled utilities, it is broad enough to encompass a broad range of non-profit organizations. The final regulations have been amended by adding general language to include organizations similar to the ones actually named in section 3500.0–5.

Finally, one comment expressed concern whether public bodies could bid in regular lease sales. The clear answer to that question is that they may bid in both special and regular sales.

4. *Disqualification of Holder of Federal Leases for 10 Years.* Section 3525. 3, as proposed, codifies the requirement in the FCLAA that disqualifies certain holders of federal coal leases from participating in competitive lease sales. One comment correctly noted that the proposed regulation omitted the statutory exception for operations that are interrupted by strikes, the elements or casualties not attributable to the lessee, or where advance royalities are being paid. The final regulations correct this omission, and renumber the proposed section as 3525.4.

5. *Attorney General Consultation.* Several comments suggested that due process and the FCLAA required the Department to hold a hearing prior to rejecting a coal lease on the basis of a determination by the Attorney General that the lease issuance would create a situation inconsistent with the anti-trust laws. The Department does not agree and has not changed this requirement. The purpose of the hearing requirement in section 15 of the FCLAA is to establish the procedures that will permit the Secretary to issue a lease despite an adverse recommendation by the Attorney General. The Secretary is not required to hold a hearing prior to rejecting a bid, in this and other situations, because the bidders do not have the type of interest protected by the due process clause of the Constitution. Also, the Departments of Interior and Justice are still determining what information a bidder must submit, and consequently, the regulations remain general on that point. The regulations have been changed in one respect. The proposed regulation stated that the Secretary could not act until 30 days after he requested the advice of the Attorney General, but did not state whether the Attorney General's failure to respond on time permitted the Secretary to issue the lease. The final regulations state that the Secretary may proceed with the issuance of a lease if the Attorney General does not respond to the request for an opinion in 30 days. Finally, the regulations clarify that the Department may offer a lease to the second high bidder if, for any reason, the high bidder is unable to receive the lease.

6. *Deferment of Bonus Payment.* Several of the comments suggested that the Department should defer the bonus payments for a 10-year period. The Department has decided to retain the 5-year schedule, as proposed, because it feels it is a good balance between the need to promote competition by reducing front-end costs and the need to have sufficient holding costs to deter speculative holdings of leases. However, the final rules contain one change from the rule proposed on deferred payment sales. The proposed rule stated that at least 50 per cent of all sales would be on a deferred payment basis. To maximize the opportunity of small businesses to compete for federal coal leases, section 3525.7 of the final regulations requires that all competitive lease sales be on a deferred payment basis.

7. *Confidentiality of Information.* Some of the comments requested that the Department omit the language in the proposed section 3525.10(f), and substitute the language in section 3520.1–2(f) of the regulations adopted on June 1, 1976, 41 FR 22053. Both sections state how information submitted under the EMARS will be treated under the Freedom of Information Act. The former section merely states that the Department will treat information in accordance with the Freedom of Information Act. The latter section states which specific type of information will be withheld from disclosure. The final regulations, section 3525.8(f), retain the language in the October 28. 1976 proposal. There are two reasons for this decision. First, the Department is currently preparing and will publish shortly extensive Freedom of Information regulations for mineral information. These regulations, if adopted, would permit the Department to adjudicate whether information is subject to disclosure at the time of its submission. Second, the Department's authority to withhold the information specified in the June 1, 1976, regulations has been challenged in a Freedom of Information suit which is currently pending before the Department. For both of these reasons, the Department prefers to leave its regulations in a general format.

8. *Limitation of Overriding Royalties.* One comment suggested that the Department institute limitations on overriding royalties to limit speculation in federal coal leases. The Department has regulations on this topic that are found in 43 CFR § 3503.3–2(c) (3) (i). If the Department determines that the limitations in this section are inadequate to prevent speculation in federal coal leases, it may reduce the limits in the section. The final rulemaking does not change the requirements of the existing regulations.

9. *Land-use Plans.* Several comments requested additional clarification of the requirements for a land-use plan. Some of the comments also suggested that the Department's Management Framework Plans were not plans which complied with the requirements of the Federal Coal Leasing Amendments Act. The Department has taken steps in these final regulations to clarify what minimum requirements are necessary to have an adequate land-use plan. The Federal Coal Leasing Amendments Act does not explain what is meant by the term "comprehensive land-use plans." Language in the legislative history of the Act suggests that the definition of a comprehensive land-use plan should be taken from what was eventually passed as the Federal Land Policy and Management Act of 1976, 90 Stat. 2743, S. Rep. No. 94–296, 94th Cong., 1st Sess. 14 (1975). The Department is required by that Act to use a land-use planning system that conforms to its requirements. Since the Department will use the same planning system for coal leasing as well as other activities, the Department has included in the EMARS regulations a list of the planning system requirements of the Federal Land Policy and Management Act. These are included in section 3525 of the final regulations.

The Department reiterates its conclusion that the Department's existing planning processes meet the requirements of both the Federal Coal Leasing Amendments Act and the Federal Land Policy and Management Act. The legislative history of both Acts confirms that Congress was both aware of and satisfied with the Department's planning system. 122 Cong. Rec. E. 3667 (daily ed. June 29, 1976); H. Rep. No. 94–1163, 94th Cong., 2d Sess. 5 (1976). The only real changes that will be required in the Department's planning system are the addition of specific figures on underground and surface coal deposits and a more formalized public participation process. The Department will also propose for adoption as formal regulations, the procedures and requirements of its planning system. The Department is now preparing proposed land-use planning regulations. These final regulations drop the reference to the Management Framework plans, and instead refer to a land-use planning system.

10. *Hearings and Meetings.* Several comments criticized the Department's proposed EMARS regulations for their failure to comply with the hearing requirements of the Federal Coal Leasing Amendments Act. In particular, criticism was directed at the use of the term "meeting" to describe the opportunity for public input prior to the adoption of a land-use plan. Traditionally, the Department has used the term "hearing" to denote a proceeding conducted by an Administrative Law Judge, and the term "meeting" to denote a proceeding that is conducted by other employees. Despite the Department's past practice, the final regulations do call for a "hearing" before a land-use plan is adopted if one is requested. The regulations go on to define the requirements of a hearing. Only two requirements are present. First, the Department (or the other agency which prepares a land-use plan) must allow the orderly presentation of testimony by those who wish to do so. Second, if a request is made in advance of the hearing, a complete transcript of the hearing must be made. The hearing described by the regulations is not a formal adversary proceeding that requires findings of fact or a recommended decision and does not have to be conducted by an Administrative Law Judge. Its sole function is to ensure that the agency which prepares the plan has given the public an adequate opportunity to comment on the proposed action. The regulations explicitly exempt from this more formal hearing procedure land-use plans which were adopted prior to the enactment of the Federal Coal Leasing Amendments Act if the public had an adequate opportunity to comment on the adoption of the plan.

The final regulations also clarify the requirements of the hearing that is to be conducted on the proposed lease tracts prior to a final decision. Under the final regulations. this hearing will be conducted on the record, and held after the

environmental analysis process has been completed, after the technical examination has been completed, but before the Bureau of Land Management has made recommendations on a proposed coal lease schedule to the Secretary. The regulations do not require the use of an Administrative Law Judge, although one may be used.

11. *Lease modifications.* A request was made that § 3524.2–1(a), which provides that the modification of a lease by adding contiguous coal deposits shall not exceed 160 acres or the same number of acres as that in the original lease, be modified by adding the words "whichever is less." This suggestion was adopted to clarify the intent of the section.

The proposed regulations did not require that a lease modification change the terms at the original lease and a suggestion was made to modify § 3524.2–1(c) to provide that the Secretary prescribe terms and conditions applicable to all the acreage in a modified lease. The Department has revised the section to make that requirement mandatory. The language of section 13 of the Federal Coal Lease Amendments Act states that the modified lease (the original lease plus the added acreage) must have lease terms consistent with the Act.

12. *Use of Rentals as a set-off against royalties.* Prior to the enactment of the Federal Coal Leasing Amendments Act, the Mineral Leasing Act and the Department's regulations required rentals to be credited against royalties that were owed for that year. The Federal Coal Leasing Amendments Act repealed that authority and the final regulations, in 43 CFR 3503.3–1 reflect that loss of authority. The Department will continue to allow holders of leases issued before August 4, 1976, to retain this offset until their leases are readjusted.

13. *Preliminary Plans.* The revised regulations also clarify that the requirement to submit a preliminary plan is limited to those who file an application for a lease. Nominators are not required to submit a preliminary plan. The information required by a preliminary plan is a good guide, however, to the type of information that the Bureau desires to receive under the nomination process.

14. *Nominations.* The final regulations retain the one-tier nomination system that was adopted in the June 1, 1976, regulations even though the response to the one-tier system has not been entirely favorable. The one-tier system, which was instituted at the request of the Western Governor's Regional Energy Policy Organization, does give the public opportunity to comment on the industry nominations after the nominations process has been held. This opportuntiy comes at the public meeting that will be held after the nominations are received (which may be combined with the hearing on adoption of a land-use plan) but before the Department chooses proposed coal lease tracts for environmental analysis. This is now included in 43 CFR 3525.9(i). The public may also comment on the nominations through the normal land-use planning process, and at the hearings on environmental impact statements, and at the final hearing prior to the Secretary's decision whether to adopt a coal lease schedule. The Department has concluded that because these opportunities are available, the one-tier system is satisfactory.

15. *Reasonable Prices.* One comment asserted that the Department was not fulfilling its responsibility under section 30 of the Mineral Leasing Act to ensure that coal from federal leases was sold at reasonable prices. As the comment noted, the Department has reserved in its leases the right to take adequate measures to ensure the sale of coal from federal coal leases at reasonable prices. The Department believes this protects the public interest, sufficiently for the present.

16. *Notice of availability of Exploration Plans.* The December 6, 1976, notice proposed that the notice of availability procedures in 30 CFR § 211.5 apply to exploration plans. Several adverse comments were received on this point, and the final rulemaking omits this requirement because the Department has concluded that the procedures of the section are not appropriate for exploration plans.

17. *Fair Market Value Determinations.* Comments received on the October proposed EMARS regulations included requests for more information on procedures for fair market value determinations. The long-standing method for determination of resource value in sales or leasing of onshore minerals is comparative sales. Under the comparative sales approach, the value of the property up for lease is inferred from recent sales of similar properties in the same area. Due to the long pause in Federal coal leasing and to the dominance of Federal coal in many areas, there have not been enough recent sales to allow use of the comparative sales method at least in the initial coal lease sales. To supplement the comparative sales method, the Department is currently developing at the Geological Survey a discounted cash flow (DCF) model for estimating the value of coal offered for lease. Using projections of future coal prices and estimates of coal production costs, the value of a coal tract can be estimated. The method would employ probabilistic techniques to take account of coal price uncertainties. This method of estimating coal resource value is similar to the Monte Carlo techniques now used for OCS resource value estimation.

The coal DCF model now under development is being tested in prototype situations and in short-term criteria lease sales. Because the best method for fair market value determination is still being examined, it is inappropriate at this time to make commitments to any particular method, and the final regulations are general on this point.

18. *Intertract Competition.* Two commenters stated their concern that intertract competition was authorized but no explanation was given as to how it would work. Intertract competition is a method of competitive bidding that can be employed where there is more federal coal acceptable for development in a sale area than the government has determined is suitable for lease in a given lease sale. Under intertract competition, bidders will be requested to submit bids on the tracts acceptable for development, but bids will be accepted only for tracts with the relative highest bids (a per ton basis), such that the total of leased coal equals the government's lease sale target. The purposes of intertract competition are to maintain strong bigging competition in western coal areas with highly fragmented coal and surface ownership and to determine which tracts will be leased to the basis of the size of industry bids. Although it is under active consideration for use in suitable circumstances, no determination has been made by the Department to employ intertract competition. Before a lease sale would be conducted under intertract competition, the Department would issue a full set of procedures and groundrules. Under the authority delegated to the Secretary of the Interior, Titles 30 [1] and 43 CFR are amended as follows:

PART 3040—ENVIRONMENT AND SAFETY

1. Subpart 3041, in Title 43, Part 3040 is revised as follows:

Subpart 3041—Environment and Safety

Sec.

3041.0–1 Pupose.
3041.0–2 [Reserved]
3041.0–3 Authorities.
3041.0–4 Responsibilities.
3041.0–5 Applicability.
3041.0–6 Definitions.
3041.0–7 Use of surface.
3041.1 [Reserved]
3041.1–1 [Reserved]
3041.1–2 [Reserved]
3401.2 Technical examination/environmental analysis.
3041.2–1 Technical examination/environmental analysis report.
3041.2–2 Obligations and standards of performance.
3041.3 Compliance or performance bond.
3041.4 Procedures and public participation.
3041.5 Completion of operations and abandonment.
3041.6 Reports.
3041.7 Notice of noncompliance: Revocation.
3041.8 Variances.

§ 3041.0–1 Purpose.

(a) The purpose of this subpart is to establish rules and regulations to be followed in the management of the federally-owned coal estate consistent with the policies, goals, and objectives established by the Acts cited in § 3041.0–3 of this Subpart, regardless of surface ownership, to ensure effective and reasonable regulation of surface coal mining operations in accordance with the requirements hereof, as an appropriate and necessary means to minimize so far as practicable the adverse social, economic and environmental effects of such operations.

[1] The amendments to 30 CFR relating to this rulemaking can be found in FR Doc. 77–2257, at page 4441 of this issue of the FEDERAL REGISTER.

§ 3041.0–2 [Reserved]

§ 3041.0–3 Authorities.

The regulations contained in this Subpart are issued pursuant to the Mineral Leasing Act of February 25, 1920, as amended (30 U.S.C. 181–287), and the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351–359), and in accordance with the policies set forth in the National Environmental Policy Act of 1969, as amended, (42 U.S.C 4321–47). Regulations governing the issuance of Federal coal leases and licenses are found in 43 CFR 3500 of this Chapter. Regulations governing operations conducted on lands subject to lease, permit, or license are found in 30 CFR 211. Regulations setting forth the general and basic policies for disposal and management of the public lands are found in 43 CFR 1725 of this Chapter.

§ 3041.0–4 Responsibilities.

(a) The Bureau of Land Management (BLM) exercises at the Bureau level the Secretary's discretionary authority to determine whether or not mineral leases and licenses are to be issued in accordance with 43 CFR Part 3500. The BLM is responsible for issuing coal leases and licenses, and is the office of record in mineral leasing matters.

(b) The Geological Survey (GS) exercises the Secretary's authority regarding operations conducted within the area of operations by permittees, lessees, and licensees and determines the action to be taken by them from the standpoint of the development, conservation, and management of mineral resources under the jurisdiction of the Department. The Geological Survey is responsible for all geologic, engineering, and economic value determinations for the Department's mineral leasing program. These determinations include: the mineral characteristics of lease and permit areas; parceling; appropriate resource evaluation; reserves; investments, diligent development, and minimum production requirements; and all other terms and conditions relating to mineral operations under leases and licenses.

(c) The BLM or other Federal surface managing agency, in consultation with the GS and the surface owner if other than the United States, formulates the requirements to be incorporated in leases and licenses for the protection of the surface and nonmineral resources and for reclamation, using the reclamation obligations and standards of performance contained in § 3041.2–2 of these regulations and in 30 CFR Part 211.40.

(d) The GS reviews and approves exploration and mining plans, and authorizes the abandonment of operations, in consultation with the BLM or other appropriate Federal surface managing agency, and the surface owner, if other than the United States, on the adequacy of the surface use, environmental protection, and reclamation aspects of such plans and will not grant approval if inconsistent with the BLM's or other Federal surface managing agency's recommendations without further discussions and referrals for resolution pursuant to 30 CFR Part 211.

(e) As to the lands outside of the area of operations, the authorized officer of the BLM or other appropriate Federal surface managing agency is responsible for conducting compliance examinations and for assuring compliance by the lessee or licensee with the requirements of this Subpart, and the terms and conditions of a lease or license and for reporting noncompliance to the Mining Supervisor for appropriate action. As to the lands inside the area of operations the GS examines operations to ensure compliance by the lessee or licensee with the terms and conditions set forth in the provisions of any lease or license or any approved mining or exploration plan. GS refers to BLM any instance of noncompliance with lease terms which may require cancellation action, and BLM may initiate such action. With respect to approval of access roads, pipelines, utility routes and other surface uses outside the area of operations, the BLM, or other Federal surface managing agency, has the primary responsibility but obtains the recommendations of the GS before taking final actions. Except as may be expressly provided for in § 3041.7 of this Subpart and 30 CFR Part 211.72, orders to operators for any remedial action are the exclusive responsibility of the Geological Survey.

(f) Subject to the supervisory authority of the Secretary, the regulations in this Subpart shall be administered by the Director, Bureau of Land Management through the authorized officers having jurisdiction over the lands subject to these regulations and authorized to perform the duties described. Prior to issuance of any coal lease or license, the authorized officer shall consult with and accept and consider recommendations from the Mining Supervisor, the Federal surface managing agency when other than the BLM, or the surface owner, as to the terms and conditions required to achieve the purpose of this Subpart. Any disagreements that cannot be resolved between the GS and BLM arising in connection with any such issuance of a lease or license will be referred for resolution to the appropriate Assistant Secretaries or to the Under Secretary of the Department of the Interior. Leases issued for lands, the surface of which is under the jurisdiction of any Federal agency other than the Department of the Interior, shall contain the terms and conditions prescribed by that agency with respect to the use and protection of the nonmineral interests in those lands.

§ 3041.0–5 Applicability.

(a) This Subpart sets forth regulations governing reclamation standards, use of surface, bond requirements, and reports relating to leases and licenses issued by the BLM with respect to Federal coal deposits located on public domain and acquired lands of the United States and reserved Federal coal deposits underlying lands the surface of which is privately owned. These regulations do not govern the leasing or development of coal deposits owned by Indians and subject to the Trust protection of the United States, which are controlled by regulations found in 25 CFR Chapter 1.

(b) The provisions of this Subpart shall become effective upon the date of publication in the FEDERAL REGISTER (January 25, 1977) as final rulemaking, except as hereinafter provided.

(1) Existing operations.

(i) On and after 180 days from the effective date of this Subpart, the provisions of § 3041.2–2(f) shall apply to all existing operations with respect to lands from which the overburden has not previously been removed, provided, however, that this subparagraph shall not be deemed or construed so as to apply the requirements of subparagraphs 3041.2–2(f) (1) and (2), hereof to any operation for which a mining plan has been approved on or before the effective date of this Subpart and for which a variance pursuant to the provisions of subparagraph 3041.2–2(f)(2) would be required.

(ii) On or before 18 months from the effective date of this Subpart, the operator of each existing operation shall have submitted and shall have obtained the approval of a plan or modification thereof which shall comply with all applicable provisions of this Subpart, provided, however, that if the Director of the GS determines that a proposed new plan or modification of an existing plan was prepared and submitted in timely fashion, taking into account the complexity of the operation and of the plan or modification involved, but that administrative delay thereafter has prevented approval within the time specified, the time for compliance with this paragraph may be extended by order of the Director of the GS for an amount of time equal to the duration of such delay.

(iii) For the purpose of this paragraph, the term "existing operation" shall mean:

(A) All operations for which a plan has been approved on or before the effective date of this Subpart, and

(B) All operations with respect to which a proposed plan has been submitted to the Department on or before the effective date of this Subpart, and with respect to which proposed plan the Department has on that date either completed its environmental impact analysis and determined that no environmental impact statement under Section 102(2)(C) of the National Environmental Policy Act is necessary, or has determined that such a statement is necessary and has commenced, and expended substantial resources of the Department in the preparation or completion of, such a statement.

(iv) On or before 90 days from the effective date of this Subpart, the Director of the Geological Survey shall review all proposed plans which have been submitted to the Department on or before the effective date of this Subpart and, after consultation with appropriate Federal surface managing agencies, publish in the FEDERAL REGISTER a list which shall identify each such proposed plan

and whether it will be considered to cover an existing operation.

(2) All operations or proposed operations not included in the definition of "existing operation" in the preceding paragraph shall be considered to be new operations, and shall be subject to the provisions of this Subpart upon the effective date hereof.

(3) The provisions of § 3041.7(c) of this Subpart shall apply immediately upon the effective date of this Subpart.

(c) To the maximum extent possible, all environmental impact statements and all approvals of plans covering existing operations which are pending before the Department on the effective date of this Subpart shall take into account and shall reflect and implement the provisions and purposes hereof; provided, however, that nothing in this subparagraph shall be construed to relieve any operator of the obligation imposed by subparagraph (b) (1) (i) of this section.

(d) Nothing in this Subpart shall be deemed or construed as increasing or diminishing any rights not in conflict with Federal law held by any person, including any surface owner or entryman, arising under the laws of any State and relating to the giving or withholding of consent to, or consultation in connection with, entry to any land for the purpose of conducting operations subject to this Subpart.

§ 3041.0–6 Definitions.

As used in this Subpart, the following terms shall have the following meanings:

(a) *"Acid or toxic producing materials"* means natural or disturbed earth materials having chemical and physical characteristics that, under mining or postmining conditions of drainage, exposure, or other processes, may produce effluents that contain chemical constituents, such as acids, bases, or metallic compounds, in sufficient concentration to individually or in combination adversely affect the environment.

(b) *"Affected lands"* means any lands affected or to be affected by exploration, development, and mining operations and the construction of facilities necessary and related to such operations.

(c) *"Approximate original contour"* means the surface configuration achieved by backfilling and grading of the mined area so that it closely resembles the surface configuration of the land prior to mining (although not necessarily the original elevation) and blends into and complements the drainage pattern and topography of the surrounding terrain.

(d) *"Area of operations"* means that area of the leased or licensed lands which is required for exploration, development, producing, and processing operations, including all related surface structures and facilities, and which is delineated on a map or plat that is made a part of the approved exploration or mining plan.

(e) *"Authorized officer"* means any officer designated by any Federal surface managing agency to exercise its authority in matters relating to coal leases and licenses and to the provisions of this Subpart.

(f) *"Coal"* includes coal of all ranks from lignite to anthracite.

(g) *"Compaction"* means the reduction of porous spaces among the particles of soil and rock generally caused by running heavy equipment over the earth materials, as in the process of leveling the overburden material on strip mine spoil piles or banks, for the purpose of increasing the bearing capacity and stability of the earth materials.

(h) *"Contemporaneously as practicable"* means with respect to reclamation of mined or otherwise disturbed areas, the commencement, conduct and completion of reclamation activity as soon after disturbance as possible, without undue physical interference with ongoing operations, leaving a minimum of land unreclaimed, consistent with the objectives of environmental protection set forth in this Subpart.

(i) *"Daylighting"* is a term used to define the surface mining procedure for exposing an underground mined area to remove remaining coal.

(j) *"Director"* means the Director of the Bureau of Land Management, U.S. Department of the Interior.

(k) *"Exploration"* means the detailed investigation and acquisition of data pertaining to a mineral deposit, including activities for identifying regions or specific areas in which deposits are most likely to occur, and activities used to establish the nature of a coal deposit preparatory to mining.

(l) *"Exploration plan"* means a detailed plan submitted to the Mining Supervisor for approval before exploration operations commence showing the location and type of exploration work to be conducted, environmental protection procedures, roads, and reclamation procedures to be followed upon completion of such operations.

(m) *"General Coal Mining Order"* means a formal numbered order issued by the Mining Supervisor, with the prior approval of the Division Chief, and published, after opportunity for public comment, in the FEDERAL REGISTER, which implements the regulations in this Part and applies to coal mining and related operations in a specified geographic area.

(n) *"Impoundment"* means an artificially built, dammed, or excavated place for the retention of water or sediments. A permanent impoundment is one that is intended to remain after final abandonment of the operation, and shall be identified as such in approved plan.

(o) *"Leased lands, leased premises, or leased tract"* means lands embraced within a coal lease and subject to the regulations in this Subpart.

(p) *"Lessee"* means any person or persons, partnership, association, corporation, public body or governmental entity to whom a coal lease is issued, subject to the regulations in this Subpart, or an assignee of such lease under an approved assignment.

(q) *"Licensee"* means any individual, association or individuals, or municipality to whom a coal license is issued pursuant to the provisions of Section 208 of Title 30 of the United States Code, or any person, association, corporation, public body or governmental entity to whom an exploration license is granted under section 201(b) of Title 30 of the United States Code.

(r) *"Logical mining unit"* means an area of land designated as such by the Geological Survey pursuant to applicable Departmental regulations.

(s) *"Methods of operation"* means the method and manner by which any activities are performed by the operator, as described in an exploration or mining plan.

(t) *"Mine"* means an underground or surface excavation and the surface or underground support facilities that contribute directly or indirectly to coal mining, preparation, and handling.

(u) *"Mining plan"* means a detailed plan for development of the coal resource submitted to the Mining Supervisor for approval prior to commencement of any mining operation, showing the proposed location, method, and extent of mining and all related activities necessary and incidental to such operation, including steps to be taken to reclaim disturbed areas, to mitigate adverse impacts, and to otherwise meet the performance standards and requirements set forth in this Subpart.

(v) *"Mining Supervisor"* means the Area Mining Supervisor, Conservation Division, Geological Survey, or District Mining Supervisor or other subordinate acting under his direction.

(w) *"Notice of Availability"* means a formal notification, by the appropriate Federal officer, to appropriate Federal, state and local agencies and interested individuals or groups of individuals, of the availability for inspection of information, data, proposed plans or modifications, thereof, pending decisions and other documents subject to such notice. Any such notice shall include the nature of the information, data, plan or modification, decision or other document involved; the name and mailing address of any applicant; the nature, location (county, township, range and section), duration and brief description of any proposed operations; the date upon which any proposed action might be taken; and, when appropriate, a specific time limit for public review, comment or request for any departmental action, including the holding of any public meeting. For the purpose of ensuring appropriate distribution of such notices, there shall be maintained at each office of a Mining Supervisor or authorized officer of the Department of the Interior a mailing list which shall consist of the names and mailing addresses of all appropriate Federal, state or local agencies and any individuals or groups of individuals who have requested in writing to be included on such lists. All notices of availability shall be mailed to such agencies, individuals or groups at the addresses indicated on such lists.

(x) *"Notice of noncompliance"* means a written notice of operator noncompliance issued pursuant to Section 211.72 of 30 CFR Part 211.

(y) *"Operator"* means a lessee or licensee, or one conducting operations on

lands under the authority of the lessee or licensee.

(z) *"Overburden"* means the earth, soil, rock, and other natural materials which lie above the coal being mined.

(aa) *"Permanent abandonment"* means the cessation of exploration or mining or other operations set forth in an approved plan on all or any portion of lands covered by a lease or license and subject to the provisions of this Subpart, where it is the intent of the operator not to continue operations at the mine or portion thereof.

(bb) [Omitted].

(cc) [Omitted].

(dd) *"Pollution"* means man-made or man-induced adverse alteration of the chemical, physical, biological, and radiological integrity of land, water or air, which reduces, or has the potential of reducing the beneficial uses of these resources.

(ee) *"Post mining land use"* means that use which will be made of affected lands after mining and reclamation is completed and which is specified in a mining or exploration plan approved pursuant to 30 CFR 211.

(ff) *"Preliminary data"* means data, consisting of maps and text, submitted by an applicant for a lease or license to the authorized officer of the BLM, which describes the applicant's proposal in the detail necessary to allow the authorized officer to conduct a technical examination and environmental analysis as described in § 3041.2.

(gg) *"Preparation"* means any crushing, sizing, cleaning, drying, mixing or other processing of coal to prepare it for market which is conducted on lands subject to this Subpart.

(hh) *"Reclamation"* means the process of returning affected lands to a stable condition and form consistent with their premining productivity and use, or other approved post mining land use.

(ii) *"Road"* means any open way for passage or travel upon which to transport people, equipment, materials, or coal, which is constructed, improved or maintained by the operator and which is used to service the pit, bench, underground mine workings, loading facilities or exploration activities.

(jj) *"Secretary"* means the Secretary of the Interior.

(kk) *"Significant vegetation"* means farm crops, including grasses and forbs, that are integral parts of agriculture or ranching operations and the natural vegetation of forests or meadows with significant recreational, watershed, agricultural, or wildlife habitat value.

(ll) *"Spoil"* means soil, rock, and other earth materials that are broken, moved, dumped, or otherwise significantly disturbed during surface coal mining operations subject to this Subpart.

(mm) *"Subsidence"* means a lowering of surface elevations over an underground mine caused by loss of support and subsequent caving of strata lying above the mine.

(nn) *"Surface owner"* means an entryman, or a person or persons who hold legal title to the land surface.

(oo) *"Topsoil"* means natural earth materials at or vertically adjacent to the land surface with physical and chemical characteristics suitable for support of vegetation.

(pp) *"Valley floors"* means the channelways, floodplains, and adjacent low terraces of streams that are flooded during periods of high flow and that are underlain by unconsolidated stream-laid deposits. Excluded are higher terraces and slopes underlain by colluvial and other surficial deposits normally occurring along valley margins.

(qq) *"Waste"* means solid or liquid refuse, rubbish, or other valueless material which is produced by or in connection with coal mining operations, including exploration, production, development, preparation and other related activities, and which has no useful purpose in connection with any remaining operations.

§ 3041.0–7 Use of surface.

(a) The operator shall be entitled to use only so much of the surface of the lands subject to a lease or license as is deemed necessary and has been designated in an approved plan. This Subpart shall not be construed to authorize any use of the Federal lands for a power generation plant or a commercial or industrial facility. Separate permits for such uses must be obtained from the appropriate agency. The operator shall not be entitled to use any mineral materials subject to the Materials Act except as provided by Part 3600 of this Chapter.

(b) Operations conducted in connection with other authorized uses on the same lands shall not unreasonably interfere with or endanger operations conducted in connection with uses authorized under this Chapter, nor shall operations authorized and conducted pursuant to this Chapter unreasonably interfere with or endanger operations under any lease, permit, license, or other use authorized pursuant to the provisions of any other Act.

§ 3041.1 [Reserved]

§ 3041.1–1 [Reserved]

§ 3041.1–2 [Reserved]

§ 3041.2 Technical examination/environmental analysis.

The appropriate authorized officer, with the assistance of the Mining Supervisor, shall make a technical examination and environmental analysis of the area covered by a competitive coal lease application or on Bureau motion, pursuant to the provisions of this section.

(a) The technical examination shall include:

(1) An examination of the technical aspects of the proposed operations set forth in any preliminary data and information; and

(2) An evaluation of the impacts of such operations or, if on BLM motion, the effect of coal leasing and development, on other land uses, resources, or land management programs on or adjacent to the area.

(b) The environmental analysis shall include an analysis of the impact of the proposed operations set forth in any preliminary data and information and of alternatives thereto, or, if on BLM motion, the impacts of coal leasing and development on the living and nonliving components of the environment.

§ 3041.2–1 Technical examination/environmental analysis report.

(a) Following completion of the technical examination and environmental analysis described in the preceding Section, the authorized officer shall prepare a report which sets forth recommendations as to (1) land which should be excluded from any lease or license in order to avoid mining where reclamation is not attainable or assured, or in recognition of other exclusive land use management priorities; (2) measures required to comply with the reclamation and performance standards set forth in this Subpart; (3) necessary conditions and amounts of bonds to cover estimated reclamation costs for areas that will be disturbed during the initial 5-year period of the lease, permit, of license; (4) any additional, more stringent requirements needed in the lease or license pursuant to § 3041.1(e) of this Subpart.

(b) If it is recommended that a specific area within the applied for lands be excluded from a lease or license, or modification thereof, the report shall set forth with reasonable specificity the facts upon which such recommendation is based.

§ 3041.2–2 Obligations and standards of performance.

(a) Any operator who accepts a coal lease or license shall comply with, and be bound by, the general obligations and standards of performance set forth in this section and such additional and more stringent specific requirements as may be contained in the terms and conditions of such lease or license.

(b) If the appropriate authorized officer of the BLM determines that an approved exploration or mining plan should be required to be revised or supplemented to adjust to changed conditions or to correct oversights, he may propose such revision or supplement to the Mining Supervisor for action pursuant to the provisions of 30 CFR Part 211 relating to changes in plans.

(c) Surface coal mining operations shall be conducted so as to assure the extraction of the coal resource to the maximum extent possible, taking into account existing technology, commercially available equipment, the cost of production, and the quality and quantity of the coal resource, so that future environmental disturbance through the resumption of mining will be minimized.

(d) The operator shall, in accordance with the terms and conditions of the lease or license (1) take visual resources identified by the Federal surface managing agency into account in the planning, design, location, and construction of facilities on the affected lands; and (2) take such action as may be needed to

minimize, control, or prevent damage to the recreational, cultural, scientific, historical and known or suspected archeological and paleontological values of the land contained therein.

(e) The following performance standards shall be applicable to the surface effects of underground mining.

(1) Each operator of an underground coal mine shall adopt measures consistent with feasible known technology in order to prevent or, in those instances where the mining method used requires planned subsidence in a predictable and controlled manner, control subsidence; maximize mine stability; and maintain the value and use of surface lands.

(2) Where pillars or panels are not removed and controlled subsidence is not part of the mining plan, pillars or panels of adequate dimensions shall be left to assure stability giving due consideration of the thickness and strength characteristics of the coal beds and of the strata above and immediately below the coal bed.

(f) The following performance standards shall be applicable to all coal exploration, development, mining, preparation, handling, and reclamation operations on the surface of lands subject to this Subpart:

(1) The operator shall reclaim affected lands pursuant to his approved plan, as contemporaneously as practicable with operations, to a condition capable of supporting all practicable uses which such lands were capable of supporting immediately prior to any exploration or mining, or equal or better uses that have been approved in accordance with this Subpart.

(2) The operator shall replace overburden and waste materials in the mined area by backfilling (compacting, where necessary, to ensure stability or to prevent leaching of toxic materials), grading or other means, so as to cover all acid-forming or other toxic materials and eliminate highwalls and spoil piles and restore the approximate original contour. Where the thickness of the coal deposits relative to the volume of overburden is large and where the overburden and other spoil and waste materials are either insufficient or more than sufficient to restore the approximate original contour, the operator shall, in order to provide adequate drainage, backfill, grade, and where necessary, compact, using all available overburden or spoil material, to obtain the lowest practicable grade, which shall in any event be less than the angle of repose. Excess overburden or other spoil material shall be fully reclaimed in accordance with the requirements of this Subpart. Variance from the requirements of subparagraphs (1) and (2) of this paragraph may be allowed in an approved mining plan if the Director of the Geological Survey, with the concurrence of the Director of the Bureau of Land Management or the comparable appropriate authorized officer, determines that unusual physical conditions at the site, such as steeply dipping coal beds or multiple seam mining, exist, and such conditions make backfilling pursuant to such requirements impracticable as a result of the volume of material excavated or environmentally undesirable as a result of the duration of the operation.

(3) The operator shall stabilize and protect all surface areas, including spoil piles, affected by the coal mining and reclamation operation, to effectively control slides, erosion, subsidence, and attendant air and water pollution.

(4) The operator shall remove topsoil separately, for replacement on the backfill area, and if not so utilized immediately, segregate it in a separate pile from other spoil. When topsoil is not to be replaced on a backfill area within a time short enough to avoid deterioration, the operator shall establish and maintain an approved quick growing vegetative cover or employ other approved measures so that the topsoil is protected from wind and water erosion and establishment of noxious plant species, and is in a condition for sustaining vegetation when used during reclamation. If topsoil is of insufficient quantity or of poor quality for sustaining vegetation, and if other excavated materials can be shown to be more suitable for revegetation, then the operator may be authorized in the approved plan to remove, segregate, protect, and utilize in a like manner such other materials.

(5) The operator shall ensure that water impoundments, water retention facilities, dams, or settling ponds have been set forth in an approved plan, and ensure that:

(i) Any such facility is adequate for its intended purposes and the quality and quantity of impounded water will be suitable for its intended use.

(ii) Any such facility is designed, located, built, used, and maintained in accordance with sound engineering standards and practices and applicable Federal and State laws and regulations, to ensure that such facilities will have necessary stability with an adequate margin of safety.

(iii) Final grading will provide adequate safety and access for proposed or reasonably anticipated water users.

(iv) Such facilities will not have a significant adverse impact on the water resources utilized by adjacent or surrounding landowners for agricultural, industrial, recreational, or domestic uses, provided, however, that this subparagraph shall not be deemed or construed to increase or diminish any property rights to any water held by any person.

(v) No mine or processing waste is used in the construction of such facilities unless authorized in the approved plan.

(6) The operator shall cover or plug all auger mine holes with noncombustible and, where necessary to minimize control or prevent harmful drainage, impervious material.

(7) The operator shall utilize the best practicable commercially available technology to minimize, control or prevent disturbances of the prevailing quality, quantity and flow of water in surface and ground water systems, and of the prevailing erosion and deposition conditions at the mine site and in affected offsite areas, both during and after coal mining operations and reclamation, by:

(i) Controlling acid or toxic drainage and the adverse consequences thereof by such measures as, but not limited to, diverting surface runoff water away from disturbed areas; excluding oxygen from, or restricting the flow of water through acid or toxic-producing minerals; treating drainage to reduce acid or toxic content which adversely affects downstream water upon being released to water courses; and casing, sealing, or otherwise treating drill holes, shafts, and wells to keep acid or toxic drainage from entering ground and surface waters.

(ii) Conducting surface mining operations so as to minimize, control, or prevent (A) contributions of suspended solids to streamflow or runoff outside the mining site above natural levels under seasonal flow conditions as measured for a period and at sites determined by the Mining Supervisor, in consultation with the appropriate authorized officer, and (B) except where specifically authorized in an approved plan, deepening or enlarging of stream channels where operations include the discharge of water from mines.

(iii) Removing or modifying siltation structures after disturbed areas are revegetated and stabilized unless otherwise authorized by the Mining Supervisor in an approved plan, with the concurrence of the appropriate authorized officer, provided, however, that any siltation structure retaining water shall, in any event, be subject to the requirements of § 3041.-2-2(f)(5) of this Subpart.

(iv) Protecting the quality, quantity and flow, including depth of flow, of upstream and downstream surface and ground water resources of those valley floors which provide water sources that support significant vegetation or supply significant quantities of water for other purposes, by such measures as, but not limited to, relocating and maintaining the gradients of stream, avoiding mining installing, reestablishing or replacing acquifers or acquicludes, and replacing soils, provided, however, that this subparagraph shall not be deemed or construed to increase or diminish any property rights to any water held by any person.

(8) The operator shall: (i) Treat or dispose of all rubbish and noxious substances in a manner designed to minimize, control or prevent air and water pollution and the hazards of ignition and combustion.

(ii) Dispose of all waste resulting from the mining and preparation of coal in a manner designed to minimize, control or prevent air and water pollution and hazards of ignition and combustion. Where surface disposal of solid wastes in areas other than the mine workings or other excavations has been authorized in the approved plan, stabilize such waste including, where necessary, constructing waste piles in compacted layers with the use of incombustible and impervious materials; shape waste piles

to be compatible with the natural surroundings and terrain; cover with topsoil or other suitable material in accordance with subparagraph (f)(4) of this section; and revegetate in accordance with subparagraph (f)(13) of this section. All impoundments of liquid wastes shall comply with the requirements of subparagraph (f)(5) of this Section. Waste containing coal in such quantity that it may be later separated from the waste by washing or other means shall be stored separately.

(9) Except as provided herein, the operator shall not conduct excavation, drilling, or blasting operations within 200 feet of an active or abandoned underground mine. Where it can be established by certified maps or inspection of such an underground mine that such activities may be conducted without danger of interference with, or penetration of, an underground mine, they may be authorized in an approved plan to be conducted up to but not less than 25 feet from such underground mine provided that nothing in this paragraph shall preclude daylighting or similar surface coal mining activities intended to improve resource recovery, abate water pollution, or eliminate public hazards resulting from such underground mines.

(10) To prevent personal injury or damage to public and private property, the operator shall use explosives only in accordance with all applicable Federal and State laws and an approved plan and shall:

(i) Provide adequate advance written notice, by publication and/or posting of planned blasting schedules, to local governments and to residents who might be affected by the use of such explosives, and maintain a log of the magnitudes and times of blasts for a period of at least two years.

(ii) Limit the size, timing, and frequency of blasts, as determined by the physical conditions of the site.

(11) The operator shall design to applicable standards, construct, maintain and, when no longer necessary and unless otherwise authorized in an approved plan, remove, all roads, pipelines, powerlines and similar utility access facilities and associated bridges, culverts and ditches, into and across the site of operations, in a manner that will minimize control or prevent erosion and siltation, fugitive dust, pollution of water, damage to fish or wildlife or their habitat and public or public property.

(12) (i) Roads shall not be surfaced with any acid or toxic producing material. No access roads will be constructed unless (A) the operator shall have first submitted a surveyed profile accompanied by typical cross-sections of the road and ditches, showing pipe, entrance, exit channels and sediment control structures and other structures or configurations to be used on the road to meet performance standards and (B) the location shall have been marked and inspected, and approved by the Mining Supervisor, in consultation with the appropriate authorized officer and the surface owner, if other than the United States.

(ii) No access road shall be constructed in a stream, nor shall any stream or stream bed be used as an access road. Insofar as possible, all roads shall be located on benches, ridges, and flatter slopes to enhance stability and minimize disturbance. Stream fordings shall be avoided and the normal seasonal flow and the normal seasonal sediment load shall not be detrimentally affected by access roads in a continuous fashion that results in harm to the aquatic ecosystem. Provided, however, that nothing in this subparagraph shall be construed to prohibit relocation or alteration of such beds or channels pursuant to the provisions of this Subpart and as set forth in an approved plan.

(13) (i) The operator shall, except where other reclamation based upon post-mining land use and not requiring revegetation pursuant to the requirements of this section is expressly provided for in an approved plan, establish on regarded areas and all other affected lands a diverse vegetative cover, native to the area and capable of regeneration and plan succession at least equal in density and permanence to the natural vegetation provided, however, that the Mining Supervisor, with the concurrence of the appropriate authorized officer may allow the use of approved mixtures of introduced or native species where preferable to achieve quick cover or assure successful revegetation. In approving such mixture, preference will be given to non-toxious species.

(ii) The operator's responsibility and liability under his performance bond for revegetation of each planting area shall extend until such time as the appropriate authorized officer, in consultation with the Mining Supervisor and the surface owner, if other than the United States, determines that successful revegetation in compliance with subparagraph (i) of this subsection has occurred, provided, however, that this period shall extend for a minimum of five full years after the first planting, and for a total period of liability not to exceed 10 years from the original planting; and further provided that,

(A) Where the appropriate officer, in consultation with the Mining Supervisor, determines that natural conditions such as annual precipitation, soil characteristics and native vegetation are stable and favor rapid revegetation, and that revegetation pursuant to subparagraph (i) of this subsection is likely to occur before the expiration of such minimum period, he may specify in the lease, permit, or license that such minimum period will not apply with respect to some or all of the lands included in such lease, permit or license; and

(B) Where during any such minimum period such authorized officer, in consultation with the Mining Supervisor and the surface owner, if other than the United States, determines that natural conditions such as annual precipitation and soil characteristics are sufficiently unstable so as to favor only slow and uncertain revegetation, he may recommend to the Mining Supervisor that the liability of the operator be extended for a period of up to five years beyond the period initially established, if the financial liability that would be incurred by the operator as a result is reasonably commensurate with the increased probability of successful revegetation.

(iii) During the relevant period of liability, the Mining Supervisor and the appropriate authorized officer shall jointly inspect and evaluate the revegetated areas pursuant to subparagraph 3041.6 (b)(2) hereof.

(14) The operator shall: (i) Except as provided in subparagraph (ii) hereof, allow public access to and upon Federal lands subject to his lease, permit, or license for all lawful and proper purposes, except where such access would unduly interfere with his authorized use.

(ii) Regulate public access, vehicular traffic, and wildlife or livestock grazing in all areas of active operations, including lands undergoing reclamation, in order to protect the public, wildlife and livestock from hazards associated with such operations, and to protect revegetated areas from unplanned and uncontrolled grazing. For this purpose, the operator shall provide warning signs, fencing, flagmen, barricades, and other safety and protective measures as may be neeessary.

(15) Coal storage areas shall be designed and maintained so as to eliminate fire hazards from spontaneous combustion and other accidential ignition. If a coal seam exposed by surface mining or an accumulation of slack coal or combustible waste becomes ignited during the term of a lease, the operator shall immediately take all necessary steps to extinguish the fire.

(16) Upon completion or temporary or permanent abandonment of mining operations in all or any part of a strip pit, the face of the coal shall be covered with noncombustible material that will effectively protect the coal bed from becoming ignited.

(17) The driving of any underground openings by auger or other methods from any strip pit shall not be undertaken except as specifically approved by the Mining Supervisor, in an approved plan.

§ 3041.3 Compliance or performance bond.

(a) The provisions of Subpart 3504 of this Chapter are hereby made applicable to this subpart. In addition each compliance bond will be conditioned upon faithful compliance with the regulations in this subpart and any additional terms and conditions of the lease or license.

(b) Prior to issuing a lease or license, the authorized officer, after consultation with the Mining Supervisor, shall ensure that the amount of the compliance bond or bonds to be furnished is sufficient to ensure reclamation in accordance with the performance and reclamation standards in § 3041.2-2, and with the terms and conditions of the lease or license.

(c) An application for a lease or license may be denied any applicant or offeror who has previously forfeited a bond because of failure to comply with an approved plan unless the affected lands covered by such plan have been re-

claimed without cost to the Federal Government. Nothing in this subparagraph shall be deemed to modify or limit any discretionary authority of the authorized officer of the BLM otherwise to deny for cause any application for a lease or license.

(d) Once a lease or license has been issued the authorized officer, after consulting with and receiving the recommendation to increase or to release in whole or in part any compliance bond or bonds so that the amount of the compliance bond or bonds will at all times be sufficient to cover the estimated costs of completion of the remaining reclamation requirements of the approved plan and of the terms and conditions of the lease or license.

§ 3041.4 Procedures and public participation.

Written findings. Except as may be otherwise expressly set forth in this Subpart, decisions and determinations of any appropriate authorized officer acting pursuant to this Subpart or to 30 CFR Part 211 with respect to issuance of leases, approval of mining plans or modifications thereof, and abandonment of operations shall be in writing, shall set forth with reasonable specificity the facts and the rationale upon which such decisions or determinations are based, and shall be available for public inspection during normal business hours at the offices of such officer.

§ 3041.5 Completion of operations and abandonment.

(a) *Grading and backfilling.* Upon completion of backfilling and grading as required by the approved plan and prior to replacing topsoil and revegetation, the operator shall submit a report thereon, in duplicate, to the Mining Supervisor and request inspection for approval. Whenever it is determined by such inspection that the backfilling and grading has met the requirements of the approved plan, the Mining Supervisor shall recommend to the appropriate authorized officer release of an appropriate amount of the compliance bond for the area satisfactorily backfilled and graded.

(b) *Temporary abandonment.* In areas in which there are no current operations, but operations are to be resumed under an approved plan, the operator shall substantially backfill, fence, protect, or otherwise effectively close all surface openings, auger holes, areas prone to subsidence, and surface facilities or workings which are a hazard to people or animals. Conspicuous signs shall be posted prohibiting entrance of unauthorized persons. All such protective measures shall be maintained in a secure condition until such operations are resumed or permanently abandoned.

(c) *Permanent abandonment.* Before permanent abandonment of exploration or mining operations, all openings and excavations, including water discharge points, shall be closed or backfilled, or otherwise permanently dealt with in accordance with sound engineering practices and according to the approved plan. Drill holes, trenches, and other excavations for exploration, development or prospecting shall be abandoned in such a manner as to protect the surface and not to endanger any present or future underground operations or any deposit of oil, gas, other mineral resources, or ground water. Methods of abandonment shall be approved in advance by the Mining Supervisor in an approved plan, and may include backfilling, regrading, revegetation, cementing, and capped casing, or combinations of these, or other methods. Reclamation and clean-up of surface areas around and near permanently abandoned underground or surface mines, including, except where otherwise expressly provided in an approved plan, removal of equipment and structures related to the mining operation, shall commence without delay following cessation of mining operations. Areas affected by access roads will be graded, drained, and revegetated in accordance with the approved Mining Plan and therein approved post mining land use prior to bond release. In the event that access or haul roads are intended to remain after abandonment of the operation, pursuant to § 3041.2–2(f)(11) of this Subpart, they must be designed and constructed so as to be permanently stabilized using adequate drains, water barriers, and other practices.

(d) *Notice of abandonments release of bond.* (1) Not less than 30 days prior to cessation or abandonment of operations, the operator shall submit to the Mining Supervisor, in duplicate, a notice of his intention to cease or abandon operations, together with a statement of the exact number of acres affected by his operations, the extent and kind of reclamation accomplished, and a statement as to the structures and other facilities that are to be removed from or remain on the leased or licensed lands.

(2) Upon receipt of such notice, the Mining Supervisor and the appropriate authorized officer or officers shall promptly make a joint inspection to determine whether all operations have been completed in accordance with the terms and conditions of all leases, permits, and licenses, and with the requirements of approved operating plan. Where the operator has compiled with all such terms, conditions and requirements and the regulations of this Subpart the Mining Supervisor shall recommend to the appropriate authorized officer that the appropriate period of bonded liability be terminated.

(3) When the surface of lands in a lease permit or license is not owned by the United States the Mining Supervisor shall notify the surface owner and solicit and take into account his comments before recommending to the appropriate authorized officer that the period of such bond liability be terminated.

§ 3041.6 Reports.

(a) *Operations.* The operator shall file with the Mining Supervisor within 30 days after the end of each calendar year, and within 30 days after any temporary or permanent abandonment of operations, a report, in duplicate, containing the following with respect to his operations or the operations subject to such abandonment.

(1) Serial number of the lease, permit, or license and a description of the lands affected by operations.

(2) The number of acres disturbed and the number of acres reclaimed, including areas on which revegetation is being conducted.

(3) A description of the reclamation work remaining to be done on lands disturbed.

(b) *Revegetation.* (1) The operator shall file a report, in duplicate with the Mining Supervisor within 30 days after each planting is completed. The report shall: (i) Identify the lease or license; (ii) Show the types of planting or seeding, including mixtures and amounts; (iii) Show the date of planting or seeding; (iv) Identify or describe the planted or seeded lands; (v) Describe any surface manipulation, mulching, fertilization, and irrigation procedures, if any, and contain such other information as may be considered relevant.

(2) The Mining Supervisor and the authorized officer of the Federal surface managing agency shall, as soon as possible after each full growing season, jointly inspect and evaluate the revegetated areas to determine, in consultation with the surface owned if other than the United States, whether satisfactory vegetative growth has been established, or whether additional revegetation efforts should be ordered pursuant to 30 CFR 211.62(b)(2).

§ 3041.7 Notice of noncompliance; Revocation.

(a) The appropriate authorized officer and the Mining Supervisor shall have the right to enter upon the lands subject to this Subpart under lease or license, at any reasonable time.

(b) If an appropriate authorized officer discovers that an operator is conducting on lands subject to this subpart activities which are not in compliance with the requirements of a least or license, applicable regulations, or an approved plan and such activities do not threaten immediate and serious damage to the environment, resources, or the health and safety of the public, such authorized officer shall or, in the case of an appropriate authorized officer of any Federal surface managing agency not in the Department of the Interior, may refer the matter to the Mining Supervisor for remedial action pursuant to 30 CFR 211.72(a).

(c) If an appropriate authorized officer discovers that an operator is conducting on lands subject to this subpart activities which are not in compliance with the requirements of a lease or license, applicable regulations or an approved plan and such activities threaten immediate and serious damage to the environment, resources, or the health and safety of the public, and the Mining Supervisor is not available for appropriate remedial action pursuant to 30 CFR 211.72(c), such authorized officer may order the immediate cessation of such activities and shall promptly notify the Mining Supervisor. Upon such notification, the Mining Supervisor shall order immediate remedial action pursuant to 30 CFR 211.72(c).

(d) Failure of the operator to take action in accordance with an order for cessation of activities issued pursuant to paragraph (c) of this section, or with a written notice of noncompliance issued by the Mining Supervisor in accordance with the provisions of 30 CFR 211.72 shall be grounds for suspension of the operation and for possible cancellation of the lease, permit, or license in accordance with the regulations in 43 CFR 3500 of this Chapter.

§ 3041.8 Variances.

(a) Variances from compliance with the performance standards set forth in this subpart may be allowed as part of an approved mining plan under either of the following circumstances:

(1) Where an applicant states in a proposed plan or modification thereof that he cannot meet a performance standard specified in subparagraphs 3041.2–2(f) (2), (4), (6), (11), (12) or (13) of this subpart, he may request a variance from such performance standard where such variance would be compatible with the approved post mining land use, and shall support his request with appropriate information demonstrating the need therefor. The Mining Supervisor, after consultation with the appropriate authorized officer and the surface owner, if other than the United States, may approve or disapprove such variance, and shall advise the applicant and approve or disapprove the proposed plan or modification accordingly;

(2) Where an applicant proposes a post-mining land use that is substantially different from the land use immediately prior to any exploration and mining, the Mining Supervisor, with the concurrence of the appropriate authorized officer and after consultation with the surface owner, if other than the United States, may approve a mining plan containing variances from the performance standards of 30 CFR 211 and § 3041.2–2(f) hereof, provided that:

(A) After consultation with the appropriate land use planning agencies, if any, the proposed development is deemed to constitute an equal or better economic or public use of the affected land, as compared with the premining use.

(B) The granting of such variance is essential to achieving the proposed post mining land use.

(C) The applicant presents specific plans for the proposed post mining land use and appropriate assurances that such use will be: (i) Compatible with adjacent land uses; (ii) Supported by commitments and assured of investment from public agencies where appropriate; (iii) Practicable with respect to private financial capability for completion of the proposed development; (iv) Planned pursuant to a schedule made part of the proposed mining plan so as to integrate the mining operation and reclamation with the post mining land use; (v) Designed by qualified personnel in conformance with professional standards in order to assure the stability, drainage, and configuration necessary for the intended use of the site.

(D) To the degree possible and taking into account the subjective nature of the assessment, the applicant has considered the impact of the proposed land use on the aesthetic character of the area by consulting with inhabitants of the area, and utilizing expertise in the landscape and geomorphologic fields.

(b) Any application for a variance pursuant to paragraph (a) of this section shall demonstrate that any proposed disturbance of land above a highwall will facilitate compliance with the environmental protection and performance standards set forth in this subpart.

(c) Any application for variance pursuant to paragraph (a) of this section which proposes to place spoil or other material on the downslope below the bench used to mine an area classed as "steep slope," shall demonstrate to the satisfaction of Mining Supervisor that the permanent or temporary sediment loads in the receiving drainages and reclamation to the post-mining land use will not have significant adverse effects upon the aesthetics of the area.

(d) All variances granted pursuant to this section shall be reviewed by the Mining Supervisor and the appropriate authorized officer not more than three years after granting of the variance and incorporation in the mining plan, to ensure that the development is proceeding in accordance with the terms of the approved plan and the terms and conditions of any lease, permit, or license.

(e) An operator may apply for a variance pursuant to the provisions of paragraph (a) of this section only by submitting a new or revised mining plan to the Mining Supervisor for approval pursuant to the provisions of 30 CFR 211. Minor changes of operations which do not involve violations of the performance standards set forth in this subpart, and the granting of a variance pursuant to the description in § 3041.2–2(a)(2) of this subpart, will not be deemed to be subject to or require compliance with the provisions of this section.

(f) If the Director of the GS determines that a decision to grant a variance would constitute a major Federal action significantly affecting the quality of the human environment, and that an environmental impact statement as required by Section 102(2)(C) of the National Environmental Policy Act has not been prepared with respect thereto, such a statement shall be prepared. If the Mining Supervisor grants a variance pursuant to this Section, he shall notify the appropriate land managing agency or land planning agency for the purpose of determining whether any changes may, as a result of such variance, be required in any land use plan.

PART 3500—LEASING OF MINERALS OTHER THAN OIL AND GAS: GENERAL

2. Section 3500.0–5 of 43 CFR is amended by revising paragraphs (h) and (i) as follows:

§ 3500.0–5 Definitions.

* * * * *

(h) *Public Bodies.* Public bodies are Federal and State agencies, municipalities, and rural electric cooperatives and similar types of organizations, and nonprofit corporations controlled by any of foregoing entities.

(i) *Government entities.* Governmental entities are Federal and State agencies, municipalities and subdivisions thereof, including any corporation primarily acting as an agency or instrumentality of a State, which produces electrical energy for sale to the public.

3. 43 CFR 3501.1–4 paragraphs (b)(1)(i) and (ii) are revised to read as follows:

§ 3501.1–4 Acreage limitations.

* * * * *

(b) * * *

(1) *Coal.* (i) No person, association, or corporation, or any subsidiary, affiliate, or persons controlled by or under common control with such person, association, or corporation shall take, hold, own or control at one time Federal coal leases or permits on an aggregate of more than 46,080 acres in any one State, and in no case on an aggregate of more than 100,000 acres in the United States.

(ii) No person, association, or corporation holding, owning or controlling Federal coal leases or permits (by itself or through any subsidiary, affiliate, or person under common control with it) on an aggregate of more than 100,000 acres in the United States on August 4, 1976, shall be required to relinquish any lease or permit which it held on that date, but it shall not be permitted to take, hold, own or control any further Federal coal leases or permits until such time as its holding, ownership, or control of Federal leases or permits has been reduced below an aggregate of one hundred thousand acres within the United States.

* * * * *

4. 43 CFR 3501.1–5 is revised to read as follows:

§ 3501.1–5 Exceptions.

(a) *All leaseable minerals except coal.* No lands within the boundaries of the following areas in the public domain shall be leased under the provisions of this Part:

(1) National parks and monuments.

(2) Indian reservations.

(3) Incorporated cities, towns, and villages.

(4) Naval petroleum and oil shale reserves.

(5) Lands acquired under the act of March 1, 1911 (36 Stat. 961; 16 U.S.C. 513–519) known as the Appalachian Forest Reserve Act, or other acquired lands.

(b) *Coal.* No coal leasing shall be permitted on the public domain within the areas set forth in 43 CFR 3535.4.

5. 43 CFR 3501.2–1 is revised to read as follows:

§ 3501.2 Acquired lands.

§ 3501.2–1 Lands and deposits not subject to leasing.

(a) *All leaseable minerals except coal.* The following acquired lands are not subject to leasing:

(1) Lands acquired for the development of their mineral deposits;

(2) Lands acquired by foreclosure or otherwise for resale;

(3) Lands acquired as surplus under the Surplus Property Act of October 3, 1944 (58 Stat. 765; 50 U.S.C. 1611, et seq.);

(4) Lands in incorporated cities, towns, and villages;

(5) Lands in national parks and monuments; and

(6) Lands which are tide lands or submerged coastal lands within the Continental Shelf adjacent or littoral to any part of land within the jurisdiction of the United States.

(b) *Coal.* No coal leasing shall be permitted on acquired lands within the areas set forth in 43 CFR 3525.4.

6. 43 CFR 3502.9 is amended to read as follows:

§ 3502.9 Public Bodies.

§ 3502.9–1 Coal.

(a) To obtain a coal lease on a tract set aside pursuant to 30 U.S.C. 201(a) a public body must submit:

(1) Evidence of the manner in which it is organized;

(2) Evidence that it is authorized to hold a lease or permit;

(3) Evidence that the action proposed has been duly authorized by its governing body; and

(4) A definite plan to produce energy solely for its own use or for sale to its members or customers (except for short-term sales to others).

(b) To obtain a license to mine coal pursuant to 30 U.S.C. 208, a municipality must submit:

(1) Evidence of the manner in which it is organized;

(2) Evidence that it is authorized to hold a license; and

(3) Evidence that the action proposed has been duly authorized by its governing body.

(c) To obtain a coal lease pursuant to 30 U.S.C. 352 on a tract of acquired lands set apart for military or naval purposes, a governmental entity must submit:

(1) Evidence of the manner in which it is organized, including the state in which it is located;

(2) Evidence that it is authorized to hold a lease;

(3) Evidence that the action proposed has been duly authorized by its governing body; and

(4) Evidence that it is producing electricity for sale to the public in the state where the lands to be leased is located.

(d) Where the material required in paragraphs (a), (b) and (c) of this section has previously been filed, a reference by serial number of the record in which it has been filed, together with a statement as to any amendments, will be accepted.

7. 43 CFR Subpart 3503 is amended by adding a new § 3503.3–3 to read as follows:

§ 3503.3–3 Coal.

(a) A coal lease shall require payment of a royalty of not less than 12½ per centum of the value of the coal removed from a surface mine.

(b) A coal lease shall require payment of a royalty of not less than 8 per centum of the value of the coal removed from an underground mine, except that the authorized officer may determine a lesser amount if conditions warrant.

(c) The value of coal removed from a mine is defined for royalty purposes in 30 CFR 211.63.

8. 43 CFR § 3503.3–1(b) is amended by revising paragraph (1) to read as follows:

§ 3503.3–1 General statement rentals.

* * * * *

(b) *Leases*—(1) *Coal.* Annual rental per acre or fraction thereof for coal leases shall not be less than 25 cents for the first year, not less than 50 cents for the second through fifth years and not less than $_____ for each and every year thereafter during the continuance of the lease.

(i) *Leases issued before August 4, 1976.* The rental paid for any year shall be credited against the royalties for that year until the lease is readjusted.

(ii) *Leases issued or adjusted after August 4, 1976.* Rental payments may not be credited against royalties.

§§ 3505.1–1, 3505.2–1 through 3505.2–4 [Reserved]

9. 43 CFR Subpart 3505 is amended by revoking and reserving §§ 3505.1–1, 3505.2, 3505.2–1, 3505.2–2, 3505.2–3, and 3505.2–4.

§§ 3511.2–1 and 3511.2–2 [Amended]

10. 43 CFR Subpart 3511 is amended by revoking and reserving paragraph (b)(1) of § 3511.2–1(b)(1) and § 3511.4–4.

PART 3520—PREFERENCE RIGHT AND COMPETITIVE LEASES

Operator questions order of sections:

11. Section 3520.0–3 is revised as follows:

§ 3520.0–3 Authorities.

(a) *Public domain and acquired lands.* The Secretary is authorized to divide into leasing units and award leases of mineral lands and mineral deposits owned by the United States as set forth in § 3500.1–1 subject to the provisions of the Mineral Leasing Act, as amended and supplemented, and the Mineral Leasing Act for Acquired Lands as set forth in § 3500.0–3. Coal leasing is governed by the application procedures in 43 CFR Subpart 3525. Other leaseable minerals are covered by the procedures in 43 CFR Subpart 3521.

14. Section 3521.2–1 is revised as follows:

§ 3521.2–1 Application or Bureau motion.

(a) *Application.* (1) *Forms.* (i) Where filed and copies. An application for a lease must be filed in duplicate in the proper office. No specific form is required. Competi-coal lease applications will be accepted only as authorized by 43 CFR Subpart 3525. The application should include the information set forth in (ii) to (v) of this subparagraph.

(ii) The applicant's name and address.

(iii) State of citizenship and qualifications.

(iv) A complete and accurate description of the lands for which the lease is desired. See § 3501.1–3.

(v) Evidence that the land is valuable for the mineral for which application is made, with a statement as to the character, extent and mode of occurrence of the deposit.

(2) *Additional Statements Required.* The contemplated investment for the development and purchase of equipment of a producing mine of a stated average daily output. Phosphate. To the extent such information is known to the applicant, a description of the phosphate and associated or related mineral deposits in the land based upon such actual examination as can be effected without an injury to the land or deposits (such examination shall not be deemed a trespass), giving nature and extent of the deposits; an outline in general terms of the proposed method of mining and processing the same; the proposed investment in mining operations thereon, and processing facilities therefor.

(3) Evidence showing in sufficient detail that:

(i) The amount of phosphate lands, Federal and non-Federal, held by him, together with the lands described in the application are necessary for his proposed development plan.

(ii) He intends to explore, mine and develop the property in good faith.

(iii) His proposed operations of the property will be in accordance with good conservation practice and this additional development is needed in order to supply an existing demand which cannot otherwise be reasonably met.

12. Section 3521.2–2 is revised as follows:

§ 3521.2–2 Qualifications.

(a) Compliance with Subpart 3502 is required.

(b) Bureau motion. (1) Bureau of Land Management responsibility.

(2) Geological Survey responsibility.

(c) *Leasing Units.* (1) *Phosphate.* If the authorized officer shall determine, after consultation with the Mining Supervisor of the Geological Survey that specific lands or deposits, not under an outstanding permit or application for preference right lease, which constitute an acceptable leasing unit are subject to phosphate lease, they will be offered for such lease on the terms and conditions to be specified in the notice of lease offer to the qualified person who offers the highest bonus by competitive bidding equal to the fair market value of the mineral deposit either at public auction

or by sealed bids as provided in the notice of lease offer.

(2) *Solid (hardrock) minerals.* Any qualified person may file an application for the competitive offering of such deposits. Leasing units may not exceed, in reasonably compact form, 2,560 acres of land described in the manner required by this section. The authorized officer may prescribe a lesser area for any mineral deposit if the Geological Survey reports that such lesser area is adequate for a logical leasing unit.

(i) *Exception.* (a) *Phosphate.* In a notice for a phosphate lease, the detailed statement will set forth that the terms of minimum production will not be reduced or waived at the lessee's request as provided in § 3503.3–2(b)(3), (d), (e), or upon a satisfactory showing that market conditions are such that the lessee cannot operate except at a loss.

(b) *Asphalt.* All leases will be issued through competitive bidding only in the same manner as that provided for in Subpart 3120.

(c) *Publication.* Notice of offer of lands or deposits for lease by competitive bidding will be by publication once a week, or for such other period as may be deemed available, in a newspaper of general circulation in the county in which lands are situated.

13. The following sections are repealed and reserved: 43 CFR § 3520.0–4, 43 CFR § 3520.1–2, 43 CFR § 3520.1–3, 43 CFR § 3521.1–4, 43 CFR § 3521.1–5.

14. Title 43 CFR § 3520.2–1 is amended to read as follows:

§ 3520.2–1 Duration of Leases.

Leases shall be issued for indeterminate periods subject to readjustment or renewal at the end of the first 20-year period upon such terms and conditions as may be incorporated in each lease or prescribed in general regulations issued by the Secretary of the Interior, including covenants relative to mining methods, waste, period of preliminary development and minimum production (a) *Exceptions.* (1) *Asphalt.* Asphalt leases are issued for 10 years and so long thereafter as the lessee complies with the terms and conditions of the lease.

(2) *Solid (hardrock) minerals.* The lease will be issued for a period not exceeding 20 years the term to be determined upon the advice of the agency having jurisdiction over the surface and the U.S. Geological Survey.

(3) *Coal leases issued or readjusted after August 4, 1976.* The term of the lease shall be twenty years, and as long thereafter as the lessee is producing coal annually in commercial quantities.

§ 3524.1–1 [Reserved]

15. 43 CFR Subpart 3524 is amended by revoking and reserving § 3524.1–1.

16. 43 CFR 3524.2–1 is amended to read as follows:

§ 3524.2–1 Coal.

(a) *Application.* A lessee may obtain modification of his lease to include coal lands or coal deposits contiguous to those embraced in his lease if the authorized officer determines that it would be in the interest of the United States to do so. In no event shall the total area added by such modifications to an existing coal lease exceed one hundred sixty acres or the same number of acres as that in the original lease, whichever is less. The lessee shall file his application for modification in duplicate in the proper land office, describing the additional lands desired, and the needs and reasons for and the advantage to the lessee of such modification.

(b) *Availability*—(1) *Noncompetitive.* Upon determination by the authorized officer that the modification is justified and that the interest of the United States is protected, the lease will be modified without competitive bidding to include such part of the land or deposits as he shall prescribe.

(2) *Competitive.* If it is determined that the additional lands or deposits can be developed as part of an independent operation or that there is a competitive interest in them, they will be offered as provided in Subpart 3520.

(c) *Terms and conditions.* The authorized officer shall require changes in the terms and conditions of the original lease to make them consistent with the modified lease. Before a lease is modified under paragraph (a) or (b) of this section, the lessee shall file his written acceptance of the conditions imposed in the modified lease and the written consent of the surety under the bond covering the original lease to the modification of the lease and to extension of the bond to cover the additional land.

17. A new Subpart, 3525, is added to Title 43 CFR as follows:

Subpart 3525—Energy Minerals Activity Recommendation System (EMARS)

Sec.
3525.1 Authority.
3525.2 Objectives and policy.
3525.3 Competitive leases: procedures.
3525.4 Qualified applicants.
3525.5 Lands subject to leasing.
3525.6 Special leasing opportunities.
3525.7 Deferred bonus payment policy.
3525.8 Request for information on areas of interest.
3525.9 Applications: short-term sales.
3525.10 Preliminary data.
3525.11 Land-use plans.
3525.12 Land-use plans: availability.
3525.13 Consent to leasing: Federal surface managing agency.
3525.14 Consultation with Governors.
3525.15 Notice of lease sale.
3525.16 Consultation with Attorney General.
3525.17 Award of leases.
3525.18 Compliance with Notice of Competitive Lease Offer.
3525.19 Procedures and public participation.

Subpart 3525—Energy Minerals Activity Recommendation System (EMARS)

§ 3525.1 Authority.

(a) *Acts.* (1) The Act of February 25, 1920, 41 Stat. 437, as amended by the Act of June 3, 1948, 62 Stat. 248, the Act of September 9, 1959, 73 Stat. 490, the Act of August 31, 1964, 78 Stat. 710, and the Act of August 4, 1976, 90 Stat. 1083, 30 U.S.C. 201(a).

(2) The Act of August 7, 1947, 61 Stat. 913, and the Act of August 4, 1976, 90 Stat. 1090, 30 U.S.C. 352.

(b) *Actions Authorized.* The Secretary may issue coal leases through competitive bidding.

§ 3525.2 Objectives and policy.

(a) The objectives of the Department's coal leasing process called Energy Minerals Activity Recommendation System (EMARS), include: the orderly and timely development of federally-owned coal; appropriate uses of the resources; effective environmental protection; and a fair market return to the public for the resources sold. The program consists of three principal elements: nominations; multiple resource land-use planning; and environmental analysis. Nominations provide the first indication of tracts which should or should not be leased. The nominations received are then compared with resource values through the Bureau's land-use planning process, including Management Framework Plans. From these phases, proposed tract recommendations will be made and environmental analyses will be undertaken on the proposed coal lease tracts. The integration of these three elements, i.e., nominations, multiple resource land-use planning, and environmental analysis—each of which will be undertaken with State and public participation—will produce specific coal lease recommendations for Secretarial decision.

(b) It is the policy of the Department to encourage the development of Federally-owned coal, where such development is authorized, through a program that will provide for the protection, orderly development and conservation of Federal mineral and nonmineral resources in a manner that will avoid, minimize or correct adverse impacts on society and the environment resulting from coal development, without undue duplication or administrative delay by Federal officers. It is also the policy of the Department to issue leases for coal only where reclamation of the affected lands to the standards set forth in 43 CFR Part 3040 is attainable and assured and a reclamation program will be undertaken as contemporaneously as practicable with operations.

§ 3525.3 Competitive leases: Procedures.

(a) *Establishment of leasing tracts.* General coal land or deposits shall be divided into suitable leasing tracts and leased competitively. The Energy Minerals Activity Recommendation System (EMARS) shall be used to identify tracts suitable for leasing through nominations and multiple-use land management planning. All competitive lease sales, except those that qualify under the short-term leasing criteria, will be on Bureau motion.

(b) *Selection of proposed tracts.* (1) *Bureau Motion.* Proposed tracts will be selected by the Bureau of Land Management and United States Geological Survey field offices, with participation from affected State governments, and other surface management agencies, if other than the Bureau of Land Management, based upon relevant information including information from the ap-

propriate land-use plan, from nominations and from competitive coal lease applications on file.

(2) *Selection of Proposed Tracts: Short-term Sale.* Proposed tracts for short-term sales will be selected using the same criteria as Bureau motion tracts. Prior to selecting a proposed short-term tract the Bureau must determine that the application meets the short-term leasing criteria.

(3) No lands may be included in a proposed tract unless: (i) the land is included in a completed land-use plan and leasing is compatible with the plan; (ii) the lands have been included in a known recoverable coal resource area (KRCRA);

(iii) the lands have been identified by BLM as potential leasing tracts or included in a short-term lease application.

(4) *Tract Selection Factors.* The selection of proposed lease tracts will include consideration of such factors as: depth, quality, thickness and extent of the coal resource; water resource availability; relationship to existing communities: potential impacts on economic structure (e.g., employment, available services, etc.); service and access corridors; aesthetic qualities such as scenic, cultural, Wildlife, and vegetative values; rehabilitation potential and Coal Resources Regulations Guideline No. 1 (41 FR 43722).

(c) *Compliance with NEPA.* The National Environmental Policy Act will be complied with as follows: If several proposed leasing units have significant related characteristics and would sustain similar or related environmental impacts, as determined by the Secretary, they may be covered by a single regional environmental impact statement. Where leasing actions are adequately covered in a regional impact statement, no additional impact statement need be prepared. A public hearing will be held after publication of a draft regional environmental assessment or an impact statement, as appropriate, will be prepared for proposed leasing actions not included in a regional impact statement. The Department will provide public notice and an opportunity for a public meeting on an environmental assessment for a coal leasing proposal that indicates that an environmental impact statement is not required.

(d) *Technical examinations.* A technical examination in accordance with the procedures in 43 CFR 3041.2 and 3041.2–1 will be completed on each unit after completion of the final environmental impact statement or environmental analysis to identify specific reclamation requirements and tracts requiring special environmental consideration and to prepare bonding requirements and stipulations to minimize impacts upon-the environment and other resources, lands uses, or programs. Reclamation requirements will be imposed in accordance with 43 CFR 3041. The technical examination will include an evaluation of the proposed leasing unit to balance the value of the coal against the cost of mining, the cost of mitigation of environmental damage, and the significance of unmitigable damages. The Bureau will obtain from the Geological Survey an evaluation and comparison of the effects of recovering coal by deep mining, by surface mining, and by other methods to determine which method or methods achieves the maximum economic recovery of the proposed tract.

(e) *Recommendation of tentative coal lease tracts.* (1) After the BLM has completed the actions required by paragraphs (a)–(e) of this section, after State government and surface management agency consultation, and after holding a public hearing, on the record, in the area which may be affected by the proposed coal lease sale, the State Director will recommend suitable tentative coal lease tracts to the Director. The Director will consolidate approved field recommendations into a proposed Coal Lease Sale Schedule for review and approval by the Secretary.

(2) The Director's recommendation, and the Secretary's final approval, shall include a written synopsis of earlier analyses which evaluates and compares:

(i) The effects of recovering coal by deep mining, by surface mining and by any other method to determine which method or methods or sequence of methods achieves the maximum economic recovery of the coal within the proposed leasing tract, and

(ii) The effects which mining the proposed lease might have on an impacted community or area, including impacts on the environment, on agriculture and other activities, and on public services.

§ 3525.4 Qualified applicants.

Leases may be issued to qualified applicants listed in Subpart 3502 of this chapter unless:

(a) The qualified applicant, or any subsidiary, affiliate, or person controlled by or under the common control of the qualified applicant holds a lease or leases to coal deposits issued by the United States and has held the lease for 10 years and is not producing coal in commercial quantities.

Exceptions. A lessee is not disqualified from holding a lease if either production is interrupted by strikes, the elements, or casualties not attributable to the lessee, or the Secretary has suspended the requirement of continued operation upon payment of advance royalties.

(1) The 10-year period referred to in paragraph (a) of this section shall begin on August 4, 1976, or the date the lease is issued, whichever is later.

(2) For the purpose of this paragraph, production of coal in commercial quantities means production adequate to meet the requirement for continuous operation as defined in § 3500.0–5(g) of this chapter.

(b) The qualified applicant holds or controls more than 46,080 acres of Federal coal leases in any one state or 100,000 acres of Federal coal leases in the entire United States.

§ 3525.5 Lands subject to leasing.

(a) The Secretary may issue coal leases on all lands owned by the United States except lands in the:

(1) National Park System;

(2) National Wildlife Refuge System;

(3) National Wilderness Preservation System;

(4) National System of Trails;

(5) Wild and Scenic Rivers System, including study rivers designated under section 5(a) of the Wild and Scenic Rivers Act;

(6) Incorporated cities, towns and villages; and

(7) Tide lands, submerged coastal lands within the Continental Shelf adjacent or littoral to any part of land within the jurisdiction of the United States.

(8) Lands acquired by the United States for the development of mineral deposits, for foreclosure or otherwise for resale, or reported as surplus property pursuant to the provisions of the Surplus Property Act of 1944.

(b) (1) The Secretary may issue coal leases with the consent of the Secretary of Defense on acquired lands set apart for military or naval purposes only if the leases are issued to a governmental entity, including any corporation primarily acting as an agency or instrumentality of a State, which

(i) Produces electrical energy for sale to the public; and

(ii) Is located in the State in which the leased lands are located.

(2) A government entity is located in a State if its production facilities are in that State, and the coal produced from the lease will be used in the State.

(c) The regulations in Subpart 3525 of Title 43 CFR do not apply to the leasing and development of coal deposits owned by Indians and subject to the trust protection of the United States. Regulations governing those deposits are found in 25 CFR Chapter I.

§ 3525.6 Special leasing opportunities.

(a) The Secretary shall, under the procedures established under this subpart, reserve and offer a reasonable number of coal lease tracts within competitive lease sales each year as special leasing opportunities. Except for the limitation on bidding contained in paragraph (b) of this section, all of the requirements of this subpart apply to special leasing opportunities including the requirement that the coal be leased at its fair-market value.

(b) Only public bodies, including Federal agencies, rural electric cooperatives, or non-profit corporations controlled by any of these entities which have a definite plan to produce energy for their own use or for sale of their members or customers will be eligible to bid for leases designated as special leasing opportunities. Evidence of qualification to bid for leases designated as special leasing opportunities must be filed with the Department at least 60 days prior to a sale.

(c) The Secretary may designate certain coal lease tracts as special leasing opportunities only if a public body has requested, in the nomination or elsewhere, that the procedures of this section apply.

(d) Leases issued under this Section may be assigned only to another public body.

§ 3525.7 Deferred Bonus Payment Policy.

All competitive coal lease sales shall be held on a deferred bonus payment basis. In a deferred bonus payment the lessee shall pay the bonus payment in five (5) equal installments: The first installment shall be made as required by § 3525. The balance shall be paid in equal annual installments due and payable on the first four anniversary dates of the lease. If a lease is relinquished or otherwise terminated, the unpaid remainder of the bid shall be immediately payable to the United States.

§ 3525.8 Request for information on areas of interest.

(a) *Purpose.* This section establishes a procedure by which industry, the general public, and State and local governments can inform the Department of the Interior of their views on coal leasing in particular areas. The Department will incorporate the information it receives into its internal planning processes for Federal coal leasing tract selections. Except for short-term leasing applications, nominations are the primary source of information on the need for additional coal leasing.

(b) *Description of process.* The Director will request information on an annual basis, or as necessary. Any person may file with the Bureau, a statement with supporting information, asking the Director to make a request for nominations. The Bureau is not required to act on the statement. The Request for Information on Areas of Interest will consist of two types.

(1) *Industry nominations.* Nominations from industry of tracts of land that the Department should or should not make available for coal leasing including, as appropriate, statements describing why the tracts should or should not be leased.

(2) *Areas of public concern.* Concurrently with Industry Nominations, State and local governments and the general public are requested to submit Areas of Public Concern covering tracts of land that the Department should or should not make available for coal leasing including, as appropriate, statements describing why the tracts should or should not be leased.

(c) *Use of nominations.* Information obtained through the nominations process will be analyzed and compared with multiple resource opportunities identified in the land-use planning process. Proposed coal lease tracts will then be developed on the basis of nominations and multiple resource information.

(d) *Description of nominations.* All nominations or statements of information for or opposed to leasing shall: (1) (i) Describe the lands by legal subdivisions, section, township, and range; or in the case of land covered only by protracted surveys, by section, township, and range according to an approved protraction diagram; or

(ii) Use the Bureau of Land Management's Surface/Minerals Management Quads (minerals ownership maps) to indicate nominated areas. A readily discernible line on these maps conforming to legal subdivision and section lines will be accepted as the description required in paragraph (d)(1)(i) of this section. The maps are available for sale at BLM State and most District Offices.

(2) Describe reasonably compact areas, which will be assumed to include all Federal coal within the boundaries described, and may not exceed 25,000 acres.

(e) *Multiple nominations.* If a person submits two or more nominations for leasing or two or more nominations against leasing, choices shall be ranked in order of importance and shall be numbered consecutively. Nominations should be ranked on a nationwide basis.

(f) *Inspection and copying.* The procedures in 43 CFR Part 2 govern the public inspection and copying of information submitted under this section.

(g) *Notice of requests for nominations on areas of interest.* (1) Notice of each Request for Information on Areas of Interest will be published in the FEDERAL REGISTER and in a newspaper(s) of general circulation in the State affected and will specify the area or areas covered by the call, the size and raking of nominations, the period of time within which to submit nominations, and the addresses to which the nominations are to be submitted.

(2) *Lands Eligible for Nominations.* Nominations will be accepted only for those lands that are eligible for coal leasing. Lands not subject to leasing include (i) lands listed in § 3525.5; (ii) lands withdrawn from coal leasing or otherwise not subject to the provisions of the Mineral Leasing Act; (iii) land subject to a coal lease, permit or preference right lease application; and (iv) areas designated by BLM as primitive areas.

(h) *Areas nominated in national forest system.* The authorized officer will notify the Secretary of Agriculture of all lands nominated for leasing that are in the National Forest System.

(i) *Meeting on Nominations.* Prior to the selection of proposed tracts, the Bureau will hold a public meeting on nominations if the public has not had an opportunity to comment on the nominations in the land-use planning process.

§ 3525.9 Applications: Short-term sales.

Applications for coal leases will be accepted only if the applicant shows that (a) the coal is needed to maintain an existing mining operation, or (b) the coal is needed as a reserve for production in the near future.

§ 3525.10 Preliminary data.

(a) Any application for coal lease filed pursuant to the regulations in this Chapter shall contain preliminary data to assist the authorized officer in making a technical evaluation and environmental analysis as described in § 3041.2.

(b) Such preliminary data shall include: (1) Such map, or maps, as may be available from State or Federal sources, on which shall be shown the topography of the land applied for, and on which the applicant shall show physical features and natural drainage patterns and existing roads, vehicular trails, and utility systems; the location of any proposed exploration operations, including seismic lines, drill holes, to the extent known, the location of any proposed mining operations and facilities, trenches, access roads or trails, and support facilities incidental thereto, including the approximate location and aerial extent of the areas to be used for pits, overburden, and tailings; and the location of water sources or other resources which may be used in the proposed operations or facilities incidental thereto.

(2) A narrative statement, including:

(i) The anticipated scope, method, and schedule of exploration operations, including the types of exploration equipment to be used.

(ii) The method of mining anticipated, including the best available estimate of the mining sequence and production rate to be followed.

(iii) The relationship, if any, between the mining operations anticipated on the lands applied for and existing or planned mining operations, or facilities incidental thereto, on adjacent Federal or non-Federal lands.

(iv) A brief description, including suitable maps or aerial photographs as appropriate, of the existing land use within and adjacent to the lands applied for; and of known geologic, visual, cultural, or archaeological features; and the known habitat of fish and wildlife, particularly threatened and endangered species, that may be affected by the proposed or reasonably anticipated exploration or mining operations.

(v) A brief description of the proposed measures to be taken to maximize control, or prevent fire, soil erosion, pollution of surface and ground water, damage to fish and wildlife or other natural resources, air and noise pollution, and hazards to public health and safety; to reclaim the surface; and to otherwise meet applicable laws and regulations, which the applicant wishes to have considered by the authorized officer.

(c) The applicant shall not enter upon the land for any operational purpose, except for casual use, without prior authorization. Casual use, as used in this section, means activities which do not cause significant surface disturbance or damage to lands, resources, and improvements, such as activities which do not include (1) the use of heavy equipment or explosives, or (2) vehicular movement off established roads and trails which causes such disturbance.

(d) The authorized officer, after reviewing the preliminary data contained in an application, and at any time during a technical examination and environmental analysis, may request additional information from the applicant.

§ 3525.11 Land-use plans.

(a) *Preparation of a land-use plan.* The Secretary may not issue a lease for coal deposits unless the lands containing coal deposits have been included in a comprehensive land-use plan and the sale is compatible with the plan. A comprehensive land-use plan shall:

(1) Use and observe the principles of multiple use and sustained yield set forth in the Federal Land Policy and Management Act of 1976;

(2) Use a systematic interdisciplinary approach to achieve integrated consideration of physical, biological, economic, and other sciences;

(3) Give priority to the designation and protection of areas of critical environmental concern;

(4) Rely, to the extent it is available, on the inventory of the public lands, their resources, and other values;

(5) Consider present and potential uses of the public lands;

(6) Consider the relative scarcity of the values involved and the availability of alternative means (including recycling) and sites for realization of those values;

(7) Weigh long-term benefits to the public against short-term benefits;

(8) Provide for compliance with applicable pollution control laws, including State and Federal air, water, noise, or other pollution standards or implementation plans; and

(9) Assess the amount of coal deposits contained in the land and shall, based on available information, identify the amount of coal that is recoverable by deep mining operations and the amount that is recoverable by surface mining operations.

(b) *Agency to prepare land-use plans.* (1) The Bureau of Land Management will prepare plans for land under its jurisdiction in accordance with its procedures.

(2) The Department of Agriculture and other federal agencies with jurisdiction over lands where there is interest in coal mining will prepare land-use plans for those lands.

(3) If the Secretary finds that because of non-Federal interest in the surface, or because the coal resources are insufficient to justify the costs of a Federal comprehensive land use-plan, in an area, he may lease lands in that area if the lands containing the coal deposits have been included in either a comprehensive land-use plan prepared by the State within which the lands are located, or a land-use analysis prepared by the Secretary of the Interior.

(c) *Consultation and public hearing.* A plan will not be adequate for the purposes of this section unless the agency that prepares the plan has:

(1) Consulted appropriate State and local governments and the general public during the preparation of a plan; and

(2) Provided an opportunity for a public hearing on a proposed plan prior to its adoption if requested by any person who may be adversely affected by the adoption of the plan.

(d) *Hearing Requirements.* The agency that conducts the hearing shall: (1) Publish a notice of the hearing in a newspaper of general circulation at least once in each of two consecutive weeks in the affected geographical area;

(2) Provide an opportunity for testimony by anyone who desires to do so;

(3) Compile a complete transcript of the hearing if a request for a transcript is filed, in writing, at least 10 days prior to the hearing;

(4) Plans adopted prior to August 9, 1976 will be considered adequate if the public had an adequate opportunity to comment on the plan prior to its adoption, even if a formal hearing was not held.

§ 3525.12 Land-use plans: availability.

The Bureau's land-use plan and multiple land-use management plans of other Federal agencies, as appropriate, will be available for inspection at the appropriate Bureau or agency office. Upon the request of the Governor of a State affected by coal lease actions, the State Director will make available for his review the land-use plans for that State, and, as appropriate, adjacent States.

§ 3525.13 Consent to leasing: Federal surface managing agency.

(a) The Secretary may not issue leases for lands the surface of which is under the jurisdiction of any agency other than the Department of the Interior unless the Federal agency has consented to the issuance of the lease, but any lease shall contain terms and conditions as the head of the agency may prescribe for the use and protection of the nonmineral interests in those lands.

(b) The Secretary must accept the conditions prescribed by the surface managing agency, but may prescribe additional terms and conditions that are consistant with the terms proposed by the surface managing agency to protect the interests of the United States and to safeguard the public welfare.

§ 3525.14 Consultation with Governors.

(a) *General consultation.* Prior to offering a coal lease for competitive sale, the Secretary shall consult the Governor of the State in which the land to be leased is located.

(b) *Consultation for surface mining proposals in national forest.* (1) Prior to offering a coal lease in a National Forest where the method of mining which achieves maximum economic recovery of the coal resources is surface mining, the Secretary shall submit the lease proposal to the Governor of the State in which the coal deposits are found.

(2) The Secretary may not issue a lease in a National Forest for a lease which the method of mining that achieves maximum economic recovery is surface mining until at least 60 days after he notifies the Governor of the lease proposal.

(3) If the Governor fails to object to the lease proposal in 60 days, the Secretary may issue the lease. If within the sixty-day period the Governor notifies the Secretary, in writing, that he objects to the lease proposal, the Secretary may not approve the lease for six months from the date the Governor objects to the lease.

(4) The Governor may, during this six-month period, submit a written statement of reasons why the lease should not be issued, and the Secretary shall, on the basis of this statement, reconsider the lease proposal.

§ 3525.15 Notice of lease sale.

(g) *Notice of lease sale.* (1) Publication. Prior to the lease sale, the Authorized Officer shall publish in the FEDERAL REGISTER and in a newspaper(s) of general circulation in the county affected by the sale a notice of the proposed sale. The newspaper notice shall be published once a week for three consecutive weeks.

(2) The notice will show the time and place of sale whether the sale will be at public auction or by sealed bids, the description of the land, and the place where a detailed statement of the terms and conditions of the lease offer and the obligations of the successful bidder to pay for publication of that notice may be obtained.

(3) It will also contain a statement that sealed bids may not be modified or withdrawn unless the modifications or withdrawals are received prior to the time fixed for opening of the bids.

(4) The detailed statement will set forth the terms and conditions of the sale, including the manner in which the bids may be submitted.

(5) The detailed statement will also contain a warning to all bidders against violation of 18 U.S.C. 1860, which prohibits unlawful combination or intimidation of bidders.

(6) The detailed statement will specify that the Government reserves the right to reject any and all bids. If the sale is by public auction, the statement of terms and conditions of the sale will also specify that sealed bids may be submitted. If any bid be rejected, the deposit will be returned.

(7) The detailed statement will also contain a request for comments on the fair market value of the tracts to be sold. The notice shall state the address to where the comments on fair market value should be submitted.

§ 3525.16 Consultation with Attorney General.

(a) Subsequent to a lease sale, but prior to issuing a lease, the Secretary shall notify the Attorney General of the proposed lease issuance, the proposed lessee, normally the high bidder in a sale, and other relevant information. The Secretary may not issue a lease until 30 days after he notifies the Attorney General.

(b) The Secretary shall not issue the lease to the proposed lessee if, during this 30-day period, the Attorney General notifies the Secretary that the proposed lease issuance would create or maintain a situation inconsistent with the antitrust laws, which means:

(1) The Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890 (15 U.S.C. 1 et seq.), as amended;

(2) The Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914 (15 U.S.C., et seq.), as amended;

(3) The Federal Trade Commission Act (15 U.S.C. 41, et seq.), as amended;

(4) Sections 73 and 74 of the Act entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes," approved August 27, 1894 (15 U.S.C. 8 and 9), as amended; or

(5) The Act of June 19, 1936, chapter 592 (15 U.S.C. 13, 13a, 13b, and 21a)."

(c) If the Attorney General notifies the Secretary that a lease should not be issued the Secretary may:

(1) Reject all other bids or may request the Attorney General in accordance with paragraph (a) of this section to consider the issuance of the proposed lease to the next qualified high bidder; or

(2) Issue the lease if, after he conducts a public hearing on the record in accordance with the Administrative Procedures Act, he determines that: (i) Issuance of the lease is necessary to carry out the purposes of the Federal Coal Leasing Amendments Act of 1975; (ii) Issuance of the lease is consistent with the public interest; and (iii) There are no reasonable alternatives to the issuance of the lease that are consistent with the Federal Coal Leasing Amendments Act of 1975, the antitrust laws and the public interest.

(d) If the Attorney General does not give a written reply to the notification in paragraph (a) of this section within 30 days, the Secretary may issue a lease without waiting for the advice of the Attorney General.

§ 3525.17 Award of leases.

(a) *Pre-sale evaluation.* Before the lease sale, the U.S. Geological Survey, considering public comments on fair market value and available geotechnical, engineering and economic data, shall make a coal resource economic evaluation of each tract to be sold and shall submit it to the authorized officer.

(b) *Notification of award.* Bids will be received only until the hour on the date specified in the notice of competitive leasing. All bids submitted after the hour will be rejected. The authorized officer will read all sealed bids. If the procedure calls for sealed bids followed by oral bids the oral bidding will begin at the level of the highest sealed bid received. After the oral bidding has ceased, the highest bid will be announced. The high bidder will be required to comply with 43 CFR § 3421.2–4 and 43 CFR § 3521.4–2. No decision to accept or reject any bid will be made at this time. The sale will be adjourned and the sale panel will convene to determine if the bid adequately reflects fair market value considering, among other factors, comments on fair market value. The recommendations of the panel will be sent to the authorized officer who, after the Department complies with § 3525.17 of this subpart, will make the final decision to accept a bid or reject all bids, as soon as possible after the sale date. The successful bidder will be notified in writing. The Department reserves the right to reject any and all bids but will not accept any bids which are less than the fair market value of the tract. The Department also reserves the right to offer a lease to the second high bidder if the successful bidder fails to execute the lease.

(c) *Intertract competition.* The use of bidding competition between tracts (intertract bidding) is hereby authorized when and if the Bureau of Land Management and the U.S. Geological Survey determine it is needed in the public interest. The authorization to utilize intertract competition does not preclude the use of any other form of competitive bidding procedure.

§ 3525.18 Compliance with notice of competitive lease offer.

(a) *Action by successful bidder.* Four copies of the lease will be sent to the successful bidder, who will be required not later than the 30th day after his receipt thereof, to execute them, pay the balance of the bonus bid or the first payment of the deferred bonus payment on the first year's rental, and file a bond as required by Subpart 3504.

(b) *Death of bidder.* If the bidder dies before the lease is issued, there must be compliance with § 3502.8 of this chapter.

§ 3525.19 Procedures and public participation.

(a) *Written findings.* Except as may be otherwise expressly set forth in this subpart, decisions and determinations of any appropriate authorized officer acting pursuant to this subpart with respect to issuance of leases, shall be in writing, shall set forth with reasonable specificity the facts and the rationale upon which such decisions or determinations are based, and shall be available for public inspection during normal business hours at the offices of such officer.

(b) *Availability of documents.* Except for documents which are subject to withholding under the Freedom of Information Act, any application for a lease, together with the proposed terms, conditions, and special stipulations and any preliminary data submitted under this subpart shall be available for public inspection in the appropriate BLM office. To allow for such public inspection, a notice of the availability of any such documents shall be prepared by the appropriate officer of the BLM and promptly posted at his office and mailed to the surface owner, if other than the United States, to appropriate Federal and State agencies, and to the clerk or other appropriate officer in the county in which the proposed operation is located for posting or publication in accordance with the procedures of that office. No final action with respect to such documents shall be taken for a period of 30 days after such posting and mailing. A copy of such notice shall be published by the applicant in a local newspaper of general circulation in the locality of the proposed operation at least once a week for four consecutive weeks.

(c) Where a hearing under this subpart has been held on the record, a complete transcript, of the hearing, including any written comments submitted for the record, shall be kept and maintained available to the public during normal business hours at the appropriate Federal office under whose auspices such meeting is conducted, and shall be furnished at cost to any interested party.

Dated: January 18, 1977.

THOMAS S. KLEPPE,
Secretary
Department of the Interior

[FR Doc 77 2256 Filed 1-24-77;8:45 am]

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

PART 3500—LEASING OF MINERALS OTHER THAN OIL AND GAS; GENERAL

PART 9230—TRESPASS

Exploration Licenses for Federally-Owned Coal Deposits

These regulations provide for the issuance of licenses to explore Federally-owned coal deposits subject to lease pursuant to 43 CFR Part 3500.

Section 4 of the Federal Coal Leasing Amendments Act of 1975 (Pub. L. 94–377, 90 Stat. 1039) amended section 2(b) of the Mineral Leasing Act of 1920 (30 U.S.C. 201(b)) to provide for the issuance of exploration licenses for federally-owned coal. In November 5, 1976, the Department published a notice of proposed rulemaking to implement section 4 of the new Act, 41 F.R. 48754. Comments have been received and carefully considered, and the regulations are included in this notice as a final rulemaking.

The most significant change to be made since the regulations were published in draft is in the section controlling the submission and treatment of data collected during exploration, 43 CFR § 3507.4. The statute requires the Department to treat data as confidential until the applicable land is leased or until disclosure would not damage the competitive position of the licensee, whichever is sooner. The proposed regulations repeated this requirement but limited the period of confidentiality to five years. Several commentators stated that if land was not leased within five years, the competitive position of a licensee would usually be damaged. For this reason, the five-year limitation has been deleted.

Other commentators expressed concern with the same section because it provides that only "resource data" (data relating primarily to coal deposits) as opposed to environmental data would be treated as confidential. However, the statute does not make this distinction in requiring "all data" to be treated as confidential. Accordingly, the section has been amended to eliminate the distinction and follow the wording of the statute more closely. The Department points out that in most cases the disclosure to the public of environmental information would not damage the competitive position of a licensee and, as

permitted by the statute, it will be disclosed when that finding is made.

Many comments were received in response to § 3507.3–1(d) of the proposal, which provides for participation in exploration licenses. Many commentators urged that the subsection be deleted because the requirement to explore jointly with others would reduce the incentive to explore. Nevertheless, the Department has decided not to delete the subsection. If parties are induced to group together, fewer exploration programs are apt to be conducted in any single area and any toll on the environment is therefore apt to be less.

Many commentators urged that 43 CFR § 3507.3–2(b) be modified so as to allow for an extension of the term of a license beyond two years. The Department believes that this suggested change would conflict with a provision in the statute that limits the term of a license to "not more than two years." There is no authority in the statute to extend that 2-year term. Accordingly, the Department has not modified the subsection as suggested. It should be noted that the provision for issuance of another license covering the same land at the end of the initial license's 2-year term serves the same purpose as an extension.

There was some concern expressed over the restrictive interpretation of "substantial disturbance" and "reasonable amounts" found in 43 CFR §§ 3507.0–5(j), 3507.0–5(k), and 3507.3–3(c). It is the Department's position that the statute is intended to allow exploration of coal deposits "without substantial disturbance to the natural land surface." So-called "test burns," involving the extraction of several thousand tons of coal, would be outside the scope of the statute. Accordingly, these provisions have not been changed

Two commentators suggested that land subject to outstanding prospecting permits or preference right lease applications be excluded from exploration activities. The statute does not provide for this limitation; it prohibits only the issuance of exploration licenses for lands for which coal leases have been issued. While no amendment has been made, however, the Department points out that if lands subject to a license are leased, those lands shall thereafter be excluded from the license.

Some commentators objected to 43 CFR § 3507.3–6 of the proposed regulations which provides that a licensee may be required to collect and submit ground water data to the authorized officer. The objections were based on a feeling that the collection of hydrologic data might be costly and beyond the scope of an exploration program. The Department feels that hydrologic data often provides valuable environmental information that can bear on the advisability of opening an area for coal leasing. For this reason, it is not considered to be beyond the scope of an exploration program. The Department has therefore not modified this section of the regulations.

On the basis of the foregoing:

1. 43 CFR Part 3500 be amended by adding a new Subpart 3507 to read as follows:

Subpart 3507—Coal Exploration Licenses

Sec.

3507.0–1 Purpose.
3507.0–2 Objective.
3507.0–3 Authority.
3507.0–4 Responsibilities.
3507.0–5 Definitions.
3507.1 Lands subject to exploration license.
3507.2 Prelicensing procedures.
3507.2–1 Environmental review.
3507.2–2 Cultural resources.
3507.2–3 Threatened or endangered species.
3507.2–4 Surface management agency.
3507.3 Licenses.
3507.3–1 Applications for license.
3507.3–2 Issuance and termination of license.
3507.3–3 Rights under license.
3507.3–4 Operating regulations.
3507.3–5 Surface protection and reclamation.
3507.3–6 Ground water data.
3507.3–7 Bonds.
3507.4 Use of data.
3507.5 Use of surface.

Subpart 3507—Coal Exploration Licenses

§ 3507.0–1 Purpose.

This subpart provides for the issuance of licenses for exploring federally-owned coal deposits subject to disposal pursuant to this Part 3500, regardless of surface ownership.

§ 3507.0–2 Objective.

The objective of this subpart is to allow private parties to explore federally-owned coal deposits in order to obtain geological, environmental, and other pertinent data concerning the deposits and the lands in which they lie.

§ 3507.0–3 Authority.

The authority for this subpart is found in section 2(b) of the Mineral Leasing Act of February 25, 1920, as amended by section 4 of the Federal Coal Leasing Amendments Act of 1975, 90 Stat. 1083, 1085, 30 U.S.C. 201(b).

§ 3507.0–4 Responsibilities.

(a) The Bureau of Land Management (BLM) exercises at the Bureau level the Secretary's discretionary authority to determine whether exploration licenses are to be issued, and is responsible for issuing and cancelling exploration licenses and terminating the period of liability of bonds. The regulations in this Subpart shall be administered by the Director through the State Director and the authorized officer, subject to the supervisory authority of the Secretary. The proper BLM office is also the office of record.

(b) The Geological Survey exercises the Secretary's authority regarding operations conducted within the area of operations by the licensee, and is responsible for all geological, economic, and engineering determinations for the Department's coal leasing program.

(c) The authorized officer in consultation with the Geological Survey, and where appropriate, the surface management agency and the surface owner if other than the United States, formulates the requirements to be incorporated in exploration licenses for the protection of the surface resources, for reclamation, using as guidelines the surface operating and reclamation performance standards in Subpart 3041 of this chapter and 30 CFR Part 211, and for the bonding requirements.

(d) The Geological Survey, after consultation with the authorized officer, and where appropriate, the surface management agency and the surface owner, if other than the United States, reviews and concurs in exploration plans and recommends termination of the period liability of the bond upon the completion of exploration operations.

§ 3507.0–5 Definitions.

(a) "Coal deposit" means all federally-owned deposits which are subject to disposal under applicable law, except those held in trust for Indians.

(b) "Exploration" means drilling, excavating, and geophysical or geochemical surveying operations designed to obtain detailed data on the physical and chemical characteristics of coal deposits and their environment including the strata above the deposit, the hydrologic conditions associated with the deposit, and any other information that may be necessary to prepare a complete resource evaluation of the land.

(c) "Surface management agency" means the Federal ageny or authorized officer thereof other than the Bureau of Land Management having jurisdiction over the surface of lands containing coal deposits subject to this part.

(d) "Exploration plan" means a detailed plan showing the location and type of exploration work to be conducted, environmental protection procedures, present and proposed roads, as well as reclamation and abandonment procedures to be followed upon completion of such operations.

(e) "Exploration license" means a license issued by the authorized officer to permit the exploration of federally-owned coal deposits under terms and conditions that will protect the surface and subsurface resources and the environment, and provide for the reclamation of any damage caused by such exploration.

(f) "Participate" means to have or take part or share with others in an exploration license.

(g) "Participant" means a person who participates or shares in an exploration license.

(h) "Reasonable amount of coal for analysis and study" means only that amount of coal necessary to establish whether or not a federally owned deposit can be economically extracted and the removal of which does not cause substantial disturbance to the natural land surface.

(i) "Substantial disturbance to the natural land surface" means disturbance of the surface other than that necessary for the mere location of potential coal deposits and for the access to those deposits necessary to determine their location and quality by operations such as surface sampling or drilling geologic study and exploration holes. These operations shall extend only to the degree and extent necessary to determine the nature of the overlying strata and the depth, thickness, shape, grade, and quality of the coal deposit.

§ 3507.1 Lands subject to exploration license.

(a) Exploration licenses may be issued for:

(1) Lands administered by the Secretary subject to coal leasing;

(2) National forest lands or other lands administered by the Secretary of Agriculture through the Forest Service subject to coal leasing;

(3) Coal deposits in lands which have been conveyed by the United States subject to a reservation to the United States or mineral deposits, to the extent that those deposits are subject to lease pursuant to this Part 3500; and

(4) Coal or lignite deposits in acquired lands set apart for military or naval purposes.

(b) No exploration license will be issued for any land on which a coal lease has been issued.

§ 3507.2 Prelicensing procedures.

§ 3507.2–1 Environmental review.

Before the issuance of an exploration license:

(a) The authorized officer or, where the surface is not administered by BLM, the surface management agency shall, in accordance with 43 CFR §§ 3041.2 and 3041.2–1 and using the exploration plan submitted by the applicant, make an environmental analysis and technical examination of the potential effect of such exploration on the resources of the area and its environment, including fish and other aquatic resources, wildlife habitats and populations, visual resources, recreation, cultural, and other resources in the affected area. The applicant shall not begin exploration until an environmental analysis is accomplished and the exploration plan has been approved.

(b) If the authorized officer or, where the surface is not administered by BLM, the surface management agency determines that an environmental impact statement is required by the National Environmental Policy Act of 1969 (43 U.S.C. 4321–4327), he will take necessary steps to prepare such a statement.

§ 3507.2–2 Cultural resources.

If lands in the National Register or nominated for inclusion in the National Register contain cultural resources which might be affected by the issuance of an exploration license, no license for such lands will be authorized until there has been compliance with Section 106 of the Historic Preservation Act (80 Stat. 917; 16 U.S.C. 470f) and Section 2(b) of E.O. 11593 of May 13, 1971, (36 FR 8921 (16 U.S.C. 470 fn)).

§ 3507.2–3 Threatened or endangered species.

The authorized officer shall not issue an exploration license if he determines pursuant to the Act of December 28, 1973 (87 Stat. 884, 16 U.S.C. 1531–1543) that the existence of any threatened or endangered species of fauna or flora will be jeopardized and that critical habitat would be destroyed or adversely modified to a significant degree by the exploration activities authorized by that license. In making this determination, the authorized officer shall consult the surface management agency, if the surface is not managed by BLM.

§ 3507.2–4 Surface management agency.

The authorized officer shall issue an exploration license covering lands the surface of which is under the jurisdiction of any Federal agency other than the Bureau of Land Management only upon such conditions as the surface management agency may prescribe with respect to the use and protection of the nonmineral interests in those lands.

§ 3507.3 Licenses.

§ 3507.3–1 Applications for license.

(a) *Applications.* Exploration license applications shall be submitted to the authorized officer and shall be subject to the following requirements:

(1) No specified form of application is required.

(2) Each application shall identify the tract or tracts to be explored described by legal description (or, if unavailable, by metes and bounds).

(3) Each application shall contain three copies of an exploration plan which complies with the requirements of 30 CFR 211.10.

(4) Each application with supporting documents shall be filed in the proper BLM Office, together with a nonrefundable $250 license fee.

(5) A separate application shall be filed for exploration in each State.

(b) *Qualified persons.* Any person qualified to hold leases or contracts issued pursuant to this Part 3500 may apply for an exploration license.

(c) *Call for applications.* Nothing in this subpart shall preclude the authorized officer from issuing a call for an expression of interest in exploration licenses for a given area.

(d) *Participation.* Applicants for licenses shall be required, after approval of the plan and prior to issuance, to afford other parties an opportunity, on a pro rata cost sharing basis, to participate in the approved exploration plan. Upon notice that a license will be issued to him an applicant must publish a "Notice of Invitation," approved by the authorized officer, once every week for four consecutive weeks in at least one newspaper of general circulation in the area where the lands covered by the license application are situated. This notice must contain an invitation to the public to participate in the proposed exploration program. Copies of published Notices of Invitation must be filed with the authorized officer upon each publication for posting in the proper BLM Office. Any person who elects to participate in the exploration programs shall notify in writing the authorized officer and the applicant. Upon the applicant's compliance with the requirements of this section, all else being regular, the authorized officer may issue the exploration license.

§ 3507.3–2 Issuance and termination of license.

(a) *General.* No person may conduct exploration without a lease unless he has been issued an exploration license. An exploration license shall not be required for "casual use" as defined in 30 CFR § 211.10(a). The issuance of exploration licenses under this Subpart is discretionary with the authorized officer. An exploration license shall confer no right to a lease.

(b) *Duration.* Exploration licenses may be issued for not more than two years, including the time for clean up and restoration. The authorized officer shall designate the date on which operations may begin.

(c) *Relinquishments.* A licensee may, subject to his own and his surety's continued obligation to comply with the terms and conditions and special stipulations of the license, the plan, and the regulations, relinquish an exploration license for all or any portion of the lands embraced in it. A relinquishment must be filed in the proper BLM Office.

(d) *Revocation.* An exploration license may be revoked for noncompliance with the terms of the license, the plan, or the regulations, after the licensee has been given a notice of violation and the licensee has failed to correct the violations within the period prescribed in the notice.

(e) *Exploration Plan.* The approved exploration plan will be dated, attached, and made a part of each license issued.

(f) *Modifications.* When unforeseen conditions that could result in signficant disturbance or damage are encountered or when geologic or other physical conditions warrant a modification in the approved exploration plan, (1) the authorized officer, after consultation with the Mining Supervisor and, where appropriate, the surface management agency, may adjust the terms and conditions of the license or, (2) the Mining Supervisor, after consultation with the authorized officer, and where appropriate, the surface management agency, may approve changes in the exploration plan.

(g) *Different States.* A separate exploration license is required for exploration in each State.

(h) *Extensions.* Exploration licenses may not be extended. Exploration operations may not be conducted after a license has expired. The licensee may apply for a new license as described in § 3507.3–1. A new license may be issued simultaneously with the termination of the existing license.

§ 3507.3–3 Rights under licenses.

(a) The issuance of an exploration license shall confer the right to perform exploration operations in accordance with the specific terms and conditions of the license, the approved plan, and the regulations.

(b) The issuance of exploration licenses shall not preclude the issuance of

coal leases at such time and places and to such persons as are deemed appropriate, subject to applicable regulations, and, if a coal lease is issued for lands embraced in an exploration license, those lands shall be eliminated from the license upon the effective date of the lease.

(c) A licensee may not remove for sale any coal from the deposits subject to his license, but he may remove a reasonable amount of coal for analysis and study.

§ 3507.3–4 Operating regulations.

The licensee shall comply with all regulations of the Secretary of the Interior, including the provisions of the operating regulations of the Geological Survey (30 CFR Part 211). Copies of the operating regulations may be obtained from the Mining Supervisor. The licensee shall allow inspection of the premises and operations by duly authorized representatives of the Secretary and, where appropriate, any surface management agency, and shall provide for the free ingress and egress of Government officers and persons using the lands under authority of the United States.

§ 3507.3–5 Surface protection and reclamation.

(a) The authorized officer shall include in each exploration license requirements and stipulations to protect the environment and other resources and to ensure reclamation of the land disturbed by exploration.

(b) A licensee may not cause substantial disturbance to the natural land surface.

§ 3507.3–6 Ground water data.

The applicant may be required to collect and report ground water data to the authorized officer.

§ 3507.3–7 Bonds.

(a) The provisions of the regulations in Subpart 3504 of this part are hereby made applicable to these regulations. The holding of an adequate compliance bond will be a condition of the exploration license.

(b) Prior to issuing an exploration license the authorized officer after consultation with the Mining Supervisor and, where appropriate, the surface management agency, the surface owner, shall ensure that the amount of the compliance bond or bonds to be furnished is sufficient to ensure compliance with the terms and conditions of the license and regulations, but in no event shall the amount of such bond be less than $5,000.

(c) Upon completion of an exploration and reclamation program which is in compliance with the terms and conditions of the exploration license, the approved plan, and the regulations, or upon discontinuance of exploration operations and completion of such reclamation as may be needed to the satisfaction of the authorized officer and, where appropriate, the surface management agency, the authorized officer will terminate the period of liability of the compliance bond. Where the surface of the land being explored is in private ownership, the authorized officer shall not terminate the period of liability under the compliance bond until he has received written acknowledgement from the surface owner of his satisfaction with the reclamation of the surface. In the event the licensee and surface owners are unable to reach agreement on the adequacy of the reclamation the authorized officer shall make the final determination. He will terminate the period of liability under the compliance bond after determining that the terms and conditions and special stipulations of the license, the approved plan, and the regulations have been met.

§ 3507.4 Use of data.

The licensee shall furnish to the Mining Supervisor copies of all data (including but not limited to, geological, geophysical, and core drilling analyses) obtained during exploration. The licensee shall submit such data and, where appropriate, the methods by which the data were gathered, at such time and in such form as required by the Mining Supervisor, the authorized officer, or surface management agency, or as specified in this Subpart the license, or the plan. The confidentiality of all data so obtained shall be maintained until after the areas involved have been leased or until such time as the Mining Supervisor determines that making the data available to the public would not damage the competitive position of the licensee, whichever comes first.

§ 3507.5 Use of surface.

(a) A licensee shall be entitled to use for exploration purposes only so much of the surface of the licensed lands as is authorized in the approved exploration plan.

(b) Operations under these regulations shall not unreasonably interfere with or endanger operations under any other authorized use pursuant to the provisions of any other Act.

(c) The licensee shall comply with all applicable Federal, State and local laws and regulations including the regulations in Parts 3041, 3500, 3600 of this chapter and 30 CFR Parts 211 and 231.

(d) Any person who willfully conducts coal exploration on lands subject to this subpart without an exploration license shall be subject to the provisions of § 9239.5–3(f) of this chapter.

2. Paragraph (b)(3) of 43 CFR 9239.0–3 be amended to read as follows:

§ 9239.0–3 Authority.

* * * * * *

(b) * * *

(3) *Coal trespass.* 18 U.S.C. 1851; 30 U.S.C. 201(b)(4).

3. 43 CFR 9239.5–3 be amended by adding a new paragraph (f) to read as follows:

§ 9239.5–3 Coal.

* * * * * *

(f) *Penalties for unauthorized exploration for coal.* (1) Any person who willfully conducts coal exploration for commercial purposes without an exploration license issued under Subpart 3507 of this chapter shall be subject to a fine of not more than $1,000 for each day of violation.

(2) All data collected by said person on any Federal lands as a result of such violations shall immediately be made available to the Secretary, who shall make the data available to the public as soon as possible.

(3) No penalty under this section may be assessed unless such person is given notice and opportunity for a hearing with respect to such violation pursuant to Part 4 of this chapter.

Effective: January 19, 1977.

Dated: January 19, 1977.

THOMAS S. KLEPPE,
Secretary,
Department of the Interior.

Title 45—Public Welfare

SUBTITLE A—DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, GENERAL ADMINISTRATION

PART 99—PRIVACY RIGHTS OF PARENTS AND STUDENTS

On June 17, 1976, final regulations were published in the FEDERAL REGISTER at 41 FR 24662 setting forth the requirements to be met by an educational agency or institution to protect the privacy of parents and students under section 438 of the General Education Provisions Act, as amended (added by section 513 of Pub. L. 93–380 and amended by section 2 of Pub. L. 93–568). Due to an inadvertent drafting error § 99.32 of those regulations require technical corrections in order to bring it into conformity with the statutory requirement upon which it is based.

Accordingly, the purpose of this correction notice is to make technical changes in the regulations of June 17, 1976.

The Department finds that there is good cause to dispense with proposed rule-making procedures as unnecessary, since the correction notice makes only technical changes to change incorrect wording and restore omissions. Furthermore, to delay the effective date of these changes might result in an unnecessary expenditure on the part of educational agencies and institutions; specifically, with respect to the requirement that a record be kept of certain requests for disclosure of education records, even though an accounting need not be made for the actual disclosure of information pursuant to these requests. As modified, § 99.32 will relieve educational agencies and institutions of keeping a record of requests for disclosure in those areas where they are not required to record actual disclosures.

Section 99.32 of Title 45 of the Code of Federal Regulations is amended as follows:

1. The title of § 99.32 is revised to read as follows:

§ 99.32 Record of requests and disclosures required to be maintained.

2. Paragraph (b) of § 99.32 is revised to read as follows:

(b) Paragraph (a) of this section does not apply:

(i) to requests by or disclosure to a parent of a student or an eligible student;

(ii) to requests by or disclosures to school officials under § 99.31(a)(1);

(iii) if there is written consent of a parent of a student or an eligible student, or

(iv) to requests for or disclosure of directory information under § 99.37.

3. Paragraph (c) is amended by inserting the phrase "requests and" before the word "disclosures".

Effective date: These amendments take effect on January 25, 1977.

Dated: January 17, 1977.

THOMAS S. MCFEE,
Deputy Assistant Secretary for Management Planning and Technology.

[FR Doc.77–2226 Filed 1–24–77;8:45 am]

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20119; FCC 77–50]

PART 15—RADIO FREQUENCY DEVICES

Low Power Communication Devices

Adopted: January 13, 1977.

Released: January 19, 1977.

By the Commission: Commissioner Lee absent.

1. The Commission has received two timely filed petitions and three letters requesting reconsideration of the revised rules adopted February 4, 1976, by the Report and Order[1] in the above described proceeding. The letters are being considered part of this proceeding, since they deal with the same questions raised in the petitions. Petitions were filed by Radio Communications Co., Inc. (Radcom) and Teletronics United Inc. (Teletronics).[2] Letters were received from Barrett Electronics Corp., (Barrett), Gutzmer International Inc. (Gutzmer) and Mr. Bruce D. Ross, a private consultant in electronics.

2. Teletronics, Gutzmer, Radcom and Ross stated that they are either manufacturing and marketing or in the design stage of producing a cordless telephone terminal device.[3] They allege that the new rules are not satisfactory to permit the continued marketing of their devices and therefore request reconsideration of these rules. Barrett claims that the channelization of the frequencies has placed a severe restriction on the marketability of low power communication devices[4] used to control material handling equipment used by the grocery industry.

3. The new rules adopted in this proceeding that, among other things, shifted low power voice-operated communication devices, such as toy walkie-talkies, from the 27 MHz band to a new band at 49 MHz, went into effect on March 18, 1976. The rules in effect prior to March 18, 1976, permitted the operation of a low power communication device on any frequency in the 26.97–27.27 MHz band—a band that coincides with the band allocated for the Class D Citizen Radio Service commonly referred to as the CB band. The principal technical restrictions for operating a low power communication device in this band were a power and antenna limitation of 100 milliwatts and 1.5 meters, respectively. Toy walkie-talkies are the most prevalent example of devices operating under these provisions. Because of enforcement and interference problems between transmitters licensed in the Class D Citizen Radio Service and toy walkie-talkies which operate without an individual license, the Commission shifted low power voice-operated devices from the CB band to 49 MHz.[5] Non-voice operated devices were permitted to remain in the 27 MHz band under more restrictive technical requirements.

PETITIONS FOR A CORDLESS TELEPHONE TERMINAL DEVICE

4. Teletronics manufacturers and markets a cordless telephone terminal device under the trade name of PortaCall. The system is comprised of a base unit that interfaces with the interstate telephone network and a mobile unit that can be carried from place to place. The battery-operated mobile unit and base units contain a telephone handset and cradle unit fitted with a low power transmitter. To permit duplex operation, i.e., a continuous conversation between sender and receiver, two frequencies separated by at least 150 kHz are required. According to Teletronics this is a critical operating requirement. Under the previous provisions at 27 MHz, Teletronics claimed that it was possible to operate up to five PortaCall systems in the same area at the same time without causing interference to one another and still avoid the most active citizens band channels. With respect to its interference potential, Teletronics argued that it was to their advantage to avoid CB channels, since PortaCall systems operate with low power and are more susceptible to receiving harmful interference than causing harmful interference. It should also be noted that the propensity for the interception of communications, as with any radio transmitter, is a possibility with the use of these devices.

5. According to Teletronics, cordless telephone terminal devices serve the public in a number of useful ways. For example an individual who is confined to a wheel chair, or otherwise has difficulty in moving rapidly to a telephone, is thereby provided with communications capability to deal with personal and emergency situations which are not possible with cord bound phones. It is also argued that these systems provide additional flexibility for many thousands of people who are required to stay by a telephone terminal. The extended range, which is advertised to be 300 feet in most operating environments, allows these individuals to receive important (and in some cases emergency) phone calls no matter where they may be as long as they are within the bounds of the system.

6. In their initial filing, Teletronics stated: "We find the shift to the 49.82 to 49.90 MHz band attractive in principle in that it will allow more reliable and secure short range communications without the present legal and illegal interference from Citizen Band users. However, the proposal (new rules) requiring that operation be confined to five defined 20 kHz channels inhibits certain developments in progress that could enable us [Teletronics] to shift to the 49 MHz band with little cost penalty and major performance advantage." Their initial petition concludes by requesting the Commission to allow the simultaneous use of two adjacent channels with a total bandwidth of 35 kHz to allow the operation of a single carrier time shared duplex communication.

7. In a subsequent supplemental filing, Teletronics stated "* * * after extensive evaluation it has been determined that the current allocation at 49.82–49.90 MHz places serious limitations that would result in its (Teletronics) demise." Moreover, the petition asserts that even if a satisfactory 49 MHz PortaCall could be developed, it would not likely be marketable due to its increased cost and single system limitation, i.e., only one system could be operated in one given area at a time. The net result of limiting such devices to the 49 MHz band, according to Teletronics, would be the cessation of their manufacture and use.

8. In its supplemental filing Teletronics suggested that the true answer to the dilemma presented to the cordless telephone industry lies in an allocation of more frequencies. This can be accomplished by permitting cordless telephones to continue to operate in the 27 MHz band with the same technical requirements as adopted for non-voice devices under Section 15.116 of the new rules adopted in this proceeding.[6] A claim is also made that the cordless phones would not be confused with the licensed Class

[1] 41 FR 7394, February 18, 1976.

[2] A supplement to the Teletronics petition for reconsideration was subsequently received and accepted on the basis of the justifications presented in a separate pleading "Motion for leave to file a supplemental Petition for Reconsideration."

[3] A cordless telephone terminal device is customer provided ancillary equipment which is connected to the telephone network through interface equipment.

[4] A low power communication device complying with both the technical and certification requirements of Subpart D of Part 15 may be operated without an individual license for any legitimate purpose.

[5] Report and Order in Docket No. 20119 at paragraph 1.

[6] Non-voice (i.e., radio control) devices operating under the new requirements (§ 15.116), among other things, are restricted to six 20–kHz channels in the 26.99–27.26 MHz band and field strength limits of 10,000 μV/m at 3 meters. It would appear that Teletronics is requesting the Commission to amend the rules in Part 15 to permit cordless telephones to operate under these same provisions.

D Citizen Stations since the cordless phone operates on different frequencies (Class C frequencies) and its transmissions are preceded with a tone signal for dialing purposes. This, coupled with Porta-Call's low power and field strength limitations, practically eliminates the possibility of interference it is asserted.

9. Gutzmer International Inc., also a manufacturer of personal communication devices including cordless telephone equipment, submitted two letters supporting the Teletronics petition. The modus operandi of the Gutzmer system is slightly different from that of Teletronics in that the base station of the Gutzmer system uses carrier current techniques at frequencies just above the standard AM Broadcast Band.[7] Its mobile unit operates at 27 MHz under the interim provisions of § 15.115 of the rules. In addition to supporting Teletronics petitions, Gutzmer emphasized the need for additional frequencies if the portable telephone industry is to grow, otherwise usage density (i.e., the number of systems in a given area) becomes high enough to cause interstation interference. Even under the previous rules in Part 15, Gutzmer says there isn't sufficient spectrum to promote growth and additional frequencies would be needed in a couple of years in any case. It claims that further studies are under way but the immediate need is a relaxation of the new rules adopted in this proceeding.

10. Gutzmer in their first correspondence requested the following technical specifications as an immediate but temporary solution for allowing the continued development and manufacture of cordless telephone extensions:

Continued operation at 27 MHz with 100 milliwatt power to the final on the six Class C Citizen Radio Station Channels.

Continued operation at 1.7 MHz using carrier current technique.

30,000 μV/m at 3 meters instead of 10,000 μV/m at 3 meters for devices at 49 MHz.

11. The second letter from Gutzmer revises their original request and asks for a higher level of radiated signal at 27 MHz. Gutzmer states that after extensive evaluation, the 10,000 μV/m at 3 meters, (which is the level of radiated signal requested by Teletronics in their Supplemental Petition) is too low to provide an operating range of 100 meter (300 feet) for a cordless telephone. A sample calculation based on a number of assumptions ostensibly shows that an order of magnitude increase of radiated signal is required to obtain a 100 meter operating distance. No measurement data is provided. Based on these calculations, Gutzmer requests that its portable phone be permitted 100,000 μ/Vm at 3 meters, which they claim is equivalent to the 100 milliwatt limit under the previous provisions.

12. The relief sought by cordless telephone terminal equipment manufacturers puts the Commission in somewhat of a quandary. On one hand, we are faced with diluting, if not abandoning, the original stated purpose of this proceeding.[8]

On the other hand, if we insist on the immediate removal of all voice-operated low power communication devices from the CB Band, it may cause the demise of these manufacturers. In part, this is due to the fact that cordless telephone equipment was designed to operate under rules which were never intended to provide for a reliable communication service. It appears that the proposal to make changes in the 27 MHz band did not come to the attention of these manufacturers until after the revised rules were promulgated. Accordingly, the Commission was not made aware of their needs when it adopted the Report and Order in Docket No. 20119. When the revised rules did come to their attention, the petitioner realized that they could not operate under the new rules and that they no longer had a marketable system.

13. The statements and claims made by the manufacturers of this equipment raise a number of questions which cannot be addressed in this reconsideration. A basic question that needs to be answered relates to the public interest aspect of the cordless equipment under our obligation to assure efficient use of the limited radio spectrum. Another is: Should such cordless equipment be operated under Part 15 or should it be licensed? These questions can only be answered in a formal rule making proceeding with adequate opportunity for all interested parties to participate and make their views known to the Commission.

14. Inasmuch as these questions cannot possibly be answered here and since at the same time we do not desire the demise of these manufacturers without giving them a reasonable opportunity to develop alternatives, the Commission is hereby granting temporary relief for manufacturers of cordless telephone terminal devices. A new § 15.114 is added to provide for the operation of such devices for a limited period of three years during which a petition for permanent regulations can be received and considered. The temporary regulations are essentially the same as those in § 15.116 which regulate the operation of non-voice devices, except that the permitted field strength has been increased from 10,000 to 50,000 μV/m at 3m in response to the Gutzmer pleading. The text of these new regulations is set out in the Appendix.[9]

15. During this 3 year period, the cordless telephone equipment industry may petition the Commission to amend the rules to make special provisions for their devices. This must be accompanied by a positive showing why it is in the public interest to do so. Any such petition should be submitted promptly, but in no event later than 9 months after release of this order, to allow adequate time for normal rule making process. The industry is also put on notice that the Commission does not anticipate extending the temporary regulations adopted herein beyond the three years specified. Also, the industry is reminded that the responsibility is theirs and not the Commission's for making a showing that such rules are necessary and in the public interest. Such a determination has not been made here.

Petitions Re Restrictions in the 49 MHz Band

16. Radio Communications Co., Inc., (Radcom) another manufacturer of such cordless equipment, in its petition requests reconsideration of the requirement in § 15.118(d) that a device operating under the new provisions at 49 MHz must be completely self-contained with the antenna permanently attached and the microphone built into the box containing the device. Radcom states that they contemplate redesign of their system, which operates under the old provisions at 27 MHz, to use the new frequencies at 49 MHz. Although not explicitly stated, the petition implies that the restriction in § 15.118(d) would preclude their type of device, since the microphone which is in a telephone handset, is separated by a connecting wire from the box housing the transmitter. Whether the firm is able to produce a marketable system at 49 MHz is not clear from the petition.

17. In a similar vein, Mr. Bruce D. Ross, a private consultant, states that he is in the process of designing a cordless telephone equipment and that the new rules, particularly § 15.118(d), are unnecessary. Mr. Ross argues that there are man configurations and services that should be allowed, but are presently excluded by the built-in microphone and no remote control rule. Most of these, he states, could be used in commercial applications; such as, desk top sets with microphones or handsets on cords, wall mounted sets with handsets, fork truck, scooter, bicycle and hard hat mounted units for use inside factories and construction sites, telephone operator type headsets. If the intent of the requirement is curtailment of the range by preventing the device to be mounted on tall poles, this can be accomplished by more direct rules, he argues. He also recommends that prohibition of remote operation, restrictions on modulation and channel specfications be deleted. No justification is provided for these recommendations.

18. With respect to the self-contained restriction in § 15.118, the Commission agrees, in part with Radcom and Mr. Ross that a requirement for a built-in microphone would preclude many types of useful devices. The intent of this restriction is to insure that the radiated signal from the device, hence its interference potential, is not increased by attachment of external antennae and microphones. Since this can be accomplished by limiting the microphone cable length and by requiring the device be tested with the permanently attached microphone cable orientated so as to produce maximum radiation, we are revising this restriction accordingly.

Barrett Petition for Additional Radio Control Frequencies

19. Barrett Electronics Corporation, in their petition, states that the rule changes in this proceeding will preclude a material handling equipment that they have been manufacturing and marketing to the grocery industry for over 20 years. The system they are producing is described as a radio remote controlled tractor-trailer train which is used by wholesale grocery warehouses for order selections. The train operator wearing a small transmitter on his belt controls the tractor from the various positions adjacent to the vehicle as he finishes each loading operation.

20. To insure that each operator controls only his particular tractor, Barrett designs each system (transmitter-tractor combination) to operate on a separate frequency and have a range of approximately 30 feet. Because some warehouses utilize up to 50 trains, 50 separate frequencies are used with the present equipment operating under the interim provisions of Section 15.115 of the rules with a 5 kHz spacing between each channnel over the entire band, 26.97–27.27. The petition states that this type of operation is obviously not feasible on the 5 channels at 49 MHz, nor is it on the 6 channels in the 27 MHz under the new provisions. Electronic schemes to reduce the number of channels, such as time division or synchronous operation, Barrett claims have not proved feasible. Redesigning the equipment to operate in the licensed Business Radio Service is also not acceptable, because of the limited number of channels available, Barrett asserts. Distributing the system over all bands available, licensed or unlicensed is costly and entirely unsatisfactory to the petitioner. Barrett concludes by requesting that instead of the present unlicensed operation anywhere in the CB band, licensed low power (100 milliwatts) limited bandwidth operation be allowed, with 5 kHz spacing throughout the entire 26.97–27.27 MHz band.

21. Barrett's request for a number of frequencies spaced 5 kHz apart over the entire CB band to provide for the licensed operation of remote control devices is outside the scope of this proceeding. To accomplish this, a new rule making proceeding must be initiated to amend the present rules to make additional frequencies available for remote control operation in the 27 MHz band. However, it is not apparent that new rules are necessary in this instance, since the present rules appear to accommodate the type of operation described by Barrett. For instance, a transmitter licensed for use in the Business Radio Service under Part 91 of the rules with an output power of 200 milliwatts may operate on almost any frequency allocated for use in the Business Radio Service with minimum technical restrictions. Eligibility requirements for licensing in this service are minimal and certainly within the realm of most small businesses. A second possibility in the Business Radio Service is use of the offset frequencies at 450–470 MHz (band).

22. Notwithstanding these alternatives, there are eleven frequencies available for remote operation without an individual license at 27 MHz and 49 MHz,[11] provided the device complies with both the technical and certification requirements of Subpart D of Part 15 of FCC Rules. A suitable coding scheme, similar to the type used by most door opener controls, could accommodate several controllers on each frequency.

Extension of Interim Requirements

23. The rules adopted in this proceeding allow a 7 year period for amortization of devices operating in the 27 MHz band under the previous provisions in Part 15. Manufacture and marketing must cease March 18, 1977 and March 18, 1978, respectively. Inasmuch as several petitioners must modify their present equipment in accordance with the rules appended hereto, the Commission is extending the 7 year amortization period under the interim provisions in Section 15.115 for an additional six months. This is to allow these manufacturers the time needed to produce equipment under these modified requirements.

24. In view of the foregoing, the Commission finds that it is in the public interest to amend Section 15.118(e), in the manner described herein, to extend the date for manufacturing low power communication devices in the CB Band for six months, and to permit continued manufacture of cordless telephone terminal devices under restricted conditions for a period of 3 years, pursuant to the discussion in paragraph 12 above. Pursuant to the authority contained in Section 4(i), 302 and 303(r) of the Communications Act of 1934, as amended *it is ordered*, That effective February 28, 1977, Part 15 is amended as set forth below.

25. *It is further ordered*, That to the extent indicated above, the subject petitions are granted and in all other respects, denied.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082. Sec. 302, 82 Stat., 290; 47 U.S.C. 154, 302, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary

Part 15 is amended as follows:

1. A new § 15.114 is added to read as follows:

§ 15.114 Interim requirements for cordless telephone terminal devices operating between 26.97–27.2 MHz.

A low power communication device used as a cordless telephone terminal device that complies with all the requirements of paragraphs (a) through (i) may be operated until January 1, 1986. Manufacture, importation and marketing of such a device shall cease January 1, 1980, April 1, 1980 and January 1 1981, respectively.

(a) The device may only be used as a cordless telephone terminal device.

(b) The device shall operate on one or more of the following frequencies:

26.995 MHz	27.145 MHz
27.045 MHz	27.195 MHz
27.095 MHz	27.255 MHz

(c) Frequency tolerance of carrier: ±0.01%. This tolerance shall be maintained for a temperature variation of −20° to +50°C at normal supply voltage and for a variation in the primary supply from 85% to 115% of the rated supply voltage at a temperature of 20°C.

(d) The authorized band shall be 20 kHz centered on the frequencies listed in paragraph (b) of this section.

(e) Emissions within the authorized band shall not exceed 50,000 μV/m when measured at 3 meters in accordance with a procedure approved by the Commission.

(f) Emissions between 10 kHz and 50 kHz from the carrier frequency shall not exceed 1000 μV/m at 3 meters.

(g) Emissions greater than 50 kHz from the carrier frequency shall not exceed 300 μV/m at 3 meters. The spectrum shall be scanned from 10 kHz to 1000 MHz and all emissions from the device shall be scanned from 10 kHz to 100 MHz exceeding 30 μV/m at 3 meters shall be reported.

(h) If the device is designed to operate from commercial power lines, the RF energy fed back into the power lines shall not exceed 100 microvolts on any frequency below 25 MHz when measured in accordance with the procedure in IEEE Standard 213 (See § 15.75 of this Part).

(i) The device shall be registered pursuant to the procedures in Subpart L of Part 2 of this Chapter demonstrating that the device complies with the requirements in Part 68 of this Chapter.

2. The headnote and introductory text of § 15.115 are revised to read as follows:

§ 15.115 Interim requirements for operation between 26.97–27.27 MHz.

A low power communications device complying with all the provisions of par-

[7] Presently these aystems operate under the provision in § 15.7 of the rules, which limits the radiated energy from the system to 15 μV/m at a distance of $\lambda/2\pi$. The Notice of Proposed Rule Making in FCC Docket No. 20780 (41 FR 17938) proposed to revise § 15.7. If revised as proposed the subject systems would be redefined as a low power communication device.

[8] See paragraph 3, supra.

[9] Although there are no requirements on the receiver part of these systems at present, this is subject to change in another rule making proceeding in FCC Docket No. 20746 (41 FR 13375, 58 FCC 2nd 5, page 839).

[10] Inasmuch as cordless phones are attached to the telephone network, they must be separately registered with the Commission pursuant to Part 68 and Subpart L of Part 2 of FCC Rules.

[11] Six frequencies are available to non-voice operation at 27 MHz and five frequencies at 49 MHz making a total of 11 frequencies available under Part 15 for remote operation.

agraphs (a) through (d) of this section may be operated until September 18, 1983. Manufacture and importation of such a device shall cease September 18, 1977 and October 18, 1977, respectively. Applications for certification of such a device will not be accepted by the Commission after June 18, 1977. Marketing of such a device shall be terminated not later than September 18, 1978.

* * * * *

3. Paragraph (e) of § 15.118 is revised to read as follows:

§ 15.118 Technical Specifications for the band 49.82–49.90 MHz.

* * * * *

(e) The device shall, with the exception of the microphone, be completely self-contained with the antenna permanently attached to the enclosure containing the device. The microphone may be external to the device, provided it is permanently attached to the enclosure with a cable not longer than 1.5 meters.

* * * * *

4. Paragraph (d) of § 15.119 is revised to read as follows:

§ 15.119 Alternative technical specifications for the band 49.82–49.90 MHz.

* * * * *

(d) The device shall, with the exception of the microphone, be completely self-contained with the antenna permanently attached to the enclosure containing the device. The microphone may be external to the device, provided it is permanently attached to the enclosure with a cable not longer than 1.5 meters.

Title 49—Transportation

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[FRA Docket No. HS-4, Notice No. 6]

HOURS OF SERVICE ACT

Signal Service: Interim Statement of Agency Policy and Interpretation

On September 28, 1976, the Federal Railroad Administration (FRA) published in the FEDERAL REGISTER a proposed statement of agency policy and interpretation concerning the Hours of Service Act, as amended (45 U.S.C. 61–64b; hereinafter "Act") (41 FR 42692). Public comments were requested to be submitted by October 29, 1976. Subsequent notices extended the comment period through December 7, 1976 (see 41 FR 48163, November 2, 1976; 41 FR 52351, November 29, 1976; 41 FR 54047, December 7, 1976). FRA administers and enforces the Act under section 6(f)(3)(A) of the Department of Transportation Act (49 U.S.C. 1655(f)(3)(A)) and a delegation from the Secretary of Transportation (49 CFR 1.49(d)).

Having analyzed the comments received in light of the express purpose of the Act, its legislative history, case law, and prior administrative interpretations, FRA has decided to issue interim interpretations concerning the limitations on hours of service of individuals engaged in installing, repairing or maintaining signal systems (section 3A of the Act). A final statement of policy and interpretation addressing the balance of the statute will be published in the very near future.

Eleven individuals or organizations submitted comments on the segment of the proposed statement dealing with signal service. A joint submission by the organization representing the great majority of common carriers by railroad and the principal labor union representing employees affected by section 3A of the Act was particularly helpful. FRA has adopted much of the substance of that joint submission in preparing the interim interpretations. Other comments have been considered and incorporated to the extent appropriate.

The interim interpretations set forth below are designed to implement safety policy considerations within the framework of the Act, guarding against excessive periods of work while permitting enough flexibility to assure that systems vital to the safety and efficiency of rail transportation are properly maintained. FRA is issuing interim interpretations at this time because of the complexity of the administrative problems involved in applying the amended statute to the variety of factual situations possible. These interpretations may be modified as knowledge is gained of the various practical situations that may arise under the Act. This will permit FRA to assess the actual application of the Act to persons in signal service. If it becomes evident that the intent of the Act is not achieved by these interpretations, then FRA may be required to issue interpretations based on a more strict reading of the statute.

In making their joint submission, industry and labor representatives noted their intention to seek legislative action to address possible deficiencies in the Act and clarify its intended application. FRA has been mindful of the likelihood of such action in preparing these interim interpretations.

Covered service. Six commenters addressed the issue of the scope of covered signal service. One commenter urged that all maintenance of way employees have a role in the installation, maintenance or repair of signal systems and that a tired or fatigued person working any place on the signal system is a danger to the integrity of the entire system. An organization representing electrical workers detailed the tasks which are the responsibility of its members on some railroads but which are listed in the legislative history as duties of "signalmen". The commenter objected to the use of the term "signalman" to identify members of other crafts and concluded by arguing that the Act should be construed to apply only to such tasks as are uniformly assigned to the signal craft on all railroads across the country.

FRA is convinced by the language of the legislative history and the stated purpose of the Hours of Service Act that the proper benchmark for application of the Act must be found in the relationship of the particular function or service to the safety of the devices and systems which Congress deemed to fall under the general rubric of "signal systems". That is, covered service cannot be defined by reference to the craft which owns the contractual right to a particular task on one or more railroads. Rather, the focus must be safety of railroad operations as it is affected by the readiness of individuals who work on the identified devices and systems. Therefore, the discussion of covered service which appears in the interim interpretations is substantially unchanged from the discussion in the notice of interpretations. A commenter has noted that, through inadvertent error, the words "train control and cab signal systems, interlocking systems" were omitted from the quotation taken from House Report 94–1166. The quotation has been corrected in the present document.

Two commenters urged that the construction of signal systems should be distinguished from the "installation" of signal systems. The commenters believe that the latter term should be read to mean "activation". No basis appears in the legislative history for making such a distinction. While it is true that normal testing procedures should limit potential hazards deriving from defects in construction, Congress may well have assumed that some problems could go undetected as a result of faulty testing or that a lack of durability could be caused by poor workmanship. Indeed, the Committee on Interstate and Foreign Commerce of the House stated in its report on the legislation "A signalman who worked excessive hours in either the "construction" or maintenance of signal systems may make errors in the intricate wiring or adjustment of those devices which would circumvent the safety functions of the system." (Emphasis added.) H.R. Rep. No. 94–1166 (1976) at page 13. Two commenters stressed the use of subsequent component tests as a basis for excluding work done in carrier signal shops from the coverage of the Act. Again, there would seem to be insufficient basis for distinguishing between repairs on components in the field and repairs effected in a carrier shop. One commenter would exclude testing and inspection functions from covered service. FRA believes that testing and inspection are an important and integral part of overall system maintenance.

Limitations on hours. One commenter suggested that the text point out more strongly that a new 24-hour period may begin after any 8-hour period of release. Additional examples have been added which point out this fact.

Duty time. Perhaps the most difficult problem posed by the general language of section 3A of the Act is the definition of time on duty. Individuals who work on signal systems often spend much of their compensated time traveling for the carrier's purposes. Since such travel inevitably adds to fatigue and detracts from time available for rest, and since the provision on commingled service contemplates that noncovered service will

normally be counted with covered service in computing total time on duty, clearly time spent in transportation before covered service and enroute between work sites must be recognized to be on-duty time. Similarly, travel from a work site to headquarters by on-track vehicle involves potential peril to train operations and to the individuals themselves and must be viewed as time on duty. However, as one commenter pointed out, highway travel back to the headquarters or residence after work is complete, by itself, involves no hazard to the safety of train operations. Further, travel to the residence (directly or via the headquarters) following a period of covered service closely resembles deadheading or a combination of deadheading and commuting.

As recommended in the joint industry/labor submission, FRA has revised the discussion and examples concerning travel time from the work site to the headquarters or residence outside the regular work day.

Both industry and employee representatives have urged that, while all travel time within regular assigned work hours should be acknowledged to be time on duty, time spent in transportation from a work site to the headquarters or residence outside regularly assigned hours should be treated neither as time on duty nor as time off duty. That is, the employee should be considered to have been "released" for purposes of the prohibition on excess service; but the employee would not be considered "off duty" for purposes of the required period of release of 8 or 10 hours. In the text below, FRA authorizes this treatment of transportation time following any period of covered or commingled service outside regularly scheduled hours. That is, during the next months FRA will not assert statutory penalties involving alleged violations where such time is used in computing excess service and no violation would exist absent the addition of such time. However, FRA will monitor implementation of this approach during the period these interim interpretations are under study.

Effective periods of release. Because many employees who work on signal systems perform overtime service outside their regularly assigned hours, and because the Act does not expressly articulate the requirements for effective periods of release, both FRA and the commenters have experienced difficulty in fashioning principles of general application concerning when time available for rest may be considered off-duty time and when the continuity of service is broken. The question of continuity is important because it may determine whether an employee is required to have 10 rather than 8 hours off following a period of 12 hours service. Obviously, any period considered off-duty time would not count toward the 12-hour maximum.

After review of all comments and in light of specific recommendations by representatives of the industry and affected employees, FRA has decided to modify its position on periods of release. It has been determined that regularly assigned meal periods should be treated as off-duty time but should not be viewed as interrupting the essential continuity of service. Similarly, other periods of release during which the employee is entirely free of responsibilities to the carrier are treated as off-duty time. However, only periods of 1 hour or more would be recognized as effective breaks in the continuity of service.

One commenter urged that transportation time to or from a food service facility should not be counted as time on duty. While FRA believes that a strong case can be made that such time, which is expended in part for the convenience of the carrier, should be treated as on-duty time, FRA recognizes that such a view may be impractical as applied in many situations. Thus, where the employee has the option to eat his lunch at the site (by use of a lunch box or other arrangement), the entire meal period may be treated as time off duty.

It should be stressed that, with the exception of assigned meal periods, all compensated time during a scheduled work tour is considered time on duty. A carrier may not stretch the permitted 12-hour work period by creating breaks in a regular work day which do not afford meaningful periods of relaxation.

Emergencies. Several commenters seriously questioned the proposed interpretation of the special emergency provision for signal service and urged a more liberal reading of the statute. The commenters noted, for instance, that there may be no way in many instances to ascertain whether a false restrictive indication involves a hazard to train operations without first calling a signal maintainer to investigate the situation.

FRA appreciates that the section 3A(f) "emergency situation" is a broader concept than the section 5(d) "casualty or unavoidable accident or * * * act of God". That is, an emergency permitting service up to 16 hours may be a less extraordinary event than an act of God permitting service in excess of 16 hours. By the same token, FRA is concerned that the exception not be read in a way which will largely consume the rule.

The joint submission of industry and employee representatives implicity recognized that many potential safety problems associated with false restrictive conditions and device malfunctions may be eliminated through temporary measures such as operation at restricted speed; but the submission noted that certain other conditions might produce service disruptions or secondary safety problems rising to the level of emergencies. The text below reflects an FRA determination that conditions producing material disruptions of service may be legitimate emergencies within section 3A(f).

As noted above, FRA has decided to issue the interpretations which appear below as operative interim interpretations pending review of their effectiveness in carrying out the statutory design and purpose. Therefore, FRA hereby reopens for comment its Docket No. HS–4 on an indefinite basis and invites further public comment on the proper application of section 3A of the Act. FRA will publish a notice in the future renewing the invitation for comments and setting a date for closing of the comment period.

Comments should refer to Docket No. HS–4 and should be submitted in triplicate to the Docket Clerk Office of Chief Counsel (RCC–1), Federal Railroad Administration, 400 7th Street, SW., Washington, D.C. 20590.

In consideration of the foregoing, the following statement constitutes the policy of FRA concerning the administration and enforcement of section 3A of the Hours of Service Act, as amended (45 U.S.C. 63a), and is effective on January 25, 1977. This statement should be read in conjunction with the final statement of policy on the balance of the statute, including general provisions, which will be published in the very near future.

INTERIM STATEMENT OF AGENCY POLICY AND INTERPRETATION: SECTION 3A OF THE HOURS OF SERVICE ACT

(Act of March 4, 1907, 34 Stat. 1415, as amended (45 U.S.C. 61–64b); sec. 6(f)(3)(A) of Pub. L. 89–670, 80 Stat. 940 (49 U.S.C. 1655(f)(3)(A)); § 1.49(d) of the Regulations of the Secretary of Transportation (49 CFR 1.49(d).)

The discussion below describes the policy of the Federal Railroad Administration (FRA) concerning the administration and enforcement of section 3A of the Hours of Service Act (45 U.S.C. 63a). Section 3A establishes maximum hours of service and required periods of release for individuals employed by common carriers who are engaged in installing, repairing or maintaining signal systems.

Section 3A was added to the Act by section 4(d) of the Federal Railroad Safety Authorization Act of 1976, Pub. L. No. 94–348, 90 Stat. 819. This amendment became effective July 8, 1976.

COVERED SERVICE

The legislative history of section 3A establishes that Congress intended to make subject to the Act all those persons who work on "signal systems," and that this term was meant to refer to a variety of technologies bearing on the safety of railroad operations. The House committee report on the 1976 amendments contains the following statement, which was repeated on the Senate floor during the debate on passage in that body and which sets forth the congressional understanding of the term "signal systems":

The duties of signalmen encompass the construction, installation, repair, maintenance, testing and inspection of signal systems. These signal systems include automatic block signal systems, traffic control systems, train stop, train control and cab signal systems, interlocking systems, railhighway grade crossing protection, automatic classification yards, hot box detectors, broken

flange detectors, and other similar devices, appliances and systems. H.R. Rep. No. 94–1166 (1976) at pg. 12. See 122 Cong. Rec. S 10376 (daily ed. June 24, 1976).

This explanation of the language of the statute stands as the basic guide to the types of duties covered by this amendment. The reference to "automatic classification yards" is to retarder mechanisms and related control systems.

On many railroads certain of the functions described by Congress as relating to signal systems are performed by persons who are assigned to other departments within the carrier's organization, persons who may not be affiliated with the labor union which represents "signalmen" as that term is commonly employed. It is neither practical nor realistic to vary the application of the Act from one railroad to another, based on which craft has the contractual right to particular work of the individual carrier. Thus, the only reasonable construction of the statute in light of the legislative purpose is that any employee who performs work on one or more of the enumerated systems during a twenty-four hour period is covered by and subject to the Act. In the discussion below, individuals covered by the statute are referred to as "signalmen" for purposes of convenience only. That term is meant to include all individuals engaged in installing, repairing or maintaining signal systems.

It should be noted that certain related work will have such a minimal relation to traditional signal duties as to put it outside the scope of covered service. For instance, an individual responsible for track maintenance whose only signal-related work is the replacement of insulation at rail joints would not be covered by the Act.

In keeping with the functional approach of the Act, employees are subject to the Act only if they perform covered service. Work in the nature of digging ditches into which signal cables are to be laid, putting up poles (without installing signal lines), and driving signal department vehicles is not covered service under the Act. Of course, if an individual performing non-covered service also engages in covered service during the twenty-four hour period, then the individual will be subject to the Act with respect to "on-duty" time and required off-duty periods.

LIMITATIONS ON HOURS

No individual employed by a common carrier in installing, repairing or maintaining signal systems may be required or permitted to work in excess of twelve continuous hours. After working twelve continuous hours, an individual must be given at least ten consecutive hours off duty before being permitted to return to work.

No individual engaged in covered work may be required or permitted to continue on duty or go on duty unless he has had "at least eight consecutive hours off duty within the preceding twenty-four hours." The clear spirit and intent of the quoted language lead to the conclusions that:

(1) When the time on duty is broken or interrupted by off-duty periods of less than 8 consecutive hours, the individual may be on duty up to a maximum of 12 hours during a 24 hour period, so long as such individual has had a statutory off-duty period of at least 8 or 10 consecutive hours immediately prior to reporting for work.

(2) After completing the 12 hours of broken duty, or at the end of the 24 hour period, whichever occurs first, the employee may not be required or permitted to continue on duty or to go on duty until he has had at least 8 consecutive hours off duty.

(3) The 24-hour period referred to in paragraphs 1 and 2 above shall begin when an employee reports for work immediately after his having had a statutory off-duty period of 8 or 10 hours.

The provision on emergencies, discussed below, may extend the permissible time on duty referred to above.

The following examples illustrate the effect of the limitations on hours of service in situations similar to those likely to be encountered on many railroads. For simplicity, the examples assume no regularly assigned meal periods during the stated hours, no emergencies, and no travel time. As used throughout these interim interpretations, "regular duty tour" refers to any scheduled period of service. It is to be distinguished from trouble calls, when the employee is called without prior warning to perform a particular task.

EXAMPLE A

Facts: Regular duty tour, 7:00 a.m.–3:00 p.m. (8 hours). Trouble call, 10:00 p.m.–1:00 a.m. (3 hours).

Effect of law: The individual may not return to his regular job until 9:00 a.m., since he must have 8 consecutive hours off duty before commencing a new 24-hour period. (Note that the individual had not had 8 consecutive hours off duty between his release at 3:00 p.m. and the trouble call). On these facts the employee could take a short trouble call if he could complete it by 7:00 a.m. However, if he returned home at 7:00 a.m., he could not return to work before 3:00 p.m.

EXAMPLE B

Facts: Regular duty tour, 7:00 a.m.–3:00 p.m. (8 hours). Trouble call, 11:00 p.m.–1:00 a.m. (2 hours).

Effect of law: The individual may return to work at 7:00 a.m., his normal starting time, since he did have 8 consecutive hours off duty prior to the 11:00 p.m. trouble call, which commenced a new 24-hour period. However, the individual would be limited to 10 hours of work, since he has already worked 2 hours in the new 24-hour period.

EXAMPLE C

Facts: Work, 7:00 a.m.–3:00 p.m. (8 hours). Off duty, 3:00 p.m.–11:00 p.m. (8 hours). Work, 11:00 p.m.–7:00 a.m. (8 hours). Off duty, 7:00 a.m.–3:00 p.m. (8 hours). Work, 3:00 p.m.–11:00 p.m. (8 hours).

Effect of law: No violation of law because a new 24-hour period commences when the employee reports for work after each 8-hour period off duty. At the end of the last 8-hour work period, the employee has an additional 4 hours that he may work in other than emergency service under the law during the 24-hour period which began at 3:00 p.m.

EXAMPLE D

Facts: Regular duty tour, 7:00 a.m.–3:00 p.m. (8 hours). Trouble call 1, 10:00 p.m.–12:00 midnight (2 hours). Trouble call 2, 5:00 a.m.–6:00 a.m. (1 hour).

Effect of law: The individual may not return to his regular duty tour until 2:00 p.m., since he must have 8 consecutive hours off duty before a new 24-hour period would commence. Note that on these facts the employee could take a short trouble call if he could complete it by 7:00 a.m. However, if he returned home at 7:00 a.m. he could not return to work before 3:00 p.m.

EXAMPLE E

Facts: Regular duty tour, 7:00 a.m.–3:00 p.m. (8 hours). Trouble call 1, 10:00 p.m.–12:00 midnight (2 hours). Trouble call 2, 6:00 a.m.

Effect of law: The individual must be released from duty at 7:00 a.m. since the 24-hour period which commenced at 7:00 a.m. the previous day has now expired. He must have 8 consecutive hours off duty before returning to work.

DUTY TIME

The Act provides that time on duty commences when an individual reports for duty and terminates when the individual is finally released from duty.

Uniform and consistent administration of the Act requires that a fixed, known standard be enunciated for the treatment of time spent in transportation for the carrier's purposes. FRA has determined that the following discussion fairly interprets the intent of the Act while providing objective standards applicable to most common situations. For purposes of the following, compensated travel time means time spent in transportation for the carrier's purposes, which is compensated by the employer.

1. *Commuting distinguished from travel for employer.* Normal commuting between the individual's residence and his normal "headquarters" or "regular reporting point" is not time on duty for any purpose. This principle applies only to commuting associated with a regular work day, irrespective of the method by which the employee commutes. By contrast, compensated travel time to an initial work site other than the individual's headquarters in connection with a regular work day is considered time on duty. Customarily, signal maintainers and other employees engaged in this work will report to headquarters before going to a work site on the line of railroad. However, in those instances where an employee is permitted to utilize some of his compensated time traveling directly from his residence to a work site where covered service is performed, that compensated time is counted as time on duty under the Act. It is administratively impracticable to distinguish between work sites which are relatively close to the residence and those distant from the residence.

Example 1–A. Signalman A operates out of a headquarters point to which he normally reports at the beginning of a regular work day. As a matter of personal preference, Signalman A chooses to live 1 hour's drive from headquarters. His transportation time between his home and the headquarters point at the beginning and end of the regular work day is counted as part of his required off-duty period of 8 or 10 hours.

Example 1–B. Signalman A, whose regular work day begins at 7:00 a.m., goes directly to a work site on a given day instead of reporting to headquarters. Signalman A leaves his home at 6:30 a.m. and drives to the work site, arriving at 7:45 a.m. He is paid from 7:00 a.m. until he goes off duty. Signalman A is on duty for purposes of the Act commencing at 7:00 a.m. It is immaterial whether he drove to the work site in his personal automobile or a carrier-provided truck.

2. *Transportation during and following regular work day.* All time spent in transportation during a regular work day is normally on-duty time. Time spent in non-rail transportation returning to headquarters or the individual's residence after the expiration of the regular work day is neither time on duty nor time off duty, even though such time may be paid for. Time spent in transportation by on-track vehicle is always time on duty.

Example 2–A. Signalman B reports to headquarters for a regular work day, 7:00 a.m.–3:00 p.m., and rides or drives to work site where covered service is performed, commencing at 7:40 a.m. He departs work site at 2:20 p.m. and rides or drives back to headquarters where he is relieved at 3:00 p.m. Signalman B has been on duty a total of 8 hours.

Example 2–B. Signalman B reports to headquarters for a regular work day, 7:00 a.m.–3:00 p.m., and rides or drives to work site where covered service is performed, commencing at 7:40 a.m. He departs work site at 3:00 p.m. and rides or drives back to headquarters where he is relieved at 3:40 p.m. Signalman B has been on duty a total of 8 hours from 7:00 a.m. to 3:00 p.m. Off-duty time commences at 3:40 p.m.

Example 2–C. Signalman B reports to headquarters for a regular work day, 7:00 a.m.–3:30 p.m., and rides or drives to work site where covered service is performed, commencing at 7:40 a.m. He departs work site at 2:50 p.m. and rides or drives back to headquarters where he is relieved at 3:30 p.m. Signalman B has been on duty a total of 8 hours from 7:00 a.m. until 3:00 p.m. Off-duty time commenced at 3:30 p.m.

Example 2–D. A signal gang travels to a work site remote from individual residences. The carrier houses the crew in a motel (or other facility), which is treated as the tie-up point for the gang. The gang has had a statutory off-duty period and departs the motel at 7:30 a.m. for a work site, works continuously until 7:30 p.m. and returns to the tie-up point arriving at 8:00 p.m. Members of the gang have been on duty for 12 hours for purposes of the Act and must have 10 consecutive hours off duty before returning to work. The travel time to the tie-up point from 7:30 p.m. to 8:00 p.m. is considered neither on-duty time nor off-duty time; consequently, the 10 consecutive hours off duty commenced on arrival at the tie-up point at 8:00 p.m.

3. *Trouble calls.* As a general rule, all compensated time from the time an individual receives a trouble call until he has completed the work for which he was called with be considered time on duty. Of course, this assumes the individual actually begins service for the carrier immediately and that there are no diversions for personal reasons. If an individual devotes only 2 hours to a call for which he receives 2 hours and 40 minutes pay under a collective bargaining agreement, only the actual time worked (2 hours) is counted for purposes of the Act. Travel time on return from an individual's work site to his headquarters or his home outside his assigned hours (except any part of said time performed in or on an on-track vehicle traveling on rails); prior to receiving an off-duty period, is not counted as either off-duty time or on-duty time.

Example 3–A. Signalman C, after returning home following a regular work day of 8 hours, receives a trouble call at 10:00 p.m. The work location is some distance from his residence. Signalman C immediately puts on work clothing and departs for the work site and completes repairs by 11:30 p.m. He arrives home at midnight having consumed 30 minutes on the return trip. He has been on duty 9½ hours (8 plus 1½ hours). His off-duty time began at 12:00 midnight, when he returned home and had an opportunity for meaningful rest.

Example 3–B. Signalman C, after returning home following a regular work day of 8 hours, receives a trouble call at 10:00 p.m. The work location is some distance from his residence. Signalman C immediately puts on work clothing and departs for his headquarters and takes an on-track vehicle and drives it over the rails to the work site. He completes repairs by 11:30 p.m. He arrives at his headquarters at midnight after driving the on-track vehicle over the rails, having consumed 30 minutes on the return trip. Taking a direct route, he arrives home at 12:15 a.m. Signalman C was on duty until his arrival at headquarters at midnight. If Signalman C is compensated in some way for the drive to his residence, then the period from 12:00 to 12:15 a.m. is counted neither as on-duty time nor as off-duty time.

As a general rule, on-duty time ceases with the employee's release. (Where travel prior to the end of the work day is involved, see paragraph 2 above.) With respect to trouble calls, on-duty time ceases with completion of the work (paragraph 3 above). On-duty time begins again at the commencement of the employee's next regular work day or with the receipt of a trouble call (paragraph 3 above).

EFFECTIVE PERIODS OF RELEASE

In order to qualify as off-duty time, a period of release must provide a meaningful opportunity for relaxation. In addition, the employee must be free of all responsibilities to the carrier, including any duty to remain at a particular location.

Because of the unique characteristics of signal service, regularly assigned meal periods are not computed as on-duty time but do not break the continuity of service. This is true regardless of the duration of the meal period. Thus, service through a scheduled work tour is deemed to be continuous for purposes of the 10-hour release requirement if the only non-duty period is a regularly assigned meal period. Of course, the 10-hour release requirement would come into play only if the continuous service (less the meal period) totaled 12 hours.

EXAMPLE A

Facts: Regular duty tour, 7:00 a.m.–12:00 noon. Assigned meal period, 12:00 noon–12:30 p.m. Regular duty tour continued, 12:30–3:30 p.m. Additional service, 3:30–7:30 p.m.

Effect of law: The individual has worked 12 continuous hours and must be afforded 10 consecutive hours off duty.

EXAMPLE B

Facts: Regular duty tour, 7:00 a.m.–12:00 noon. Assigned meal period, 12:00 noon–12:30 p.m. Regular duty tour continued, 12:30–3:30 p.m. Trouble call, 4:30 p.m.–8:30 p.m.

Effect of law: The individual has worked a total of 12 hours in broken service and must be afforded 8 consecutive hours off duty before being permitted to return to work.

All other non-duty periods of less than one hour during which there is an opportunity for relaxation and during which the individual is free of responsibilities to the carrier are excepted from the computation of on-duty time. However, such periods of less than one hour are not deemed to interrupt the continuity of service. Conversely, periods, of one hour or more which are available for rest and during which the individual is free of responsibilities are considered off-duty time and do break the continuity of service.

EXAMPLE C

Facts: Regular duty tour, 7:00 a.m.–12 noon. Assigned meal period, 12:00 noon–1:00 p.m. Regular duty tour continued, 1:00–4:00 p.m. Trouble call, 4:30 p.m.–8:30 p.m. Travel on return from trouble call, 8:30 p.m.–9:00 p.m.

Effect of law: The individual has been on duty 12 continuous hours (5+3+4) and must receive 10 consecutive hours off duty. The 30-minute period between the close of the scheduled duty tour and the trouble call is not counted toward time on duty but does not interrupt the essential continuity of service. The off-duty period begins at 9:00 p.m.

EXAMPLE D

Facts: Scheduled duty tour, 7:00 a.m.–12:00 noon. Assigned meal period, 12:00 noon–12:30 p.m. Scheduled duty tour continued, 12:30 p.m.–3:30 p.m. Trouble call, 5:30 p.m.–9:30 p.m. Travel on return from trouble call, 9:30 p.m.–10:00 p.m.

Effect of law: The individual has been on duty 12 hours in broken service (5+3+4) and must receive 8 consecutive hours off duty. The off-duty period begins to run at 10:00 p.m.

EMERGENCIES

Section 3A(f) of the Act provides that an individual engaged in installing, repairing, or maintaining signal systems may work up to 4 additional hours within a 24-hour period when an actual emergency exists and the work of the individual is related to such emergency. This means that during an ongoing emergency the individual may work up to 16 hours consecutively or in the aggregate. An emergency ceases to exist when the signal systems are restored to service.

An emergency for purposes of signal service is considered to be any condition causing a material disruption of service or constituting a significant safety hazard. Examples of emergencies include (1) false proceed indications, (2) malfunctioning grade crossing protection devices, and (3) false restrictive conditions that materially disrupt service or which may cause a significant safety hazard. An emergency is to be distinguished from an extraordinary event under section 5(d) of the Act which may render the limitations of the Act inapplicable. For instance, an unusually severe ice storm might rise above an emergency and qualify as an "act of God" permitting service in excess of 16 hours. However, judicial pronouncements on section 5(d) have made it clear that, even in the presence of an "act of God" or other extraordinary event the carrier must employ due diligence to avoid or limit excess service.

It is important to remember that the existence of a bona fide emergency does not excuse the failure to provide a proper off-duty period after the emergency is over. In addition, the existence of a continuing emergency will not always justify working an employee a full 16 hours.

Consider the following:

EXAMPLE

Facts: Work: 7:00 a.m.–3:00 p.m. (8 hours). Trouble call 10:00 p.m.–12:00 midnight (2 hours). Emergency call (valid continuing emergency) 3:00 a.m.

Effect of law: The individual must be released for 8 hours off duty not later than 7:00 a.m., even though at that time he has worked only 14 hours total. The reason for this is that the 24 hour period which commenced at 7:00 a.m. the previous day has now expired.

NOTE.—These interim interpretations should be read in conjunction with the final statement of agency policy and interpretation on the balance of the Hours of Service Act which will be issued in the very near future.

Issued at Washington, D.C., on January 18, 1977.

ASAPH H. HALL,
Administrator.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1256]

PART 1033—CAR SERVICE

The Baltimore and Ohio Railroad Co. and the Chesapeake and Ohio Railway Co. Authorized To Select Certain Cars of Coal To Be Unloaded by Port Coal Dumping Machines

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 17th day of January, 1977.

It appearing, that, there are massive accumulations of carloads of coal for transshipment by water awaiting unloading by the coal dumping machines of The Baltimore and Ohio Railroad Company (B&O) at its Curtis Bay coal piers at Baltimore, Maryland, and by The Chesapeake and Ohio Railway Company (C&O) at its coal piers at Newport News, Virginia; that because of extreme cold and high moisture content, many of these carloads of coal are so deeply frozen that they cannot be unloaded at rates in excess of five cars per hour; that other carloads of coal are available which are not so deeply frozen which can be unloaded without excessive delay for thawing and loosening; that the normal practice of the B&O and C&O is to unload cars on a sequential basis determined by the arrival of the vessel designated by the transshipper to receive the coal; that such practice results in excessive delays to cars of coal which are unfrozen or only partially frozen on arrival thereby causing these cars also to become deeply frozen; that the transshipment of coal from railroad cars to vessels has been drastically reduced because of these conditions; that the B&O and C&O are unable to supply sufficient cars to coal mines, thereby forcing some mines to close or severely to curtail operations resulting in the unemployment of coal miners, railroad employees and others engaged in the mining and transporting of coal; that several thousand carloads of coal awaiting movement are being stored at points as far distant as 300 miles from the ports; that such practices are resulting in serious congestion and are interfering with the normal flows of other types of traffic; that the prompt unloading of coal less deeply frozen or unfrozen without regard to the normal sequence of unloading will enable the B&O and C&O to reduce the backlog of cars awaiting unloading, thereby making these cars available to shippers and reducing congestion at various points between the coal fields and the ports; that the severity of the operating and car supply problems caused by the continued attempt to unload frozen coal on the normal sequential basis requires immediate modification; that in the opinion of the Commission an emergency exists; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1256 The Baltimore and Ohio Railroad Company and the Chesapeake and Ohio Railway Company authorized to select certain cars of coal to be unloaded by port coal dumping machines.

(a) The Baltimore and Ohio Railroad Company (B&O) and The Chesapeake and Ohio Railway Company (C&O), be, and they are hereby, authorized to select for unloading by the coal dumping machines of the B&O at Curtis Bay, Baltimore, Maryland, and by the coal dumping machines of the C&O at Newport News, Virginia, carloads of coal consigned to such ports for transshipment to vessels, which, in the judgment of the carrier, may be unloaded more promptly than other carloads of coal which are more deeply frozen regardless of the normal sequence of unloading.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Effective date.* This order shall become effective at 12:01 a.m., January 19, 1977.

(d) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., February 28, 1977.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Lewis R. Teeple, and Thomas J. Byrne.

ROBERT L. OSWALD,
Secretary.

Title 50—Wildlife and Fisheries

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 263—UNITED STATES STANDARDS FOR GRADES OF FISH FILLETS

Subpart A—United States General Standards for Fish Fillets

The National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), proposes to issue interim regulations to amend Title 50, Code of Federal Regulations, by the addition of a new Subpart A to Part 263. The purpose of this proposed amendment is to issue U.S. general standards for grades of fish fillets.

The scope of the proposed general standards cover fresh or frozen fish fillets of any commercial marine or fresh water species except those fillets covered by specific U.S. Standards for Grades as follows:

PART 263

Subpart B—U.S. Standards for Grades of Cod Fillets
Subpart C—U.S. Standards for Grades of Flounder and Sole Fillets
Subpart D—U.S. Standards for Grades of Haddock Fillets
Subpart E—U.S. Standards for Grades of Ocean Perch and Pacific Ocean Perch Fillets

The intent of the proposed general standards is to allow for the systematic differentiation of the quality of fish fillets into three categories, U.S. Grades A, B, and C, and subsequently to permit identification of such quality levels on the product or product label for the benefit of the consumer and the industry.

Issuance of general standards is expected to facilitate trade in fish fillets of all commercial species, not just those currently covered by specific standards. This will allow consumers to select purchases of any fish fillet on the basis of identified quality.

It is the policy of the Department of Commerce, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections with respect to the proposed amendments on or before February 28, 1977, to the Director, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C. 20235.

Because of the high level of interest expressed for the availability of this document, NMFS intends to allow the use of the proposed interim general standards for fish fillets in its voluntary program of fishery products inspection and certification commencing on January 25, 1977.

The amendments are proposed pursuant to 16 U.S.C. 742e; D.O.O. 25–5A, subsection 3.01 K(A); and D.O.O. 25–5B, section 12.

Accordingly, Title 50 Chapter II, Part 263 of the Code of Federal Regulations is hereby proposed to be amended by the addition of a new Subpart A to read as follows:

Subpart A—U.S. General Standards for Grades of Fish Fillets

Sec.
263.101 Scope and product description.
263.102 Product forms.
263.103 Grades.
263.104 Grade determination.

AUTHORITY: 16 U.S.C. 742e; D.O.O. 25–5A, subsection 3.01K(A); and D.O.O. 25–5B, section 12.

Subpart A—U.S. General Standards for Grades of Fish Fillets

§ 263.101 Scope and product description.

This standard shall apply to fillets of fish that are fresh or frozen of any species suitable for use as human food and processed and maintained in accordance with good manufacturing procedures. It does not apply to products covered by Subparts B, C, D, and E of Part 263. Fillets are slices of fish of irregular size and shape which are removed from the carcass by cuts made parallel to the backbone and sections of such fillets cut so as to facilitate packing.

§ 263.102 Product forms.

(a) *Types.*
(1) Fresh.
(2) Frozen individually (IQF); glazed or unglazed.
(3) Frozen solid packs; glazed or unglazed.
(b) *Styles.* (1) Single.
(i) Skin-on.
(ii) Skin-on scaled.
(iii) Skin-on (white side only).[1]
(iv) Skin-off (skinless).
(2) Butterfly.

The fillets may be labeled as boneless, provided that boning has been completed.

§ 263.103 Grades.

(a) U.S. Grade A. Fish fillets shall (1) Possess good flavor and odor characteristic of the species and
(2) Comply with the limits for defects for U.S. Grade A quality as outlined in § 263.104.

(b) U.S. Grade B Fish fillets shall. (1) Possess reasonably good flavor and odor characteristic of the species and
(2) Comply with the limits for defects for U.S. Grade B quality in accordance with § 263.104.

(c) U.S. Grade C. Fish fillets shall. (1) Possess minimal acceptable flavor and odor characteristic of the species with no objectionable off-flavors or off-odors and
(2) Exceed the limits for defects for U.S. Grade B quality in accordance with § 263.104.

§ 263.104 Grade determination.

(a) *Procedures for grade determination.* The grade shall be determined by evaluating the product in the frozen, and/or thawed, and cooked states. Each defect is classified as to its relative severity as minor, major, or serious in accordance with paragraphs (d), (e), and (f) of this section. Odor and flavor are evaluated in accordance with paragraph (c) of this section. Tolerance for the various defects is set for each grade classification according to group species.

(b) *Sampling.* Sampling is to be done in accordance with the Regulations Governing Processed Fishery Products, Title 50, Chapter II, Subchapter G, § 260.61, Tables II or V, where applicable. When sampling for Military procurement, sampling shall be in accordance to Military Standard 105. The sample unit shall be the container and its entire contents for containers up to 10 pounds. A representative 3 pound sample unit for containers over 10 pounds shall be used.

(c) *Evaluation of flavor and odor.* (1) Evaluation of flavor and odor on each of the sample units shall be carried out only by those trained to do so. For evaluation of the odor of raw fillets the thawed fillets should be broken and the broken flesh held close to the nose immediately to detect off odor.

(2) If raw odor evaluation indicates any non-characteristic and/or off-odors, the sample unit or parts thereof shall be cooked by any of the following methods for verification of results of raw odor evaluation:

(i) Baked method. Package the product in aluminum foil. Place the packaged product on a flat cookie sheet or shallow flat-bottom pan of sufficient size so that the packages can be evenly spread on the sheet or pan. Place the pan and frozen contents in a properly ventilated oven preheated to 400° F until the internal temperature of the product reaches 160° F.

(ii) Boil in bag method. Insert the thawed unseasoned sample into a boilable film-type pouch. Fold open end of the pouch over a suspension bar. Clamp in place to provide a loose seal after evacuating the air by immersing the pouch into boiling water. Cook the contents until the internal temperature of the product reaches 160° F.

(iii) Steam method. Wrap the sample in a single layer of aluminum foil and place on a wire rack suspended over boiling water in a covered container. Steam the packaged product until the internal temperature of the product reaches 160° F.

(d) *Examination for physical defects.* Each sample unit shall be examined for defects using the list of defect definitions that follow. Defects will be categorized as minor, major, and serious according to Table 1 of this standard.

(e) *Definition of defects in fillets.* (1) "Abnormal condition" means that the normal physical and/or chemical structure of the fish flesh has been sufficiently changed so that the usability and/or desirability of the flesh is adversely affected. It includes but is not limited to the following:

(i) Jellied—refers to the abnormal condition wherein a fish fillet is partly or wholly characterized by a gelatinous, glossy, translucent appearance.

(ii) Milky—refers to the abnormal condition wherein a fish fillet is partly or wholly characterized by a milky-white, excessively mushy, pasty, or fluidized appearance.

(iii) Chalky—refers to an abnormal condition wherein a fish fillet is partly or wholly characterized by a dry, chalky, granular appearance, and fiberglass structure.

The intensity of abnormal conditions is defined as follows:

(A) Moderate—refers to a condition that is distinctly noticeable but does not seriously affect the appearance, desirability, and/or the eating quality of the product.

(B) Excessive—refers to a condition which is both distinctly noticeable and seriously objectionable.

(2) Appearance defects—refers to the color of the fish flesh and to the degree of surface dehydration of the product.

(i) Color defects—refers to any readily discernable abnormal coloration including bruises, blood spots, browning, yellowing, and melanin spotting. Each square inch (6.5 cm^2) of affected area is counted as one instance as determined by a transparent grid of 1 inch squares.

The extent of appearance defects is defined as follows:

(A) Slight—2–4 instances.
(B) Moderate—5–6 instances.
(C) Excessive—over 6 instances.

(ii) Dehydration—refers to loss of moisture from fish fillet surfaces during frozen storage.

(A) Slight dehydration—is surface color masking affecting more than 5 percent of area which can be readily removed by scraping with a blunt instrument.

(B) Moderate dehydration—is deep color masking penetrating the flesh affecting less than 5 percent of area and requiring a knife or other sharp instrument to remove.

(C) Excessive dehydration—is deep color masking penetrating the flesh affecting more than 5 percent of area and requiring a knife or other sharp instrument to remove.

(3) Workmanship defects refers to (i) Cutting and trimming imperfections ragged edges, holes, tears, and improper or misplaced cuts. Each square inch (6.5 cm^2) of affected area is counted as one instance whether it is full or fractional. "Ragged edges" refers to the irregular or shredded appearance of the fillet edge.

(ii) Scales, fins, or pieces of fins or extraneous material.

(A) Scales (skin-off) scaled fillets—An occurrence of attached or loose scales in any sample unit up to 1 square inch (6.5 cm^2) is counted as one instance. Each additional 1 square inch (6.5 cm^2) is an additional instance.

(B) Fins—Any fin or parts of any fin up to 1 square inch (6.5 cm^2) in area shall be considered one instance of fin.

(C) Extraneous material means any piece of foreign matter on the fillet or elsewhere in the package. Each occurrence is considered one instance.

The extent of workmanship defects is defined as follows:

Slight degree—1–2 instances.
Moderate degree—3–4 instances.
Excessive degree—Over 4 instances.

(4) Bones (for Fillets not designated as boneless) refers to a bone that after the product has been cooked is capable of piercing or hurting the palate. Each area of one inch square (6.5 cm^2) which contains a bone or a cluster of bones shall be regarded as one instance of bones.

The amount of bones is defined as follows:

Slight—1 instance.
Moderate—2–4 instances.
Excessive—Over 4 instances.
If labeled boneless, no bones shall be permitted.

(5) Skin—this includes exterior skin and black membrane (belly lining).

(i) For skinless fillets, each piece of skin up to 1 square inch (6.5 cm^2) and every additional complete 1 square inch (6.5 cm^2) thereafter shall be considered an instance.

(ii) In the case of skin-on or skinless fillets, each piece of black membrane (belly lining) up to 1 square inch (6.5 cm^2) thereafter shall be considered an instance.

The amount of skin is defined as follows:

Slight degree—1 instance.
Moderate degree—2–4 instances.
Excessive degree—Over 4 instances.

(6) Size of fillets—Refers to the freedom from undesirably small pieces of fil-

[1] Flatfish only.

lets. Undesirably small shall mean any piece of fillet weighing less than 1 ounce (30 grams) per container.

Moderate degree—2 pieces.
Excessive—Over 2 pieces.

(7) "Texture defects"—Refers to the texture of the cooked fish—not characteristic of the species.

(i) Slight—fairly firm, does not form a fibrous mass in the mouth, moist but not mushy.

(ii) Moderate—moderately tough or rubbery, has noticeable tendency to form a fibrous mass in the mouth. moist but not mushy.

(iii) Excessive—excessively tough or rubbery, has marked tendency to form a fibrous mass in the mouth, or is very dry or very mushy.

(f) *Categorization of physical defects.* Instances shall be assessed on a per pound basis for physical defects, except for defects relating to abnormal conditions, texture, dehydration and sizes of fillets.

TABLE 1.—*Defect table*

Defect description	Classification		
	Minor	Major	Serious
1. Abnormal condition:			
Moderate		2	
Excessive			4
2. Appearance:			
(a) Color defects:			
Slight (2 to 4 instances)	1		
Moderate (5 to 6 instances)		2	
Excessive (over 6 instances)			4
(b) Dehydration:			
Slight moderate	1	(1)	
Moderate excessive		2	
Excessive excessive		(1)	4
3. Workmanship defects:			
(a) Cutting and trimming			
(b) Scales, fins, extraneous material:			
Slight (1 to 2 instances)	1	2	
Moderate (3 to 4 instances)		2	
Excessive (over 4 instances)			4
4. Bones:			
Slight (1 instance)	1		
Moderate (2 to 4 instances)		2	
Excessive (over 4 instances)			4
5. Skin and membrane:			
Slight (1 instance)	1		
Moderate (2 to 4 instances)		2	
Excessive (over 4 instances)			4
6. Size of fillets:			
Moderate (2 instances)		2	
Excessive (over 4 instances)			4
7. Texture:			
Slight	1		
Moderate		2	
Excessive			4

[1] Less than 5 pct.

Tolerances for various defects

Combined minor and major defects	Serious defects	Group species [1]
U.S. grade A:		
Up to 4 points	None	Groundfish.
Up to 5 points	do	Flatfish.
Up to 6 points	do	Redfish.
Up to 6 points	do	Herring and others.
U.S. grade B:		
Up to 8 points	do	Groundfish.
Up to 10 points	do	Flatfish.
Up to 12 points	do	Redfish.
Up to 12 points	do	Herring and others.
U.S. grade C: Exceeds tolerances for U.S. grade B, but is suitable for human consumption.		

[1] Groundfish (white fish) includes cusk, ocean catfish, pollock, hake, whiting, and ling. Flatfish includes Greenland turbot and halibut. Redfish includes rockfish, and sea bream. Herring and others includes sardines, pilchards, sprats, and mackerel.

(g) *Grade assignment.* Each sample unit will be assigned the grade into which it falls in accordance with the tolerance contained in Table 1 for Group Species. The grade to be assigned a lot is the grade indicated by the average of the total scores, provided the number of sample units in the next lower grade for both physical defects and flavor and odor does not exceed the acceptance number of indicated in the sampling plans contained in § 260.61.

Dated: January 17, 1977.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 1002]

[Docket No. AO-71-A72]

MILK IN THE NEW YORK-NEW JERSEY MARKETING AREA

Decision on Proposed Amendments to Marketing Agreement and to Order

A public hearing was held upon proposed amendments to the marketing agreement and the order regulating the handling of milk in the New York-New Jersey marketing area. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at New York, New York, on September 16, 1976, pursuant to notice thereof issued on August 26, 1976 (41 FR 36668).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Program Operations, on November 30, 1976 (41 FR 53346), filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein subject to the following modifications:

1. Under the heading "1. *Partial payments to producers and cooperative associations.*", three new paragraphs are added at the end of the discussion.

2. Under the heading "2. *Due dates for the payment of certain obligations.*":

a. Paragraph 4 is changed.

b. Two new paragraphs are added after paragraph 13.

c. A new paragraph is added after paragraph 17.

d. Paragraph 20 is changed.

e. Two new paragraphs are added after paragraph 21.

f. Paragraphs 22 and 23 are changed, and two new paragraphs are added after paragraph 23.

The material issues on the record of the hearing relate to:

1. Partial payments to producers and cooperatives; and

2. The dates by which payments should be made to producers and cooperatives, and to and from the producer-settlement fund.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Partial payments to producers and cooperative associations.* The New York-New Jersey order (Order 2) should not be amended to require handlers to make a partial payment for milk received from producers and cooperatives during the first 15 days of the month.

Amendments requiring partial payments for milk were proposed by a group of nine cooperatives representing about 30 percent of the market's producers. As propdsed, handlers would be required to pay not less than the preceding month's Class II price for milk received from cooperatives and producers during the first 15 days of the month. Such payments to cooperatives would be due by the 5th day of the following month and payments to individual producers would be due on the 7th day.

The witness for proponents contended that adoption of the proposal would assure a uniform and more orderly system of partial payments for all producers and Cooperative associations supplying the market. He indicated that for those producers not now receiving partial payments the order changes would reduce the period of time some must wait to be paid for at least a portion of their deliveries to handlers. The witness also contended that mandatory partial payments would eliminate certain handler inequities which he alleged exist under the voluntary partial payment practices that now prevail in the market. The spokesman asserted that such inequities contribute to market disorder by creating competitive advantages for some handlers. The witness also claimed that order-imposed partial payments would help reduce the risk of losses by cooperatives and producers if a handler became financially unable to pay for his milk receipts.

In support of partial payments, the witness pointed out that such payments are required under most other Federal orders. He contended that adoption of partial payments for the New York-New Jersey market would better align the payment provisions of Order 2 with other orders, thereby promoting greater intermarket equity for handlers, producers, and cooperative associations.

Mandatory partial payments were opposed by several handlers on the basis that most cooperatives and producers now receive partial payments at rates that generally exceed the proposed rate. The handlers contended that producers are satisfied with the current partial payment practices. The spokesman for a major cooperative association indicated that there appeared to be little need at this time for establishing prescribed partial payment procedures for the market.

The evidence adduced at the hearing indicates that most of the handlers in the market are making partial payments to producers and cooperatives that supply them milk. However, payment practices do vary. For example, various cooperatives bill handlers for partial payments on the basis of class prices, estimated class prices, or estimated blend prices. The dates on which such billings are submitted and the subsequent payments received also vary. In the case of nonmembers, some handlers make partial payments to just those producers who request them, while others make partial payments to all producers from whom they receive milk. Also, the date on which such partial payments are made may vary from handler to handler by several days.

Partial payment practices in this market clearly lack uniformity. Yet, aside from that expressed by the proponent cooperatives, there appears to be little dissatisfaction with the present voluntary arrangements. Although one handler expressed concern about handler equity, he nevertheless was opposed to having the order require partial payments. Handler spokesman otherwise did not express concern that certain handlers might gain a competitive advantage by not making partial payments, or by making such payments at lower rates than paid by other handlers. Also, the record provides no evidence that producers or cooperatives that wish to receive a partial payment for milk are unable to obtain such payments.

As pointed out by witnesses, recent legislation applicable in the State of New York is tending to result in somewhat greater uniformity of payment practices in the Order 2 market. Under the New York State Security Fund Law for assuring payments to producers, handlers who make semi-monthly payments in a prescribed manner are entitled to a reduction in the amount of the surety bond or other security filed by them in lieu of making payments to the security fund. It is recognized that this applies only to handlers receiving milk from New York producers. Nevertheless, such legislation apparently is lessening the differences in payment practices in this market.

The fact that other Federal orders require partial payments in itself provides no basis for adopting similar provisions in the Order 2 market. There was no demonstration, however, that the lack of prescribed partial payment requirements in this market is causing problems for handlers or producers because of the application of such payment requirements in other markets.

The record in this proceeding does not provide a compelling basis for concluding that partial payment provisions are es-

sential to maintain stable and orderly marketing conditions in the Order 2 market. Accordingly, such provisions should not be adopted.

In their exceptions to the recommended decision, the proponent cooperative contended that the Department erred in concluding that mandatory partial payments should not be adopted on the basis of this proceeding. They stated that because of proposed order changes that would affect the payment schedule of handlers, some handlers have indicated their intention to cease their current practice of making voluntary partial payments to cooperatives. Proponents indicated that if this alleged threat materializes handlers would then be in a position to make partial payments to nonmembers only, thereby further undermining the strength of cooperatives in this market. Also, the cooperatives argued that the Department relied on "self-serving, unsworn statements by handlers in opposition" to the partial payment proposal, and that evidence of non-uniform voluntary partial payments was disregarded.

It is recognized, as stated in the recommended decision, that volutary partial payment practices lack uniformity. This does not necessarily mean, however, that partial payments thus should be mandated by the order. In view of opposition to such provisions, their adoption should be based on a demonstrated need, which we believe is lacking. The absence of a compelling need tends to be supported by the lack of widespread support among producers in this market for the adoption of the proposal.

The alleged threats that voluntary partial payments may be discontinued do not appear in the record and thus may not serve as a basis for concluding that partial payments should be mandatory. The decision must be based, as this decision is, solely on the basis of testimony by witnesses who were under oath at the hearing.

2. *Due dates for the payment of certain obligations.* The dates by which certain payments under the order are to be made should be changed as follows: (1) Handler payments to cooperatives for milk purchased at class prices should be received by such cooperatives by the 19th day after the month in which the milk was delivered; (2) Handler payments to the producer-settlement fund should be received by the market administrator by the 21st day of the month; and (3) Payments to handlers from the producer-settlement fund should be made by the market administrator by the 22nd day of the month. If the due date for payments to or from the producer-settlement fund falls on a Saturday or Sunday or a national holiday, such payment should not be due until the next day the market administrator's office is open for public business.

The order also should be clarified with respect to the handling of producer-authorized deductions from payments for their milk, and with respect to the collection of lump-sum payments at the blend price by a cooperative on behalf of its member producers.

Handler payments to cooperatives at class prices currently are required by the 15th day of the month, and payments to and from the producer-settlement fund are due on the 18th and 20th days, respectively. Handler payments to producers and cooperatives at the uniform price, which would not be changed, are due on the 25th day of the month.

The group of nine cooperatives referred to under Issue No. 1 proposed that handlers pay cooperatives for milk purchased at class prices by the 16th day of the month following the month of delivery, rather than on the 15th day. These cooperatives also proposed that the due date for paying producers and cooperatives at the uniform price be changed from the 25th to the 22nd day of the month. Another group of cooperatives proposed that handler payments to cooperatives at class prices be due by the 19th instead of the 15th day of the month. Also, they proposed that payments to and from the producer-settlement fund be made by the 20th and 21st days, respectively, of each month, rather than on the 18th and 20th days.

In the case of both groups, the basic thrust of their proposals was a reduction in the amount of time between payments to cooperatives at class prices and payments to individual producers and cooperatives at the blend price. Presently, the time between payment dates is 10 days, the difference between the 15th and the 25th days of the month. Both groups contended that the 10-day difference in payment dates tends to provide handlers with an economic incentive to buy milk from nonmember producers rather than from cooperatives that are selling milk at class prices, since the cooperatives must be paid 10 days earlier.

While the cooperatives were in agreement on the need for reducing the 10-day difference in payment dates, the two groups proposed different sets of dates to accomplish this. The witness for the nine cooperatives indicated that producers should be paid as soon as possible and urged that the final payment date be advanced from the 25th to the 22nd day of the month. It was his position that the current deadline (the 25th) provides an unjustified extension of credit to handlers. Also, he claimed that an earlier payment date would be somewhat more in line with the payment deadlines under other Federal orders. The witness indicated, on the other hand, that the final payment date should not be advanced more than 3 days because of problems associated with adjustments in other payment dates. In this regard, he urged that payments to cooperatives at class prices be due on the 16th rather than the 15th day of the month so that handlers would have an additional day for making their payments.

Witnesses for the other cooperatives stressed that the payment dates must be structured so as to afford handlers a reasonable opportunity to comply with the regulations. They indicated that requiring payments to cooperatives at class prices and to producers at the blend price on the 19th and 25th days, respectively, would best accommodate the existing settlement arrangements in the market. They pointed out, however, that if these dates are adopted corollary changes would need to be made in the dates by which payments to and from the producer-settlement fund must be made.

The order prescribes various dates throughout the month for actions that must be completed. The present sequence begins with the announcement of class prices by the 5th day of each month. Handlers' reports of receipts and utilization must be mailed to the market administrator by the 8th day, or physically delivered to him by the 10th day. By the 15th day of the month the market administrator announces the uniform price, with his billings to handlers mailed immediately thereafter. Handler payments to cooperatives for milk purchased at class prices also are due on the 15th day. Handler obligations to the producer-settlement fund are due by the 18th, followed by payments to other handlers from the fund by the 20th. Finally, handler payments to producers are due by the 25th day of the month. It is within the context of this sequence of dates that the proposed changes must be considered.

It is necessary that the payment dates prescribed in the order allow adequate time for the required transfers of money. Otherwise, handlers could be placed in the position of being unable to comply with the order simply because the dates are not realistic in view of mailing times and other factors that affect the payment of obligations. The changes in dates adopted herein are intended to provide handlers a reasonable opportunity to comply with the order in making the required payments.

Basically, the various payment dates must be coordinated with the date for announcing the uniform price to producers. Presently, the market administrator must announce this price by the 15th day of the month. It is only then that the obligations to and from the producer-settlement fund can be determined and final payments made to producers and cooperatives.

With this announcement date for the blend price, it is not reasonable to require that payments to the producer-settlement fund be completed before the 21st day of the month. Once the uniform price has been announced, the market administrator must then notify handlers of their obligation to the producer-settlement fund. The handlers in turn must submit their payments to the market administrator. Thus, in setting the date for such payments, it is necessary that adequate recognition be given to the time needed to carry out these steps.

Customarily, both the notification to handlers and the payments to the producer-settlement fund are done by mail. Although other procedures could be used that would involve less time, it is more convenient for both the handlers and the market administrator to rely upon the mail service. This necessarily requires, then, that handlers be given until the 21st of the month to get their payments to the market administrator. Payments not received by the market administrator by the close of business on the 21st day would be considered late.

Payments to handlers from the producer-settlement fund should then be made by the market administrator by the 22nd day of the month. This will provide 3 days for handlers to receive their money from the producer-settlement fund and, in turn, make final payments to producers by the 25th day.

A group of cooperatives took exception to specifying the 21st and 22nd days of the month as the dates for making payments to and from the producer settlement fund. They would prefer the 20th and 21st days, as they proposed at the hearing, on the basis that cooperatives otherwise may not receive payments from the producer-settlement fund in time for the payments by the cooperatives to reach their member producers by the 25th of the month.

If the latter dates were adopted, cooperatives receiving class price payments from handlers would have only one day in which to make their payments to the producer-settlement fund, since such handler payments would not have to reach the cooperative until the 19th day. This would provide insufficient time for cooperatives to then get their payments to the market administrator.

The dates when payments to and from the producer-settlement fund are due occasionally will fall on weekends or holidays when the market administrator's office is not open for public business. On such occasions, the due date should be the next day that the market administrator's office is open for business. The order should provide, however, that if payments to the market administrator are so delayed, payments by the market administrator to handlers also may be delayed by the same number of days.

From a review of the various procedures just outlined, it is evident that final payments to producers and cooperatives at the blend price should not be required before the 25th day of the month. Requiring such payments at an earlier date would not permit the timely completion of the various payment procedures necessary under the order.

It is possible, however, to accommodate the desire of the cooperatives to reduce the time between payments to cooperatives at class prices and payments to producers and cooperatives at the blend price. The order requires that when a cooperative in its capacity as a handler sells milk to other handlers, it must account to the pool at the classified use value of the milk. If the value of the milk at class prices exceeds its value at the uniform price, the cooperative must pay the difference to the producer-settlement fund. It is essential, then, that the cooperative receive payment for the milk from handlers at the appropriate class prices in time to make the necessary payment to the producer-settlement fund.

As provided herein, handlers (including cooperatives) would not be required to get their payments to the market administrator until the 21st day of the month. Accordingly, cooperatives that must submit payments to the market administrator need not receive payments from their handler-buyers until the 19th of the month, rather than on the 15th as the order now provides. Under such scheduling, cooperatives should be able to make their payments to the producer-settlement fund on a timely basis. At the same time, such scheduling would reduce from 10 days to 6 days the difference in time between payments to cooperatives at class prices and final payments to producers at the blend price.

The order language accompanying the recommended decision did not specifically state that handler payments to cooperatives at class prices and to the producer settlement fund must be received by the recipients by the due date, as was indicated in the findings. The order should be specific in this regard, as reflected in the revised order language accompanying this decision.

On the basis of questions raised at the hearing relative to various payment practices in the market, certain clarifying changes should be made in the order in conjunction with the handling of the principal issues of this proceeding. The record indicates that some handlers receive milk from producers who are members of a cooperative association that is not acting as the handler for such milk. However, rather than paying the individual producers, the handler pays the cooperative an amount equal to the total amount due the individual producers at the blend price. The cooperative, in turn, distributes the funds to its member producers.

The order lacks specific provisions for the accommodation of this payment practice. Accordingly, the order should clearly specify that a cooperative may collect from handlers on behalf of its members the total amount due such producers at the blend price. Such payments should be subject to the following conditions: (1) The cooperative has been authorized by each such producer to collect payment for his milk delivered to the handler; (2) The cooperative has requested the handler in writing to make such payment to the cooperative; and (3) The cooperative has certified to the market administrator in writing that it has authority to collect payments for milk on behalf of its member producers.

At the hearing a witness suggested that lump-sum payments to cooperatives at the blend price be required two days earlier than the final payments to individual producers. He contended that cooperatives need to receive such payments from handlers in time for the cooperatives to make payments to members on the same date that proprietary handlers pay their producers.

The order should provide that payments to cooperatives that are collecting on behalf of their members be made by the same date that final payments are due individual producers—the 25th day of the month. As indicated earlier, the market administrator's payments to handlers from the producer-settlement fund would not be required until the 22nd day. In most cases, this schedule would not provide sufficient time for handlers to receive their payments from the market administrator and pay the cooperatives on the 23rd of the month.

Cooperatives took exception to this conclusion in the recommended decision. They claimed that cooperatives need to receive their money from handlers by the 25th day to cover the cooperatives' payments to producers on that date. Otherwise, they contended, cooperatives may need to seek short-term commercial loans in order to pay their member producers on the 25th when other producers in the market are paid.

With the other payment dates adopted herein, there is no practicable way to provide assurance that cooperatives will receive lump-sum payments by the 25th of the month. Under the adopted timetable, it is possible that payments to handlers from the producer settlement fund might not be made until the 24th. This could occur when the due date for making payments to the producer settlement fund falls on a Saturday. In such situations, payment to the market administrator would not be due until Monday, the 23rd, and payments from the producer settlement fund would then be due on the 24th. Handlers should not be required to pay cooperatives in advance of the date that the handlers themselves can expect to receive payment from the market administrator.

Another issue raised at the hearing was the procedure for handling producer-authorized deductions from blend price payments to producers. Handlers are making payments to third parties on behalf of producers and deducting such amounts when making payment for milk received from the producers. Amounts covering the value of supplies purchased from the handler also are being deducted from producer payments. The order lacks specific language concerning the treatment of such deductions. Accordingly, the order should clearly provide for producer-authorized deductions. Deductions for assignments and supplies should be allowed, however, only if the producer has authorized the handler in writing to make such deductions and such authorization is retained by the handler for verification by the market administrator.

Exception was taken by cooperatives to the statement in the recommended decision that handlers are expected to pay the amounts deducted from producers' returns to the assignees by the time payment is made to producers. The cooperatives took the view that a few days of leeway in this regard is reasonable because rigid compliance with the payment date would interfere with the scheduled use of computers in preparing payments to producers. Moreover, it was claimed that the order language does not reflect this expectation.

A producer's written authorization or a handler to deduct monies for payment to an assignee does not relieve the handler of his obligation to make full payment or milk received from producers by the date specified in the order. The

minimum payment requirement of the order would not be fully met if handlers were permitted to delay payments to assignees to some time after such monies otherwise would be due producers. If such such requirements are not met, inequities may arise among competing handlers. Thus, the date set forth in the order for handler payments to producers must apply also to the payment by handlers of third-party assignments. This is implied in the order language prescribing the payment requirements of handlers.

In conjunction with other changes adopted herein, the date by which handlers are required to pay their administrative assessment to the market administrator also should be changed. Such payments are now due on the 18th day of the month, which is the same date that handler payments to the producer-settlement fund are now due. As described earlier, the latter payments would not be due under the changes adopted herein until the 21st day of the month. No purpose would be served by requiring handlers to make separate payments to the administrative expense and producer-settlement funds on different dates. Accordingly, payments to the administrative expense fund should be due on the same date that payments to the producer-settlement fund are due.

In conjunction with other proposed changes to the section of the order dealing with class prices, it also was proposed that a proviso applicable to the Class I-A milk price be removed because it no longer is operative.

The proviso, adopted effective February 11, 1975, provided that the Class I-A price for the remainder of February 1975 and for March 1975 be based on the basic formula price for the preceding month, rather than for the second preceding month. The proviso's application thus was limited to that period of time. Since no purpose would be served by retaining order language no longer in effect, the proviso should be delcted.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conculsions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

At the hearing, a representative of several handlers requested a deferral of the decision on the issues being considered so that handlers could have an opportunity to submit other proposals for consideration. This request was renewed in the handlers' brief.

The record in this proceeding does not demonstrate a need for granting the request. There has been no showing of how the submission of additional proposals would be helpful to a full review of the issues under consideration. Also, the handlers in question have not demonstrated how they would be adversely affected should the Department not grant their request. Accordingly, their request is denied.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on Exceptions

In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents, a Marketing Agreement regulating the handling of milk, and an Order amending the order regulating the handling of milk in the New York-New Jersey marketing area which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which is published with this decision.

Referendum Order To Determine Producer Approval; Determination of Representative Period; and Designation of Referendum Agent

It is hereby directed that a referendum be conducted and completed on or before the 30th day from the date this decision is issued, in accordance with the procedure for the conduct of referenda (7 CFR 900.300 et seq.), to determine whether the issuance of the attached order as amended and as hereby proposed to be amended, regulating the handling of milk in the New York-New Jersey marketing area is approved or favored by producers, as defined under the terms of the order (as amended and as hereby proposed to be amended), who during the representative period were engaged in the production of milk for sale within the aforesaid marketing area.

The representative period for the conduct of such referendum is hereby determined to be August 1976.

The agent of the Secretary to conduct such referendum is hereby designated to be Norman K. Garber.

The United States Department of Agriculture has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Signed at Washington, D.C., on January 19, 1977.

RICHARD L. FELTNER,
Assistant Secretary.

Order amending the order, regulating the handling of milk in the New York-New Jersey marketing area.

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the New York-New Jersey marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure (7 CFR Part 900).

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is, therefore, ordered that on and after the effective date hereof the handling of milk in the New York-New Jersey marketing area shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

The provisions of the proposed marketing agreement and order amending the order contained in the recommended decision issued by the Deputy Administrator, Program Operations, on November 30, 1976, and published in the FEDERAL REGISTER on December 6, 1976, (41 FR 53346) shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein, subject to the following modifications:

Changes are made in §§ 1002.50a (introductory text) and 1002.85.

1. In § 1002.50a, the introductory text and paragraph (a) are revised to read as follows:

§ 1002.50a Class prices.

For pool milk received during each month from dairy farmers or cooperative associations of producers, each handler shall pay per hundredweight not less than the prices set forth in this section, subject to the differentials and adjustments in §§ 1002.51 and 1002.81. Any handler who purchases or receives milk during any month from a cooperative association of producers which is also a handler but which does not operate the plant or the unit receiving the milk from producers shall pay the cooperative association on or before the 19th day of the following month for such milk at not less than the class prices pursuant to this section, subject to the differentials and adjustments set forth in §§ 1002.51, 1002.81 and 1002.82(b) applicable at the location where the milk was received from producers. Any handler who purchases or receives milk during any month from a cooperative association of producers which is also a handler and which operates the plant or the unit receiving the milk from producers shall pay the cooperative association on or before the 19th day of the following month for such milk at not less than the class prices pursuant to this section, subject to the differentials and adjustments set forth in §§ 1002.51, 1002.81, and 1002.82(b) applicable at the plant at which the milk was first received. Such payments to a cooperative association shall be deemed not to have been made until the payments have been received by the cooperative association.

(a) For Class I-A milk the price shall be the basic formula price for the second preceding month plus $2.40.

* * * * *

2. In § 1002.80, paragraphs (a), (b), (c), and (d) are redesignated as paragraphs (c), (d), (e), and (f), respectively, the introductory text of the section is designated as paragraph (a) and is revised, and a new paragraph (b) is added to read as follows:

§ 1002.80 Time and rate of payments.

(a) On or before the 25th day of each month, each handler shall make payment pursuant to paragraphs (b), (c), (d), (e), and (f) of this section to each producer for all pool milk delivered by such producer during the preceding month at not less than the uniform price, subject to the following adjustments:

(1) Appropriate differentials set forth in §§ 1002.81 and 1002.82;

(2) Proper deductions for the month that were authorized in writing by producers from whom the handler received milk; and

(3) For milk received in a bulk tank unit, there may be deducted, as proper and as authorized in writing by the producer, or by a cooperative association authorized to act on behalf of such producer, a tank truck service (transportation) charge of up to 10 cents per hundredweight, which in no event shall exceed in the case of Class II milk on which a transportation credit is applicable pursuant to § 1002.55 the actual transportation costs in excess of 10 cents and otherwise actual transportation costs, and in either circumstance only to the extent transportation was actually provided by the handler or at his expense. Any such deduction with respect to bulk tank milk must be made by the handler not later than the date on which the producer is required to be paid for the milk involved. If authorization for such deduction is canceled by the producer or by the cooperative by notifying the handler in writing, such cancellation shall be effective on the first day of the month following its receipt by the handler.

(b) Upon receipt of a written request from a cooperative association which the market administrator determines is authorized by its producer-members to collect payment for their milk, each handler, on or before the date on which the payments are otherwise due individual producers, shall pay the cooperative association for milk received during the month from the producer-members of such association an amount equal to not less than the total amount otherwise due such producer-members as determined pursuant to paragraph (a) of this section.

* * * * *

3. Section 1002.85 is revised to read as follows:

§ 1002.85 Payments to the producer-settlement fund.

On or before the 21st day of each month, each handler shall make full payment to the market administrator of the debit balance, if any, of such handler shown on the last statement of account rendered pursuant to § 1002.84. Payments to the market administrator shall be deemed not to have been made until such payments have been received by the market administrator. If the date by which such payments must be received by the market administrator falls on a Saturday or Sunday or a national holiday, such payments shall not be due until the next day that the market administrator's office is open for public business.

4. Section 1002.86 is revised to read as follows:

§ 1002.86 Payments out of the producer-settlement fund.

(a) On or before the 22nd day of each month, the market administrator shall make payment to each handler of the credit balance, if any, of such handler shown on the last statement of account rendered pursuant to § 1002.84. If the date by which such payments are to be made falls on a Saturday or Sunday or a national holiday, such payments need not be made until the next day that the market administrator's office is open for public business. If payments to the producer-settlement fund under § 1002.85 were delayed because the due date fell on a Saturday or Sunday or a national holiday, payments under this paragraph may be delayed by the same number of days.

(b) If the balance in the producer-settlement fund is insufficient to make the full payment required under paragraph (a) of this section, the market administrator shall reduce uniformly the payments to each handler and shall complete such payments as soon as the necessary funds are available. No handler who, on the 25th day of the month, has not received such payments in full from the market administrator shall be deemed to be in violation of §§ 1002.80 through 1002.82 if he reduces his total payments to producers for milk delivered by such producers during the preceding month by not more than the amount of the reduction in payment from the producer-settlement fund.

5. Section 1002.90 is revised to read as follows:

§ 1002.90 Payment by handlers.

As his pro rata share of the expense of administration of this part, each handler shall, on or before the date specified for making payment to the producer-settlement fund pursuant to § 1002.85, pay to the market administrator a sum not exceeding 4 cents per hundredweight on the total quantity of pool milk received from dairy farmers at plants or from farms in a unit operated by such han-

dler, directly or at the instance of a cooperative association of producers and on the quantity for which payment is made pursuant to § 1002.70(d)(2), the exact amount to be determined by the market administrator subject to review by the Secretary. This section shall not be deemed to duplicate any similar payment by any handler under an order issued by the Commissioner of Agriculture and Markets of the State of New York, or the Director of the Division of Dairy Industry of the New Jersey Department of Agriculture, with respect to the marketing area. Whenever verification by the market administrator discloses an error in the payment made by any handler, such error shall be adjusted not later than the date next following such disclosure on which payments are due pursuant to this section.

Agricultural Marketing Service

[7 CFR Part 1260]

[Docket No. BRIA-1]

BEEF RESEARCH AND INFORMATION

Recommended Decision and Opportunity To File Written Exceptions

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision concerning a proposed national research and information order for cattle, beef, and beef products.

Interested persons may file written exceptions to the recommended decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C. 20250, no later than February 24, 1977. The exceptions should be filed in quintuplicate. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours.

This notice of filing of the recommended decision and of opportunity to file exceptions thereto is issued pursuant to the provisions of the Beef Research and Information Act (7 U.S.C. 2901 et seq.) and the applicable rules of practice and procedure (7 CFR Part 1260) governing proceedings to formulate an order under the Act, which were published in the FEDERAL REGISTER, June 23, 1976, 41 FR 25881.

PRELIMINARY STATEMENT

The public hearing, on the record of which the recommended decision was formulated, was held at Dallas, Texas, September 14 and 15; Pittsburgh, Pennsylvania, September 28; Atlanta, Georgia, September 30; Denver, Colorado, October 5 and 6; San Francisco, California, October 7; and Des Moines, Iowa, October 12 and 13, 1976. Briefs, proposed findings, and conclusions were received until November 15, 1976. This hearing was held pursuant to notice thereof which was published in the FEDERAL REGISTER, August 17, 1976, 41 FR 34772.

MATERIAL ISSUES

The material issues presented on the record of hearing are as follows: (1) The need for the Proposed Research and Information Order to effectuate the declared policy and purposes of the Act; and (2) The determination of the specific terms and provisions of the Proposed Order necessary to effectuate the declared policy and purposes of the Act, including:

(a) Definitions of terms used therein which are necessary and incidental to achieve the objectives of the Order;

(b) The establishment, maintenance, composition, powers, duties, procedures, and operation of a Board which shall be the administrative agency for this Order;

(c) The authority for establishing and financing the development and implementation of programs and projects of research, information, education, and promotion to improve, maintain, and develop domestic and foreign markets for cattle, beef, and beef products;

(d) The establishment and maintenance of an effective working relationship with State beef boards, beef councils, or other beef promotion entities organized to conduct programs with objectives similar to those of this Order;

(e) The procedures to levy assessments on the sales of cattle, to make refunds of assessments to producers who request them, and to incur necessary expenses;

(f) The provisions concerning record-keeping requirements and reports by slaughterers; and

(g) The need for additional terms and conditions as set forth in §§ 1260.181 through 1260.187 of the Order which are necessary to effectuate provisions of the Act.

FINDINGS AND CONCLUSIONS

Cattle are produced in all 50 States and cattle, beef, and beef products move in interstate and foreign commerce and those which do not move in such channels of commerce directly burden or affect interstate commerce of cattle, beef, and beef products. The record is replete with testimony that such commerce in cattle, beef, and beef products is commonplace. Therefore, it is found that the right to exercise Federal jurisdiction with respect to the Order set forth herein is established.

The findings and conclusions on the material issues are based on the evidence presented at the hearing and the record thereof and are as follows:

(1) *Need for the Order.* Beef is the major source of protein in the diet of most U.S. citizens. Beef supplies are currently at record levels and U.S. per capita beef consumption in 1976 totaled more than 8 pounds above the former record established in 1975. Large increases in beef output during 1975 and 1976 were due largely to unusually high cow and heifer slaughter. During the past 3 years, beef producers have been caught in a severe price-cost squeeze. In response to this extremely unfavorable situation, cattlemen have reduced cow herds, sharply curtailing the nation's production potential for future years.

The U.S. cattle cycle typically encompasses a period of approximately 10 years, which usually includes a period of about 7 years of increasing numbers followed by about 3 years of decline. There is a need to eliminate or at least moderate the recurring 10-year cattle cycle. A more stable beef production pattern would result in less variation in prices to consumers and more consistent returns to producers. Funding from assessments under this Order could be used to provide improved market information at all levels, which could aid the nation's nearly 2 million producers in being more responsive to consumer demand.

During the past 50 years the U.S. cattle herd has more than doubled, but inventory growth has been marked by alternate periods of expansion and liquidation. The number of cattle and calves on U.S. farms and ranches grew from 57 million head in 1928 to a peak of nearly 132 million head on January 1, 1975. Numbers have consistently peaked at about 10-year intervals followed by inventory declines of up to 12 percent in succeeding years. U.S. per capita consumption of beef and veal during the past 50 years has ranged from about 53 pounds in 1932 to an estimated 132 pounds during 1976. However, as herds were being rebuilt following periods of inventory liquidation, per capita consumption declined as much as 22 percent from the level attained in an earlier year.

These large fluctuations are caused by large numbers of individual cattle producers responding independently but similarly to price incentives. Cattlemen tend to retain larger numbers of cows and heifers for breeding when calves are selling at profitable levels. This practice tends to restrict concurrent beef supplies while increasing beef output prospects for future years. In the early stages of an expansion phase of the cattle cycle, inventories grow but slaughter supplies remain relatively stable as increased retention of females tends to offset the effect of larger calf crops. Eventually, however, the full impact of a larger breeding herd is reflected in larger slaughter and prices begin to decline. As profits turn to losses, cow and heifer slaughter increases, further boosting beef output. The increased supplies soon put additional pressure on prices and significant losses to producers result. After the cow herd is diminished and calf crops decline, however, smaller beef supplies and higher prices return. With improved profitability the expansion phase of the cycle begins anew.

Biological factors are a major cause of alternate periods of overproduction and underproduction in the beef industry. Roughly 3 years transpire between the time a producer decides to retain a heifer for replacement and the date the beef from her offspring is purchased by the consumer. Thus, unprofitable price levels for a sustained period do not result in a reduction in beef output until a few years later. Losses continue until the adjustment can be accomplished.

Changes in cow numbers are a major determinant of future beef supplies and cattlemen favor an improved cow-herd size awareness program. Cow numbers increased rapidly during the early 1970's, jumping from 48 million head on January 1, 1969, to a peak of 56.7 million head on January 1, 1975. From January 1, 1972, through January 1, 1975, cow numbers grew at an annual rate of 4 percent, or over 2 million head per year. As usually happens when the rate of expansion exceeds the normal year-to-year increase in demand for beef, which is 1 to 2 percent, excess beef output and unprofitable price levels resulted.

As losses to producers mounted during 1974 and 1975, cow slaughter rates increased dramatically and numbers of heifer replacements entering the herd dropped sharply. Cow slaughter reached a record of almost 12 million head in 1975, nearly doubling the 6 million head killed during 1973. The cow inventory dropped nearly 2 million head during 1975 to 54.8 million on January 1, 1976. Since cow slaughter during 1976 totaled almost 11 million head and the number of heifer replacements continued to decline, another significant drop in cow numbers will undoubtedly be reflected in the January 1, 1977, inventory.

The downturn in the total cattle inventory during the current cycle is unusually sharp, reflecting the severe financial stress the cattle industry experienced during 1974–1976. On January 1, 1976, cattle numbers totaled 128 million head, down nearly 4 million head from peak levels a year earlier, and the January 1, 1977, inventory is expected to total only 120–122 million head. With the exception of several months during 1975, the cattle feeding segment of the industry has suffered severe losses, often over $100 per head marketed, since late 1973. Cow-calf producers generally have sold calves and yearlings for less than the cost of production since mid-1974. As a result, many cattlemen have been forced into bankruptcy and those remaining have sharply higher mortgages on their farms and ranches and greatly increased overall debt.

One significant measure of the turnaround experienced by the industry was the drop in inventory value. From January 1, 1974, to January 1, 1975, the average value per head of cattle in the United States dropped 46 percent from $293 to $159, and the value of the total inventory dropped from over $37 billion to only $21 billion.

Cattle producers have repeatedly indicated that they want a self-help program and not Federal monetary assistance. There are no price support programs for cattle or beef to moderate the cyclical ups and downs. A desirable goal of the programs made possible by assessments under the Order is to assist in alleviating the problems which result from the cyclical nature of beef production by providing improved information to aid in making production decisions.

Beef producers have been conducting beef education, information, and promotion programs for a number of years, often relying on either voluntary or mandatory State collection systems. Funding levels in relation to sales value are lower than expenditures for many other raw agricultural products, and are extremely low when compared to expenditures for competing manufactured food products. Twenty-eight major beef producing States have organizations which collect funds, primarily for State promotion activities. Some of the money collected at the State level is forwarded to the National Live Stock and Meat Board to be used, along with other voluntary contributions, in national education, information, promotion, and research efforts. But such efforts have been relatively small in size and scope due to funding limitations.

The Proposed Order would provide the industry with sufficient funding to carry out a coordinated program of education, promotion, and research for the entire cattle and beef industry. Such a program, operated on a national basis, would minimize duplication of effort among the various State groups and would be far more efficient and effective than previous fragmented programs.

Numerous areas of research concerning cattle and beef have potential for benefiting both producers and consumers but presently lack funding. There are identifiable research needs for production research, marketing research, product or market research, and foreign market research. Examples of some current research needs are:

Production research. Studies should be designed to speed genetic improvement of the nation's cattle herds and to improve the rate of gain on grass and in the feedlot. Gaining a clearer understanding of protein synthesis would provide a step toward improving the growth process. Increasing the emphasis on finding solutions to animal health problems, such as brucellosis and internal parasites, could lead to reduced death losses and lower production costs.

Marketing research. More efficient beef marketing procedures and techniques would not only benefit producers but would also help consumers obtain quality beef at reasonable prices. Improved efficiency and reductions in the cost of distribution, cost reduction in the labor-intensive processing segment of the industry, and reducing product loss in the distribution chain could be studied to help reach that goal.

Product or market research. There is a need to more accurately identify the quantities and types of cattle and beef products desired by the retail customer. Methods of marketing beef have not kept pace with consumer desires and buying habits and new beef products should be developed to meet the changing consumer preferences. With a growing share of meals eaten away from home, appropriate beef products must be developed to meet the needs of this growing market. Studies should be initiated to find beef products and cooking methods consistent with the limited time available for meal preparation. Also, research directed toward developing processing methods to produce more desirable products from the less desirable portions of the carcass is necesary to more efficiently utilize the whole carcass.

Foreign market research. Determining the wants and needs of potential foreign customers for beef and methods to fulfill those needs is necessary for effective foreign market development. U.S. exports of beef and veal in recent years have been less than one-half of 1 percent of commercial production while comparable U.S. imports averaged 7 to 8 percent of commercial production. The United States enjoys a competitive advantage over all other nations in the production of large quantities of high-quality beef. With increasing affluence around the world, there is considerable potential for substantial increases in U.S. beef exports if the appropriate market knowledge is developed.

The record reveals a need to communicate factual information to consumers about the nutritional properties of beef. Consumers understand that beef is high in protein, but often do not understand its many other significant contributions to health needs. For instance, there are high iron and B vitamin contents in beef, and the life-saving drug insulin is a beef byproduct. Educational programs could provide information to consumers on many topics concerning beef, with particular attention directed to those issues involving nutrition and health. Nutrition and health information developed for use in elementary schools has been well received. However, funds to reproduce this information and to distribute it to schools have been limited; consequently, only a small percentage of the nation's schools have had access to this information. Similar funding problems have limited the distribution of meat nutrition, purchasing, and cooking information to high school and college classes in nutrition, food, and home economics.

Adoption of a beef research and information order has been endorsed in concept by 81 State and national cattle organizations. The record evidence establishes a need for financing research to find more efficient methods to produce and market a relatively stable supply of beef at fair prices to consumers with reasonable returns to producers. The evidence also shows that research and information funded under the Order will be beneficial to the beef industry and consumers as well. Consumers would benefit from the increased efficiency in production and marketing, a more stable supply of beef, more stable beef prices, and increased nutrition and health information.

It is concluded from the record evidence that the beef industry needs a research and information program and that the Order, by providing such a program, would effectuate the declared policy of the Act.

(2) *Terms and provisions of the Order.*

(a) *Definitions.*—"Act" is defined to provide the correct legal citation for the statute pursuant to which the Order may be put into effect and operated. The inclusion of this definition makes it unnecessary to refer to such law and statutory citation each time reference is made to the Act in the provisions of the Order. "Act" also is defined to include any amendments that may be made to the Beef Research and Information Act (7 U.S.C. 2901 et seq.).

"Fiscal Period" is defined as the 12-month period corresponding with the USDA's fiscal year. The Beef Board is required to submit to the Secretary, for his approval, budgets on a fiscal period basis containing anticipated expenses and disbursements in the various areas expenditures are authorized. The Board's fiscal period is the same as USDA's fiscal year. However, the Beef Board, with the approval of the Secretary, may select some other 12-month period as its fiscal year if necessary.

"Beef Board" or "Board" is defined as the administrative agency or body charged by the Act with the duty to administer the Order. Producer assessments finance the activities authorized and the administrative agency is composed of beef producers, selected by the Secretary from nominations submitted by eligible organizations, associations, general farm organizations, cooperatives, or unaffiliated producers.

The Board shall elect an "Executive Committee" of 7 to 11 Board members who are generally representative of the cattle industry. This Committee has the authority to hire a staff to handle administrative matters, to make policy recommendations to the Board, and to administer the terms of the Order under the direction of the Board and within the policies determined by the Board.

"Producer" is defined in the Order to identify the persons responsible for payment of assesments under the Order. In addition, producers have the right to vote in any referendum on the Order and are eligible to serve on the Board and to nominate others to serve on the Board.

The term "producer" includes any person who owns or acquires ownership of cattle other than one who acquires cattle solely for the purpose of slaughter, except that a person may not qualify as a producer based on sales transactions in which his only share in the proceeds is a sales commission, handling fee, or other fee. However, the period of ownership may be short. For example, a cattle trader or any other person who assumes ownership of cattle, even if the cattle are resold the same day, would qualify as a producer.

The term "producer" does not include a person who acquires cattle solely for the purpose of slaughter. Packers who purchase all their cattle solely for the purpose of slaughter are performing no producer function and do not qualify as producers, even though it is recognized that in normal trade practice such cattle sometimes remain in the feedlot or packer's lot for several days before slaughter. However, a cattle slaughterer or packer who has cattle on feed or buys or owns cattle for purposes other than immediate slaughter qualifies as a producer.

"Producer organization" or "eligible organization" is defined to include producer organizations, associations, general farm organizations, and cooperatives representing cattle producers in a geographic area. The final determination of whether an organization is an eligible organization rests with the Secretary of Agriculture.

"Research" is defined to include any type of systematic study or investigation intended to advance the desirability, marketability, production, or quality of cattle, beef, or beef products. It includes market research, production research, and other basic research as well as the evaluation of the relative effectiveness of such studies and investigations.

The Board may enter into contracts, with the approval of the Secretary, for the purpose of carrying out authorized activities. The term "Contracting Party" is defined to include any individual, group of individuals, partnership, corporation, association, cooperative, or other entity, public or private, with which the Beef Board may enter into a contract or agreement in the manner provided in the Order.

"Marketing year" means the calendar year ending on December 31 unless some other consecutive 12-month period is designated by the Board and approved by the Secretary. The calendar year is the appropriate period to be designated the marketing year since most marketing statistics applicable to the Order are maintained on a calendar year basis.

"Part" refers to 7 CFR Part 1260, containing rules, regulations, orders, supplemental orders, amendments, and similar matters concerning the Beef Research and Information Act. The term "subpart" is used when referring to a portion or segment of Part 1260.

(b) *Beef Board.* A "Beef Board" is established to act as the administrative body for this Order as specified in Section 8 of the Act. It is composed of producers appointed by the Secretary from nominations submitted either by eligible producer organizations in specified geographic areas or in a direct manner by producers not represented by eligible organizations in such areas. Each member has an alternate to serve in his stead as necessary.

Membership. Members of the Beef Board shall be selected to reflect the varied character of the cattle and beef industry. Cattle are produced in all 50 States, although the concentration varies greatly in different States as does the position of producers in the production chain. Some are engaged primarily in the production of calves from either commercial or purebred herds, while another large section of the industry is involved in feedlot operations. Many producers keep only dairy animals which are used primarily for the production of milk, although such operations also add substantially to the beef supply. There are many combinations of these different functions and related interests in individual production units. There also is a wide range in the size of production units.

The Act specifies that the Beef Board shall consist of not more than 68 members. A Board of this size was constituted so that there may be sufficient representation for all geographic areas and for the multifarious interests of producers. It is intended that the result will be widespread participation of producers in the management of the programs authorized by the Act and the Order.

The stated purpose of the Act is to enable cattle producers, through a Board composed of producers, to establish, finance, and carry out a coordinated program of research, producer and consumer information, and promotion to improve, maintain, and develop markets for cattle, beef, and beef products.

There was testimony recommending that consumers should be included as members of the Beef Board. The legislative history of the Act demonstrates that Congress considered this point extensively. However, the final version of the Act specifies that the Beef Board shall be composed of producers. The conference report indicates that Congress intended for the Beef Board to seek consumer input and it was recommended that the Secretary appoint five consumer representatives to serve in advisory capacities. Record evidence indicates that such a practice would be advisable in order to obtain consumer views on programs of the Board.

A partnership, cooperative, corporation, or similar business entity is to be considered a producer for the purpose of determining who is required to pay assessments and who is eligible to vote in any referendum held pursuant to the Act. However, only individual producers will be nominated and appointed to membership on the Beef Board.

There was testimony proposing that only producers who receive a majority of their income from the production of cattle should be eligible to serve on the Beef Board. Further, it was recommended that elected or appointed local, State, or Federal government officials and executives or officers of organizations which contract with the Beef Board should be prohibited from serving as members of the Board. Rather than outlining such restrictions on Board membership in the Order, producers in selecting nominees and the Secretary in appointing Board members should ascertain that they are active, representative producers.

Term of office. The term of office for Board members and their alternates is 3 years as provided in the Act. Such a period of time is necessary to permit a member to become familiar with the programs and operations of the Board and to make an effective contribution. Initial appointments shall be, proportionately, 1, 2, and 3 year terms, giving staggered terms for Board members to prevent the possibility that all terms would expire at the same time and providing continuity of program efforts and program direction. The Secretary shall determine which initial members shall serve for 1, 2, and 3 year terms on a random basis, though assuring that the terms of members from a geographic area with multiple representation expire at different times.

No member may serve more than 6 consecutive years on the Beef Board, except that members appointed to the initial Board for terms of 1 or 2 years are eligible to serve 2 additional terms. This provision would serve to utilize the experience acquired and enhance the development of an effective program.

Certification of organizations. Record evidence shows that there are many organizations representing cattle producers throughout the country. The Secretary is charged with the responsibility to set the criteria to be used in determining the eligibility of organizations to nominate members of the Board and has the final authority to make the determination.

Representatives of general farm organizations expressed concern about whether such organizations would be eligible to nominate members to the Board. Further testimony suggested that accurate information necessary to establish the eligibility of general farm organizations to nominate members would not be available, such as the proportion of members producing cattle and the number of cattle they produce. However other testimony indicates that such organizations normally could provide the data required to meet the needs for certification. It is concluded that general farm organizations should be certified if they meet the criteria established.

Record testimony shows that many of the producer organizations intending to nominate Board members are State organizations, but there also may be some regional organizations participating. A regional organization should be certified to nominate members to the Board in any geographic area in which it meets the established criteria. Similarly, a State organization should be certified to nominate members in a geographic area, even though the area may include other States, if it meets the established criteria.

An organization may file a request for certification to nominate members to the Board at any time. However, the certification of an organization should not be open-ended, since the membership, program objectives, geographic area covered, and other characteristics of an organization may shift. Accordingly, an organization is required to request recertification each time it wishes to nominate a member of the Board.

Nominations. Orderly procedures are established for producer organizations, associations, general farm organizations, cooperatives, and producers not represented by such organizations within a geographic area, as determined by the Secretary, to submit nominations for Board members and alternates to the Secretary. It is essential that the nominations and appointments be completed in a timely fashion, but adequate time must be provided for producers to consider and select their nominees and for the Secretary to make the appointments. A final Order establishing a Beef Board becomes effective only upon approval by producers voting in a referendum. Nominations shall be submitted to the Secretary within 90 days after it is determined that the results of the referendum favor the Order, but the Secretary may prescribe a longer period if necessary.

Eligible organizations in each geographic area may caucus to jointly nominate qualified individuals for each member and each alternate member to be appointed to the Board. If they do not caucus or if they fail to agree on nominees, each eligible organization is authorized to submit nominations for each position to be filled. The Secretary also is required to determine whether a substantial number of producers are not members of or their interests are not represented by any eligible organization and, if so, provide a manner for such producers to submit nominations. The 90-day period between approval of the Order and the deadline for submitting nominations is necessary to permit the Department to certify eligible organizations and establish procedures by which producers not represented by an organization may submit nominations. This period of time should be sufficient for all certified organizations to caucus, make their selections, and submit their nominations to the Secretary and for producers not represented by such organizations to submit nominations. However, the Secretary may prescribe a longer period if necessary.

After the initial Board has been established, nominations for subsequent appointments of Board members and alternates should be submitted sufficiently in advance to permit the Secretary to select the members, to inform them of their selection, and to obtain acceptance of such appointments before the beginning of the term of office for which they are being appointed. It is necessary to make these subsequent appointments in a timely fashion in order that operations of the Board can continue without interruption when normal changes in membership of the Board occur. Therefore, submission of nominations to the Secretary for subsequent Board members and alternates shall be at least 60 days prior to the expiration of the terms of members and alternates previously appointed to the Board. Other aspects of the nomination procedures for these appointments to the Board are the same as those for nominating members and alternates to the initial Board.

Section 8 of the Act provides that Board members and alternates be named from specified geographic areas designated to reflect, to the extent practicable, the proportion of cattle in each such geographic area. Organizations representing cattle producers normally are organized and operate on a statewide basis, although there also are regional or national organizations, often formed by an affiliation of similar State organizations. Statistics measuring cattle production are available on a State by State basis. Accordingly, to the extent practicable, a State is the geographic area used for determining representation on the Board, with each major cattle producing State entitled to at least one Board member and one alternate. The geographic areas for the initial Board and the number of Board members for each are listed in § 1260.138(e) of the Order.

January 1 inventory numbers of cattle and calves on farms, published annually by the Department of Agriculture, are generally considered the best available measure of the proportion of cattle in the various States. In determining this initial distribution of membership, a geographic area is defined as a State or combination of States with 500,000 head of cattle or more. Each such geographic area is entitled to one Board member and alternate plus an additional member and alternate for each additional 2.5 million head of cattle. Use of this definition accomplishes the objective of providing separate representation on the Board for most States, recognizing the usual boundaries of producer organizations and the similarity of interests of producers within many States.

Important considerations in combining States which have to few cattle to qualify as a geographic area are geographic location and similarity of interests, among other factors. To the extent possible, a geographic area containing several States includes those which are contiguous and which have similar interests. The practical problems of caucusing and reaching agreement on nominations then are simplified.

California and Hawaii were combined to form a geographic area with two Board members and two alternates in the Proposed Order published and subjected to hearing. Spokesmen for California cattlemen testified at the hearing that California should be designated a geographic area by itself, since under the proposed guidelines the State would be entitled to two Board members without the addition of another State. A representative of Nevada cattlemen testified that it would be acceptable to combine Nevada and Hawaii. In a subsequent brief, the proponents recommended that Hawaii be included with Maryland, Delaware, New Jersey, and the District of Columbia to form a geographic area. A spokesman for Hawaii cattlemen filed a brief with the same recommendation. Such a combination would not follow the principle outlined with respect to geographic location. Accordingly, Hawaii is included with Nevada to form a geographic area rather than with California.

The record contains a suggestion that each State be assigned one Board member in establishing the initial Board until records are developed on assessments from the various States for use in determining representation. However, it is found that, with the wide differences in cattle numbers among the various States, adoption of such a plan would not provide representation on the Board accurately reflecting the proportion of cattle in each geographic area.

The basis of determining the makeup of the initial Board cannot be permanent. Representation must be reviewed periodically to take into account shifts in cattle production. Accordingly, the Board is required to review the distribution of membership within 5 years of the establishment of the initial Board and subsequently at any time not to exceed 5 years from the date of the last review. Assessments, cash receipts from the sales of cattle, cattle numbers, and other factors which are found feasible to reflect the proportion of cattle in each geographic area may be considered by the

Board in determining the need for changes in geographic areas when updating representation on the Board. The Board shall cause regular review to be made of geographic areas and redefine the geographic areas as necessary, subject to the approval of the Secretary. Such changes will be made at the expiration of the terms of members in order to effect the changes in an orderly fashion.

Appointments. The Order provides that the Secretary will select and appoint Board members and an alternate for each from nominations submitted, providing representation on the Board by geographic area. Written notice of their acceptance of the appointment will be submitted to the Secretary promptly by member and alternate designates.

Vacancies. The nomination and appointment procedures for individuals to fill unexpired terms when vacancies occur are the same as those specified for the normal appointment and reappointment of members and alternates. It is important that vacancies be filled promptly in order to maintain full membership and representation on the Board and a minimum of disruption. Accordingly, nominations to fill vacancies are to be submitted to the Secretary within 60 days of the time the vacancy occurs. Such a period provides a reasonable amount of time for the selection of nominees. However, should a vacancy occur within 6 months of the expiration of the term of a Board member or alternate, the Secretary need not fill the vacancy.

Alternate members. Each Board member has an alternate designated to serve in his place as necessary. On occasions, a Board member may find it necessary to be absent from Board meetings. An alternate member should be available so that the business affairs of the Board will not be impaired. The alternate member will serve at Board meetings in the absence of the member. Also, in the event of a vacancy on the Board for any reason, the alternate will act until a successor is appointed. Alternate members do not automatically serve in place of Board members on committees and other special assignments unless specifically selected to do so by the Board. The Board is not precluded from assigning other duties to alternates in addition to their responsibility to serve in the absence of Board members. The same criteria and procedures are used for nominating and appointing alternates as those for Board members. Alternates also are limited to 6 consecutive years of service as an alternate. However, nothing precludes an alternate from replacing or succeeding a member and that alternate is permitted to serve up to two terms as a Board member, without regard to the length of time served as an alternate.

Procedure. The Board should adopt bylaws governing its organization and operation. However, the method of voting in decisions of the Board and quorum requirements are specified in the Order. The presence of a majority of the members and alternates acting for members constitutes a quorum. On any vote taken by the Board, a majority of those present and voting must concur before any action can be taken. All votes cast at an assembled meeting shall be cast in person with no proxy voting permitted.

It is necessary that the Board adopt procedures which will assure that it operates properly and efficiently and it should schedule regular meetings. However, there may be instances when it is necessary to transact routine, noncontroversial business or take rapid action at times when it would be expensive and unnecessary to call an assembled meeting. Therefore, the Board is authorized to vote by telephone, telegraph, or other means of communication in such instances. However, any such vote by telephone shall be confirmed promptly in writing. The Board should have authority to determine when it will be necessary to transact business without calling an assembled meeting.

Compensation. Board members and alternates serve without compensation, but it is appropriate that members and alternates be reimbursed for necessary and reasonable expenses incurred when performing authorized Board business. The Board, with the approval of the Secretary, shall set standard procedures governing reimbursement, including the forms to be used, receipts or other documentation required, and the limits of reasonable expenses.

Powers. The Board must have the powers specified in Section 8 of the Act in order to effectively provide administrative direction of the program. The Board has the power to administer all terms and provisions of the Order and carry out the plans and programs authorized by the Act. The Board is empowered to develop rules and regulations necessary for implementing and operating the program and submit them to the Secretary for approval and issuance. Such rules and regulations are necessary to set the procedures under which the Board exercises its responsibilities. They govern the method of collecting assessments, the refund procedures, the actions to be taken to implement specific programs, the records that must be kept by slaughterers and others, and the related provisions necessary to meet the requirements of the Order.

Violations of the rules and regulations issued pursuant to the Order may occur and the Board has the power to investigate alleged violations. Procedures established for handling such violations should assure fair and equitable treatment in all instances. The Board should take all reasonable steps to settle violations and in the event that settlement cannot be reached, report violations to the Secretary for appropriate action.

Problems may arise or conditions may change within the industry that would necessitate amendments to the Order. The Board should maintain regular surveillance of the need for amendments and has the power to recommend amendments of the Order to the Secretary when it deems that such action is necessary.

Duties. The duties of the Board as set forth in the Order are necessary for the discharge of its responsibilities. The stated duties provide authority and guidance concerning many details common to the operation of an administrative entity such as the Board. They include the duty to meet and organize, elect officers, and establish committees and subcommittees of Board members as necessary to handle the affairs of the Board. Bylaws should be adopted governing the conduct of business by the Board. The Board also has authority to appoint advisory committees, which would include persons who are not members of the Board, in order to gain added expert advice and counsel on problems, procedures, and programs. Such committees can act in an advisory position only; final decisions and actions are reserved to the Board, and only the Board may take action authorizing the expenditure of funds. The Board has the authority to reimburse advisory committee members for travel and other expenses arising from their assignments.

The Act provides that the Beef Board shall appoint from its members an Executive Committee of not less than 7 nor more than 11 members. In view of the authorized maximum size of the Beef Board, 68 members, an Executive Committee is necessary to provide more efficient and effective administration of the programs. The Beef Board shall delegate to the Executive Committee authority to employ staff members, specifying their duties and compensation, and to administer the provisions of the Order under the direction of the Board and within policies established by the Board. The Board should establish and maintain an effective managerial team composed of the Executive Committee and the administrative staff of the Board.

A major duty of the Board is the development of plans and programs to implement the Order. Since the level of anticipated funding is relatively large for programs of this nature and should provide for a comprehensive program, the Board has authority to initiate contracts or agreements with other organizations to conduct program activities. Contractors are required to provide plans for each project or program, outline procedures to be followed, and submit a detailed estimate of the costs. Further, contractors are required to keep adequate records and submit regular reports of their activities on a project showing progress made, disbursement of funds, and any other relevant information required by the Board or the Secretary. Contracts and agreements of the Board may become effective only upon approval of the Secretary. In addition to contracting with others, the Board has authority to conduct program activities on its own if such an approach can be shown to be more effective or efficient in furthering the purposes of the Act and Order.

The Board shall prepare a budget of its anticipated income and expenses each fiscal period and submit it to the Secretary for approval. The Secretary should specify the date for submission of the budget for his approval, allowing adequate time for review prior to the beginning of the fiscal period. In addition to income and expenses, the budget statement should show program plans, the distribution of anticipated expenses for each major program category, the estimated cost for administration, and detailed justification of the plans. The Board is required to submit copies of the budget to the House Committee on Agriculture and the Senate Committee on Agriculture and Forestry.

Other duties of the Board which are outlined in the Order are those necessary to assure that it operates in a business-like fashion. They involve requirements for maintaining records and submitting reports of activities as required by the Secretary, making annual reports of activities to producers and the public, accounting for funds received and expended each fiscal period, and initiating an annual audit of its financial status by an outside party. Further, the Board is required to give the Secretary the same notice of meetings as is given Board members and to provide any other information pertaining to the Order which the Secretary requests.

(c) *Programs and Projects.* The Board has the authority to determine the type of research, market development, education, producer information, consumer information, promotion, and advertising charged with the responsibility of initiating and recommending to the Secretary the establishment of such projects as are authorized by the Act. The projects and programs should be designed to assist, improve, or promote the production, sale, marketing, processing, distribution, and utilization of cattle, beef, and beef products. The authority is broad and flexible to enable the Board to use the most efficient and effective methods of carrying out the purposes of the Act. Emphasis should be placed on developing a coordinated national program, with activities designed to complement the efforts of groups, organizations, or agencies which are currently engaged in research and promotion activities.

The Board has the authority to recommend programs designed to expand sales in foreign markets for cattle, beef, and beef products. This area of activity should include steps to increase sales to present overseas customers as well as to develop new outlets and tailor products to their needs. Cooperative efforts with existing programs of this nature conducted by Federal and State governments and private interests may prove to be an effective approach.

Programs or projects conducted by the Board shall be periodically reviewed to determine if each such plan or project contributes to an effective and coordinated program of research, information, education, and promotion. Upon such review the Board shall terminate any program or project which it determines does not further the purposes of the Act.

The provision of the Order and Act that no advertising or promotion shall make any reference to private brand names of cattle, beef, or beef products is necessary to avoid discrimination. The Board represents all interests in the industry and therefore must be fair to all segments and elements of the cattle industry. Prohibition of the use of false or unwarranted claims in behalf of cattle, beef, or beef products or false or unwarranted statements with respect to the attributes or uses of competing products is also necessary for proper administration of the Order.

An ample and stable supply of beef for consumers is clearly in the public interest. Maintenance and expansion of existing markets and the development of new markets, both at home and abroad, are essential if the cattle industry is to be healthy enough to supply the needs of consumers. Therefore, the Order provides the necessary authorizations for research and information designed to accomplish this objective. It enables the Board to undertake production research, marketing research, product or market research, and other research designed to improve efficiency throughout the production and marketing chain from the earliest stages of production up to the time the product reaches the consumer. In addition, information derived from research and other factual information would be made available to both producers and consumers.

The Board may either perform research or information work within its own organization, or it may contract for such research, market development, education, producer information, consumer information, promotion, and advertising projects and programs with public and private research and development agencies which are capable of performing the work needed. While the projects and programs must be submitted to the Secretary for approval, it is recognized that study and planning may be involved in the development of such activities. Therefore, reasonable expenses which may be incurred by the Board in connection with such development should be authorized as part of the annual plan or budget even though prior to the time such projects are submitted.

(d) *State beef councils.* The effectiveness of a new national program of research and information activities for cattle and beef will depend, in part, on its relationship to existing programs operating in several States. The stated purpose of the Act is to enable the development of an effective and continuous program of research, consumer information, producer information, and promotion designed to strengthen the cattle and beef industry's position in the marketplace and maintain and expand domestic and foreign markets and uses for United States beef. Further, Section 16 of the Act states that nothing in the Act shall be construed to preempt or interfere with the workings of any beef board, beef council, or other beef promotion entity organized and operating within and by authority of any of the several States. Record evidence shows that 28 States have programs similar to the national program which would be established by an Order under thes Beef Research and Information Act. Also, there is a national effort of this nature, currently operating on a voluntary basis, conducted by industry interests through the National Live Stock and Meat Board. A portion of the funds collected in connection with several of the State programs presently is being forwarded to the National Live Stock and Meat Board.

State programs differ widely in several characteristics, but especially with respect to the basis for the assessments, the assessment rate, the method of collection, the mandate under which the State program operates, the availability of refunds, and the composition of the administrative body of the program. Testimony received at the hearing indicates that the anticipated effect on existing State programs of the initiation of a new national program varies widely. Representatives of some State programs indicated that they expected their local effort to continue with little change. Others indicated that their program would be likely to either diminish considerably or end because producers would not be willing to pay an increased assessment necessary to operate both State and national programs. Such testimony indicates that a new national program under the Beef Research and Information Act may interfere with the operation of some State programs in such instances. There is abundant evidence throughout the record that it may be desirable to keep viable State programs active in a coordinated, cooperative effort as part of a new national program in order to achieve maximum overall effectiveness of the effort. Such an approach would provide continuity available from ongoing State programs, minimize duplication of effort, and assure that the total effort was directed toward common goals. Spokesmen familiar with existing State programs pointed out the need for local contacts in order to have effective educational activities, particularly those conducted through the schools. Feedback from producers through cooperating State programs also might help achieve a successful national program. Some State representatives felt that there should be no overlap between current State programs and a new national program. They felt that assessments for State programs should be phased out and that such programs should continue to operate only as a part of the national effort. In essence, such an approach could result in using the State organization only as an administrative entity of the national program without the State organization conducting any local program activities. The Board should continually analyze the results of cooperative relationships with the various State programs and select the most effective approach in each case.

Record evidence supports permitting the Beef Board to allocate up to 10 percent of the net assessments paid by producers in a State for return to the qualifying State beef board, beef council, or other beef promotion entity. Although current programs in some States are funded at a higher level and some at a lower level than such funds would pro-

vide, all State programs would be accorded equal treatment by making up to 10 percent of the funds generated in the State for the national program available for use in the State. Such a provision helps assure the continuation of State programs by providing funds, upon the proper showing of program need and objectives.

Many producers testified that the Order should guarantee that at least 10 percent of the assessments from a State would be returned to help fund its State beef council, if requested. However, such a provision would be an undue restriction on the Board in that needs for funds may change over the years in many States and other States may demonstrate acceptable plans for less than the 10 percent level of funding. Still other States may decide that the national program better serves their purposes. Further, the Order contains a provision that allows State promotion entities to be eligible to be awarded contracts by the Board for program activities. These funds would be in addition to any funds returned to the States from the allocation of up to 10 percent of net assessments. Thus, a State promotion board, upon demonstration of need and an acceptable program, could receive further funding.

The Board is given flexibility with respect to the use of funds, including those which may be made available to support State programs, in order to achieve maximum effectiveness of the total national program. Testimony at the hearing indicates that assessments in some State programs would diminish rapidly and that funds from the national program would be needed in many States soon after the national program began. Accordingly, the Board may enter into agreements allocating funds to State programs as soon as possible during the first year on the basis of estimated net assessments in the State.

The amount of funds available for return to a qualifying State organization is based on net assessments contributed to the program by producers in that State. Refunds made to producers in the State would be subtracted from the estimated total assessments paid by producers in the State to compute net assessments. Accurate records of assessments on a State by State basis will be difficult or impractical to compile, since under the value-added concept the assessments remitted to the Board at the time cattle are slaughtered may also include assessments paid by several previous owners. The record includes considerable testimony showing that many cattle change ownership several times during their lifetime and often move from State to State. Extensive recordkeeping would be necessary to accurately credit the assessments paid by producers in each State. Data on the cash receipts from the sale of cattle by producers in each State, published by the U.S. Department of Agriculture, may provide the best available estimate of total assessments obtained from each State. It was also suggested in testimony that the number of cattle fed in a State and the size of the basic cow herd should be considered to help determine net assessments. Finally, testimony was presented proposing that the Order explicitly show the manner in which net assessments for a State would be computed. However, it is preferable for the Board to spell out such procedures in the rules which it adopts, thereby maintaining the option of seeking improvements, from time to time, in the basis for accurately reflecting the net assessments paid by producers in each State.

To qualify to receive funds from those assessments which may be made available for distribution to States, a State beef board, beef council, or other beef promotion entity must demonstrate ability to provide research, information, education, or promotion consistent with the purposes of the Order. The State entity should have goals and purposes complementary to the goals and purposes of the Act and the Order and must submit budgets and plans for research, information, education, or promotion programs for which the funds will be used and also submit reports to the Board on use of the funds. An eligible State organization should be organized under legislative authority in the State or by State charter. If more than one State entity requests funds, the one most qualified to fulfill the purposes of the Act and the Order will be selected by the Beef Board, subject to the approval of the Secretary.

Record evidence shows considerable concern that the use of funds returned to States would be unduly controlled by the Board and the Secretary. It was suggested that an organization should be able to qualify merely by demonstrating that it has goals complementary to those of the Order rather than be required to submit specific plans and programs for which the funds would be used and to report how the funds were used. However, the requirements should be the same as for other contractors and are not meant to result in submission of State entities to undue controls. Rather, they are necessary to assure that the Board and the Secretary exercise their responsibilities under the Act.

(e) *Assessments, Refunds, Expenses. Assessments.* The Act provides that funding for activities under this Order shall be acquired from assessments levied on producers of cattle, which will be collected from producers by producer-buyers and slaughterers, and that the slaughterers shall remit the assessments to the Board. Assessments levied on producers are based on the commercial value of cattle at the time of sale, normally the sale price. In order for each producer to pay his fair share of the assessment on cattle owned by two or more producers, a value-added procedure is employed.

The rate of assessment will be established each fiscal year by the Board, subject to the approval of the Secretary. Such rate of assessment may not exceed the statutory maximum of one-half of 1 percent of the value of the cattle sold. A rate of three-tenths of 1 percent of the value of cattle sold should provide sufficient funds to carry out the policy and purposes of the Act at this time while not creating an undue burden on producers. Section 1260.162 of the Order specifies that assessments may not exceed three-tenths of 1 percent of the value of cattle sold during the first 3 years that assessments are collected. Some producer testimony recommended a one-tenth of 1 percent assessment rate for the first year or more, or a plan whereby the rate would be increased periodically in the early years of the program. Reasons given for this position included: (1) Some producers, especially feeders, would pay a relatively larger share of the assessments since they would have to pay the total assessment on cattle they owned at the time the program began, even though they owned the cattle only a short time; (2) time is required to develop the administrative details of a new program and initiate projects to effectively use the funds; and (3) a lower initial rate would help reduce any disruption of existing State programs caused by the beginning of a new national program. However, the bulk of the testimony supported the assessment rate shown in the Order. Further, under the Order, the Board has flexibility to set the assessment rate at less than three-tenths of 1 percent if it finds that conditions warrant a lesser rate.

The cattle industry includes numerous classes of producers, such as dairy cattle producers, purebred or breeding stock producers, cow-calf producers, stocker-growers, traders, and cattle feeders. Each represents a segment of the industry or a stage in the production process. Most cattle slaughtered are owned by two or more producers prior to slaughter and some change hands several times.

The evidence indicates that for all producers to pay their fair share of assessments, a value-added concept should be employed—that is, each producer should pay an assessment based on the increase in value of cattle under his ownership. The value-added concept operates as follows:

Assuming an assessment rate of three-tenths of 1 percent of the sales price, a cow-calf man who sells a calf to a stocker-grower for $100 would be assessed three-tenths of 1 percent of the sales price or $.30. The cow-calf man could pay the stocker-grower $.30 or the stocker-grower could deduct $.30 from the $100 sales price and pay the cow-calf man $99.70 rather than $100. In either case, the cow-calf man would have paid an assessment based on the value added to the animal during his ownership. If the stocker-grower sold the animal to a feeder for $200, he would either pay the feeder three-tenths of 1 percent of the sales price ($.60) or the feeder would deduct $.60 from the $200 sales price and pay the stocker-grower only $199.40. In either instance, the $.60 assessment would include $.30 from the $100 increase in value during the cow-calf man's period of ownership and $.30 from the $100 increase in value during the stocker-grower's period of ownership. If the feeder later sells the animal to a slaughterer for $400, the slaughterer would collect from the feeder, or deduct from his $400 check, three-tenths of 1 percent of the sales value or $1.20. The slaughterer would forward the $1.20 to the Beef Board. Each of the producers would have contributed his fair share based on the value added during his ownership—$.30 each from the cow-calf man and the stocker-grower and $.60 from the feeder.

If no sales transaction occurs at the point of slaughter or other transfer, a fair commercial market value shall be attributed to the cattle for purposes of determining the assessment. For example, packer-owned cattle from feedlots will be assessed at the point of slaughter based on market prices of similar cattle. Cattle traded for other cattle or for merchandise also would be assessed on commercial market value. Similarly, cattle customs slaughtered for home consumption would be assigned a fair commercial market value for assessment purposes. However, cattle slaughtered for an individual's own home consumption are exempt from the assessment if the individ-assessment on such cattle until time of slaughter.

Most cattle increase in value rather consistently from birth to slaughter. Thus, under the value-added system of assessments, the final assesment remitted to the Beef Board by the slaughterer will exceed any previous assessment for the bulk of all cattle slaughtered. However, if the value of cattle involved in a sales transaction declines during a person's period of ownership, the total assessment paid by previous producers will not be passed on in the normal manner. A decline in value could be due to factor such as death loss, weight loss, or decline in market price. Detailed procedures for the collection of assessments due the Board but not passed along in the normal manner under such circumstances should be provided in the rules and regulations of the Board.

Further, since many cattle kept for breeding and milk production achieve a value for these purposes which is higher than their slaughter value, the Order specifies that the Beef Board may provide for an adjustment in the value of these cattle for assessment purposes so as not to exceed their value in the commercial slaughter market chain, or the Board may exempt collection of the assessment on such cattle until time of slaughter.

Some hearing evidence indicated that purebred cattle and cattle kept for dairy purposes should be exempt from assessment until slaughter. The exemption of such cattle until slaughter would reduce administrative problems, it was argued. However, testimony from producers of purebred and dairy cattle indicated that they wished to pay their fair share of assessments levied on the industry. In addition, proponents testified that determination by the buyer and seller of the commercial market value of breeding cattle would not be difficult. To maintain the flexibility necessary under the Order, the Beef Board will determine and specify in the regulations of the Board whether assessments on breeding cattle, including cattle kept for milk production, will be based on the estimated commercial value or whether such cattle will be exempt until slaughter. If assessments are based on estimated commercial value and difficulties arise, the Beef Board may amend the regulations and exempt breeding and dairy cattle from assessment until slaughter.

Slaughterers will be required to remit assessments to the Board, including assessments due at time of slaughter on cattle of their own production, in accordance with regulations developed by the Board. Assessments due on cattle slaughtered must be paid to the Board regardless of whether the assessment has been collected from the producer. Similarly, throughout the production chain, collection or deduction of assessments with transfer of ownership will be self-enforcing, since a producer-buyer who fails to collect the assessment on a transaction will be obligated to pay, as a producer-seller, an assessment based on the total commercial value of the transaction rather than only the assessment based on the value added during his ownership. In all transactions in which a slaughterer or producer-buyer has collected or deducted an assessment from a producer, the producer-seller should be given a receipt showing the amount deducted or collected.

The Beef Board is authorized to set aside funds in an operating reserve and to budget for such a reserve. It would be impractical to operate without a reasonable reserve. Research opportunities, the need for increased promotion, and other opportunities may develop suddenly. Without available funds it would not be possible to take advantage of such opportunities and to fulfill such needs, and a reserve fund is necessary for such purposes. The amount of the reserve fund will be determined by the Board with the approval of the Secretary. However, the reserve fund should not exceed approximately the average yearly collections of the Board.

Refunds. Refunds of assessments to producer-sellers who request them are provided in the Order. Any producer against whose cattle any assessment is made and collected from him—and who is not in favor of supporting the programs—shall have the right to receive a refund of such assessment from the Beef Board. However, no producer may receive a refund of the portion of the assessment which he collected from other producers. Regulations will be issued controlling the method of obtaining a refund, including a requirement of proof that the producer-seller paid the assessment for which the refund is claimed. A refund request must be submitted within 60 days after the end of the month in which the transaction occurred.

The Act and the Order provide that the refund be made by the Board within 60 days after the submission of proof satisfactory to the Board that the producer-seller paid the assessment for which refund is sought, but no producer shall claim or receive a refund of any portion of an assessment which he collected from other producers. The refund provision is essential to the voluntary concept of the Order, in that no producer is forced to financially support the Order if he does not favor it. The Board should make refund forms readily available to producers and each producer who asks for a refund must individually request it, i.e., he must submit the refund request. Marketing agencies, cooperatives, brokers, or others shall not be allowed to request refunds on behalf of producers. Slaughterers shall not be entitled to refunds even if they submit funds to the Board in the amount of a producer's assessment without collecting the assessments from the producer. But a slaughterer who is also a producer and has paid the assessment as a producer is entitled to request and receive a refund.

Expenses. Board expenses shall be paid from assessments received and any other funds which accrue to the Board. The Board may incur expenses which are found by the Secretary to be reasonable for the functioning and maintenance of the Board and necessary for the Board to exercise its powers and duties.

The Act and its legislative history make it clear that included in the expenses of the Board will be a reimbursement to the Secretary for such expenses, excluding salaries, as the Secretary determines were incurred by the Government in preparation of an original order and for the conduct of the referendum. In a brief, the opinion was expressed that the Secretary should be reimbursed for the conduct of the referendum but not for expenses incurred in preparation of an original order. However, the conference report of April 15, 1976, (House of Representatives Report No. 94–1044), clearly lists a number of costs for which the Secretary is to be reimbursed which are necessary costs in preparation of an original order. It is therefore found that such costs must be reimbursed.

The Act also requires that, after the Order becomes effective, all administrative costs, including salaries, which the Secretary determines were incurred by the Government under the Order shall be reimbursed by the Beef Board. In a brief, the opinion was expressed that Government salaries should not be reimbursed by the Beef Board. However, the legislation is clear that administrative costs of the Government are to be reimbursed. Therefore, it is found that the Secretary shall be reimbursed for all costs, including salaries, that he determines are incurred by the Government under the Order.

(f) *Records and Reports.* The Act imposes requirements on slaughterers to keep records and make such reports as necessary to the effectuation, administration, and enforcement of the Act and the Order or regulations issued pursuant to it. The Board has authority, with approval of the Secretary, to establish regulations requiring slaughterers to keep necessary books and records and to report to the Board periodically as the Board determines is necessary. Details on the information needed in records and reports and the frequency and timing of reports are to be estabished by the Board

and shown in the regulations. Record evidence shows some concern that unduly burdensome requirements may be imposed on slughterers. It was suggested that existing records systems of the industry should be utilized to the extent possible, and the Board should be cognizant of this recommendation when formulating regulations for approval by the Secretary.

All books and records required under the regulations must be made available by slaughterers for inspection by representatives of the Board or the Secretary as necessary to verify reports on assessments made and forwarded to the Board. These records are to be retained at least 2 years beyond the marketing year of their applicability. Such a time period is necessary to permit to completion of authorized audits, investigations, or other actions that may be necessary in administering and enforcing the provisions of Order and the Act.

Representatives of the Board or the Secretary, while acting in their official capacities, on occasion are likely to have access to records and accounts of slaughterers, producers, and others which may reveal trade secrets. The Act requires that the confidential nature of such business records be protected. Therefore, the Order provides that information obtained from books, records, and reports required of slaughterers, and information about refunds made to producers, shall be kept confidential by employees of the Board and of the Department of Agriculture. Also, any such information which becomes available to contracting parties should be kept confidential by officers and employees of such parties. However, the Secretary retains the authority to permit disclosure of such information, but only in a suit or administrative hearing relevant to the Order brought at the direction, or upon the request, of the Secretary of Agriculture, or to which any officer of the United States is a party.

It should be recognized that some information about the program may be of interest and benefit to the general public. Accordingly, the Order does not prohibit (1) the issuance of general statements concerning the number of persons subject to the Order or statistical data collected which do not identify the information furnished by any person; (2) the publication, as approved by the Secretary, of general statements relating to refunds made by the Beef Board which do not identify any person to whom a refund is made; or (3) the publication by direction of the Secretary of the name of any person violating the Order, together with a statement of the provisions of the Order violated.

(g) *Other Terms and Conditions.* Record evidence shows concern that patents, copyrights, inventions, and publications developed through the use of funds collected under the Order should be the property of the Beef Board to use for the benefit of the entire cattle industry. In a brief, proponents suggested that a section be added to the Order to outline such a provision. Accordingly, a new section is included in the Order as shown in § 1260.181. It provides that any patents, copyrights, inventions, or publications developed through the use of funds collected under the Order shall be the property of the Beef Board and any benefits or income from the use of such patents, copyrights, inventions, or publications shall inure to the benefit of the cattle industry. In the event of termination of the Order, control of such holdings and other assets would revert to the Secretary to be used for the benefit of the industry as specified in the Order.

The record shows a need for several other miscellaneous terms and conditions as shown in §§ 1260.182 through 1260.187 of the Order. Each section sets forth certain rights, obligations, privileges, or procedures which are necessary and appropriate for the effective operation of the Order. These provisions are incidental to, and not inconsistent with, the terms and conditions of the Act, are necessary to effectuate the other provisions of the Order, and are supported by the record evidence.

RULINGS ON BRIEFS, PROPOSED FINDINGS, AND CONCLUSIONS

At the close of the hearing, the Administrative Law Judge fixed November 15, 1976, as the final date for interested parties to file briefs, proposed findings, and conclusions based on the evidence received at the hearing. Eight briefs were filed on behalf of the following parties: Ed Grady, Manager, Information Division, Minnesota Farm Bureau Federation, St. Paul, Minnesota; Jack Russ, Director, California Cattlemen's Association, Sacramento, California; J. F. Goold, Executive Vice-President, League of California Milk Producers, Sacramento, California; James K. Kreutz, Attorney, Beef Development Taskforce, Denver, Colorado; Stephen F. Krut, Assistant Executive Director, National Association of Meat Processors, Elizabethtown, Pennsylvania; B. H. Jones, Executive Vice-President, National Livestock Feeders Association, Omaha, Nebraska; J. Gordon Cran, President, Hawaii Cattlemen's Council, Inc., Honolulu, Hawaii; and John Lewis, Director, California Farm Bureau Federation, Berkeley, California.

Several of the briefs reiterated points made by witnesses at the hearing or were copies of statements presented at the hearing. The points in each of the briefs were carefully considered along with the record evidence received at the hearing in making the findings and conclusions set forth herein as discussed in this recommended decision. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions as set forth herein, requests to make such findings or reach such conclusions are denied for the reasons previously cited in this decision.

GENERAL FINDINGS

On the basis of the evidence presented at the hearing and the record thereof, it is found that: 1. The Beef Research and Information Order and all of the terms and conditions thereof as hereinafter set forth will tend to effectuate the declared policy of the Act; and

2. The following terms and conditions of the Order are recommended as a detailed means of carrying out the declared policy of the Act with respect to the development of effective and continuous coordinated programs of research, consumer information, producer information, and promotion for cattle, beef, and beef products with adequate financing through assessments on the sales of cattle.

RECOMMENDED BEEF RESEARCH AND INFORMATION ORDER

The following national Research and Information Order is recommended as the appropriate means by which the foregoing conclusions may be carried out.

A new subpart is added to Part 1260 of Title 7, CFR as follows:

PART 1260—BEEF RESEARCH AND INFORMATION

Subpart—Beef Research and Information Order

DEFINITIONS

Sec.
1260.101 Secretary.
1260.102 Act.
1260.103 Person.
1260.104 Cattle.
1260.105 Beef.
1260.106 Beef products
1260.107 Fiscal period.
1260.108 Beef Board or Board.
1260.109 Executive Committee.
1260.110 Producer.
1260.111 Producer-buyer.
1260.112 Producer-seller.
1260.113 Slaughterer.
1260.114 United States.
1260.115 Marketing.
1260.116 Commerce.
1260.117 Producer organization or eligible organization.
1260.118 Producer information.
1260.119 Consumer information.
1260.120 Promotion.
1260.121 Research.
1260.122 Transaction.
1260.123 Contracting party.
1260.124 Marketing year.
1260.125 Part and subpart.

BEEF BOARD

1260.136 Establishment and membership.
1260.137 Term of office.
1260.138 Nominations.
1260.139 Appointments.
1260.140 Acceptance.
1260.141 Vacancies.
1260.142 Alternate members.
1260.143 Procedure.
1260.144 Compensation and reimbursement.
1260.145 Powers of the Board.
1260.146 Duties of the Board.

RESEARCH, INFORMATION, EDUCATION, AND PROMOTION

1260.151 Research, information, education and promotion.

STATE BEEF COUNCILS

1260.156 Continuity.
1260.157 Qualifications.

EXPENSES AND ASSESSMENTS

1260.161 Expenses.
1260.162 Assessments.
1260.163 Producer refunds.
1260.164 Influencing governmental action.

REPORTS, BOOKS, AND RECORDS

1260.171 Reports.
1260.172 Books and records.
1260.173 Confidential treatment.

CERTIFICATION OF ORGANIZATIONS

1260.176 Certification of organzations.

MISCELLANEOUS

1260.181 Patents, copyrights, inventions, and publications.
1260.182 Suspension and termination.
1260.183 Proceedings after termination.
1260.184 Effect of termination or amendment.
1260.185 Amendments.
1260.186 Personal liability.
1260.187 Separability.

AUTHORITY: Beef Research and Information Act (7 U.S.C. 2901 et seq.).

DEFINITIONS

§ 1260.101 Secretary.

"Secretary" means the Secretary of Agriculture or any other officer or employee of the Department of Agriculture to whom there has heretofore been delegated, or to whom there may hereafter be delegated, the authority to act in his stead.

§ 1260.102 Act.

"Act" means the Beef Research and Information Act (7 U.S.C. 2901 et seq.) and any amendments thereto.

§ 1260.103 Person.

"Person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity.

§ 1260.104 Cattle.

"Cattle" means live domesticated bovine quadrapeds.

§ 1260.105 Beef.

"Beef" means the flesh of cattle.

§ 1260.106 Beef products.

"Beef products" means products produced in whole or in part from cattle, exclusive of milk and products made therefrom.

§ 1260.107 Fiscal period.

"Fiscal period" is the 12-month budgetary period and means the USDA's fiscal year unless the Beef Board, with the approval of the Secretary, selects some other 12-month period.

§ 1260.108 Beef Board or Board.

"Beef Board" or "Board" or other designatory term adopted by such Board means the administrative body established pursuant to § 1260.136.

§ 1260.109 Executive Committee.

"Executive Committee" means those members of the Beef Board, from 7 to 11 in number, who are elected by the Board to administer the provisions of this subpart under the supervision of the Board and within the policies determined by the Board.

§ 1260.110 Producer.

"Producer" means any person who owns or acquires ownership of cattle other than one who acquires cattle solely for the purpose of slaughter: *Provided*, That a person shall not be considered to be a producer if his only share in the proceeds of a sale of cattle or beef is a sales commission, handling fee, or other service fee.

§ 1260.111 Producer-buyer.

"Producer-buyer" means a producer who buys cattle.

§ 1260.112 Producer-seller.

"Producer-seller" means a producer who sells cattle.

§ 1260.113 Slaughterer.

"Slaughterer" means any person who slaughters cattle including cattle of his own production.

§ 1260.114 United States.

"United States" means the 50 States of the United States of America and the District of Columbia.

§ 1260.115 Marketing.

"Marketing" means the sale or any other disposition of cattle, beef, or beef products in any channel of commerce.

§ 1260.116 Commerce.

"Commerce" means interstate, foreign, or intrastate commerce.

§ 1260.117 Producer organization or eligible organization.

"Producer organization" or "eligible organization" means any organization which has been certified by the Secretary pursuant to this subpart.

§ 1260.118 Producer information.

"Producer information" means facts, data, and other information that will assist producers in making decisions that lead to increased efficiency, lower cost of production, a stable supply of cattle, and the development of new markets.

§ 1260.119 Consumer information.

"Consumer information" means facts, data, and other information that will assist consumers and other persons in making evaluations and decisions regarding the purchasing, preparation, and utilization of beef and beef products.

§ 1260.120 Promotion.

"Promotion" means any action to advance the image or desirability of beef and beef products.

§ 1260.121 Research.

"Research" means any type of systematic study or investigation to advance the desirability, marketability, production, or quality of cattle, beef, and beef products, and includes the evaluation of such studies or investigations.

§ 1260.122 Transaction.

"Transaction" means any transfer of ownership of cattle or beef through a sale, trade, or other means of exchange.

§ 1260.123 Contracting party.

"Contracting party" means any individual, group of individuals, partnership, corporation, association, cooperative, or other entity, public or private, with which the Beef Board may enter into a contract or agreement pursuant to § 1260.146(e).

§ 1260.124 Marketing year.

"Marketing year" means the calendar year ending on December 31 or any other consecutive 12-month period designated by the Board, with the approval of the Secretary.

§ 1260.125 Part and subpart.

"Part" means 7 CFR Part 1260, containing rules, regulations, orders, supplemental orders, and similar matters concerning the Beef Research and Information Act. "Subpart" refers to any portion or segment of this part.

BEEF BOARD

§ 1260.136 Establishment and membership.

There is hereby established a Beef Board composed of not more than 68 producers, each of whom shall have an alternate, appointed by the Secretary from nomination submitted by eligible producer organizations within geographic areas certified pursuant to § 1260.176 or by producers in a manner authorized by the Secretary pursuant to § 1260.138(a).

§ 1260.137 Term of office.

The members of the Board and their alternates shall serve for terms of 3 years, except appointments to the initial Board shall be, proportionately, for terms of 1, 2, and 3 years. Each member and alternate member shall continue to serve until his successor is appointed by the Secretary and has accepted. No member or alternate member shall serve more than 6 consecutive years: *Provided*, That those members and alternate members appointed to the initial Board for 1 or 2 year terms are eligible to serve two additional consecutive terms.

§ 1260.138 Nominations.

All nominations to the Beef Board authorized under § 1260.136 shall be made in the following manner:

(a) Within 90 days of the announcement of approval of this Order, or a longer period if so prescribed by the Secretary, nominations shall be submitted to the Secretary for each member and each alternate member to be appointed for each geographic area as specified in paragraph (d) of this section by eligible organizations, certified pursuant to § 1260.176: *Provided*, That if there is no eligible organization certified for a geographic area, or if the Secretary determines that a substantial number of producers are not members of, or their interests are not represented by, any such eligible organization, then nominations shall be submitted in a manner authorized by the Secretary;

(b) After the establishment of the Board, the nominations for subsequent Board members and alternates shall be submitted to the Secretary not less than 60 days prior to the expiration of the terms of the members and alternates previously appointed to the Board;

(c) Where there is more than one eligible organization within a geographic area, they may caucus for the purpose of jointly nominating qualified persons for each member and for each alternate member to be appointed. If joint agreement is not reached with respect to any such nominations, or if no caucus is held within a defined geographic area, each eligible organization may submit to the Secretary nominations for each appointment to be made;

(d) For purposes of nominating members and their alternates to the Board, the United States shall be divided into geographic areas so as to reflect the proportion of cattle in each geographic area: *Provided*, That each designated geographic area shall be entitled to at least one member on the Board and one alternate member;

(e) The initial geographic areas and the number of members and alternates on the Beef Board from each area shall be: Alabama 1, Arizona 1, Arkansas 1, California 2, Colorado 2, Florida 1, Georgia 1, Idaho 1, Illinois 2, Indiana 1, Iowa 3, Kansas 3, Kentucky 2, Louisiana 1, Michigan 1, Minnesota 2, Mississippi 1, Missouri 3, Montana 2, Nebraska 3, New Mexico 1, New York 1, North Carolina 1, North Dakota 1, Ohio 1, Oklahoma 3, Oregon 1, Pennsylvania 1, South Carolina 1, South Dakota 2, Tennessee 2, Texas 7, Utah 1, Virginia 1, West Virginia 1, Wisconsin 2, Wyoming 1. Additional geographic areas, comprised of combined States, shall be: Nevada-Hawaii 1, Washington-Alaska 1, Maryland-Delaware-New Jersey-District of Columbia 1, Maine-Vermont-New Hampshire-Massachusetts-Rhode Island-Connecticut 1; and

(f) After the establishment of the Board, the geographic areas provided for in paragraph (d) of this section, including the area distribution of members of the Board and their alternates, shall be reviewed within 5 years and at any time not to exceed 5 years from the date of the last review by the Board. The Board shall redefine the geographic areas, subject to the approval of the Secretary, if it finds that the existing geographic areas do not properly reflect the proportion of cattle in each geographic area: *Provided*, That each such area shall be represented by at least one Board member.

§ 1260.139 Appointments.

From the nominations made pursuant to § § 1260.136 and 1260.138, the Secretary shall appoint the members of the Board and an alternate for each member on the basis of the representation provided for in § § 1260.136, 1260.137 and 1260.138.

§ 1260.140 Acceptance.

Any person appointed by the Secretary as a member or as an alternate member of the Board shall notify the Secretary of his acceptance in a manner prescribed by the Secretary.

§ 1260.141 Vacancies.

To fill any vacancy occasioned by the death, removal, resignation, or disqualification of any member or alternate member of the Board, a successor for the unexpired term of such member or alternate member of the Board shall be nominated and appointed in a manner specified in §§ 1260.1336, 1260.137, 1260.138(b), and 1260.140, except that replacement of a Board member or alternate with an unexpired term of less than 6 months is not necessary.

§ 1260.142 Alternate members.

An alternate member of the Board, during the absence of the member for whom he is the alternate, shall act in the place and stead of such member of the Board at meetings and perform such other duties as assigned. In the event of the death, removal, resignation, or disqualification of a member, his alternate shall act for him at Board meetings until a successor for such member is appointed.

§ 1260.143 Procedure.

(a) A majority of the members of the Board, including alternates acting for members of the Board, shall constitute a quorum, and any action of the Board shall require the concurring votes of at least a majority of those present and voting. At assembled meetings all votes shall be cast in person.

(b) For matters which do not require deliberation and the exchange of views, and in matters of an emergency nature when there is not enough time to call an assembled meeting of the Board, the Board may also take action upon the concurring votes of a majority of its members by mail, telegraph, or telephone, but any such telephone vote shall be confirmed promptly in writing.

§ 1260.144 Compensation and reimbursement.

The members of the Board and alternates shall serve without compensation but shall be reimbursed for necessary and reasonable expenses incurred by them in the performance of their duties under this subpart.

§ 1260.145 Powers of the Board.

The Board shall have the following powers:

(a) To supervise the administration of this subpart in accordance with its terms and conditions;

(b) To make rules and regulations to effectuate the terms and provisions of this subpart;

(c) To receive, investigate, and report to the Secretary complaints of violations of the provisions of this subpart; and

(d) To recommend to the Secretary amendments to this subpart.

§ 1260.146 Duties of the Board.

The Board shall have the following duties: (a) To meet and organize and to select from among its members a chairman and such other officers as may be necessary, to select committees and subcommittees of Board members, and to adopt such rules for the conduct of its business as it may deem advisable. The Board also may establish advisory committees of persons other than Board members;

(b) To appoint from its members an Executive Committee, consisting of not less than 7 nor more than 11 members, and to delegate to the Committee authority to employ a staff and administer the terms and provisions of the subpart under the direction of the Beef Board and within the policies determined by the Board. The membership of the Executive Committee shall be generally representative of the cattle industry and shall reflect, to the extent practicable, the same geographic distribution of membership as the Beef Board itself;

(c) To develop and submit to the Secretary plans or projects, together with the Board's recommendations with respect to the approval thereof by the Secretary;

(d) To prepare and submit to the Secretary for his approval budgets on a fiscal period basis of its anticipated expenses and disbursements in the administration of this subpart, including probable costs of each research, information, advertising, promotion, and developmental plan or project. The Board shall also submit informational copies of such budgets to the House Committee on Agriculture and the Senate Committee on Agriculture and Forestry;

(e) To enter into contracts or agreements, with the approval of the Secretary, with appropriate contracting parties for the development and carrying out of the projects and programs of the Board as authorized by § 1260.151, and for the payment of the costs thereof with funds accruing pursuant to the administration of this subpart: *Provided*, That nothing in this subpart shall preclude the Board from conducting projects or activities on its own to effectuate the intent and purposes of the Act. Any such contract or agreement shall also provide that such contracting parties shall develop and submit to the Board a plan or project, together with a budget or budgets which shall show the estimated cost to be incurred for such plan or project, and that any such plan or project shall become effective upon approval by the Secretary. Any such contract or agreement shall also provide that the contracting parties shall keep accurate records of all of their activities with respect to the contract or agreement and make periodic reports to the Board of activities carried out, an accounting for funds received and expended, and such other reports as the Secretary or Board may require;

(f) To maintain such books and records and prepare and submit such reports from time to time to the Secretary as he may prescribe and to make appropriate accounting with respect to the receipt and disbursement of all funds entrusted to it;

(g) To prepare and make public, at least each fiscal period, a report of activities carried out and an accounting for funds received and expended;

(h) To cause its books to be audited by a public accountant at least once each fiscal period and at such other times as

the Secretary may request and to submit a copy of each such audit to the Secretary;

(i) To give the Secretary the same notice of meetings of the Board as is given to members in order that he or his representative may attend such meetings; and

(j) To submit to the Secretary such information pertaining to this subpart as he may request.

RESEARCH, INFORMATION, EDUCATION, AND PROMOTION

§ 1260.151 Research, information, education, and promotion.

(a) The Beef Board shall in the manner prescribed in § 1260.146 provide for: (1) The establishment, issuance, effectuation, and administration of plans or projects for advertising, promotion, education, producer information, and consumer information with respect to the use of cattle, beef, and beef products and for the disbursement of necessary funds for such purposes;

(2) The establishment and carrying on of research, market development projects, and studies with respect to the production, sale, processing, distribution, marketing, or utilization of cattle, beef, and beef products and the creation of new products thereof, in accordance with section 7(b) of the Act, to the end that the production, marketing, and utilization of cattle, beef, or beef products may be encouraged, expanded, improved, or made more efficient and/or acceptable and the data collected by such activities may be disseminated, and for the disbursement of necessary funds for such purposes; and

(3) The development and expansion of foreign markets and uses for cattle, beef, or beef products.

(b) Each program or project authorized under paragraph (a) of this section shall be periodically reviewed or evaluated by the Board to insure that each such plan or project contributes to an effective and coordinated program of research, information, education, and promotion. If it is found by the Board that any such program or project does not further the purposes of the Act, then the Board shall terminate such program or project.

(c) No reference to a private brand or trade name shall be made if the Secretary determines that such reference will result in undue discrimination against the cattle, beef, or beef products of other persons in the United States. No such advertising, consumer education, or sales promotion program shall make use of claims in behalf of cattle, beef, or beef products, or statements with respect to quality, value, or use of any competing product if the Secretary determines them to be false or misleading.

STATE BEEF COUNCILS

§ 1260.156 Continuity.

The Beef Board may allocate up to 10 percent of net assessments from each State for use during the next fiscal year by the qualifying State beef council, beef board, or other beef promotion entity: *Provided*, That during the first year, the Beef Board may estimate the net assessments from each State and upon request from such entity provide up to 10 percent of estimated net assessments. The amount of net assessments from each State shall be computed by the Beef Board to reflect total assessments in such State less a deduction for refunds to producers in such State. Any request for funds shall be made by a State beef promotion entity which meets the qualifications specified in § 1260.157.

§ 1260.157 Qualifications.

To qualify for the receipt of funds pursuant to § 1260.156, a State beef board, beef council, or other beef promotion entity shall (a) be organized pursuant to legislative authority within the State or be organized by State charter, (b) have goals and purposes complementary to the goals and purposes of the Act, and (c) demonstrate ability to provide research, information, education, or promotion consistent with the Act and this subpart. The request from a State beef promotion entity for such funds shall show plans or projects and estimated costs of activities for which the funds will be used. The contract or agreement for such funds shall provide that the State promotion entity shall keep accurate records of all activities with respect to the contract or agreement and make periodic reports to the Board of activities carried out, an accounting for funds received and expended, and such other reports as the Board or the Secretary may require. In no event shall more than one such entity qualify within a State. If more than one entity applies for qualification within a State, the Beef Board shall choose, subject to the approval of the Secretary, the one most qualified to fulfill the purposes of the Act and this subpart.

EXPENSES AND ASSESSMENTS

§ 1260.161 Expenses.

(a) The Board is authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by the Board for its maintenance and functioning and to enable it to exercise its powers and perform its duties in accordance with the provisions of this subpart. Such expenses shall be paid from assessments received pursuant to § 1260.162 and other funds available to the Board.

(b) The Board shall reimburse the Secretary, from producer assessments, for all the expenses and expenditures, excluding salaries, which the Secretary determines were incurred by the Government in the preparation of an original order and the conduct of the referendum considering its approval.

(c) The Board shall reimburse the Secretary, from producer assessments, for administrative costs, including salaries, which the Secretary determines are incurred by the Government with respect to this subpart.

§ 1260.162 Assessments.

(a) Each producer-seller, upon sale or transfer of ownership of any cattle, except as provided below, shall pay to the producer-buyer or slaughterer thereof, pursuant to regulations issued by the Board, and such producer-buyer or slaughterer shall collect from the producer-seller an assessment based on the value of the cattle involved in the transaction as follows:

(1) The Beef Board, with the approval of the Secretary, shall set the amount of assessment, not to exceed five-tenths of 1 percent of the sale price;

(2) The assessment rate for the first three years shall not exceed three-tenths of 1 percent of the sale price;

(3) In the event that no sales transaction occurs at the point of slaughter or other transfer, a fair commercial market value shall be attributed to the cattle for the purpose of determining the assessment;

(4) Cattle slaughtered for his own home consumption by a producer who has been the sole owner of such cattle shall not be subject to assessments provided in this subpart;

(5) The Beef Board may provide for the adjustment of the value of breeding cattle or classes of breeding cattle, including those used in milk production, so as not to exceed commercial market value, or it may exempt collection of the assessment on such cattle until time of slaughter;

(6) Each slaughterer shall remit assessment(s) collected to the Beef Board at such times and in such manner as prescribed by regulations issued by the Board, including any assessment(s) due at time of slaughter on cattle of his own production;

(7) Failure of the slaughterer to collect the assessment(s) on each animal shall not relieve the slaughterer of his obligation to remit the assessment(s) to the Beef Board as required in this subpart; and

(8) The Beef Board may collect directly from any producer any assessment(s) that he collected under the provisions of this subpart or otherwise due which were not passed along in the manner set forth in this subpart due to the loss in value of the cattle or due to the export of the cattle or due to other reasons.

(b) The Beef Board may accumulate a reasonable reserve of approximately the average yearly collections to maintain continuity of programs and fulfill other obligations and expenses.

§ 1260.163 Producer refunds.

Any producer-seller on whose cattle an assessment is made and collected from him under the authority of the Act shall have the right to remand and receive from the Beef Board a refund of such assessment upon submission of proof satisfactory to the Board that the producer-seller paid the assessment for which refund is sought. Any such demand shall be made by such producer-seller in accordance with regulations and on a

form prescribed by the Board and approved by the Secretary. Such demands shall be made within 60 days after the end of the month in which the transaction occurred upon which said refund is based. Refund shall be made within 60 days after the submission of proof satisfactory to the Board that the producer-seller paid the assessment for which refund is sought: *Provided*, That no producer shall claim or receive a refund of any portion of an assessment which he collected from other producers.

§ 1260.164 Influencing governmental action.

No funds collected by the Board under this subpart shall in any manner be used for the purpose of influencing governmental policy or action except as provided in this subpart.

REPORTS, BOOKS, AND RECORDS

§ 1260.171 Reports.

Each slaughterer subject to this subpart shall be required to report to the Beef Board periodically such information as may be required by regulations established by the Board.

§ 1260.172 Books and records.

Each slaughterer shall maintain and make available for inspection by the Beef Board and the Secretary such books and records as are necessary to carry out the provisions of this subpart and the regulations issued thereunder, including such records as are necessary to verify any reports required. Such records shall be retained for at least two years beyond the marketing year of their applicability.

§ 1260.173 Confidential treatment.

All information obtained from such books, records, or reports required to be maintained under §§ 1260.171 and 1260.172 and all information obtained by the Beef Board pertaining to producer refunds made pursuant to § 1260.163 shall be kept confidential by all employees of the Beef Board, all employees of the Department of Agriculture, and all officers and employees of contracting parties, and only such information so furnished or acquired as the Secretary deems relevant shall be disclosed by them, and then only in a suit or administrative hearing brought at the direction, or upon the request, of the Secretary of Agriculture, or to which any officer of the United States is a party, and involving this subpart: *Provided, however*, That nothing in this subpart shall be deemed to prohibit (a) the issuance of general statements based upon the reports of the number of persons subject to this subpart or statistical data collected therefrom, which statements do not identify the information furnished by any person, (b) the publication of general statements relating to refunds made by the Beef Board during any specific period, which statements do not identify any person to whom refunds are made, or (c) the publication by direction of the Secretary of the name of any person violating this subpart, together with a statement of the particular provisions violated by such person.

CERTIFICATION OF ORGANIZATIONS

§ 1260.176 Certification of organizations.

(a) Any producer organization within a geographic area designated pursuant to §§ 1260.136 and 1260.138 may request the Secretary to certify its eligibility to represent cattle producers to participate in nominating members and alternate members to represent such geographic area on the Beef Board. Such eligibility shall be based, in addition to other available information, upon a factual report submitted by the organization which shall contain information deemed relevant and specified by the Secretary for the making of such determination, including but not limited to the following:

(1) Geographic area covered by the organization's active membership;

(2) Nature and size of the organization's active membership, proportion of total of such active membership accounted for by producers of cattle, and the volume of cattle produced by the organization's active membership in each such State or applicable geographic area(s);

(3) The extent to which the cattle producer membership of such organization is represented in setting the organization's policies;

(4) Evidence of stability and permanency of the organization;

(5) Sources from which the organization's operating funds are derived;

(6) Functions of the organization; and

(7) The organization's ability and willingness to further the aims and objectives of the Act.

(b) The primary consideration in determining the eligibility of an organization shall be whether its producer membership consists of a substantial number of producers who produce a substantial volume of cattle in the geographic area subject to the provisions of this subpart.

(c) The Secretary shall certify any organization which he finds to be eligible under this section and his determination shall be final. After the original certification of an organization, such organization shall request recertification at any time it wishes to nominate a member to the Board and the Secretary may require recertification at any time.

§ 1260.181 Patents, copyrights, inventions, and publications.

Any patents, copyrights, inventions or publications developed through the use of funds collected under the provisions of this subpart shall be the property of the Beef Board, and shall, along with any rents, royalties, residual payments, or other income from the rental, sale, leasing, franchising, or other uses of such patents, copyrights, inventions, or publications, inure to the benefit of the cattle industry. Upon termination of this subpart, § 1260.183 applies to determine disposition of all such property.

§ 1260.182 Suspension and termination.

(a) The Secretary shall, whenever he finds that this subpart or any provision thereof obstructs or does not tend to effectuate the declared policy of the Act, terminate or suspend the operation of this subpart or such provision.

(b) The Secretary may conduct a referendum at any time, and shall hold a referendum on request of 10 percent or more of the number of cattle producers voting in the referendum approving this subpart, to determine whether cattle producers favor the termination or suspension of this subpart, and the Secretary shall suspend or terminate such subpart 6 months after he determines that its suspension or termination is approved or favored by a majority of the producers of cattle voting in such referendum who, during a representative period determined by the Secretary, have been engaged in the production of cattle and who produced more than 50 percent of the volume of the cattle produced by the cattle producers voting in the referendum.

§ 1260.183 Proceedings after termination.

(a) Upon termination of this subpart, the Beef Board shall recommend not more than five of its members to the Secretary to serve as trustees, for the purpose of liquidating the affairs of the Beef Board. Such persons, upon designation by the Secretary, shall become trustees of all of the funds and property then in the possession or under control of the Board, including claims for any funds unpaid or property not delivered or any other claim existing at the time of such termination.

(b) The said trustees shall: (1) continue in such capacity until discharged by the Secretary; (2) carry out the obligations of the Beef Board under any contracts or agreements entered into by it pursuant to § 1260.146(e); (3) from time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the Board and of the trustees, to such person as the Secretary may direct; and (4) upon the direction of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in the Board or the trustees pursuant to this subpart.

(c) Any person to whom funds, property, or claims have been transferred or delivered pursuant to this subpart shall be subject to the same obligations imposed upon the trustees.

(d) Any residual funds or property not required to defray the necessary expenses of liquidation shall be turned over to the Secretary to be utilized, to the extent practicable, in the interest of continuing one or more of the beef research or information programs hitherto authorized.

§ 1260.184 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this subpart or of any regulation issued pursuant thereto, or the issuance of any amendment to either thereof, shall not:

(a) Affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this subpart or any regulation issued thereunder;

(b) Release or extinguish any violation of this subpart or any regulation issued thereunder; or

(c) Affect or impair any right or remedies of the United States, or of any person, with respect to any such violation.

§ 1260.185 Amendments.

Amendments to this subpart may be proposed, from time to time, by the Board or by an organization certified pursuant to Section 15 of the Act, or by any interested person affected by the provisions of the Act, including the Secretary.

§ 1260.186 Personal liability.

No member, alternate member, or employee of the Beef Board shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member, alternate, or employee except for acts of dishonesty or willful misconduct.

§ 1260.187 Separability.

If any provision of this subpart is declared invalid or the applicability thereof to any person or circumstances is held invalid, the validity of the remainder of this subpart or the applicability thereof to other persons or circumstances shall not be affected thereby.

Single copies of this notice of recommended decision may be obtained from the Hearing Clerk, Room 112–A, Administration Building, United States Department of Agriculture, Washington, D.C. 20250, or may be there inspected.

Signed at Washington, D.C., on January 18, 1977.

DONALD E. WILKINSON,
Administrator.

Rural Electrification Administration

[7 CFR Part 1701]

RURAL TELEPHONE PROGRAM

Purchasing and Installing Central Office Equipment

Notice is hereby given that, pursuant to the Rural Electrification Act, as amended (7 USC 901 et seq.), including the amendment thereto enacted by Pub. L. 93–32, REA proposes to revise REA Bulletin 384–1 (Telephone), Purchasing and Installing Central Office Equipment. The proposed revised bulletin modifies the procedures whereby an REA Telephone Borrower may purchase central office equipment. On issuance of REA Bulletin 384–1, revised January 1977, Appendix A to Part 1701 will be modified accordingly.

Persons interested in the proposed revision may submit written data, views or comments to the Director, Telephone Operations and Standards Division, Rural Electrification Administration, Room 1355, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, on or before February 24, 1977. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Director, Telephone Operations and Standards Division, during regular business hours.

The text of the proposed revision is as follows:

REA BULLETIN 384–1

Subject: Purchasing and Installing Central Office Equipment:

I. *Purpose.* To set forth the methods and procedures to be employed by borrowers in purchasing and installing the following central office equipment with REA loan funds:

A. Dial Central Office Equipment.

B. Automatic Toll Ticketing Equipment.

C. Automatic Number Identification Equipment.

D. Toll Office Equipment.

E. Private Automatic Branch Exchange (PABX) Equipment.[1]

F. Miscellaneous Equipment (Traffic Recording, Loop Treatment, Remote Alarm Reporting, Etc.).[1]

II. *General.* A. Materials and equipment must meet the standards and general specifications approved by REA. Materials and equipment included in REA Bulletin 344–2, "List of Materials Acceptable for Use on Telephone Systems of REA Borrowers," have been accepted as meeting these requirements. If the equipment being considered is not included in the "List of Materials" but has been generally approved for field trial installations, the borrower must in each instance obtain field trial approval from REA prior to entering into any agreement with a supplier.

B. Only new equipment shall be purchased unless otherwise approved by REA in specific cases.

C. All purchases of materials and equipment are subject to the "Buy American" provision. See REA Bulletin 344–3.

D. Appendix A is attached and provides an abbreviated summary of the procedures covered in detail in this bulletin.

III. *Contract Documents.* REA Bulletin 384–3, "Central Office Equipment Contracts and Specifications," lists the contracts and specifications which are currently available as well as the source of supply for these documents. Two types of contracts are available for the purchase of central office equipment.

A. REA Form 525 provides for the furnishing, delivery, and installation of the equipment and consists of the following:

1. Notice and Instructions to Bidders.
2. Proposal and Acceptance.
3. Form of Contractor's Bond.
4. Specifications:

a. Central Office Dial Equipment: (Direct Acting):

(1) REA Form 558a, General Specifications.

(2) REA Form 558b, Installation.

(3) REA Form 558c, Detailed Central Office Requirements (one required for each central office location).

(4) REA Form 810, Central Office Equipment Engineering Information.

b. Central Office Dial Equipment (Common Control):

(1) REA Form 524a, General Specifications.

(2) REA Form 524b, Installation.

(3) REA Form 524c, Detailed Common Control Central Office Equipment Requirements (one required for each central office location).

(4) REA Form 524d, Detailed Common Control Central Office Equipment Requirements (Information supplied by Bidder).

(5) REA Form 810, Central Office Equipment Engineering Information.

c. Toll Office Equipment—When toll board equipment is required, the following specifications shall be attached to and made a part of the contract:

(1) REA Form 542a, General Specifications.

(2) REA Form 542b, Installation.

(3) REA Form 542c, Detailed Toll Office Equipment Requirements.

d. Direct Distance Dialing Equipment—When direct distance dialing (automatic toll ticketing) equipment is required, the following specifications shall be attached to and made a part of the contract:

(1) REA Form 538a, General Specifications.

(2) REA Form 538b, Installation.

(3) REA Form 538c, Detailed Direct Distance Dialing Equipment Requirements.

(4) REA Form 538d, Detailed Direct Distance Dialing Equipment Requirements (Information supplied by Bidder).

e. Automatic Number Identification Equipment-CAMA—When CAMA-ANI equipment is required, the following specifications shall be attached to and made a part of the contract:

(1) REA Form 537a, General Specifications.

(2) REA Form 537b, Installation.

(3) REA Form 537c, Detailed ANI Equipment Requirements.

(4) REA Form 810, Central Office Equipment Engineering Information.

f. Private Automatic Branch Exchange Equipment—PABX—When PABX equipment is required, the following specifications shall be attached to and made a part of the contract:

(1) REA Form 528a, General Specifications.

(2) REA Form 528b, Installation.

(3) REA Form 528c, Detailed PABX Equipment Requirements.

(4) REA Form 528d, PABX Special Features.

(5) REA Form 528e, Detailed PABX Equipment Requirements (Information supplied by Bidder).

g. Miscellaneous Equipment—When miscellaneous equipment such as traffic recording equipment, loop treatment equipment, remote alarm reporting equipment, etc., is to be purchased with loan funds, the following shall be attached to and made part of the contract:

(1) A functional specification describing the requirements for the particular application.

(2) The supplier's technical proposal including a list of materials.

B. REA Form 545 provides for the furnishing and delivery of the equipment and is used when the installation is to be made by other than the supplier. It consists of the following:

1. Notice and Instruction to Bidders.
2. Proposal and Acceptance.
3. Specifications: Same as listed under "A", above, except part "b", Installation, will not be used.

C. REA Form 238, "Construction/Equipment Contract Amendment," should be used

[1] The procedure set forth in this bulletin for the purchase of equipment covered in E and F above shall be used only when this equipment is being purchased under contract terms. Usually this type of equipment will be purchased on a purchase order basis as explained in Bulletin 344–1.

* Supersedes March 24, 1958, issue.

when an amendment to either Form 525 or Form 545 is required.

IV. *Purchasing Central Office Equipment.* A. Central office equipment (direct acting or common control) may be purchased by the competitive bid procedure or by negotiation, at the borrower's option. The procedure as set forth below in V,A (Competitive) or V,B (Negotiation) shall be followed, depending upon the method selected. In either case, prior to requesting proposals from suppliers, REA must be notified of the method of procurement and approval of the plans and specifications must be obtained from REA. If the competitive bid method is followed, negotiations after the bid opening will not be permitted. When common control equipment is to be purchased by competitive bidding it is recommended that a two-step procedure similar to that set forth in paragraph V,A,4 be used.

B. When a borrower considers foreign equipment under either plan, selection of the foreign equipment may be made only if it meets the "Buy American" requirements. It will be necessary in those instances to obtain two or more domestic proposals for comparable equipment for the purpose of making a "Buy American" comparison. An exception to this would be the case where a domestically equivalent product is not available. (See REA Bulletin 344–3).

V. *Procedure.* A. Competitive Bidding:

1. After approval by REA of the specifications and equipment requirements, the Owner, or its engineer, sends out two copies of the "Notice and Instructions to Bidders" accompanied by two complete copies of the proposal and specifications to each supplier. The documents for this purpose are prepared by the Owner's engineer. The "Notice and Instructions to Bidders" is dated at the time it is signed and sent out. No less than three Bidders capable of preparing a responsive bid will be invited to bid.

2. The Bidder prepares its proposal entering the required information thereon and signs and dates same. One copy of the completed proposal is sent to the borrower and one copy is retained by the Bidder for its record.

3. The proposals of the Bidders, on the date of bid opening, are reviewed by the Owner and its engineer. Prior REA approval of the award of the contract is not required where the contract is awarded under the following conditions:

a. Award is made to the lowest responsive Bidder, and

b. A minimum of three bids are received, and

c. The amount of the bid is not in excess of the amount established in the loan budget for central office equipment, and

d. The bid contains no irregularities except minor ones which may be waived by the Owner.

In such cases, the Owner's engineer is to immediately send to REA a tabulation of the bid results for all Bidders by exchanges, the recommendation of the engineer, and a statement of the Owner (in case of a cooperative, the statement should be in the form of a board resolution) concerning the award of the contract. Prior receipt of this information by REA will allow prompt approval of the executed copies of the contract when they are received.

Prior REA approval of the award of a contract is required where conditions (a) to (d), above, have not been met. In such cases, the results of the bid opening, the recommendation of the Owner's engineer and a statement from the Owner (in case of a cooperative, the statement should be in the form of a board resolution) recommending the award of the contract are to be sent to REA for review and approval.

4. Procurement of common control equipment may be by a "Two-Step Competitive Bid" in which case:

a. The notice and instructions to Bidders must set forth the method of evaluating bids and must require the submission of equipment lists and traffic calculations with the bids.

b. Standard REA Contract Forms 525 or 545, as appropriate, shall be used, except that the "Notice and Instructions to Bidders" shall state that prior to the bid opening a technical evaluation will be conducted with each supplier to resolve any questions related to the technical proposal submitted by the supplier. The suppliers' technical proposals should be requested for presentation 30 days in advance of the bid opening to enable sufficient time to make the technical evaluation.

c. A sufficient number of firms (at least three) shall be invited to bid to assure adequate competition. A list of the firms invited to bid shall be sent to REA well in advance of the bid opening date.

d. Suppliers' technical proposals received by the Owner should be considered by representatives from the board of directors of the borrower, the manager, and the borrower's engineer. The REA field engineer may attend these evaluations as an observer where requested by the borrower.

e. Upon completion of technical discussions, sealed bids will be solicited from those Bidders whose technical proposals were found to meet the plans and specification requirements. When bids are solicited from less than three Bidders capable of making a responsive bid, prior REA approval must be obtained. The award will then be made to the low Bidder.

5. When the successful Bidder has been determined, and approved by REA, if necessary, the Owner's engineer then prepares two counterpart copies of the proposal and specifications and has the Owner sign and date the acceptance in the original and two counterpart copies.

6. The engineer then sends the three copies of the contract to the Bidder. The Bidder executes the two counterpart copies using the same date as the original proposal. When the contract includes installation of the equipment by the Bidder, the Bidder also has the three copies of the Contractor's Bond, pages 9 and 10, REA Form 525, completely executed. The date of the contract to be inserted in the bond on page 9 is the date of acceptance of the proposal as shown on page 8. The bond is dated on page 10, which date should always be subsequent to the date of the contract. (The signature of a resident agent of the surety is required in some studies.)

7. The Bidder then sends the three complete contracts to the Owner's engineer for final review and submission to REA for approval.

8. Upon approval of the contract by REA, notice is given to the Bidder, Owner, and the Owner's engineer and two copies of the contract are returned to the Owner. One copy is then sent by the Owner to the Bidder.

B. Negotiation. 1. Quotations from at least three suppliers shall be secured. If three cannot be secured, waiver of this requirement must be obtained from REA. The "three proposal" requirement would not apply when negotiating for an office of the same type as an existing one in the borrower's system. The suppliers should be advised that the award may be based upon factors other than low price. REA approval will be conditioned upon the borrower obtaining prices in line with current competitive prices.

2. The Bidders prepare their proposals, entering the required information thereon and sign and date same. One copy of the completed proposal is to be sent to the borrower and one copy retained by each Bidder for its record. Technical presentations and subsequent evaluations similar to those outlined under V,A,4,d should be made. The "two-step" procedure is not necessary if the negotiation is for an additional office of the same type as an existing one in the borrower's system.

3. When a quotation is accepted by the Owner, the Owner's engineer sends to REA the quotation accepted, a tabulation of the other quotations received, the engineer's recommendation to the Owner, and a statement of the Owner (in case of a cooperative, the statement should be in the form of a board resolution) concerning the acceptance of the proposal. The engineer's recommendation should include complete justification for the selection made.

4. Following approval by REA of the Owner's selection, the Owner's engineer then prepares two counterpart copies of the proposal and specifications, and has the Owner sign and date the acceptance in the original and two counterpart copies.

5. The engineer then sends the three copies of the contract to the Bidder. The Bidder executes the two counterpart copies using the same date as the original proposal. When the contract includes installation of the equipment by the Bidder, the Bidder also has the three copies of the Contractor's Bond, pages 9 and 10, REA Form 525, completely executed. The date of the contract to be inserted in the bond on page 9 is the date of acceptance of the proposal as shown on page 8. The bond is dated on page 10, which date should always be subsequent to the date of the contract. (The signature of a resident agent of the surety is required in some states.)

6. The Bidder then sends the three complete contracts to the Owner's engineer for final review and submission to REA for approval.

7. Upon approval of the contract by REA, notice is given to the Bidder, Owner, and Owner's engineer and two copies of the contract are returned to the Owner. One copy is then sent by the Owner to the Bidder.

C. Contract Amendments: The borrower's engineer should prepare equipment contract amendments on REA Form 238, "Construction or Equipment Contract Amendments,":

1. As soon as it has been determined that a change in the specifications is necessary or desirable which increases the contract price by more than $2500, or

2. Whenever a substantial change in the design or type of materials to be used in the installation under the contract is proposed, whether or not the contract price is changed.

Prior REA approval of such amendments is required before any such changes are initiated. Whenever a change has been made in the specifications which did not require prior REA approval under conditions "1" or "2" above, a final contract amendment shall be prepared and submitted to REA with the final documents. When an amendment by itself or together with preceding amendments increases the initial contract price by an amount which exceeds 20 percent of the initial contract price, an extension to the bond covering the amount of the increase shall be executed (see REA Bulletin 381–9).

D. Additions: Where additions to existing central office equipment installations are required:

1. When it is determined what additional equipment is required, a quotation is requested from the supplier. This request should be based on the original installation specifications. The General Specifications (558a, 524a, 528a, 542a, 538a or 537a) should not be used when purchasing additions.

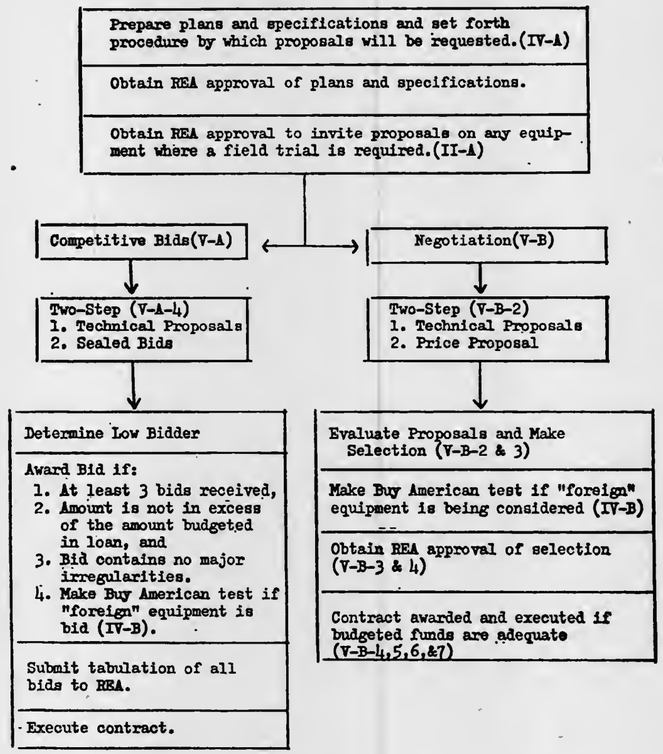
2. The borrower prepares a proposal containing an outline of the proposed use of the equipment, the quotation from the supplier and an estimate of the installation cost, and submits to the REA field engineer for approval. The field engineer will either approve or forward it to the Chief, Area Engineering Branch, for approval.

3. After approval of the quotation, the purchase may be made by using either the standard form contract, Form 525 (or 545, not installed), or a purchase order.

4. If the purchase is to be made by contract, three executed copies of the contract with attachments are to be submitted to the Chief, Area Engineering Branch. If satisfactory, REA will approve the contract and return two copies to the borrower.

5. If the purchase is to be made by purchase order, the executed purchase order with attachments is issued to the supplier. Copies of the purchase orders are *not* to be sent to REA (see REA Bulletin 344–1).

This REA bulletin supersedes REA Bulletin 384–1, dated March 24, 1958, and all other material in conflict with its provisions.



Dated: January 13, 1977.

C. R. BALLARD,
Assistant Administrator—Telephone.

Bulletin 384-1

APPENDIX A

SUMMARY OF PROCEDURES FOR PURCHASING COMMON CONTROL EQUIPMENT[1]

[1]Procedure is identical for direct acting equipment except the two-step process does not apply.

[FR Doc.77-1967 Filed 1-24-77;8:45 am]

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 212]

PRODUCTION AND SALE OF "IMPUTED STRIPPER WELL CRUDE OIL" FROM UNITIZED PROPERTIES

Proposed Rulemaking and Public Hearing

The Federal Energy Administration ("FEA") hereby gives notice of a proposed rulemaking and public hearing to consider a proposal to amend 10 CFR 212.75 so as to compute volumes of "imputed stripper well crude oil" produced and sold from unitized properties on a percentage basis. Currently, § 212.75 provides for such computations to be made on the basis of absolute production and sale volumes.

Section 212.75 currently provides that with respect to any unitized property which is comprised of one or more previously qualified stripper well properties and for which the producer has established a unit base production control level, the producer may sell each month a number of barrels of "imputed stripper well crude oil" at prices which are exempt from the provisions of Subpart D. "Imputed stripper well crude oil" is currently defined as:

> A number of barrels of crude oil equal to the total number barrels of crude oil produced during the 12-month period immediately preceding the establishment of a unit base production control level for the unitized property from all stripper well properties that constitute the unitized property, divided by 12 • • •.

On October 29, 1976, in connection with the adoption in final form (effective September 1, 1976) of the stripper well property exemption mandated by the Energy Conservation and Production Act (Pub. L. 94–385), FEA indicated its intention to initiate a rulemaking proceeding to consider modifying the definition of "imputed stripper well crude oil" to be based upon a percentage of the unitized production rather than upon a fixed number of barrels. (Comments received in connection with the rulemaking proceeding to implement the stripper well property exemption urged that stripper well property operators might be deterred from participating in a unitization unless any increased production attributable to the stripper well property is afforded exempt status.)

FEA's preliminary consideration of this concern leads to the conclusion that there may be instances in which certain operators of stripper well properties might be discouraged from participating in a unitized project. For example, if a stripper well property is so strategically located with reference to the underlying reservoir that the operator will benefit from any enhanced recovery operation regardless whether the stripper will property actually participates in the unitization, the operator might be encouraged

not to participate in the unitization because all increased production from his property would qualify as exempt. If the property were to participate in the project, on the other hand, any increased production attributable to the stripper well property would qualify under present regulations, at best, for treatment only as upper tier crude oil.

Accordingly, FEA solicits comments addressed to the need for and feasibility of a unitized property rule which would permit a percentage of increased production from the unit to be sold at exempt prices. Such a percentage might be equal to the percentage of stripper well property production to total production from participating leases over the 12-month period immediately preceding the establishment of a unitized BPCL. However, FEA will consider any reasonable alternative approach that might be suggested in the comments.

WRITTEN COMMENT PROCEDURES

Interested persons are invited to participate in this rulemaking by submitting data, views or arguments with respect to the proposals set forth in this notice to Executive Communications, Room 3309, Federal Energy Administration, Box KD, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to FEA Executive Communications with the designation "Production and Sale of 'Imputed Stripper Well Crude Oil' From Unitized Properties." Fifteen copies should be submitted. All comments received by Thursday, February 10, 1977, before 4:30 p.m., will be considered by the Federal Energy Administration before final action is taken on the proposed amendment.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

HEARING PROCEDURES

The public hearing in this proceeding will be held at 9:30 a.m., on Friday, February 11, 1977, and will be continued, if necessary, on Monday, February 14, 1977, in Room 2105, 2000 M Street, NW., Washington, D.C. 20461, in order to receive comments from interested persons on the matters set forth herein.

Any person who has an interest in the proposed amendment issued today, or who is a representative of a group or class of persons that has an interest in today's proposed amendment, may make a written request for an opportunity to make oral presentation. Such a request should be directed to Executive Communications, FEA, and must be received before 4:30 p.m., on Wednesday, January 26, 1977. Such a request may be hand delivered to Room 3309, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. The person making the request should be prepared to describe the interest concerned, if appropriate, to state why he is a proper representative of a group or class of persons that has such an interest, and to give concise summary of the proposed oral presentation and a phone number where he may be contacted through Thursday, February 10, 1977. Each person selected to be heard will be so notified by the FEA before 4:30 p.m., Friday, January 28, 1977 and must submit 100 copies of his statement to Regulations Management, FEA, Room 2214, 2000 M Street, N.W., Washington, D.C. 20461, before 4:30 p.m., Thursday, February 10, 1977.

The FEA reserves the right to select the persons to be heard at these hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings, and there will be no cross-examination of persons presenting statements. Any decision made by the FEA with respect to the subject matter of the hearings will be based on all information available to the FEA. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearings, to Executive Communications, FEA, before 4:30 p.m., Thursday, February 10, 1977. Any person who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The FEA or the presiding officer, if the question is submitted at the hearings, will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcript, will be retained by the FEA and made available for inspection at the Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

As required by section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93-275, a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator had no comments.

This proposal had been reviewed in accordance with Executive Order 11821, issued November 24, 1974, and has been determined not to be of a nature that requires an evaluation of its inflationary impact pursuant to Executive Order 11821.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 212 of Chapter II of Title 10 of the Code of Federal Regulations is proposed to be amended as set forth above.

Issued in Washington, D.C., January 19, 1977.

DAVID G. WILSON,
Acting General Counsel,
Federal Energy Administration.

URBAN MASS TRANSPORTATION ACT OF 1964

Proposed Guidelines

Correction

In FR Doc. 77-1517 appearing at page 3319 of the issue for Tuesday, January 18, 1977:

1. In the fifth and sixth lines of the first paragraph, "states other than local public bodies" should read "states or other local public bodies";

2. In the middle of the third column, page 3320, the section heading reading § 215.66 *Recertifications based on existing agreements"* should read "§ 215.6 *Recertifications based on existing agreements".*

DEPARTMENT OF THE INTERIOR

Geological Survey

[30 CFR Part 211]

COAL MINING OPERATION REGULATIONS: REQUIREMENTS OF A MINING PLAN FOR UNDERGROUND OPERATIONS

Proposed Rulemaking

On May 17, 1976, the Department of the Interior adopted regulations to govern the management and operation of federal coal leases. 41 FR 20252. The regulations that were published on that day contain the requirements for a mining plan for federal coal lessees. 30 CFR § 211.10. The requirements of those regulations were drafted with specific consideration for operations that would use surface mining to remove the coal resources, and contain extensive data-collecting and other requirements that are extremely appropriate to surface mines.

The regulations also apply to underground mines. The Department has now received several applications for approval of mining plans for operations that will be conducted by underground mining. The Department's experience with these plans has demonstrated that many of the requirements of 30 CFR 211.10 are unnecessary to accomplish the purposes of the Department's regulations: development of the nation's coal resources in an environmentally acceptable manner. To relieve the problem of requiring irrelevant information from operators who will be conducting underground operations, the Department is now proposing that the mine plan requirements be amended to reflect the Department's different information needs on underground operations and surface operations.

Comments on this proposed change should be sent in writing to the Director, Geological Survey, the National Center, Reston, Virginia 22092. Comments should be sent to that address by March 1, 1977. The Department will consider all comments received by that date, and will consider all comments received after that date to the extent that is possible.

It is proposed that 30 CFR § 211.10(a)(1) be amended by adding after the last word of the fifth sentence the following:

§ 211.10 Exploration and mining plans.

(a)(1) * * * and shall include all of the information set forth in paragraph (c) of this section for surface mines and all such information relevant to the surface and subsurface impacts of underground or deep mines. * * *

* * * * *

THOMAS S. KLEPPE,
Secretary,
Department of the Interior.

JANUARY 19, 1977.

[30 CFR Part 211]

COAL MINING OPERATIONS REGULATIONS

Adoption of the Cooperative Agreement With North Dakota for Enforcement and Administration of Surface Coal Mine Reclamation Standards

On May 17, 1976, the Department of the Interior adopted new regulations to govern the management of federally-owned coal resources. 41 F.R. 20252 (1976). These regulations authorize the Department to enter into Cooperative Agreements with States in which federal coal leases have been or will be issued for the purpose of avoiding duality in the administration and enforcement of surface coal mining reclamation operations. 30 C.F.R. 211.75.

On October 12, 1976, the Secretary issued a Policy Statement to clarify the intent and meaning of the May 1976 regulations. In a letter to the Governor of North Dakota, the Secretary stated: "I want you to know that I fully accept the premise that State reclamation laws and regulations can apply to the Federal lands * * * [and] * * * In a further effort to ensure cooperation and avoid duplication, we desire to enter into cooperative agreements with the respective States for the administration and enforcement of regulations on Federal lands."

The Secretary and the Governor of North Dakota have completed the negotiation of a Cooperative Agreement as authorized by 30 CFR 211.75(b). The Agreement provides that the State of North Dakota will be the principal entity responsible for the administration and enforcement of surface coal mine reclamation operations on federal coal leases in North Dakota.

The Department of the Interior's surface mining regulations require a federal coal lessee to conduct mining operations in a manner which ensures the effective reclamation of mined lands. After review of State laws and regulations, practices and procedures, the Department has concluded that the State of North Dakota has the authority to, and does in fact, administer its reclamation laws and regulations in a manner that provides the same cedures of the State are as effective as required by Federal law. The Cooperative Agreement commits the State to this degree of environmental protection. The Agreement also recognizes that the procedures of the State are as affective as the procedures of the Department to enforce the requirements of the mining plan. If the State is unable to meet the terms of the Agreement, the Department has the duty to notify the State that it intends to cancel the Agreement. The Agreement calls for an exchange of information between the State and the Department and the Department may conduct inspections to determine whether the State is complying with the provisions of the Agreement.

The Department and the State regard four elements as central to the Agreement: Mine plans, inspections, enforcement provisions, and bonding requirements. The Department believes that the State of North Dakota is capable of administering and enforcing reclamation operations on federal coal leases in North Dakota in such a way that federal interests are protected.

Although the Agreement grants the State of North Dakota the authority for administering and enforcing reclamation operations, we note the following: The Federal Coal Leasing Amendments Act of 1975, Pub. L. 94-377, requires the Secretary to approve the mining plan of a federal lessee. Article IV, section C of the Agreement states that it is the Secretary's duty to review and approve mining plans in addition to the State review and approval. The Agreement does avoid the application of conflicting standards by allowing the submission of one mining plan to both the State and the Department.

Article VII, section A avoids the imposition of double bonds by providing that the Department's bond requirement, if higher than the State's, will only be for the amount of the difference between the two amounts.

This rulemaking takes no action under 30 CFR 211.75(a) and does not affect the requirements of 30 CFR 211.40, or the standards the Department will use to approve a mining plan. In addition, this rulemaking does not explicitly amend 43 CFR Subpart 3041, but the Department wishes to state that the enforcement and administration provisions of that Subpart will be administered consistently with the changes in 30 CFR Part 211 proposed here.

The environmental impacts of this proposed action are discussed in the final Environmental Impact Statement, Surface Management of Coal Resources (43 CFR Subpart 3041) and Coal Mining Operating Regulations (30 CFR Part 211). NEPA does not require and the Department has not prepared a separate impact statement for this action.

The proposal contains the text of the Cooperative Agreement but it also contains proposed technical changes in 30 CFR 211.10 and 211.74 to conform those rules to the adoption of the Cooperative Agreement.

The Department and the State of North Dakota believe that this Agreement can promote both coal production and proper surface coal mine reclamation by eliminating duplication in the administration and enforcement of reclamation laws.

The Department will accept and consider written comments on the proposed rulemaking until February 21, 1977. Comments should be directed to Deputy Under Secretary W. W. Lyons, Chairman, Task Force on the Determination of State Role in Federal Surface Coal Mine Programs, Department of the Interior, Washington, D.C. 20240.

Dated: January 19, 1977.

THOMAS S. KLEPPE,
Secretary of the Interior.

1. It is proposed that 30 CFR § 211.10 be amended by the addition of a new paragraph (e)(4) to read as follows:

§ 211.10 Exploration and mining plans.

* * * * *

(e) *States with 211.75(b) agreements.* * * *

(4) *North Dakota.* A Federal coal lessee in the State of North Dakota who must submit a mining plan or permit under both State and Federal law shall submit, in lieu of the mining plan required by this section, a mining plan containing the information required by:

(i) North Dakota Cent. Code 38-14-04;

(ii) North Dakota Public Service Commission Rules and Regulations for Reclamation of Surface Mined Lands, R38-14-04.1 through R38-14-04.20;

(iii) 30 CFR 211.10(c); and a statement certifying that the information has been given to the North Dakota Public Service Commission and the Department of the Interior.

2. It is proposed that 30 CFR 211.74 be amended by the addition of a new paragraph (g)(4) to read as follows:

§ 211.74 Variances.

• • • • •

(g) *States with 211.75(b) agreements.* • • •

(4) *North Dakota.* A federal coal lessee in the State of North Dakota shall request and receive a variance from a mining plan under the provisions of North Dakota Public Service Commission Rules and Regulations for Reclamation of Surface Mined Lands, R38–14–04.18 and 30 CFR 211.74.

3. It is proposed that the Department enter into and approve a Cooperative Agreement to designate the State of North Dakota as the principal party to enforce surface coal mine reclamation on Federal coal leases in the State of North Dakota, to read as follows:

COOPERATIVE AGREEMENT BETWEEN THE UNITED STATES DEPARTMENT OF THE INTERIOR AND THE STATE OF NORTH DAKOTA under Section 32 of the Mineral Leasing Act of 1920, 30 U.S.C. Section 189, and Section 307 of the Federal Land Policy and Management Act of 1976, and 30 CFR 211.75(b).

THIS AGREEMENT (referred to as the Cooperative Agreement) is made between the STATE OF NORTH DAKOTA acting by and through its Governor and its Public Service Commission (referred to as the State) and the UNITED STATES DEPARTMENT OF THE INTERIOR, acting by and through the Secretary of the Interior or his duly authorized representative (referred to as the Secretary).

ARTICLE I

PURPOSE

This Cooperative Agreement provides for a cooperative program between the United States Department of the Interior and the State of North Dakota with respect to the administration and enforcement of surface coal reclamation requirements conducted under coal leases issued by the Department of the Interior under the Mineral Leasing Act of 1920. The basic purpose of the agreement is to prevent duality of administration and enforcement of surface reclamation requirements by designating the State of North Dakota as the principal entity to enforce reclamation laws and regulations in North Dakota.

ARTICLE II

EFFECTIVE DATE

The Cooperative Agreement is effective on the _____ day of _____, 19___, and remains in effect until terminated as provided in Article IX.

ARTICLE III

REQUIREMENTS FOR COOPERATIVE AGREEMENT

The State of North Dakota affirms that the State will comply with all of the provisions of this Cooperative Agreement and will continue to meet all the conditions and requirements specified in this Article upon which the approval of the Secretary is based.

A. *Responsible Administrative Agency.* The North Dakota Public Service Commission (hereinafter referred to as the State Agency) is, and shall continue to be, the sole agency responsible for administering this Cooperative Agreement on behalf of the State throughout the State of North Dakota.

B. *Authority of State Agency.* The State Agency designated in Paragraph A of this Article has, and shall continue to have, authority to carry out this Cooperative Agreement on behalf of the State throughout the State of North Dakota.

C. *State Reclamation Law.* The State Agency shall ensure that all mining plans covering coal subject to federal lease approved under this agreement shall afford general protection of the environment at least as stringent as would occur under the exclusive application of 30 CFR Part 211, and that the standards used to approve a mining plan of a Federal Lessee will not unreasonably impair coal mining that is in the overriding national interest.

D. *Effective of State Procedures.* The procedures of the State shall be, in the judgment of the Secretary, substantially as effective for the purpose of enforcing the reclamation requirements of 30 CFR Part 211 as the procedures of the Department of the Interior.

E. *Inspection of Mines.* The State affirms that the State Agency will inspect all mines located in the State, in accordance with the minimum schedules in Article V.

F. *Enforcement.* The State affirms that it will enforce the Agreement in a manner that ensures effective environmental protection.

G. *Qualified Personnel.* The State Agency will have an adequate number of fully qualified personnel necessary for the enforcement of this Cooperative Agreement.

H. *Funds.* The State will devote adequate funds for the administration and enforcement of reclamation requirements in the State.

I. *Reports and Records.* The State Agency shall make reports to the Secretary, containing information about its compliance with the terms of this Cooperative Agreement, as the Secretary shall from time to time require. The State Agency and the Secretary shall exchange, upon request, information developed under this Cooperative Agreement.

The Secretary affirms that the Department of the Interior will comply with all of the provisions of this Cooperative Agreement.

ARTICLE IV

MINE PLANS

Federal regulation, 30 CFR 211.10(c), and State laws and regulations require the operator of lands leased, permitted or licensed for coal mining to receive approval of a mining plan, or permit, or amendment thereto, prior to conducting operations.

A. *Contents of Mining Plans and Permits.* The State and the Secretary agree to require a Federal coal lessee who must submit a mining plan or permit application under both State and Federal law, to submit a plan or permit with the following information:

1. The information required by:

a. North Dakota Cent. Code § 38–14–04.

b. North Dakota Public Service Commission Rules and Regulations for Reclamation of Surface Mined Lands, R38–14–04.1 through R38–14–04.20.

c. 30 CFR 211.10(c).

2. A Statement certifying that a copy of the plan or permit has been given to both the State Agency and the Secretary.

If either the State or the Secretary requires the operator to submit additional information, the operator shall submit the information to both the State and the Secretary. The operator will request variance from the mining plan in accordance with 30 CFR 211.74, and shall file the request with the State Agency and the Secretary.

B. *Review of Plan.* The State Agency and the Secretary shall each review and analyze the adequacy of the plan or request for a variance from a plan or changes in an approved plan.

C. *Approval of Mining Plans.* The State Agency shall review the adequacy of the mining plan, any request for a variance, or a request for a change in a mining plan, as provided in North Dakota Public Service Commission Rules and Regulations for Reclamation of Surface Mined Lands, R30–14–04.18, and shall notify the Secretary of its action. The Secretary shall then review and take final action on the mining plan as required by 30 CFR 211.10(d), a request for a variance as required by 30 CFR 211.74, or a change in an approved mining plan which was acted upon by the State Agency. The Secretary shall notify the State Agency of his action, and the State Agency shall reconsider its action if necessary to comply with this Cooperative Agreement.

ARTICLE V

INSPECTIONS

A. The State Agency shall inspect as authorized by North Dakota Cent Code § 38–14–03.1 as frequently as necessary but at least quarterly the operations area of all Federal leases, permits and licenses where operations affecting the reclamation of mined lands are conducted or are to be conducted, for the purpose of determining whether the operator is complying with all requirements of approved mining plans.

B. The State Agency shall subsequent to conducting any inspection, file with the Secretary a copy of their report on (1) the general conditions of the lands under lease permit or license, (2) the manner in which the operations are being conducted, and (3) whether the operator is complying with applicable reclamation requirements. A copy of such report shall be furnished to the operator on request, and shall be made available for public inspection during normal business hours at the offices of the Mining Supervisor.

C. For the purpose of evaluating the manner in which the Cooperative Agreement is being carried out and to ensure that reclamation is being effectively performed, the Secretary may inspect from time to time mines on Federal coal leases within the State of North Dakota. Inspections by the Secretary may be made in association with regular inspection by the State Agency.

D. The Secretary may conduct inspections to determine whether the operator is complying with requirements that are unrelated to reclamation.

ARTICLE VI

ENFORCEMENT

A. If the State Agency determines that the operator is not complying with a requirement that relates to the reclamation of lands disturbed by surface mining, it shall take such steps as required by North Dakota Cent. Code § 38–14–03.1, and § 38–14–12.

B. If, in the judgment of the State Agency, an operator is conducting activities on lands subject to this Agreement which fail to comply with a requirement that relates to reclamation and those activities threaten immediate and serious damage to the environment, the State shall order the immediate cessation of such activities, as authorized by North Dakota Cent. Code § 38–14–03.1.

C. The State shall notify the Secretary of all violations of applicable laws regarding reclamation including violations of Federal laws and regulations or lease terms and of all actions taken under North Dakota Cent. Code § 38–14–03.1, and § 38–14–12.

D. This Article does not limit the Secretary's authority to seek cancellation of a Federal coal lease under Federal laws and regulations, or prevent the Secretary from taking appropriate steps to correct actions that violate Federal law, other than those incorporated in this Agreement, but not State law.

E. Failure to adequately enforce the reclamation laws and regulations shall be grounds for termination of this Cooperative Agreement.

ARTICLE VII

BONDS

A. *Amount and Responsibility.* The State Agency shall require all Federal coal lessees subject to the provisions of 30 CFR Part 211 to submit a bond as required by North Dakota Cent. Code § 38–14–07. The Secretary shall reduce the federal bond required for reclamation purposes under 43 CFR 3041.3, and 30 CFR 211.3 by the amount of the bond required by the State Agency only if the release of all or any portion of the State's bond is conditioned on compliance with the requirements of the approved plan, and the amount released is appropriate to the work completed. Where the surface of the lands is not owned by the United States, the State Agency shall notify the surface owner and solicit and take into account his comments before recommending release of the bond.

B. *Notification.* Prior to releasing the bond required by North Dakota Cent. Code § 38–14–07 for lands the surface of which is owned by the Federal Government, the State Agency shall consult with and seek the advice and consent of the Secretary.

C. *Release of Bond.* The State Agency shall hold the operator responsible and liable for successful reclamation as required by North Dakota Cent. Code § 38–14–07.

ARTICLE VIII

OPPORTUNITY TO COMPLY WITH COOPERATIVE AGREEMENT

The Secretary may, at his sole discretion, and without instituting or commencing proceedings for withdrawal of approval of the Cooperative Agreement, notify the State Agency that it has failed to comply with the provisions of the Cooperative Agreement. The Secretary shall specify how the State has failed to comply and shall specify and state the period of time within which the defects in administration shall be remedied and satisfactory evidence presented to him that the State has remedied the defects in administration and is in compliance with and has met the requirements of the Secretary. Upon failure of the State Agency to meet the requirements of the Secretary within the time specified, the Secretary may institute proceedings for withdrawal of approval of the Cooperative Agreement as set forth in Article IX.

ARTICLE IX

TERMINATION OF COOPERATIVE AGREEMENT

The Cooperative Agreement may be terminated as follows:

A. *Termination by the State.* The Cooperative Agreement may be terminated by the State upon written notice to the Secretary, specifying the date upon which the Cooperative Agreement shall be terminated, but which date of termination shall not be less than 60 days from the date of the notice.

B. *Termination by the Secretary.* The Cooperative Agreement may be terminated by the Secretary whenever the Secretary finds, after giving due notice to the State and affording the State an opportunity for a hearing:

1. That the State has failed to comply substantially with any provision of the Cooperative Agreement; or

2. That the State has failed to comply with any assurance given by the State upon which the Cooperative Agreement is based, or any condition or requirement which is specified in Article III; or

3. That State action unrelated to surface coal mine reclamation will unreasonably and substantially prevent the mining of Federal coal.

C. *Termination by Operation of Law.* This Cooperative Agreement shall terminate by operation of law when no longer authorized by Federal laws and regulations.

D. *Notice of Proposed Termination.* Whenever the Secretary proposes to terminate the Cooperative Agreement he shall:

1. Give written notice to the Governor and to the State Agency specified in Article III;

2. Specify and set out in the written notice the grounds upon which he proposes to terminate the Cooperative Agreement;

3. Specify the date upon which and the place where the State will be afforded an opportunity for hearing and to show cause why the Cooperative Agreement should not be terminated by the Secretary. The date upon which such hearing shall be held shall be not less than 30 days from the date of such notice, and the place of hearing shall be in the State of North Dakota.

4. The Secretary shall also publish a notice in the FEDERAL REGISTER containing the items in 1–3 of this paragraph.

5. Within 30 days of the date of the written notice specifying the date of the hearing, the State shall file a written notice with the Secretary stating whether or not it will appear and participate in the hearing. The notice shall specify the issues and grounds specified by the Secretary for termination which the State will oppose or contest and a statement of its reasons and grounds for opposing or contesting. Failure to file a written notice in the Office of the Secretary within 30 days shall constitute a waiver of the opportunity for hearing, but the State may present or submit before the time fixed for the hearing written arguments and reasons why the Cooperative Agreement should not be terminated, and within the discretion of the Secretary may be permitted to appear and confer in person and present oral or written statements, and other documents relative to the proposed termination.

E. *Conduct of Hearing.* The hearing will be conducted by the Secretary. A record shall be made of the hearing and the State shall be entitled to obtain a copy of the transcript. The State shall be entitled to have legal and technical and other representatives present at the hearing or conference, and may present, either orally or in writing, evidence, information, testimony, documents, records, and materials as may be relevant and material to the issues involved.

F. *Notice of Withdrawal of Approval of Cooperative Agreement.* After a hearing has been held, or the right to a hearing has been waived or forfeited by the State, the Secretary, after consideration of the evidence, information, testimony, and arguments presented to him shall advise the State of his decision. If the Secretary determines to withdraw approval of the Cooperative Agreement, he shall notify the State Agency of his intended withdrawal of approval of the Cooperative Agreement, and afford the State an opportunity to present evidence satisfactory to the Secretary that the State has remedied the specified defects in its administration of the Cooperative Agreement. The Secretary shall state the period of time within which the defects in administration shall be remedied and satisfactory evidence presented to him, and upon failure of the State to do so within the time stated, the Secretary may thereupon withdraw his approval of the Cooperative Agreement without any further opportunity afforded to the State for a hearing.

ARTICLE X

REINSTATEMENT OF COOPERATIVE AGREEMENT

The Cooperative Agreement which has been terminated may be reinstated upon application by the State and upon giving evidence satisfactory to the Secretary that the State can and will comply with all the provisions of the Cooperative Agreement and has remedied all defects in administration for which the Cooperative Agreement was terminated.

ARTICLE XI

AMENDMENTS OF COOPERATIVE AGREEMENT

This Cooperative Agreement may be amended by mutual agreement of the State and the Secretary. An amendment proposed by one party shall be submitted to the other with a statement of the reasons for such proposed amendment. The amendment shall be adopted after rulemaking and the party to whom the proposed amendment is submitted shall signify its acceptance or rejection of the proposed amendment, and if rejected shall state the reasons for rejection.

ARTICLE XII

CHANGES IN STATE OR FEDERAL STANDARDS

The Secretary of the Interior or the State of North Dakota may from time to time revise and promulgate new or revised reclamation requirements or enforcement and administration procedures. The Secretary and the Governor shall immediately inform the other of any final changes in their respective laws or regulations. Each party shall, if it determines it to be necessary to keep this Cooperative Agreement in force, change or revise its respective laws or regulations. For changes which may be accomplished by rulemaking, each party shall have six months in which to make such changes. For changes which require legislative authorization, each party has until the close of its next legislative session at which such legislation can be considered in which to make the changes. If such changes are not made, then the termination provision of Article IX may be invoked.

ARTICLE XIII

QUALIFICATIONS AND EXPERIENCE OF PERSONNEL

The State Agency, under appropriations from the Legislature, shall be adequately staffed with, or have readily available to it, an adequate number of qualified personnel to carry out fully the requirements of the Cooperative Agreement.

ARTICLE XVI

CONFLICT OF INTEREST

No member of the State Agency or agencies responsible for the administration of the State law and rules and regulations relating to this Cooperative Agreement shall participate in the review, analysis, administration, decision-making, or enforcement actions relating to any operation subject to this Cooperative Agreement if such person has, directly or indirectly, any financial interest in a company, partnership, organization, or corporation (parent or subsidiary) which owns, operates or has a financial interest in such operations subject to this Cooperative Agreement.

ARTICLE XV

EQUIPMENT AND LABORATORIES

The State Agency, under appropriations from the Legislature, shall have the equipment, laboratories, and facilities with which all inspections, investigations, studies, tests, and analyses can be performed or determined, and which are necessary to carry out the requirements of the Cooperative Agreement or have access to such facilities and personnel.

ARTICLE XVI

EXCHANGE OF INFORMATION

A *Organizational and Functional Statement.* The State Agency and the Secretary shall advise each other of the organization, structure, functions, and duties of the offices, departments, divisions, and persons within their organizations. Each shall advise promptly the other in writing of changes in personnel, officials, heads of departments or divisions, or a change in the functions or

duties of persons occupying the principal offices within the organization. The State Agency and the Secretary shall advise each other in writing the location of its various offices, addresses, telephone numbers, and the names, locations, and telephone numbers of their respective mine inspectors and the area within the State for which such inspectors are responsible, and shall advise promptly of any changes in such.

B. *Laws, Rules and Regulations.* The State Agency and the Secretary shall provide to each other copies of their respective laws, rules, regulations and standards pertaining to the enforcement and administration of this Cooperative Agreement and promptly furnish copies of any final revision of such laws, rules, regulations, and standards when the revision becomes effective.

ARTICLE XVII

RESERVATION OF RIGHTS

This Cooperative Agreement shall not be construed as waiving or preventing the assertion of any rights the Governor and the Secretary may have under the Mineral Leasing Act, the Constitution of North Dakota or the Constitution of the United States.

STATE OF NORTH DAKOTA,
ARTHUR A. LINK,
Governor of North Dakota.

RICHARD ELKIN,
Chairman, Public Service Commission.

DEPARTMENT OF THE INTERIOR,
THOMAS S. KLEPPE,
Secretary of the Interior.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 674-2]

ALABAMA

Approval and Promulgation of Implementation Plans

On May 31, 1972 (37 FR 10847), the Administrator approved the Alabama plan to attain and maintain the National Ambient Air Quality Standards in that State. The State continually revises the plan to improve its effectiveness. On May 25, 1976 after notice and public hearing, the Alabama Air Pollution Control Commission adopted additional changes in its air pollution control regulations. These changes were submitted as proposed implementation plan revisions to the Agency's Region IV office in Atlanta. The purpose of this notice is to describe the proposed changes in the Alabama plan and to invite public comment on them.

Part 5.3, Sulfur Recovery Plants, is replaced by a part titled, "Petroleum Production." This part applies to the regulation for facilities that handle natural gas or refinery gas that contains more than 0.10 grains of hydrogen sulfide per standard cubic foot (SCF). In subpart 5.3.2., No person shall cause or permit the emission of a process gas stream containing more than 0.10 grains hydrogen sulfide per SCF into the atmosphere unless it is properly burned to maintain ground level concentrations of hydrogen sulfide to less than 20 parts per billion beyond plant property limits, averaged over a 30-minute period. In subpart 5.3.3, No person shall cause or permit the sulfur oxide emission from any facility designed to dispose of, or process, natural gas or refinery gas containing more than 0.10 grains hydrogen sulfide per SCF to exceed the following:

CATEGORY I COUNTIES

Available sulfur (long tons per day):	*Permitted emissions of sulfur dioxide*
Up to 5	No limit.
5 to 35	373 lb/h.
35 to 75	0.10 lb SO_2 per pound of sulfur processed.
Over 75	0.08 lb SO_2 per pound of sulfur processed.

CATEGORY II COUNTIES

Up to 10	No limit.
10 to 50	560 lb/h.
50 to 100	0.10 lb SO_2 per pound of sulfur processed.
Over 100	0.08 lb SO_2 per pound of sulfur processed.

The allowable emissions of sulfur dioxide are increased as follows to allow for dry acid gas streams containing less than 60 percent hydrogen sulfide:

Mol percent of hydrogen sulfide tons per day):	*Additonal SO_2 of sulfur dioxide*
50% but less than 60%	.02 lb SO_2 per pound of sulfur processed.
40% but less than 50%	.04 lb SO_2 per pound of sulfur processed.
30% but less than 40%	.06 lb SO_2 per pound of sulfur processed.
20% but less than 30%	.10 lb SO_2 per pound of sulfur processed.
Less than 20%	Must utilize the best available control technology, with consideration to the technical practicability and economic reasonableness of reducing or eliminating the emissions from the facility.

In subparts 5.3.4 (a) and (b), the following counties are classified Category I Counties: Jackson, Jefferson, and Mobile; all other counties are classified as Category II. A new Part 5.5 is added and applies to facilities not regulated by Parts 5.1, 5.2, 5.3, and 5.4. In subpart 5.3.2, No person shall construct and operate a new or modified sulfur compound emission source that does not meet any and all applicable New Source Performance Standards and utilize the best available control technology, with consideration to the technical practicability and economic reasonableness of reducing or eliminating the emissions from the facility. In subpart 5.5.3, No person shall construct and operate a new or modified emission source that will cause or contribute to a condition such that either the primary or the secondary sulfur dioxide ambient air quality standards are exceeded in the area.

Copies of the information submitted by Alabama may be examined by the public during normal business hours at the following locations:

Air Programs Branch, Air and Hazardous Materials Division, Environmental Protection Agency, Region IV, 345 Courtland St. NE., Atlanta, Georgia 30308.

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460.

Alabama Air Pollution Control Commission, 645 South McDonough St., Montgomery, Alabama 36104.

Interested persons are encouraged to submit written comments on the Alabama plan revisions. To be considered, such comments must be received on or before February 24, 1977, and should be addressed to Eliot Cooper of the Agency's Region IV Air Programs Branch in Atlanta (see address above). After carefully weighing relevant comments received and all other information available to him, the Administrator will take approval/disapproval action on these changes in the Georgia plan.

(Section 110 of the Clean Air Act (42 U.S.C. 1857c-5).)

Dated: January 13, 1977.

JOHN A. LITTLE,
Acting Regional Administrator.

DEPARTMENT OF THE INTERIOR

[43 CFR Part 2]

RECORDS AND TESTIMONY

Mineral Resource Data Information; Proposed Rulemaking

The Department of the Interior is considering promulgation of regulations to prescribe rules for the handling of mineral resource data information in the Department's possession which may be entitled to confidential treatment. The primary purpose of the regulation is to establish the substantive criteria which the Department will apply in determining whether mineral resource data and information which it receives is entitled to confidential treatment so that both the submitters of such information and the public are fully informed of the Department's policy.

It is proposed to promulgate a new subpart C of Title 43, Code of Federal Regulations, to contain all substantive Departmental regulations governing the treatment of mineral resource data and information which are entitled to confidential treatment. Existing subparts C, D, and E would be redesignated as D, E, and F. In addition, the new subpart will contain special provisions concerning the confidential treatment of data and information relating to coal as required by the Federal Coal Leasing Amendments Act of 1975 (Pub. L. 94-377). A number of existing regulations relating to confidentiality of mineral resource data and information which appear in Title 43 and Title 30 of the Code of Federal Regulations would be revoked or revised to conform to the new subpart. Notices of these revocations or revisions will be published in the FEDERAL REGISTER when and if the new subpart C is adopted.

Relationship to subpart B. Subpart B contains the Department's general regulations and procedures implementing the Freedom of Information Act, 5 U.S.C. Section 552. Those regulations contain no provisions requiring consultation with persons who may have submitted information either voluntarily or involuntarily which they may regard as entitled to confidential treatment, other than the provision in 43 CFR § 2.13(h) which provides that if a requested record was obtained by the Department from a person or entity outside of the Government the official responsible for processing the request shall seek the views of that person or entity "when it is administratively feasible to do so." Likewise, the existing regulations do not provide any procedures or guidelines for persons wishing to assert a claim of confidentiality, or for advance determination that certain types of mineral resource information is entitled to confidential treatment. The proposed new subpart would thus correct these deficiencies in the Department's present regulations.

Policy pending final promulgation of subpart. The Department will continue to follow the procedures in existing subpart B and other regulations in responding to requests for information, and, where mineral resource data and information is requested, to the extent that it is possible under existing regulations, will follow the general approach in the proposed subpart until the final version is promulgated. Pending final promulgation the Department will not utilize those provisions in the proposed subpart which impose new, affirmative requirements on persons who desire that the Department not release mineral resource information. For example, § 2.22 which requires timely assertion of a claim of confidentiality and contains the consequences of failure to assert such a claim by marking the data and information at the time of submission, will not be relied upon to justify disclosure of mineral resource information over the objections of the submitter. Nor will the Department use the provisions of § 2.24 (d) which require a person to institute an action in court to obtain preliminary injunctive relief within 10 days after being informed that the Department has determined that a claim of confidentiality should be denied and the mineral resource information should be released.

As a matter of policy the Department will require the substantiation of a claim of confidentiality, and will require such substantiation to be furnished quickly in order to process initial determinations and appeals involving Freedom of Information Act requests. Likewise, the substantive criteria in § 2.25 for determining confidentiality of mineral resource information will be applied by the Department prior to final promulgation, as will the provisions in § 2.27 regarding disclosure in special circumstances.

Interested parties may participate in the proposed rulemaking by submitting comments and objections to the Office of the Solicitor, United States Department of the Interior, Washington, D.C. 20240. Comments received on or before February 24, 1977 will be considered before taking final action on the proposal.

W. W. LYONS,
Deputy Under Secretary of the Interior.

JANUARY 29, 1977.

It is proposed to revise 43 CFR Part 2 by redesignating existing subparts C, D and E as D, E, and F and by adding a new subpart C to read as follows:

Subpart C—Confidentiality of Mineral Resource Information

Sec.
2.20 Definitions.
2.21 Applicability of subpart; priority where provisions conflict.
2.22 Notice to be included in requests, demands, and forms; method of asserting confidentiality claim; effect of failure to assert claim at time of submission.
2.23 Initial action by bureaus.
2.24 Final confidentiality determinations.
2.25 Substantive criteria for use in confidentiality determinations.
2.26 Advance confidentiality determinations.
2.27 Disclosure in special circumstances.
2.28 Safeguarding of mineral resources information; penalty for wrongful disclosure.
2.30 Special rules governing certain information concerning coal obtained under the Mineral Leasing Act.

AUTHORITY: 5 U.S.C. 552.

Subpart C—Confidentiality of Mineral Resource Information

§ 2.20 Definitions.

For the purposes of this subpart: (a) "person" means an individual, partnership, corporation, association, or other public or private organization or legal entity, including Federal, State or local governmental bodies and agencies.

(b) "mineral resource data and information" means any geological and geophysical data and information, including maps, which may be used to calculate mineral reserves in place, drill hole data and information, core drilling analyses, geophysical data, processed and reprocessed geophysical information and interpreted geophysical information, and geological data and analyzed and interpreted geological information, and includes trade secrets and commercial or financial information concerning mineral resources, mining methods, mineral beneficiation and processing.

(c) "reasons of confidentiality" include the concept of trade secrecy and other related legal concepts which give or may give persons the right to preserve the confidentiality of mineral resource data and information and to limit its use or disclosure to or by others in order that they may obtain or retain competitive advantages they derive from their rights in the information.

(d) "confidentiality claim" means a claim or allegation that mineral resource data and information are entitled to confidential treatment or a request for a determination that such information is entitled to such treatment.

(e) "voluntary submitted information" means mineral resource data and information in the Department's possession: (1) the submission of which the Department had no statutory or contractual authority to require; and (2) the submission of which was not prescribed by statute or regulations as a condition for obtaining some benefit.

(f) "Bureau" means any constituent bureau or office of the Department of the Interior, including the Office of the Secretary and other Departmental offices.

§ 2.21 Applicability of subpart; priority where provisions conflict.

(a) Sections 2.20 through 2.28 establish basic rules governing confidentiality claims, the handling by the Department of all mineral resource data and information in its possession which are or may be entitled to confidential treatment, and determinations by the Department of whether information is entitled to confidential treatment.

(b) The Mineral Leasing Act of 1920, as amended, contains special provisions concerning the entitlement to confidential treatment of data and information relating to coal. Section 2.30 prescribes special rules relating to the treatment to be given certain categories of mineral resource data and information obtained by the Department under the Act's provisions.

(c) The basic rules of §§ 2.20 through 2.28 govern except to the extent that they are modified or supplanted by the special rules of § 2.30 respecting coal resources. In the event of a conflict between the provisions of the basic rules and those of a special rule respecting coal, the provision of the special rule shall govern.

(d) The subpart does not apply to questions concerning entitlement to confidential treatment of mineral resource information which concerns an individual solely in his personal, as opposed to his business capacity.

§ 2.22 Notice to be included in requests, demands, and forms; method of asserting confidentiality claim; effect of failure to assert claim at time of submission.

(a) *Notice.* Whenever an authorized representative of a bureau makes a written request or demand that a person furnish mineral resource data and information, which in the bureau's opinion, are likely to be regarded by the submitter as entitled to confidential treatment under this subpart, or whenever a bureau prescribes a form for use in furnishing such information, the request, demand or form shall include or enclose a notice which—

(1) States that the person may, if he desires, assert a confidentiality claim covering part or all of the data and information, in the manner prescribed in paragraph (b) of this section, and that data and information covered by such claim will be disclosed by the Department only to the extent and by means of the procedures set forth in this subpart; and

(2) States that if no such claim accompanies the data and information when they are received by the Depart-

ment, they may be made available to the public by the Department without further notice to the person.

(b) *Method of asserting claim.* A person submitting mineral resource data and information to the Department may assert a confidentiality claim by placing on (or attaching to) the data and information at the time of submission to the Department, a cover sheet, a stamped or typed legend, or other suitable form of notice employing language such as "trade secret," "proprietary," or "company confidential". Allegedly confidential portions of otherwise non-confidential documents should be clearly identified, and may be submitted separately to facilitate identification and handling. If confidential treatment is desired only until a certain date or the occurrence of a certain event, the notice should so state.

(c) *Failure to assert claim.* If information was submitted to a bureau, on or after the effective date of this subpart, in response to a request or demand (or on a prescribed Departmental form) which contained the substance of the notice required by paragraph (a) of this section, and if no confidentiality claim accompanied the data and information when they were received by the bureau, the notice to the submitter required by § 2.23(c)(1) need not be sent.

§ 2.23 Initial action by bureaus.

(a) *Situations requiring action.* This section prescribes the procedures to be followed by bureaus in making an initial determination of whether mineral resource data and information are entitled to confidential treatment. Actions shall be taken under this section whenever a bureau:

(1) receives a request under 5 U.S.C. 552 for the release of mineral resource data and information; in such a case the bureau shall issue an initial determination within the period of time specified in § 2.16 of this Part; or

(2) desires to determine whether mineral resource data and information are entitled to confidential treatment, even though no request for the release of the information has been received.

(b) *Confidentiality determinations.* Whenever a request for release of information under 5 U.S.C. 552 is received the bureau shall—

(1) first determine whether there has been a previous determination of confidentiality issued by the Office of the Solicitor acting under this subpart, or by a Federal court, holding that the data and information requested are entitled to confidential treatment. If such a determination has been made the bureau shall inform the requester that the request is denied; or

(2) if no previous determination of confidentiality has been made, examine the information and its records to determine whether an assertion of confidentiality has been made as provided in § 2.22(b). If a claim of confidentiality has been asserted the bureau shall take action under paragraph (c) of this section.

(c) *Preliminary determination.* Whenever action under this paragraph is required by paragraph (b)(ii) of this section the bureau shall make a determination with respect to the assertion of confidentiality governing the data and information involved. Such determination shall take into account the applicable substantive criteria in § 2.25 and any previously issued determinations which are applicable.

(1) If, in connection with any confidentiality claim, a bureau determines that the information may be entitled to confidential treatment, the bureau shall—

(i) send to the person asserting a claim of confidentiality concerning the information involved a written notice by certified mail (return receipt requested) stating that a request for the information has been received under 5 U.S.C. § 552; that the bureau is determining under this subpart whether the information is entitled to confidential treatment, and according the person 15 working days from receipt of the written notice within which to send any comments or objections. The notice shall specify that information may be disclosed without further notice if comments are not received within the 15 day period;

(ii) inform the person whose request for release of the information is pending under 5 U.S.C. 552 that the information requested may be entitled to confidential treatment under this subpart and 5 U.S.C. § 552(b)(4) and/or (b)(9); that further inquiry by the Department is necessary before a final determination on the request can be issued; that the request is therefore initially denied, and that after further inquiry a final determination will be issued by the Office of the Solicitor; and

(iii) refer the matter to the appropriate legal office of the Office of the Solicitor.

(2) The written notice required by paragraph (c)(1)(i) of this section shall in addition invite comments on the following points:

(a) the portions of the information which are alleged to be entitled to confidential treatment;

(b) the period of time for which confidential treatment is desired (e.g., until a certain date, until the occurrence of a specified event, or permanently);

(c) the purpose for which the information was furnished to the Department and the approximate date of submission, if known;

(d) measures taken to guard against undesired disclosure of the information to others;

(e) the extent to which the information has been disclosed to others; and the precautions taken in connection therewith;

(f) whether the person asserts that disclosure of the information requested would be likely to result in substantial harmful effects on his competitive position, and if so, what those harmful effects would be, why they should be viewed as substantial, and an explanation of the causal relationship between disclosure and such harmful effects; and

(g) whether the information is voluntarily submitted as defined in § 2.20(e), and if so, whether and why disclosure of the information would tend to lessen the availability of the information in the future.

§ 2.24 Final confidentiality determinations.

(a) The appropriate legal office of the Office of the Solicitor (see subparagraphs (d)(1)(i), (ii), and (iii) of this section) is responsible for making the final administrative determination of whether or not mineral resource information covered by a confidentiality claim is entitled to confidential treatment under this subpart.

(1) Whenever a request under 5 U.S.C. § 552 involves records located in field installations the regional solicitor providing legal services for such installation shall make the final determination.

(2) Whenever a request under 5 U.S.C. 552 involves records located at the headquarters installation of a bureau the associate solicitor providing legal services for such bureau shall make the final determination.

(3) Advance confidentiality determinations under § 2.25 shall be made by the appropriate associate solicitor.

(b) *Comment period; extensions; untimeliness as waiver of claim.*

(1) Any person who has been furnished the notice to comment prescribed by § 2.23(c)(1) shall furnish his comments to the office specified in the notice in a manner calculated to result in receipt of such comments no later than the date specified for receipt in the notice.

(2) The period for submission of comments may be extended if a request for an extension is made and approved by the appropriate office of the Solicitor. Requests for extension will not be approved except in extraordinary circumstances without the consent of the person whose request for release of information under 5 U.S.C. 552 is pending.

(3) If no comments are received within the time specified, in the notice, or within an extended comment period; a claim of confidentiality shall be deemed to be waived and the information shall be considered to be available to the public.

(c) *Determination that information is entitled to confidential treatment.* If the Office of the Solicitor determines that the information involved is entitled to confidential treatment for the full period requested by the person who made the claim, the Department will maintain the information in confidence for such period, subject to disclosure in special circumstances as prescribed in § 2.27 of this subpart.

(d) *Determination that information is not entitled to confidential treatment; notice, waiting period; release of information.* (1) If the Office of the Solicitor determines that a claim of confidentiality should be denied in whole or in part a written notice of denial shall be sent to the person asserting the claim. The notice of denial shall state: (i) The basis for the denial;

(ii) That the denial constitutes final Departmental action concerning the confidentiality claim;

(iii) That the Department will make the information available to the public on the tenth working day after the person's receipt of the written notice unless the Office of the Solicitor has been notified of the commencement of an action in a Federal court to obtain judicial review of the determination and to obtain preliminary injunctive relief against disclosure;

(iv) That the Department may make the information available to the public if the Federal court has denied a motion for a preliminary injunction or has upheld the Department's determination, or whenever the Office of the Solicitor, after reasonable notice, determines that appropriate measures are not being taken to obtain a speedy resolution of the action; and

(v) That the information will not be released to the public prior to the end of the period of temporary entitlement to confidential treatment.

(2) The period of time within which an action to obtain judicial review of a decision denying confidential treatment may be extended if a request for extension is received before the expiration and is approved by the Office of the Solicitor. Extensions will not be approved except in extraordinary circumstances without the consent of any person who has requested release of the information pursuant to 5 U.S.C. 552.

§ 2.25 Substantive criteria for use in confidentiality determinations.

Mineral resource information shall be determined to be entitled to confidential treatment if—

(a) A claim of confidentiality has been asserted which has neither expired by its terms, nor has been waived nor withdrawn;

(b) It has been shown that the person supplying the information to the Department has taken reasonable measures to protect the confidentiality of the information, and that such measures will be continued;

(c) The information is not, and has not been, reasonably obtainable without the person's consent by other persons (other than governmental bodies) by use of legitimate means other than discovery based on a showing of special need in a judicial or quasi-judicial proceeding;

(d) There is no statute specifically requiring disclosure of the information; and

(e) Either—

(1) It has been satisfactorily shown that disclosure of the information is likely to cause substantial harm to a person's competitive position; or

(2) The information is voluntarily submitted information and its disclosure would be likely to seriously impair the Government's ability to obtain the information in the future.

§ 2.26 Advance confidentiality determinations.

(a) An advance determination under this section may be issued by the Office of the Solicitor if—

(1) The Department has requested, or proposes to request that mineral resource information be furnished to it;

(2) There is reason to believe persons required to submit the information will assert that the information if submitted would constitute voluntarily submitted information under § 2.20(e);

(3) There is reason to believe that persons will vountarily submit the information for use by the Department only if the Department first determines that the information is entitled to confidential treatment under this subpart; and

(4) The bureau which desires submission of the information has requested that the Office of the Solicitor issue a determination under this section.

(b) If the Office of the Solicitor determines that the information involved would constitute voluntarily submitted information and that it is entitled to confidential treatment, a notice of such determination shall be published in the FEDERAL REGISTER which describes the information involved, the basis for the conclusion that the information is entitled to confidential treatment, and states that such information will not be released to the public unless or until such time as the determination is modified or revoked.

§ 2.27 Disclosure in special circumstances.

(a) *General.* Mineral resource information which under this subpart is not available to the public may be disclosed to the persons in the manner, and under the circumstances described in this section.

(b) *Disclosure to Congress or the Comptroller General.* Upon receipt of a written request the Department will disclose mineral resource information to either House of Congress, to a committee or subcommittee of Congress, or to the Comptroller General, unless a statute forbids such disclosure. Whenever such disclosure is made the Department will inform the requester of any unresolved claims of confidentiality, and any determination that the information is entitled to confidential treatment.

(c) *Disclosure to other Federal or State agencies.* The Department may disclose mineral resource information to Federal or State agencies if—

(1) It is required by Federal law to disclose such information; or

(2) It receives a written request for disclosure from a duly authorized officer or employee of such agency;

(3) The written request describes the official purpose for which the information is needed;

(4) The requesting agency agrees not to disclose further unless—

(i) The other agency has obtained the consent of the affected person to the proposed disclosure; or

(ii) The other agency has received a written statement from the Solicitor agreeing to the proposed disclosure.

(d) *Court-ordered disclosure.* The Department shall disclose any mineral resource information when so ordered by a Federal court.

(e) *Disclosure within the Department.* A Department office, officer, or employee may disclose any mineral resource information to another Department office, officer, or employee with an official need for the information.

(f) *Disclosure with consent.* Mineral resource information subject to confidential treatment may be disclosed whenever the Department obtains prior consent of each affected person.

§ 2.28 Safeguarding of mineral resource information; penalty for wrongful disclosure.

(a) No Department officer or employee may disclose, or use for his private gain or advantage, any mineral resource information in his possession, or to which he gained access, by virtue of his official position or employment, except as authorized by this subpart.

(b) Department officers or employees who have custody or possession of mineral resource information shall take appropriate measures to protect such information from improper disclosure.

(c) Violation of paragraphs (a) and (b) of this section shall constitute grounds for dismissal, suspension, fine, or other adverse personnel action. Willful violations of paragraph (a) may result in criminal prosecution under 18 U.S.C. 1905 or other applicable statutes.

(d) Each contractor with the Department or any subcontractor of such contractor, and each employee of the contractor or subcontractor, who is furnished mineral resource information by the Department shall use or disclose such information only as permitted by the contract under which the information was furnished. Any violation of this paragraph shall constitute grounds for debarment or suspension of the contractor or subcontractor or the contractors or subcontractor's employee in question. Willful violation of this paragraph may result in criminal prosecution.

§ 2.30 Special rules governing certain information concerning coal obtained under the Mineral Leasing Act.

(a) *Definitions.* As used in this § 2.30:

(1) "Act" means the Mineral Leasing Act of February 25, 1920, as amended by the Act of August 4, 1976, P.L. 94-377 (30 U.S.C. § 181 et seq).

(2) "Exploration license" means a license issued by the Secretary of the Interior to conduct coal exploration operations on lands subject to the Act pursuant to the authority in section 2(b) of the Act, as amended (30 U.S.C. 201 (b)).

(3) "Fair market value of coal to be leased" means the fair market value of coal as determined by the Secretary of the Interior underlying leasing tracts offered in general lease sales or reserved

and offered for lease to public bodies, including Federal agencies, rural electric cooperatives, or non-profit corporations controlled by any of such entities, pursuant to section 2(a) of the Act (30 U.S.C. 201(a)(1)).

(b) *Applicability.* (1) This section applies to the following categories of mineral resource information—

(i) *Category A.* Information and data provided to or obtained by a bureau under section 2(b)(3) of the Act by the holder of a coal exploration license.

(ii) *Category B.* Information and data purchased by a bureau from commercial or other sources pursuant to section 8A (b) of the Act, and information and data developed by the United States Geological Survey under an exploratory program authorized by Section 8A of the Act;

(iii) *Category C.* Information and data obtained from commercial sources while not under contract with the United States Government;

(iv) *Category D.* Information and data provided to the Secretary by a Federal department or agency pursuant to section 8A(e) of the Act; and

(v) *Category E.* The fair market value of coal to be leased and comments received by the Secretary with respect to such value.

(c) *Availability of data and information.* Information obtained by the Department from various sources shall be made available to the public as follows—

(1) *Category A—Information.* All coal data and information in Category A furnished to the Secretary by the holder of an exploration license under Section 2(b)(3) of the Act shall not be disclosed to the public until after the areas to which the data and information pertains have been leased by the Department, or until the Secretary determines that release of the information to the public would not damage the competitive position of the licensee, whichever comes first.

(2) *Category B—Information.* Mineral resource data and information in Category B purchased by a bureau from commercial or other sources shall be made available to the public in accordance with the terms and conditions of the contract or purchase agreement.

(3) *Category C—Information.* Confidential and proprietary data and mineral resource information in Category C purchased from commercial sources not under contract with the United States Government shall not be made available to the public until after the areas to which the information and data pertain have been leased by the Department.

(4) *Category D—Information.* Confidential and proprietary mineral resource data and information in Category D obtained pursuant to section 8A(e) of the Act shall be made available to the public under the terms and conditions agreed to by the head of the department or agency from whom the information is requested.

(5) *Category E—Information.* Category E shall not be made public until the lands have been leased.

Bureau of Land Management

[43 CFR Part 4700]

RANGE MANAGEMENT

Wild Free-Roaming Horse and Burro Management

This proposed rulemaking amends 43 CFR Part 4700, "Wild Free-Roaming Horse and Burro Protection, Management, and Control," to implement section 9 of the Wild Free-Roaming Horse and Burro Act (16 U.S.C. 1331–1340) as provided by section 404 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701). This amendment to the Wild Free-Roaming Horse and Burro Act authorizes the use of helicopters or, for the purpose of transporting captured animals, motor vehicles in administering the provisions of the Wild Free-Roaming Horse and Burro Act, as amended (16 U.S.C. 1331-1340). The provision also directs that the use of helicopters and motor vehicles be undertaken (1) in accordance with humane procedures prescribed by the Secretaries of the Interior and Agriculture, (2) under the direct supervision of the appropriate Secretary or a duly authorized officer or employee of their Departments, and (3) only after a public hearing.

This proposed rulemaking establishes the procedures to be used in carrying out the amendment to the Wild Free-Roaming Horse and Burro Act by:

1. Amending the authority section (§ 4700.0–3) to reflect the amendment to the Act of December 15, 1971 (16 U.S.C. 1331–1340).

2. Defining the terms "the Act," "malicious harassment," "captured animal," and "humane procedures."

3. Revising § 4720.2, "Claimed Animals," to exclude the use of helicopters for the gathering operations of claimed animals.

4. Establishing procedures for using fixed-wing aircraft, helicopters, and motor vehicles in management operations.

5. Establishing humane procedures for the use of helicopters and motor vehicles.
